GUEST EDITORIAL

This issue of *Molecular Simulation* contains invited papers presented at the Materials Modelling Meeting, which covered minerals, energy storage devices, polymers, metal alloys and catalytic materials. The meeting was held to launch a collaboration in Materials Modelling between South Africa and the U.K. and in particular to build research capacity at the Materials Modelling Centre at the University of the North and to encourage the creation of an interface in computational modelling between industries and universities in South Africa. The collaboration is sponsored by the Royal Society, London, U.K. and the Foundation for Research and Development, Pretoria, South Africa. The meeting was held at the University of the North on 29 and 30 April 1997.
