

Correction to “Generalized Anomeric Effect in *gem*-Diamines: Stereoselective Synthesis of α -N-Linked Disaccharide Mimics”

Elena M. Sánchez-Fernández, Rocío Rísquez-Cuadro, Matilde Aguilar-Moncayo, M. Isabel García-Moreno, Carmen Ortiz Mellet,* and José M. García Fernández*

Org. Lett. 2009, 11 (15), 3306–3309. DOI: 10.1021/ol901125n

Supporting Information

Solvent peaks and in some cases minor impurities had been removed from the ^1H and ^{13}C NMR spectra reported for compounds 9, 15, 16, 18, and 19. Original FIDs were located for compounds 9, 15, 16, 18, and 19, and the spectra were reprocessed and have been replaced in the revised [Supporting Information](#) submitted with this correction. For compound 17, the wrong spectra were submitted in the original Supporting Information. The correct spectra are now included in the [Supporting Information](#). The editing of the spectra did not affect any of the conclusions of the published paper. Note that the yields for the aforementioned compounds were already corrected and are based on pure products.
