

# ANNOUNCEMENT

*PHARMACOLOGY BIOCHEMISTRY & BEHAVIOR* is completing its third year of publication and we are looking forward to the beginning of a successful fourth year of increased production due to a significant increase in the number of manuscripts which we are receiving for our editorial consideration. We originally anticipated printing six issues per year for a total of 600 pages, but we actually printed 750 pages in 1973, 900 pages in 1974 and will publish approximately 1200 pages in 1975. Due to this increase in the number of printed pages it has become necessary to publish *twelve issues a year in two volumes* and to increase the individual subscription rate to \$25 per year and the institutional subscription rate to \$160 per year in order to meet the anticipated costs for the additional six issues to be printed in 1976. We appreciate your continued interest and use of this important scientific periodical.
