

Index

Note: Page numbers of article titles are in **bold face** type.

A

N-Acetyl aspartate, in magnetic resonance spectroscopy, in obsessive-compulsive disorder, 214–215

Amygdala, connections to, in depression, 216–218

Annas, George, on psychiatric neurosurgery regulations, 314

Anticonvulsant action, of vagus nerve stimulation, 276–277, 279–280

Antidepressants, for depression, 201. *See also* Transcranial magnetic stimulation.

Anxiety disorders, transcranial magnetic stimulation for, 293–294

B

Ballantine, H. Thomas, Jr., on psychiatric neurosurgery, 308

Barber, Jesse, on psychiatric neurosurgery, 311

Behavioral therapy, for obsessive-compulsive disorder, 200–201

Benabid, Alim, deep brain stimulation studies of, 315

Bipolar mood disorder, thalamocortical dysrhythmia in. *See* Thalamocortical dysrhythmia.

Body dysmorphic disorder, neuroimaging and neurocircuitry in, 214

Broca, Paul, localization philosophy of, 181

Burckhardt, Gottlieb, frontal lobotomy procedure of, 181–182

C

Califano, Joseph, psychiatric neurosurgery regulations approved by, 314

Capsule, internal, anterior limbs of, electrical stimulation of, in obsessive-compulsive disorder, **267–274**

Capsulotomy, for psychiatric disorders
depression, 219, 232–233
history of, 191–192
obsessive-compulsive disorder, 204–208, 219, 232–233

Caudate nucleus, connections to
in depression, 216–219
in obsessive-compulsive disorder, 214, 218–219

Cerebrospinal fluid analysis, in depression, in vagus nerve stimulation, 280

Chlorpromazine, for psychiatric disorders, history of, 190

Cingulate cortex, anterior, connections to
in depression, 216–219
in obsessive-compulsive disorder, 214, 218–219

Cingulotomy, for psychiatric disorders, 191–192, **225–235**
anatomic considerations in, 225–227
complications of, 230
depression, 204–206, 208–209, 218, 225–228
history of, 225
obsessive-compulsive disorder, 204–206, 208–209, 216, 225–231
SPECT in, 238–249
patient selection for, 227–228, 231
physiologic considerations in, 225–227
results of, 228–231, 241–243
technique for, 228, 239
versus alternative surgical methods, 231–233

Corticostriatalthalamocortical circuitry
in depression, 216–219
in obsessive-compulsive disorder, 214, 218–219

D

Delgado, Jose M.R., on psychiatric neurosurgery, 309

Deniker, Pierre, psychoactive drug therapy discovery by, 190

Depression, 199–212

- clinical features of, 201
- epidemiology of, 201
- medical treatment of, 201
- neurocircuitry models for, 216–219
- neuroimaging in, 216–219
- neurosurgery for
 - capsulotomy, 219, 232–233
 - cingulotomy, 204–206, 208–209, 225–228
 - current awareness of, 201–202
 - effectiveness of, 207–209
 - history of, 202–203
 - limbic leukotomy, 205–207, 209, 232
 - modern procedures for, 203–205
 - neuroimaging and neurocircuitry related to, 218–219
 - safety of, 205–207
 - subcaudate tractotomy, 204–205, 207, 218, 231
- thalamocortical dysrhythmia in. *See* Thalamocortical dysrhythmia.
- transcranial magnetic stimulation for, 288–293
 - maintenance, 292
 - meta-analysis of, 289–292
 - with intentional seizure generation, 294–295
- vagus nerve stimulation for, **275–282**

Diethelm, Oskar, on ethics of neuropsychiatric surgery, 305–307

E

-
- Electrical stimulation
 - of internal capsule anterior limbs, for obsessive-compulsive disorder, **267–274**
 - of vagus nerve, for depression, **275–282**
 - Electroconvulsive therapy, for psychiatric disorders, 184, 201
 - versus transcranial magnetic stimulation, 287–289, 291–292, 294
 - Electroencephalography, in depression, in vagus nerve stimulation, 280
 - Eloquent cortex, localization of, transcranial magnetic stimulation for, 287
 - Epilepsy
 - transcranial magnetic stimulation for, 286–287, 293
 - vagus nerve stimulation for, 276–277
 - Ervin, Frank R., on psychiatric neurosurgery, 309

