CALL FOR PAPERS

SPECIAL ISSUE IN MEMORY OF PROFESSOR VLADIMIR A. EFIMOV (APRIL 11, 1946–JULY 28, 2010)

In 2011, Nucleosides, Nucleotides, & Nucleic Acids will dedicated an issue to the memory of Professor Vladimir A. Efimov, an outstanding Russian scientist, who made innumerable contributions to the field of nucleic acid chemistry. For many years, Professor Efimov was a head of the Laboratory of Nucleic Acids Chemistry at the Institute of Bioorganic Chemistry of Russian Academy of Sciences, and for several years he was a member of NNNA editorial advisory board. Some of Professor Efimovs' research highlights include the development of methodology of chemical synthesis of nucleic acid fragments, oligonucleotide analogous and mimics, including phosphonate-containing analogues of peptide nucleic acids, as well as their application as universal tools for solving various problems in molecular biology, recombinant DNA technique, and medicine.

Authors are invited to submit papers for publication in this special issue. Papers can take the form of research articles, short notices, and concise reviews of related topics that focus on the chemistry and biology of nucleosides, nucleotides, and nucleic acids. Submission of manuscripts should follow the standard *NNNA* "Instructions for Authors," which can be found at the end of journal issues or on the journal's website (http://www.informaworld.com/lncn). Please forward your submission no later than March 15, 2011, to the guest editors of this very special issue of *Nucleosides, Nucleotides, & Nucleotides Acids*.
