

# RSC Conferences 2008

Faraday Discussion 139:

**The Importance of Polymer  
Science for Biological Systems**

26-28 March, York, UK

[www.rsc.org/FD139](http://www.rsc.org/FD139)

Dalton Discussion 11:

**The Renaissance of Main  
Group Chemistry**

23-25 June, Berkeley, USA

[www.rsc.org/DD11](http://www.rsc.org/DD11)

Faraday Discussion 140:

**Electrocatalysis – Theory and  
Experiment at the Interface**

7-9 July, Southampton, UK

[www.rsc.org/FD140](http://www.rsc.org/FD140)

**Analytical Research Forum 2008**

21-23 July, Hull, UK

[www.rsc.org/ARF08](http://www.rsc.org/ARF08)

Faraday Discussion 141:

**Water – From Interfaces to the Bulk**

27-29 August, Edinburgh, UK

[www.rsc.org/FD141](http://www.rsc.org/FD141)

**Chemistry in the New World of  
Bioengineering and Synthetic Biology**

22-24 September, Oxford, UK

[www.rsc.org/chembio08](http://www.rsc.org/chembio08)

Bursaries are often available to students and younger members of the RSC to attend major RSC conferences. For more information telephone: **+44 (0)1223 423354/432380** or email: **[conferences@rsc.org](mailto:conferences@rsc.org)**.

# A step ahead

Publishing  
the most topical  
organometallic and  
inorganic chemistry  
research.  
Faster!

"We are all VERY impressed  
with the rapidity with which  
this communication has been  
processed and typeset –  
six days!"

Professor Michael I Bruce,  
University of Adelaide, Australia

*Dalton Transactions*, the leading European and one of the world's most respected international organometallic and inorganic chemistry journals, embraces all aspects of the chemistry of inorganic and organometallic compounds including bioinorganic chemistry and materials chemistry.

The first general inorganic chemistry journal to publish weekly issues, *Dalton Transactions* prides itself on making the best organometallic and inorganic chemistry research available, fast! With typical online publication times of only 75 days from receipt for full papers and 35 days for communications, *Dalton Transactions* is the fastest in the field. What's more, an immediacy index of 0.89\* ranks the journal as the most topical in general inorganic chemistry.

An impact factor of 3.012\*, a variety of article types, no page charges, and additional innovative features such as html enhancement with our new award-winning *Project Prospect* ([www.projectprospect.org](http://www.projectprospect.org)), mean the benefits to authors and readers just go on and on. Find out more online now!
