This issue contains selected papers from Nanotech 2004, the nanotechnology conference and trade show, held at the Boston Sheraton Hotel and Copley Convention Centre, Boston, Massachusetts. Nanotech is the largest Nanotechnology conference in the world providing collaborative direction to the growing community of nano science, technology and business. The nanotech umbrella event additionally hosts

the Conference on Modeling and Simulation of Microsystems (MSM) and the International Conference on Computational Nanoscience and Technology (ICCN).

The papers in this special issue deal with applications of modelling to a range of phenomena related to Nanomaterials. They provide a snapshot of current research in this fast moving area.
