ISSN 0026-895X

## PERSPECTIVE

- Seven Transmembrane Receptors as Nature's Prototype Allosteric Protein: De-emphasizing the Geography of Binding   
*Terry P. Kenakin*

541

## ACCELERATED COMMUNICATION

-  Ligand-Dependent Oligomerization of Dopamine D<sub>2</sub> and Adenosine A<sub>2A</sub> Receptors in Living Neuronal Cells  
*Pierre-Alexandre Vidi, Benjamin R. Chemel, Chang-Deng Hu, and Val J. Watts*

544

## ARTICLES

- Mutational Analysis of the Conserved Asp<sup>2.50</sup> and ERY Motif Reveals Signaling Bias of the Urotensin II Receptor  
*Christophe D. Proulx, Brian J. Holleran, Antony A. Boucard, Emanuel Escher, Gaétan Guillemette, and Richard Leduc* 552
-  Different Internalization Properties of the  $\alpha$ 1a- and  $\alpha$ 1b-Adrenergic Receptor Subtypes: The Potential Role of Receptor Interaction with  $\beta$ -Arrestins and AP50  
*Laura Stanasila, Liliane Abuin, Julien Dey, and Susanna Cotecchia* 562
- Effects of Active and Inactive Phospholipase D2 on Signal Transduction, Adhesion, Migration, Invasion, and Metastasis in EL4 Lymphoma Cells  
*Stewart M. Knoepp, Manpreet S. Chahal, Yuhuan Xie, Zhihong Zhang, Daniel J. Brauner, Mark A. Hallman, Stephanie A. Robinson, Shujie Han, Masaki Imai, Stephen Tomlinson, and Kathryn E. Meier* 574
- Pharmacological Characterization of Membrane-Expressed Human Trace Amine-Associated Receptor 1 (TAAR1) by a Bioluminescence Resonance Energy Transfer cAMP Biosensor  
*Larry S. Barak, Ali Salahpour, Xiaodong Zhang, Bernard Masri, Tatyana D. Sotnikova, Amy J. Ramsey, Jonathan D. Violin, Robert J. Lefkowitz, Marc G. Caron, and Raul R. Gainetdinov* 585

The  symbols in the table of contents identify articles discussed in the *Perspective*.

*Molecular Pharmacology* (ISSN 0026-895X) is published monthly (two volumes per year beginning in January and July) by the American Society for Pharmacology and Experimental Therapeutics, 9650 Rockville Pike, Bethesda, MD 20814-3995; e-mail: [info@aspet.org](mailto:info@aspet.org); Web site: <http://www.aspet.org>. Periodicals postage paid at Bethesda, MD and at additional mailing offices. POSTMASTER: Send address changes to *Molecular Pharmacology*, 9650 Rockville Pike, Bethesda, MD 20814-3995. Subscription rates: U.S.: \$647.00 for institutions and \$264.00 for non-ASPET members. Outside the U.S.: \$734.00 for institutions and \$351.00 for non-ASPET members. Single copy:

