

Announcement

The first Florida Colloquium on Molecular Biology which will be held March 13 and 14 at the University of Florida, Gainesville, Florida, will deal with *Chromosomal Proteins and Their Role in the Regulation of Gene Expression*. An opportunity is available for attendance by individuals who have an interest in this exciting area of molecular biology. However, participation will be limited so that an informal atmosphere and high degree of interaction can be maintained.

Those interested in attending the colloquium should inquire by December 20 to:

Florida Colloquium on Molecular Biology
Department of Biochemistry
University of Florida
Gainesville, Florida 32610

Proceedings of the colloquium will be published by Academic Press as a monograph entitled, "Chromosomal Proteins and Their Role in the Regulation of Gene Expression."

Errata

In the paper by Yoda and Yoda, "Influence of Certain Ligands on the Dissociation Rate Constants of Cardiac Glycoside Complexes with Sodium- and Potassium-Dependent Adenosine Triphosphatase," Vol. 10, No. 5, September 1974, line 9 of MATERIALS AND METHODS (p. 811) should read:

Enzyme complex, the enzyme suspension was diluted to stop the association . . .
Line 21 on p. 814 should read:

50 mM NaCl instead of 50 mM CaCl.
