

Correction to Synthetic Studies on (+)-Manzamine A: Stereoselective Synthesis of the Tetracyclic Core Framework

Yoichi Kita, Tatsuya Toma, Toshiyuki Kan, and Tohru Fukuyama* *Org. Lett.* **2008**, *10*(15), 3251–3253. DOI: 10.1021/ol801111r

Supporting Information

Peaks of solvents and impurities had been removed from the ¹H NMR spectra reported for compounds 3, 4, 5, 8, 10, and 15. Original FIDs were located, and the spectra were reprocessed and have been replaced for the above compounds in the revised Supporting Information submitted with this correction. The spectra editing did not affect any of the conclusions of the published paper. The purities calculated on the basis of the revised spectra and corrected yields are as follows: 5 (93% purity, 76% yield). The samples of 3, 4, 8, 10, and 15 included some unknown impurities, thus the exact purity could not be determined.
