GUEST EDITORIAL

This issue of Molecular Simulation contains invited papers presented at the Second Materials Modelling Meeting, which covered minerals, energy storage devices, polymers, metal alloys and catalytic materials. The meeting was held at the University of the North on the 4th and 5th of May 1998, and marked the continuation of a collaboration in Materials Modelling between South Africa and the U.K., with the aim of building research capacity at the Materials Modelling Centre at the University of the North and encouraging interactions involving computational modelling between industries and universities in South Africa. The proceedings includes results from the collaboration. The programme is sponsored by the Royal Society, London, U.K. and the Foundation for Research and Development, Pretoria South Africa.
