

Announcement

The Phytochemical Society of Europe
Società Italiana di Fitochimica
Future Trends in Phytochemistry
A Young Scientists Symposium
Gargnano, Garda Lake, Italy, 6–9 June 2007

F. Tomè *

Dipartimento di Biologia, via Celoria 26, 20133 Milano, Italy

Available online 9 October 2006

Invited speakers include, amongst others, G. Cragg (Natural anticancer agents), B. V. Charlwood (Plant cell biotechnology), P. Dugo (Analysis of natural products), A. Minnaard (Natural product synthesis), N. van Dam (Chemical ecology), G. Cimino (Recent results on marine organisms and their pharmacological potential), P. Facchini (Biochemistry, molecular and cell biology of alkaloid biosynthesis in opium poppy), E. Bombardelli (Future prospects from industrial point of view).

During the Symposium there will be ample opportunity for participants to present and discuss their own work in short lectures and posters. Ph.D. students and younger scientists working in the field of secondary metabolism or natural product chemistry and analysis are particularly invited to participate in the Symposium and to present their research results. Bursaries are available and applications for these would be welcomed.
