November, 1976 Issue

SMITH, D. F. AND M. SHIMIZU. *Effects of alpha methyltyrosine and parachlorophenylalanine on open field behavior in rats given tranylcypromine stereoisomers and lithium carbonate.* PHARMAC. BIOCHEM. BEHAV. 5(5) 515 -518, 1976. --

In the Discussion section (page 517), left hand column, the first two lines of the last paragraph should read as follows:

Hyperactivity induced by d-Tc consisted mainly in increased ambulation, measured by the number of lines . . .
