GUEST EDITORIAL

11th Japanese Symposium on Molecular Simulation

This issue of *Molecular Simulation* contains selected papers presented at 11th Symposium on Molecular Simulation of Japan, held at Kurashiki, Japan from December 11 to 13, 1997. This symposium has been held annually since 1987 and is the core meeting for the molecular simulation community in Japan. A permanent organization to unite this community has been longed for. During this symposium, the Molecular Simulation Society of Japan was founded and Yasuaki Hiwatari (Kanazawa University) was elected to the chairman. The Society will extend its activity not only in research but in collaboration with industry and in organizing seminars. The symposium will be continued as Annual Meeting of Molecular Simulation Society of Japan.

The 11th symposium was organized by Professor Koichiro Nakanishi (Kurashiki University of Science and the Arts) and 46 oral and 50 poster papers were presented. Twelve papers are collected in this issue.

We would like to thank all those who have made the symposium possible. We are also grateful for co-operation of the authors and Professor Quirke, Editor in Chief.