|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Midazolam Reverses Salicylate-Induced Changes in Brain-Derived Neurotrophic Factor and Arg3.1 Expression: Implications for Tinnitus Perception and Auditory Plasticity<br><i>Rama Panford-Walsh, Wibke Singer, Lukas Rüttiger, Saida Hadjab, Justin Tan, Hyun-Soon Geisler, Ulrike Zimmermann, Iris Köpschall, Karin Rohbock, Anna Vieljans, Elmar Oestreicher, and Marlies Knipper</i> | 595 |
| Ligand-Receptor Interactions at the Parathyroid Hormone Receptors: Subtype Binding Selectivity Is Mediated via an Interaction between Residue 23 on the Ligand and Residue 41 on the Receptor<br><i>Rosalind Mann, Mark J. Wigglesworth, and Dan Donnelly</i>                                                                                                                           | 605 |
| Mutations of the GABA-A Receptor $\alpha 1$ Subunit M1 Domain Reveal Unexpected Complexity for Modulation by Neuroactive Steroids<br><i>Gustav Akk, Ping Li, John Bracamontes, David E. Reichert, Douglas F. Covey, and Joe Henry Steinbach</i>                                                                                                                                         | 614 |
| § Ethanol Modulates BK <sub>Ca</sub> Channels by Acting as an Adjuvant of Calcium<br><i>Jianxi Liu, Thirumalini Vaithianathan, Kandiah Manivannan, Abby Parrill, and Alejandro M. Dopico</i>                                                                                                                                                                                            | 628 |
| A Peptide Accelerating the Conversion of Plasminogen Activator Inhibitor-1 to an Inactive Latent State<br><i>Lisa Mathiasen, Daniel M. Dupont, Anni Christensen, Grant E. Blouse, Jan K. Jensen, Ann Gils, Paul J. Declerck, Troels Wind, and Peter A. Andreasen</i>                                                                                                                    | 641 |
| § Inhibition of I $\kappa$ B Kinase-Nuclear Factor- $\kappa$ B Signaling Pathway by 3,5-Bis(2-fluorobenzylidene)piperidin-4-one (EF24), a Novel Monoketone Analog of Curcumin<br><i>Andrea L. Kasinski, Yuhong Du, Shala L. Thomas, Jing Zhao, Shi-Yong Sun, Fadlo R. Khuri, Cun-Yu Wang, Mamoru Shoji, Aiming Sun, James P. Snyder, Dennis Liotta, and Haian Fu</i>                    | 654 |
| § Computational Discovery of Novel Low Micromolar Human Pregnane X Receptor Antagonists<br><i>Sean Ekins, Vladyslav Kholodovych, Ni Ai, Michael Sinz, Joseph Gal, Lajos Gera, William J. Welsh, Kenneth Bachmann, and Sridhar Mani</i>                                                                                                                                                  | 662 |
| Caffeine Stimulates Cytochrome Oxidase Expression and Activity in the Striatum in a Sexually Dimorphic Manner<br><i>Frederick S. Jones, Jie Jing, Anthony H. Stonehouse, Anthony Stevens, and Gerald M. Edelman</i>                                                                                                                                                                     | 673 |
| Activation of the A <sub>3</sub> Adenosine Receptor Suppresses Superoxide Production and Chemotaxis of Mouse Bone Marrow Neutrophils<br><i>Dharini van der Hoeven, Tina C. Wan, and John A. Auchampach</i>                                                                                                                                                                              | 685 |
| Elevated Glutathione Levels Confer Cellular Sensitization to Cisplatin Toxicity by Up-Regulation of Copper Transporter hCtr1<br><i>Helen H. W. Chen, Im-Sook Song, Anwar Hossain, Min-Koo Choi, Yoshiaki Yamane, Zheng D. Liang, Jia Lu, Lily Y.-H. Wu, Zahid H. Siddik, Leo W. J. Klomp, Niramol Savaraj, and Macus Tien Kuo</i>                                                       | 697 |
| Transcription Factor Sp1 Plays an Important Role in the Regulation of Copper Homeostasis in Mammalian Cells<br><i>Im-Sook Song, Helen H. W. Chen, Isamu Aiba, Anwar Hossain, Zheng D. Liang, Leo W. J. Klomp, and Macus Tien Kuo</i>                                                                                                                                                    | 705 |
| Effect of Pregnancy on Cytochrome P450 3a and P-Glycoprotein Expression and Activity in the Mouse: Mechanisms, Tissue Specificity, and Time Course<br><i>Huixia Zhang, Xiaohui Wu, Honggang Wang, Andrei M. Mikheev, Qingcheng Mao, and Jashvant D. Unadkat</i>                                                                                                                         | 714 |
| § Overcoming S-Phase Checkpoint-Mediated Resistance: Sequence-Dependent Synergy of Gemcitabine and 7-Ethyl-10-hydroxycamptothecin (SN-38) in Human Carcinoma Cell Lines<br><i>Marina Gálvez-Peralta, Nga T. Dai, David A. Loegering, Karen S. Flatten, Stephanie L. Safgren, Jill M. Wagner, Matthew M. Ames, Larry M. Karnitz, and Scott H. Kaufmann</i>                               | 724 |

