4,5-Diazafluorene-Incorporated Ter(9,9-diarylfluorene):
A Novel Molecular Doping Strategy for Improving the
Electron Injection Property of a Highly Efficient OLED Blue
Emitter.

Page 1982. The procedure as originally published in the Supporting Information for preparing the starting material 4,5-diazafluoren-9-one was incorrect. This method was based on the procedure of Plater et al., and the reference to Plater was omitted in the first footnote. The corrected Supporting Information has been reposted in its entirety, and the correct reference is as follows:

1. (a) Plater, M. J.; Kemp, S.; Lattmann, E. *J. Chem. Soc., Perkin Trans. 1* **2000**, 971. (b) Mazaleyrat, J.-P.; Wright, K.; Wakselman, M.; Formaggio, F.; Crisma, M.; Toniolo, C. *Eur. J. Org. Chem.* **2001**, 10, 1821. (c) Baxter, P. N. W.; Connor, J. A.; Wallis, J. D.; Povey, D. C.; Powell, A. K. *J. Chem. Soc., Perkin Trans. 1* **1992**, 1601.
