Editorial

Dieter Schrenk 1209

Research Article

The Ussing type chamber model to study the intestinal transport and modulation of specific tight-junction genes using a colonic cell line

Hannah Bergmann, Dorothee Rogoll, Wolfgang Scheppach, Ralph Melcher, Elke Richling 1211

Research Article

Formation of hydrogen peroxide in cell culture media by apple polyphenols and its effect on antioxidant biomarkers in the colon cell line HT-29

Phillip Bellion, Melanie Olk, Frank Will, Helmut Dietrich, Matthias Baum, Gerhard Eisenbrand and Christine Janzowski 1226

Research Article

Identification of 3-hydroxy- β -damascone and related carotenoid-derived aroma compounds as novel potent inducers of Nrf2-mediated phase 2 response with concomitant anti-inflammatory activity

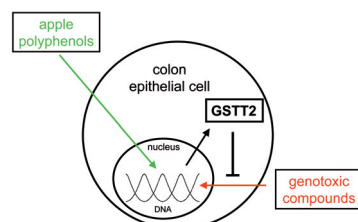

Clarissa Gerhäuser, Karin Klimo, Wolfgang Hümmer, Jana Hölzer, Astrid Petermann, Antonio Garreta-Rufas, Frank-D. Böhmer and Peter Schreier 1237

Research Article

GSTT2, a phase II gene induced by apple polyphenols, protects colon epithelial cells against genotoxic damage

Astrid Petermann, Claudia Miene, Gabriele Schulz-Raffelt, Katja Palige, Jana Hölzer, Michael Gleis, Frank-D. Böhmer 1245

Research Article

Impact of apple polyphenols on GSTT2 gene expression, subsequent protection of DNA and modulation of proliferation using LT97 human colon adenoma cells

Claudia Miene, Stefanie Klenow, Selvaraju Veeriah, Elke Richling and Michael Gleis 1254

Research Article**Influence of apple polyphenols on inflammatory gene expression***Mathias Jung, Sven Triebel, Timm Anke, Elke Richling and Gerhard Erkel*

... 1263

Review**Dietary fiber, low-molecular-weight food constituents and colo-rectal inflammation in animal models – A review***Dieter Schrenk*

... 1281

Review**Prevention of colon carcinogenesis by apple juice *in vivo*: Impact of juice constituents and obesity***Tatiana C. L. Koch, Karlis Briviba, Bernhard Watzl, Christine Fährdrich, Achim Bub, Gerhard Rechkemmer and Stephan W. Barth*

... 1289

Regular

Review**The complex links between dietary phytochemicals and human health deciphered by metabolomics***Claudine Manach, Jane Hubert, Rafael Llorach and Augustin Scalbert*

... 1303

Research Article**Curcumin reduces oxidative and nitrative DNA damage through balancing of oxidant–antioxidant status in hamsters infected with *Opisthorchis viverrini****Somchai Pinlaor, Puangrat Yongvanit, Suksanti Prakobwong, Butsara Kaewsamut, Jarinya Khoontawad, Porntip Pinlaor and Yusuke Hiraku*

1316

Research Article**High sensitivity detection of the glial fibrillary acidic protein as indicator for TSE risk material in meat products using an immuno-PCR***Thorsten Kuczius, Karsten Becker, Helge Karch, and Wenlan Zhang* 1329**Research Article****Incorporation and metabolism of punicic acid in healthy young humans***Gaofeng Yuan, Andrew J. Sinclair, Chaojiong Xu and Duo Li* 1336**Research Article****Oat β -glucan increases postprandial cholecystokinin levels, decreases insulin response and extends subjective satiety in overweight subjects***Eleanor J. Beck, Susan M. Tosh, Marijka J. Batterham, Linda C. Tapsell and Xu-Feng Huang* 1343**Erratum** 1352
