

# Erratum: Dopamine D<sub>2</sub> and D<sub>3</sub> Receptor Occupancy in Normal Humans Treated with the Antipsychotic Drug Aripiprazole (OPC 14597): A Study Using Positron Emission Tomography and [<sup>11</sup>C]Raclopride<sup>☆</sup>

In an article in the August issue [Yokoi F, Gründer G, Biziere K, Stéphane M, Dogan AS, Dannals RF, Ravert H, Suri A, Bramer S, Wong DF (2002): Dopamine D<sub>2</sub> and D<sub>3</sub> Receptor Occupancy in Normal Humans Treated with the Antipsychotic Drug Aripiprazole (OPC 14597): A Study Using Positron Emission Tomography and [<sup>11</sup>C]Raclopride. *Neuropsychopharmacology* 27(2): 248–259], an incomplete version of Figure 2 on page 251 was mistakenly printed. The figure and legend should have appeared as follows:

**Figure 2.** The mean ± SD plasma aripiprazole concentration-time profile for day 14 following 10 mg once daily administration.
