

## ANNOUNCEMENT

The International Polyphenols Group is holding its next biennial conference in the Niagara Falls area of Canada on 16-19 August 1988. Topics of the symposium with the names of the invited speakers are as follows: overview of plant phenolics (J. B. Harborne, Reading, U.K. and M. Jay, Villeurbanne, France); biodegradation and utilization of lignin (A. M. Boudet, Toulouse, France and N. Lewis Blacksburg, U.S.A.); significance of flavonoids in foods (M. Metche, Nancy, France and M. Stavric, Ottawa, Canada); cereal polyphenols (F. W. Collins and R. G. Fulcher both of Ottawa, Canada); phenolics in phytopathology (M. Legrand, Strasbourg, France and U. Matern, Freiburg, F.R.G.) and enzymatic synthesis and production of flavonoids (H. Grisebach, Freiburg, F.R.G. and L. Varin, Montreal, Canada). Contributed papers and posters on these and other polyphenol-related topics are still being accepted. For further information contact:
