N-Tosyl-*S*-difluoromethyl-*S*-phenylsulfoximine: A New Difluoromethylation Reagent for S-, N-, and C-Nucleophiles

Page 2111, Table 1. The correct structure for **6i** should be a *N*-difluoromethyl compound instead of a *S*-difluoromethyl compound.

Page 2111, Table 2. The correct structure for **8h** should be an *O*-difluoromethyl compound instead of a *N*-difluoromethyl compound.

Here are the corrected structures for compounds **6i** and **8h**:

Accordingly, the nomenclature of **6i** and **8h** in the Supporting Information has been corrected to 1-(difluoromethyl)-4-phenyl-1*H*-tetrazole-5(4*H*)-thione (**6i**) and 3-(difluoromethoxy)-1-phenyl-4,5-dihydro-1*H*-pyrazole (**8h**), respectively. Also, there were some typographical errors in the Supporting Information. The revised Supporting Information includes corrected spectral analysis data for the following compounds. Compound **6i**: “7.55 (d, *J* = 57.0 Hz, 1H)” should read “7.55 (t, *J* = 57.0 Hz, 1H)”. Compound **8h**: “ δ –97.5 (d, *J* = 53.3 Hz, 2F)” should read “ δ –87.4 (d, *J* = 72.0 Hz, 2F)”.
