## ERRATUM

HASENFRATZ, M., A. JACOBBER AND K. BÄTTIG. *Smoking-related subjective and physiological changes: Pre- to postpuff and pre- to postcigarette*. PHARMACOL BIOCHEM BEHAV 46(3) 527-534, 1993.

THE correct version of the last paragraph on page 529 is as follows: For the smoking and drinking phases, the means of five 5-s intervals were computed as follows: 1) before the subject pressed the button to indicate that she wished to take a puff/sip; 2) between the subject's button press and the acoustic signal (these data were available for only half of the puffs of a cigarette/sips of a cup of coffee); and 3-5) the three successive 5 s after the subject began to puff/drink. These 5-s intervals were aggregated separately over the first six puffs of a cigarette and the first six sips of coffee. We regret any inconvenience this may have caused.
