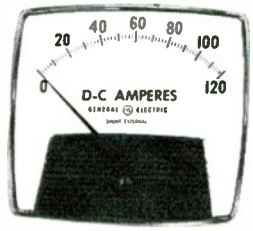
BIG LOOK panel meters



Ratings of D-c Panel Meters

D-C VOLTMETERS (Self-contained) 1.5, 3, 5, 8, 10, 15, 30, 50, 80, 100, 150, 200, 250, 300, 500 or 600 volts

D-C VOLTMETERS (For use with external resistors) 500, 600 or 750 volts

D-C AMMETERS (Self-contained) 1, 1.5, 2, 3, 5, 10, 15, 20, 30 to 50 amperes

D-C AMMETERS (For use with 50 millivolt external shunts) 50, 75, 100, 150, 200, 250, 300, 400, 500, 600 or 800 amperes; 1, 1.2, 1.5 or 2 KA

D-C AMMETERS (For use with 100-mv external shunts) 20, 40, 50, 75, 100, 150, 200, 250, 300, 400, 500, 600 or 800 amperes; 1 or 2 KA

D-C MICROAMMETERS 20, 50, 100, 200 or 500 microammeters

D-C MILLIAMMETERS 1, 1.5, 3, 5, 10, 20, 25, 30, 50, 80, 100, 150, 200, 250, 300, 500 or 800 milliammeters

Ratings of A-c Panel Meters

A-C VOLTMETERS (Self-contained) 3, 5, 10, 15, 30, 50, 150, 300, 500 or 600 volts

A-C VOLTMETERS (Transformer rated) 600 or 750 volts; 3 KV

400-CYCLE A-C VOLTMETERS (Self-contained—for use at 400 cycles) 150 or 300 volts

A-C AMMETERS (Self-contained) 1, 3, 5, 8, 10, 15, 20, 30 or 50 amperes

A-C AMMETERS (Transformer rated) 10, 15, 20, 30, 40, 50, 75, 80, 100, 150, 200, 300, 400, 500, 600 or 800 amperes; 1, 1.2, 1.5, 2 or 3 KA

A-C LOAD INDICATORS—Rated 0-5A. Can be applied to any 60-cycle a-c motor when used with the variable-ratio Type JCH-O current transformer

A-C MILLIAMMETERS 10, 25, 50, 100, 200 or 500 milliammeters

Ratings of Rectifier-type Panel Meters

VOLTMETERS 10, 15, 20, 25, 30, 50, 80, 100, 150, 200, 250 or 300 volts

MICROAMMETERS 500 or 800 microammeters

MILLIAMMETERS 1, 1.5, 2, 3, 5, 10 or 20 milliammeters

Available in 2½-, 3½-, and 4½-inch a-c, d-c, and rectifier types, General Electric BIG LOOK panel meters are particularly suitable for use in radio and communication equipment where accuracy and quality are required and space is at a premium.

Features include distinctive appearance, excellent readability, and improved reliability. 2% accuracy class except for rectifier types.

Completely Sealed Cases on 2½- and 3½-inch Designs

General Electric quality is built in to stay. Gasketed construction on 2½- and 3½-inch models protects internal parts from dirt, dust, and water, and helps assure extra long, reliable life.

Snap-on, Snap-off Covers on 4½-inch Designs

Snap-on, snap-off covers are supplied on all 4½-inch BIG LOOK panel meters. The covers can be easily removed and replaced while the meter remains in its normal mounted position.

	SIZE		
	2½-inch	3½-inch	4½-inch

GREIBACH PRECISION METERS

nearest to the theoretical ideal of the perfect electrical meter —for direct measuring with the highest accuracy and negligible loss

for TRANSISTORS, DIODES, TUBES, AMPLIFIERS, IONIZATION, HYPERCRITICAL MEASURING, CONTROL BY LIGHT BEAM & PHOTOCELL

D.C. ULTRA SENSITIVE METER TO .0002 MA

6.3 inch scale—Microamps to Amps with high overload capacity. Precise, stable, rugged. up to 23 ranges in a single meter.

