Novel Synthetic Approach Toward ( $\pm$ )- $\beta$ -Cuparenone via Palladium-Catalyzed Tandem Heck Cyclization of 1-Bromo-5-methyl-1-aryl-hexa-1,5-dien-3-ol Derivatives.

Page 192. In the first column, we inadvertently overlooked the following mistakes: 3-bromo-2-methyl-1-propene should be written instead of 1-bromo-2-methyl-2-propene in the text and also over the arrow of Scheme 3. The structure in Scheme 2 (last compound) should be that shown below (3-bromo-2-methyl-1-propene).
