2-(N₂-O,O-DIALKYLTHIOPHOSPHORYL)-HYDRAZINOBENZOTHI-AZOLE

JING-LIN ZHANG and JIN-QIAO LU
 Institute of Organic Synthesis, Huazhong
 Normal University, Wuhan, Hubei, P.R.C.

2-(N₂-O,O-Dialkylthiophosphoryl)hydrazinobenzothiazole (I) could be synthesized with satisfactory yields from the reaction of 2-hydrazinobenzothiazole with thiophosphoryl chlorides. At higher temperature bis(dialkoxy)thiophosphoryl derivatives (II) were given.

R, R' = Me, Et, n-Pr, Ph, Ar

Compounds (I) can react with tris(dialkylamino) phosphines to form derivatives of fused tricyclotriazaphosphole containing one tercoordinated and one tetracoordinated phosphorus atom in one molecule.