SELECTIVE EXPANSION .025%

.025% accuracy on effective 1,000 division 5 ft. scale, electrically folded into 10 sections. No hunting for readings.

NEW AC/DC NON-THERMAL TRUE RMS MICROAMMETER

Now voltmeters and ammeters with lowest energy consumption of any non-amplifier type. Low millivolt drop. 20-30MV, high overload capacity. Response—DC to megacycles.

BIFILAR SUSPENSION IN ALL METERS

Frictionless, pivotless. No jewel bearings. Unique bifilar suspension—this basic element in all Greibach meters—assures permanent calibration.

S35S

PARKER panel meters

STANDARD (S35) AND SEALED (S35S)

FOR SURFACE MOUNTING

FEATURING...

• Two 3/8" holes for mounting • Accuracy—1½% full scale • Movement withstands 100 times full scale current continuously • Printed circuit coil • Ceramic disk magnet • Distinctive styling for minimum space • Self shielding

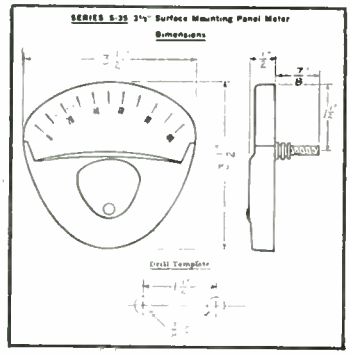
The Parker Surface Mounting Panel Meter embodies a revolutionary approach to movement design using a printed circuit coil in conjunction with a thin ceramic disk magnet.

The most striking advantage of this technique is a great reduction in size so that the entire meter is contained in the scale housing and nothing projects from the rear except the terminals — which also serve as mounting screws.

STABILITY — Ceramic magnets used in Parker meters supersede all other known types of magnets for stability.

POINTERS — All meters have nylon pointers which are unaffected by overload shock contact with limit stops.

BEARINGS — Synthetic sapphire in silicone rubber shock-mounts. Pivots are made from "Niva Point"



SCALE LENGTH — Extra long 3 3/16" scale for maximum readability.

PRICES LIST (S35)

DC MILLIVOLTMETERS

$12.72 — 25 MV, 50 MV, 100 MV

DC VOLTMETERS

$13.92 — 1.5 VDC, 3.0 VDC, 5.0 VDC, 10 VDC, 15 VDC, 25 VDC, 30 VDC, 50 VDC, 100 VDC, 150 VDC, 200 VDC — 500 ohms volt*

$15.12 — 250 VDC, 300 VDC, 500 VDC — 1 000 ohms volt

VIBRATING REED FREQUENCY METERS

J-B-T

Model 30-F

Used wherever constant or known frequency is important to efficient operation of equipment.

- ***Permanently Accurate*** **within ±0.3% or better at reference temperature, depending on the model. This accuracy is not affected by poor wave form, external magnetic disturbances, or voltage fluctuations.**
- ***Size and Type for Every Service.*** **Made in many portable and panel styles and reed groupings; 12-650 cycles and above.**
- ***Rugged Construction*** **simplified, patented.**
- ***Suitable for Electronic Circuits.*** **Power consumption is comparatively low, and J-B-T reeds have high Q with prompt, sharp response.**

ELAPSED TIME METERS

J-B-T elapsed time (or running time) meters provide a convenient means for timing reliability or other tests, checking tube or machine life, and scheduling maintenance. To be compatible with other panel indicators, they are made in many case types: round, square, clear-plastic, glass-to-metal seal, or special. Standard models for 60 cycles, 100-130 volts register in 1/10 hour steps to 9,999.9 hours (or 99,999.9 hours in new Model 31-EXW illustrated) then automatically reset. Others such as 50 cycles, 230 volts, or 0-9,999.9 minutes are also available.

Purchase of standard items through authorized electronic distributors is strongly recommended.

