In Sec. IV B, the beginning sentence of the second paragraph should read: “The averages of the charged and neutral $B \rightarrow K\phi$ modes $\mathcal{B}(B^+ \rightarrow K^+ \phi) = (7.7 \pm 1.2) \times 10^{-6}$ and $\mathcal{B}(B^0 \rightarrow K^0 \phi) = (7.5 \pm 1.8) \times 10^{-6}$ are used to extract s'_p .”
 Equations (7) should be

$$A(\pi^+ \eta) = \frac{-0.88 \sin \delta \sin \alpha}{1 - 0.88 \cos \delta \cos \alpha},$$

$$A(\pi^+ \eta') = \frac{-\sin \delta \sin \alpha}{1 - \cos \delta \cos \alpha}. \quad (7)$$
