Special: Diet and prostate cancer

Guest Editors: Andy H. Lee and Colin W. Binns

Editorial

Diet and prostate cancer: Evidence from epidemiological studies

Andy H. Lee and Colin W. Binns 169

Review

International epidemiology of prostate cancer: Geographical distribution and secular trends

Peter D. Baade, Danny R. Youlden and Lauren J. Krnjacki 171

Research Article

Exploratory correlations of dietary nutrients with prostate cancer mortality using over two decades of observations in Korea

Hyun Kyung Moon, Chae Yoon Kim and Seung Wook Lee 185

Review

Traditional Japanese diet and prostate cancer

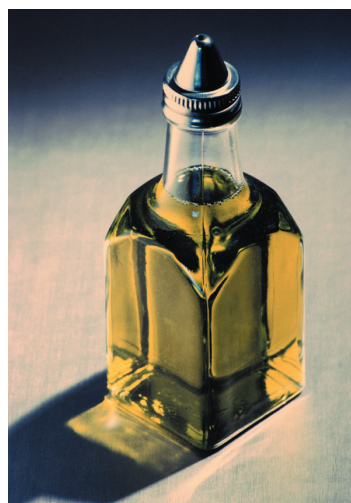

Mitsuru Mori, Naoya Masumori, Fumimasa Fukuta, Yoshie Nagata, Tomoko Sonoda, Fumio Sakauchi, Hirofumi Ohnishi, Masanori Nojima and Taiji Tsukamoto 191

Review

Prostate cancer and vegetable consumption

Ruth Chan, Kris Lok and Jean Woo 201

Review

Soy, isoflavones, and prostate cancer

Le Jian 217

Review

Can the Mediterranean diet prevent prostate cancer?

Catherine Itsiopoulos, Allison Hodge and Mary Kaimakamis 227

Review

Alcohol use and prostate cancer: A meta-analysis

Kaye Middleton Fillmore, Tanya Chikritzhs, Tim Stockwell, Alan Bostrom and Richard Pascal 240

Supporting information see www.mnf-journal.com

Review**Tea, Coffee and Prostate Cancer**

Andy H. Lee, Michelle L. Fraser and Colin W. Binns 256

**Regular****Research Article**

Oligomeric procyanidins inhibit cell migration and modulate the expression of migration and proliferation associated genes in human umbilical vascular endothelial cells

María-Teresa García-Conesa, Sandra Tribolo, Sylvain Guyot, Francisco A. Tomás-Barberán and Paul A. Kroon 266

Supporting information see www.mnf-journal.com

Research Article

Gastrointestinal absorption and metabolism of soy isoflavonoids in ileal-cannulated swine

Kelly R. Walsh, Sara J. Haak, Nathan D. Fastinger, Torsten Bohn, Qingguo Tian, Donald C. Mahan, Steven J. Schwartz and Mark L. Failla 277

Research Article

Characterization of high molecular weight coffee fractions and their fermentation by human intestinal microbiota

Nicole Reichardt, Diana Gniechewitz, Hans Steinhart, Mirko Bunzel and Michael Blaut 287

**Research Article**

The citrus fruit flavonoid naringenin suppresses hepatic glucose production from Fao hepatoma cells

Aparna Purushotham, Min Tian and Martha. A. Belury 300

Letter to the Editor

Increasing the solubility of the nutraceutical curcumin by heat and inhibition of oxidative modification

Biji T. Kurien and R. Hal Scofield 308

Erratum 309

Retraction 309
