PHOSPHORUS-CONTAINING MULTIMACROCYCLES AND CRYPTANDS

Anne-Marie CAMINADE, Joëlle MITJAVILLE and Jean Pierre MAJORAL*

Laboratoire de Chimie de Coordination du CNRS, 205 route de Narbonne, 31077
 Toulouse Cédex, France

Numerous well established methodologies are known for the synthesis of organic cryptands and multimacrocycles. However, in most cases, these synthetic pathways are not appropriate to the synthesis of phosphorus containing analogues. We present several methods which allowed us to isolate in high yield original phosphorus derivatives such as the cryptand and the multimacrocycle depicted below [1-4].
