

PCCP Nanoscience and Nanotechnology themed issues

A unique and timely series of special issues from PCCP

Tim Jones

Paul Mulvaney

Philip Bartlett

Guest editors Philip Bartlett, Paul Mulvaney and Tim Jones bring you a superb mix of urgent communications, full research papers and key reviews focusing on the physico-chemical aspects of nanoscience. Published in selected printed issues of PCCP over the coming months and collected together on a dedicated webpage, explore the exciting and expanding world of nanoscience and nanotechnology with PCCP.

According to the editors, PCCP is the natural place to publish these special edition papers,

"Our aim is to provide a snapshot of the current state of play, to highlight some of the exciting multidisciplinary work being done, to show you some of the breathtaking technology that is evolving from basic nanoscience and to illustrate that the science action is still in basic chemistry and physics."

Specialised searching

The graphical abstracting services at the RSC are an indispensable tool to help you search the literature. Focussing on specific areas of research they review key primary journals for novel and interesting chemistry.

requires specialised tools

Catalysts & Catalysed Reactions

Catalysts and Catalysed Reactions covers all areas of catalysis research, with particular emphasis on chiral catalysts, polymerisation catalysts, enzymatic catalysts and clean catalytic methods.

The online database has excellent functionality. Search by: authors, products, reactants and catalysts, catalyst type and reaction type.

With Catalysts and Catalysed Reactions you can find exactly what you need. Search results include diagrams of reaction schemes. Also available as a print bulletin.