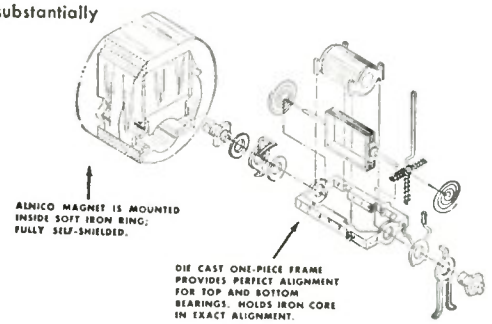
BAR-RING TYPE MOVEMENTS (Exclusively Triplett)

- Self Shielded
- Not affected by magnetic panels or substantially by stray magnetic fields.
- More Torque
- Lower Terminal Resistance
- Faster Response
- Exceedingly Rugged and Accurate
- All Case Sizes



TRIPLETT
Quality... First to last

TRIPLETT—For over 56 years, a leader in the field of meter and test equipment design and manufacture.

TRIPLETT offers a complete line of:

- Panel Instruments
- Portable Instruments
- Test Equipment: Radio, TV, Electrical and Electronic

For a complete description of all products, see the **TRIPLETT** listing in the Radio Electronic Master catalog.

All standard Triplett products available nationally through authorized Triplett Distributors.

RAWSON METERS

MULTIMETERS® and REGULAR METERS
AC and DC types, multiple ranges, accuracy ½ of 1%. 2 microamperes to 1 ampere DC. 2 milliamperes to 3 amperes AC.

ELECTROSTATIC VOLTMETERS
Ranges 100 V to 35,000 V, AC or DC. Resistance exceeds million megohms. Can measure static electricity.

R. F. VOLTMETERS
DC to 100 megacycles s. Thermocouple type. Ideal for laboratory standards. New bulletin.

FLUXMETERS
Laboratory and production measurements on magnets and magnetic circuits. Single push button return-to-zero.

ROTATING COIL GAUSSMETERS
Our most recent development for measuring magnetic field strengths. Measures from a few gausses to 120 kilogausses.

World Radio History

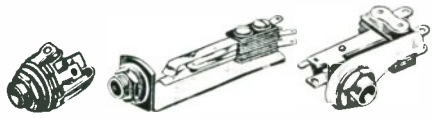
SWITCHCRAFT INC.

"SETS the STANDARD" in electronic components

FOR RADIO—TELEVISION—HI-FI—STEREO—TAPE RECORDERS MUSICAL INSTRUMENTS—ELECTRONIC CONTROLS AND COMPUTERS



JACKS

FOR MILITARY AND INDUSTRIAL EQUIPMENT—MOST COMPLETE LINE

Available in all common and many special circuits.
"LITTEL-JAX"—require minimum panel space.
"TINI-JAX"—Similar to "Littel-Jax"—subminiature in design.
"SF-JAX"—short frame design—innumerable circuits.
"LF-JAX"—long frame design—all circuits.
"EXTENSION JAX"—for cable extensions.
"SHIELDED JAX"—shield assembled into and made a part of Jack.
"LAMP JAX"—Switchboard panel type. Ideal for mounting on Jack Panel.

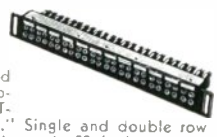
TELEPHONE & MILITARY JACKS

"T-JAX"—a conventional telephone switchboard design—all standard circuits and military specifications.
"M-JAX"—a heavy duty design used in heavy industrial equipment.

PLUGS

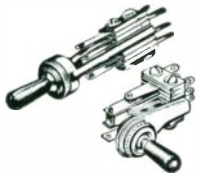
THE LARGEST VARIETY OF STYLES, SIZES AND TYPES

"LITTEL-PLUG"—small—fits standard Jacks—(also MIL type).
"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".
"LUG-PLUG"—small—low cost.
"STANDARD"—conventional size, heavy terminals—rugged design. 2 and 3 conductor types.
"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.
"TWIN-PLUG"—two electrically independent 2-conductor plugs on ⅝" C.C. MILITARY TYPE



JACK PANELS

Black phenolic and aluminum types. Support Switchcraft "T-JAX" and "MT-JAX." Single and double row panels. Accommodate up to 52 Jacks.