- Ethical issues, in neuropsychiatric surgery, **303–319**
 - historical aspects of, 303–308
 - regulatory aspects of, 312–315

S

- Schizophrenia
 - lobotomy for, 308
 - transcranial magnetic stimulation for, 293
- Seizures. *See also* Epilepsy.
 - induction of, in transcranial magnetic stimulation, 294–295
- Selective serotonin reuptake inhibitors, for obsessive-compulsive disorder, 200
- Shock therapies, for psychiatric disorders, 184
- Single-photon emission computed tomography
 - in depression, in vagus nerve stimulation, 279
 - in obsessive-compulsive disorder, **237–250**

diagnostic, 238, 241–242
 postoperative, 238–241, 245–249

SPECT. *See* Single-photon emission computed tomography.

Stereotactic surgery
 cingulotomy. *See* Cingulotomy.
 history of, 190–193

Subcaudate tractotomy, for psychiatric disorders, 193
 depression, 204–205, 207, 218
 obsessive-compulsive disorder, 204–205, 207, 218, 231–232
 versus cingulotomy, 231–232

T

Talairach capsulotomy procedure, 191

Thalamocortical dysrhythmia, **251–265**
 pathophysiology of, 251, 259, 262
 surgery for, 252–263
 magnetoencephalography with, 253–256, 260
 patient selection for, 252
 results of, 255, 259–263
 strategy for, 252–253, 259

Thalamotomy
 central lateral, for thalamocortical dysrhythmia, 252–263
 magnetoencephalography with, 253–256, 260
 patient selection for, 252
 results of, 255, 259–263
 strategy for, 252–253, 259
 dorsomedial, for psychiatric disorders, 191

Thalamus, connections to
 in depression, 216–219
 in obsessive-compulsive disorder, 214, 218–219

Thermocapsulotomy, for psychiatric disorders, 204–208

Tics, transcranial magnetic stimulation for, 293

Tourette syndrome
 neuroimaging and neurocircuitry in, 214
 transcranial magnetic stimulation for, 293

Tractotomy, subcaudate, for psychiatric disorders, 193
 depression, 204–205, 207, 218
 obsessive-compulsive disorder, 204–205, 207, 218, 231–232

versus cingulotomy, 231–232

Transcranial magnetic stimulation, **283–301**
 animal models of, 287
 drug use with, 293
 electrical requirements of, 285
 for anxiety disorders, 293–294
 for depression, 288–293
 maintenance, 292
 meta-analysis of, 289–292
 with intentional seizure generation, 294–295
 for eloquent cortex localization, 287
 for epilepsy, 286–287, 293
 for mania, 292
 for movement disorders, 293
 for schizophrenia, 293
 functional imaging with, 287–288
 high-frequency, 285–286
 mechanisms of action of, 284–286
 paired-pulse, 286–287
 repetitive, 284
 research uses of, 286–288
 safety of, 286
 versus electroconvulsive therapy, 287–289, 291–292, 294

Transorbital lobotomy, 189

Trichotillomania, neuroimaging and neurocircuitry in, 214

V

Vagus nerve, electrical stimulation of
 clinical applications of, 280
 for depression, **275–282**
 anatomic considerations in, 275
 clinical trials of, 276
 long-term results of, 278–279
 mechanism of action of, 277, 279–280
 open-label study of, 277–278
 placebo-controlled study of, 278–279
 practical considerations in, 280–281
 preclinical investigations of, 275–276

Valentine, Elliot S., on psychiatric neurosurgery, 312

W

Watts, James, psychiatric neurosurgical procedures of, 185–187, 189

Weinberger, Lawrence M., on ethics of neuropsychiatric surgery, 306
