1-N-(Arylmaleamoyl)-3,5-bis(phenylmethylene)-4-piperidones: a novel class of antimycobacterial agents

A. JHA¹, J. R. DIMMOCK²

Pharmazie 61: 562–563 (2006)

By technical reasons, the Table in the above mentioned paper was published incorrectly. The Table should be read as follows. Editors apologize for the mistake.

Table: Evaluation of the compounds in series 2–4 for growth inhibiting properties of *Mycobacterium tuberculosis* H₃₇Rv

	R ¹ /R ^{2a}	Percentage inhibition at 6.25 µg/mL		
		2	3	4
a	H	24	0	8
b	4-Cl	0	0	0
c	3,4-Cl ₂	2	74	0
d	4-NO ₂	0	98	6
e	4-CH ₃	8	4	0
f	4-OCH ₃	7	100	0

^a R¹ and R² are the aryl substituents in ring C of the structure indicated in Figure 1