"LEV-R SWITCHES"

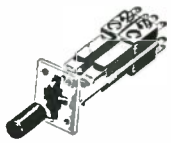
Unusually compact. Many circuits. Locking and non-locking. Series 3000 and 13000—single hole mounting. Series 12000 requires only about ¼ of depth behind panel of conventional "Key" switches.

"FF-SWITCH"

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

"HOOK SWITCH"

Switch actuated by hanging accessory on hook. 2 different methods of mounting. Standard circuits. Soft easy action. Require minimum of depth behind panel.

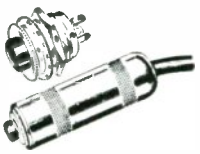


"TELEVER SWITCHES"

Rugged telephone type. Locking and non-locking types. Series 6000 mounts by screws or to escutcheon plate. Series 16000 features single hole mounting.

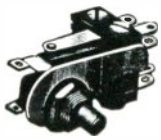
"LITTEL & TINY-SWITCHES"

"Littel-Switch" — rugged yet small, a Push Button switch available in simple circuits; contacts to suit. Various colors of Buttons.
"Tiny-Switch" — similar to "Littel-Switch", except sub-miniature design.



BUTTON AND CORD SWITCHES

"Button-Switches"—unusually small push button switch, completely enclosed.
"Cord-Switches" — cord mounted or pendant switch. Ideal for "hold" in hand operation.



"RS-SWITCH"

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth. 2 or 3 position; locking or nonlocking action.

"MULTI-SWITCH"

Features choice of switching functions. 1 to 37 stations possible. Single frame or ganged assemblies. Illuminated or non-illuminated buttons. Available in 6 and 28 volt.

MOLDED CABLE ASSEMBLIES

(Audio Jumpers) Plugs molded directly to various cable combinations. Shielded and unshielded. Various lengths.

COMPLETE LINE OF AUDIO ACCESSORIES—ADAPTERS, COUPLERS, CONNECTORS WITH PHONE OR PHONO CONNECTIONS. AUDIO MIXERS. SPEAKER CONTROLS. WRITE FOR CATALOG A-401.

When writing for catalog, list products in which you are interested. Inquiries on custom-made components handled promptly.

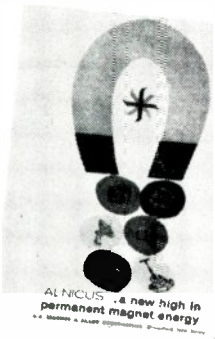
ALNICUS!®

ALNICUS is a new kind of permanent magnet material that affords the design engineer in modern industry the widest latitude and greatest flexibility because—**it is commercially produced... it has the highest magnetic power ever... it is not limited to plugs, rectangles or other prismatic shapes.** In plain truth—ALNICUS makes it possible to **commercially produce** permanent magnets with the highest energy level ever achieved **in virtually any size or shape, and ALNICUS will maintain this high magnetic power in all configurations!**



For complete information write for Brochure RE. Address inquiries to Dept. 62 on your company letterhead.

MAGNETIC MATERIALS DIVISION
U. S. MAGNET & ALLOY CORPORATION
266 Glenwood Avenue, Bloomfield, N. J.

the highest magnetic power for electronic applications!

ALNICUS... broadens the scope of magnet use for the Military and all industries. For example—with **commercially produced** ALNICUS it is now possible to have higher magnetic energy with no increase in unit size or weight... or, retain the same magnetic energy with a smaller, lighter unit.

