

## Correction to Total Synthesis of (–)-Huperzine A

Takahiro Koshiba, Satoshi Yokoshima, and Tohru Fukuyama\*

*Org. Lett.* **2009**, *11*(22), 5354–5356. DOI: 10.1021/ol9022408

### Supporting Information

Solvent peaks had been removed from the  $^1\text{H}$  NMR spectra reported for compounds **10** (S6) and **14** (S14). The revised Supporting Information now contains the full spectra for these compounds. Original FIDs were located, and the spectra were reprocessed and have been replaced for the above compounds in the revised Supporting Information submitted with this correction. The spectra editing did not affect any of the conclusions of the published paper. The purities calculated on the basis of the revised spectra and corrected yields are as follows: **10** (94% purity, 75% yield), **14** (97% purity, 86% yield).
