

Correction to Total Synthesis of Lysergic Acid

Satoshi Umezaki, Satoshi Yokoshima, and Tohru Fukuyama* *Org. Lett.* **2013**, *15*(16), 4230–4233. DOI: 10.1021/ol4019562

Supporting Information

Solvent peaks had been removed from the ¹H NMR spectra reported for compounds 20 (S33), 21 (S35), 22 (S37), and 29 (S41). Original FIDs were located, and the spectra were reprocessed and have been replaced for the above compounds in the revised Supporting Information submitted with this correction. The spectra editing did not affect any of the conclusions of the published paper. The purities calculated on the basis of the revised spectra and corrected yields are as follows: 20 (98% purity, 80% yield), 21 (97% purity, 91% yield), 22 (97% purity, 94% yield), 29 (98% purity, 72% yield).