World Radio History

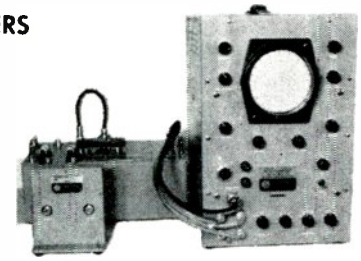
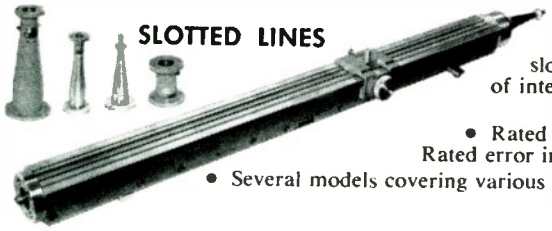
rf instruments and coaxial components

AUTOMATIC IMPEDANCE PLOTTERS

- Measure and plot rf impedance or transfer characteristic as a continuous function of frequency from 0.1 to 1700 mc.
- Impedance versus frequency curve is automatically plotted as it would be seen at any point desired.
- Entirely self-contained, except for use of an external oscillator.

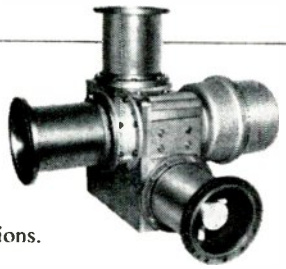


SLOTTED LINES



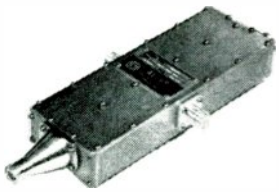
- High-precision universal slotted lines with a wide variety of interchangeable tapered reducers and tunable probes.
- Rated residual SWR is under 1.010. Rated error in detected signal under 1.005.
- Several models covering various bands from 37.5 to 4,000 mc.

COAXIAL SWITCHES



- For use in rigid 3⅛" and 6⅛" coaxial transmission line.
- Low SWR.
- Motor-driven or manually operated.
- Very high peak power models for radar applications.

INSTRUMENT HYBRIDS



- Inherent high isolation independent of frequency. Rated residual unbalance from 40 to 60 db.
- Wide range of frequency bands from 45 mc to 3600 mc for use with all transmission line sizes from Type N to 6⅛".
- Constant coupling in both magnitude and phase over the frequency range, with equal loads.

INSTRUMENT LOADS

- Excellent stability and low reflection. Suitable as secondary standards.
- SWR of Type N termination under 1.02, 0-1100 mc.
- Available in nearly all rigid and flexible coaxial transmission line sizes.
- Models for use at liquid nitrogen temperatures.

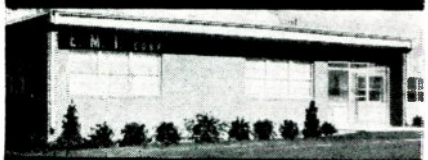
ELECTRO MAGNETIC TECHNIQUES



EMT's new facility provides the most comprehensive line of FLEXGUIDE

E M T CORPORATION announces the election of TORE N. ANDERSON as PRESIDENT and CHAIRMAN OF THE BOARD.

E M. T. Corporation reorganized under the leadership of Tore Anderson with its Founder, John Lamb, Vice-President-Engineering, provides the most experienced design team in the Flexible Waveguide field today.

Mr. Anderson, presently Chairman of the PGMTT is a consultant to the Department of Defense and the U.S. Delegate to the International Electro-Technical Commission for Waveguide standardization.

COAXIAL DIRECTIONAL COUPLERS

λ/4 side arm type, in rigid transmission line ⅞ in. to 6⅛ in. diameter—copper or aluminum—standard and pressurized types available.

- **Coupling 20db to 60db:** The value of coupling can be maintained within plus or minus 1db over a 2 to 1 frequency range.
- **Directivity 35db or better:** A directivity of over 40db can be held over a 30% frequency range.
- **Frequency range 200 to 2000 mc.**

COMPONENTS

"Microwave equipment made better by BOGART"

WATER LOADS
The most experienced dummy load manufacturer in the world.