|                                                                                                                                                                                                                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Sulfonylurea Receptor-Dependent and -Independent Pathways Mediate Vasodilation Induced by ATP-Sensitive K <sup>+</sup> Channel Openers<br><i>Adebawale Adebisi, Elizabeth M. McNally, and Jonathan H. Jaggar</i>                                                                                                                                             | 736 |
| Novel Polymorphic Human UDP-glucuronosyltransferase 2A3: Cloning, Functional Characterization of Enzyme Variants, Comparative Tissue Expression, and Gene Induction<br><i>Michael H. Court, Suwagmani Hazarika, Soundararajan Krishnaswamy, Moshe Finel, and J. Andrew Williams</i>                                                                          | 744 |
| Aging-Resistant Organophosphate Bioscavenger Based on Polyethylene Glycol-Conjugated F338A Human Acetylcholinesterase<br><i>Ohad Mazar, Ofer Cohen, Chanoch Kronman, Lily Raveh, Dana Stein, Arie Ordentlich, and Avigdor Shafferman</i>                                                                                                                     | 755 |
| Activation and Block of the Adult Muscle-Type Nicotinic Receptor by Physostigmine: Single-Channel Studies<br><i>Julius Militante, Bei-Wen Ma, Gustav Akk, and Joe Henry Steinbach</i>                                                                                                                                                                        | 764 |
| Knockout Mice Reveal a Role for P2Y <sub>6</sub> Receptor in Macrophages, Endothelial Cells, and Vascular Smooth Muscle Cells<br><i>Isabelle Bar, Pieter-Jan Guns, Jessica Metallo, Dorothée Cammarata, Françoise Wilkin, Jean-Marie Boeynants, Hidde Bult, and Bernard Robaye</i>                                                                           | 777 |
| Direct Modulation of P2X <sub>1</sub> Receptor-Channels by the Lipid Phosphatidylinositol 4,5-Bisphosphate<br><i>Louis-Philippe Bernier, Ariel R. Ase, Xinkang Tong, Edith Hamel, Dominique Blais, Qi Zhao, Diomedes E. Logothetis, and Philippe Séguéla</i>                                                                                                 | 785 |
| ☐ Erlotinib Induces Mitochondrial-Mediated Apoptosis in Human H3255 Non-Small-Cell Lung Cancer Cells with Epidermal Growth Factor Receptor <sup>L858R</sup> Mutation through Mitochondrial Oxidative Phosphorylation-Dependent Activation of BAX and BAK<br><i>Yi-He Ling, Ruoping Lin, and Roman Perez-Soler</i>                                            | 793 |
| ☐ Lapatinib Resistance in HCT116 Cells Is Mediated by Elevated MCL-1 Expression and Decreased BAK Activation and Not by ERBB Receptor Kinase Mutation<br><i>Aditi Pandya Martin, Anna Miller, Luni Emad, Mohammed Rahmani, Teneille Walker, Clint Mitchell, Michael P. Hagan, Margaret A. Park, Adly Yacoub, Paul B. Fisher, Steven Grant, and Paul Dent</i> | 807 |
| Elevated GSH Level Increases Cadmium Resistance through Down-Regulation of Sp1-Dependent Expression of the Cadmium Transporter ZIP8<br><i>Isamu Aiba, Anwar Hossain, and Macus Tien Kuo</i>                                                                                                                                                                  | 823 |
| ☐ Binding of Orthosteric Ligands to the Allosteric Site of the M <sub>2</sub> Muscarinic Cholinergic Receptor<br><i>Dar'ya S. Redka, Luca F. Pisterzi, and James W. Wells</i>                                                                                                                                                                                | 834 |
| Long-Term Nicotine Treatment Differentially Regulates Striatal $\alpha 6\alpha 4\beta 2^*$ and $\alpha 6(\text{Non}\alpha 4)\beta 2^*$ nAChR Expression and Function<br><i>Xiomara A. Perez, Tanuja Bordia, J. Michael McIntosh, Sharon R. Grady, and Maryka Quik</i>                                                                                        | 844 |
