

Erratum

Extrusion cooking with glucose supplementation of fumonisin-contaminated corn grits protects against nephrotoxicity and disrupted sphingolipid metabolism in rats.

By Kenneth A. Voss et al., *Mol. Nutr. Food Res.* 2011, vol. 55, issue S2, pp. S312–S320

DOI: 10.1002/mnfr.201100067

In Section 3.6 of the Results, the superscript in the top panel of Fig. 1 (group mean histopathology scores for severity of lesions consistent with fumonisin exposure at week 8) for the group designated “Uncooked” should read “a A” not “ab A”.

In Section 3.6 of the Results, the number of animals per group in the Batch-2 series having nephropathy are given for “week 3 and week 8” not “week 3 and week 6”.
