

Achieving great heights

The latest impact factor of 13.69* says it all.

Chemical Society Reviews publishes accessible, succinct and reader-friendly articles on topics of international, multidisciplinary and social interest in the chemical sciences. 12 monthly issues include special themed issues reviewing new areas of research, edited by a specialist guest editor. High visibility is ensured by indexing in a number of databases, including Medline.

CHEMISTRY WEEK

3-11 November 2007

**Find out how
we will be
'Fuelling the Future'**

What will you be driving in 2020?

Probably not a rocket, but more likely a vehicle driven by hydrogen power.

There is an increasing need to reduce our carbon emissions and alter our methods of travel. Chemistry is helping to provide some of the positive solutions to these challenges through the use of hydrogen power and other alternative fuels. To find out more about Chemistry Week events in your local area and the National Chemistry Week Tour visiting nine locations around the UK, visit www.rsc.org/chemistryweek