| The Proton-Coupled Folate Transporter: Impact on Pemetrexed Transport and on Antifolates Activities Compared with the Reduced Folate Carrier<br><i>Rongbao Zhao, Andong Qiu, Eugenia Tsai, Michaela Jansen, Myles H. Akabas, and I. David Goldman</i>                                                                                                        | 854 |
| MLH1 Deficiency Enhances Radiosensitization with 5-Fluorodeoxyuridine by Increasing DNA Mismatches<br><i>Sheryl A. Flanagan, Christina M. Krokosky, Sudha Mannava, Mikhail A. Nikiforov, and Donna S. Shewach</i>                                                                                                                                            | 863 |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Combinatorial Antileukemic Disruption of Oxidative Homeostasis and Mitochondrial Stability by the Redox Reactive Thalidomide 2-(2,4-Difluoro-phenyl)-4,5,6,7-tetrafluoro-1 <i>H</i> -isoindole-1,3(2 <i>H</i> )-dione (CPS49) and Flavopiridol<br><i>Yun Ge, Jung S. Byun, Paola De Luca, Geraldine Gueron, Idalia M. Yabe, Sara G. Sadiq-Ali, William D. Figg, Jesse Quintero, Cynthia M. Haggerty, Quentin Q. Li, Adriana De Siervi, and Kevin Gardner</i> | 872 |
| Proapoptotic Activity and Chemosensitizing Effect of the Novel Akt Inhibitor (2 <i>S</i> )-1-(1 <i>H</i> -Indol-3-yl)-3-[5-(3-methyl-2 <i>H</i> -indazol-5-yl)pyridin-3-yl]oxypropan-2-amine (A443654) in T-Cell Acute Lymphoblastic Leukemia<br><i>Federica Falà, William L. Blalock, Pier Luigi Tazzari, Alessandra Cappellini, Francesca Chiarini, Giovanni Martinelli, Agostino Tafuri, James A. McCubrey, Lucio Cocco, and Alberto M. Martelli</i>      | 884 |
| Local Not Systemic Modulation of Dendritic Cell S1P Receptors in Lung Blunts Virus-Specific Immune Responses to Influenza<br><i>David Marsolaïs, Bumsuk Hahm, Kurt H. Edelmann, Kevin B. Walsh, Miguel Guerrero, Yasuko Hatta, Yoshihiro Kawaoka, Edward Roberts, Michael B. A. Oldstone, and Hugh Rosen</i>                                                                                                                                                 | 896 |
| Alternative Splicing of the Ca <sup>2+</sup> Channel $\beta$ 4 Subunit Confers Specificity for Gabapentin Inhibition of Ca <sub>v</sub> 2.1 Trafficking<br><i>Patrice M. Mich and William A. Horne</i>                                                                                                                                                                                                                                                       | 904 |
| Nuclear Receptor Coactivator 6 Mediates the Synergistic Activation of Human Cytochrome P-450 2C9 by the Constitutive Androstane Receptor and Hepatic Nuclear Factor-4 $\alpha$<br><i>Sailesh Surapureddi, Ritu Rana, Janardan K. Reddy, and Joyce A. Goldstein</i>                                                                                                                                                                                           | 913 |
| <b>ERRATA</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                |     |
| Correction to “Fluvastatin Synergistically Improves the Antiproliferative Effect of Everolimus on Rat Smooth Muscle Cells by Altering p27 <sup>Kip1</sup> /Cyclin E Expression”                                                                                                                                                                                                                                                                              | 924 |
| Correction to “ <i>Slc39a14</i> Gene Encodes ZIP14, A Metal/Bicarbonate Symporter: Similarities to the ZIP8 Transporter”                                                                                                                                                                                                                                                                                                                                     | 924 |