COAXIAL COUPLERS
Flattest couplers in the industry.

COAXIAL SWITCHES
Highest power, highest isolation.

CUSTOM DESIGNS
Custom creativity.

5000 series

7000 series

8000 series

Cover to Choke	102 ()*FC	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
7/8" to RG 48/U	104								L		S										
Flexible	105													B	X						
ANTENNA—Horn	110	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
ATTENUATOR—WAVEGUIDE Fixed - High Power	119								L	M	S	C	A	B	X	G	K	T	V	W	Z
Fixed - Low Power	120	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Flap	121								L	M	S	C	A	B	X	G	K	T	V	W	Z
Semi-Prec.	122	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Precision	123								L	M	S	C	A	B	X	G	K	T			
Var. Coax. Hi-Power	124	(Continuous 100 - 10,000 mcs.)																			
Fixed - Coaxial	125 A	- Low Power C-Hi-Power (1000 - 10,000 mcs.)																			
Fixed - Coaxial	126 A	- Low Power C-Hi-Power (0 - 4000 mcs.)																			
Variable Coaxial	127	(Continuous) (500 - 10,000 mcs.)																			
Fixed Coax.—Very Hi-Power	128 A	- Type N - B - 7/8" coax. (1000 - 3000 mcs.)																			
Variable Coax. Pad	129	(Continuous 1,000 - 4,000 mcs.)																			
BEND—E Plane	130	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
H Plane	131	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Coaxial (7/8") Right Angle	135 LS	- (0 - 3600 mcs.)																			
CAVITY—Filter	140						F		L	M	S	C									
LHT Transmitter	141								L		S										
Reference	142								L	M	S	C									
COUPLER—Signal Sampler Coaxial	148	(100 - 6,000 mcs.)																			
Waveguide	149	P	N	J	H	F	E	D	L	M	S	C	A	B	X						
CRYSTAL DETECTOR MTS. COAXIAL Broadband	150	- (900 - 12,400 mcs.) Video Output																			
	150 BNC	- (900 - 12,400 mcs.) BNC Output																			
	150 N	- (900 - 12,400 mcs.) Type N Output																			
Tunable	151	(900 - 12,400 mcs.)																			
Matched	152	(500 - 3,000 mcs.)																			
CRYSTAL DETECTOR MTS. W.G. Broadband	160	P	N	J	H	F	E	D			S	C	A	B	X	G	K				
Tunable	161										S	C	A	B	X	G	K	T	V	W	Z
DIRECT'L CPLERS. Coax. 3/8"	165	(100 - 3,500 mcs.) HIGH DIRECTIVITY																			
Coax. Hi-Power	166	(100 - 10,000 mcs.) HIGH DIRECTIVITY																			
Coax. - 7/8"	167	(100 - 3,000 mcs.) HIGH DIRECTIVITY																			
Coax. - 1 3/8"	168	(100 - 1,500 mcs.) HIGH DIRECTIVITY																			
Coax. - 3 1/8"	169	(100 - 1,000 mcs.) HIGH DIRECTIVITY																			
Waveguide Uni-Directional	170	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Bi-Directional	171	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Uni-Reflectometer	172	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Bi-Reflectometer	173	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Broadband	174	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
FILTER—LOW PASS Coax.	175	Cut off frequency 100 to 3,000 mcs.																			
LINE STRETCHER—Coax. - 3/8"	180	- (900 - 12,400 mcs.) VSWR dependent on length																			
	180 P	- (900 - 12,400 mcs.) VSWR independent of length																			
LOAD—COAX. High Power	189 A	- (1000 - 10,000 mcs.) 100 watts - Type N																			
	189 B	- (1000 - 10,000 mcs.) 350 watts - Type N																			
LOAD—COAX. Low Power	190 A	- Type N, 190 B - 7/8" line (0 - 4000 mcs.)																			
Medium Power 7/8" Line	191								L		S										
Medium Power 1 3/8" Line	192								L												
High Power 7/8" Line	193								L		S										
High Power 1 3/8" Line	194								L												
LOADS—W.G. Low Power	200	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Medium Power	201	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
High Power	202	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Water	210	P	N	J	H	F	E	D	L	M	S	C	A	B	X						
MIXER—CRYSTAL Coaxial	220								L	M	S	C									
Waveguide	230										S	C	A	B	X	G	K	T			
Balanced Waveguide	235										S			X		K					
NUT & BOLT	240								L		S	C	A	B	X	G	K	T			
POWER DIVIDER—Coax.-Fixed	245								L		S										
Adjustable	246								L		S

