

Training Competent Piano Technicians for the 21st Century

Offering a complete correspondence, home study (open university) course for beginning and intermediate technicians in piano tuning, repairing, regulating, voicing, apprentice training, business practices and dealer and manufacturer relations. We are the largest school teaching piano technology in the world, with students and graduates in over 70 countries.

Written and Video Tape Training Materials

Course training materials include a 1,000+ page written study manual, many auxiliary texts, manufacturers technical materials, video tapes teaching tuning, repairing and regulating, and more.

Tools

Tuning, repairing and regulating tools, and a vertical action model, are included with the course.

Parts and Supplies

Also included are repair parts and supplies, so students can practice doing repairs as they study the course.

We also offer week-long, one-on-one hands-on, 60-hour intensive training seminars each summer at Northwestern College in St. Paul, Minnesota.

Randy Potter School of Piano Technology