MULTIPLIER—(FREQ.) Waveguide - Coax. Input	248	Any input or output freq. 1 - 90 kmc.																			
Waveguide Input	249	Any input or output freq. from 1 - 90 kmc.																			
PROBE—Tunable	250	(900 - 12,400 mcs.)																			
REFLECTION—Stand. W.G.	256												S	C	A	B	X	G	K	T	
ROTARY JOINT—COAXIAL Med. Speed 7/8"	260	(2,700 - 2,900 mcs.)																			
High Speed 7/8"	261	(2,700 - 2,900 mcs.)																			
Inline L.T.	262	(10 - 3,000 mcs.)																			
ROTARY JOINT W.G. Doorknob Transition	270											S				X					
Circular Transition	271														B	X		K	T		
Crossbar Transition	272														B	X					
SHIFTER—PHASE W.G.	275	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T			
SHORT—MOVABLE Waveguide - (Unhoused)	283								L	M	S	C	A	B	X	G	K	T	V	W	
SHORTS—MOVABLE 3/8" Coax (Housed)	290								L	M	S	C	A	B	X						
5/8" Coaxial	291								L		S	C									
7/8" Coaxial	292								L		S										
Waveguide	293	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Waveguide Precision	294								L	M	S	C	A	B	X	G	K	T	V	W	Z
SLOTTED LINE—COAXIAL Waveguide	300								L	M	S										
	310	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
STAND	330								L	M	S	C	A	B	X	G	K	T			
SWITCH—Coax	334 LT - (0 - 4000 mcs.) LT connection 334 LA - (0 - 4000 mcs.) 7/8" line																				
W.G. Rotary Type	335	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
W.G. Multiple Type	336										S				X		K				
TEE—Coaxial 7/8" Line	340								L		S										
W.G. Series TEE	350	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
W.G. Shunt	351	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
W.G. E-H (Hybrid)	352	P	N	J	H	F	E	D	L	M	S	C	A	B	X*	G	K*	T	V	W	Z
TRANSITIONS—COAXIAL 3/8" - 7/8" Line	370	(0 - 4,000 mcs.)																			
7/8" to 1 5/8"	371	(0 - 4,000 mcs.)																			
W.G. Taper	380	Any Combination of waveguide, sizes P to T inclusive.																			
W.G. Step	381														B	X					
W.G. Elbow	382														B	X					
TUBE MOUNT—KLYS.	390												C	A	B	X					
TUNER—Coaxial 3/8" Single Stub	400								L		S	C	A	B	X						
7/8" Single Stub	401								L		S										
3/8" Double Stub	402	(1,000 - 10,000 mcs.)							L		S										
7/8" Double Stub	403								L		S										
3/8" Triple Stub	404	(1,000 - 10,000 mcs.)							L		S										
7/8" Triple Stub	405								L		S										
7/8" Slug	407								L		S										
TUNER—WAVEGUIDE Single Stub	409	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Double Stub	410	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Triple Stub	411	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
E/H	412	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Glide Screw	413	P	N	J	H	F	E	D	L	M	S	C	A	B	X	G	K	T	V	W	Z
Double Slug	414										S	C	A	B	X	G	K	T	V	W	Z
TWISTS Standard	420										S	C	A	B	X	G*	K	T	V	W	Z
Step	421	P	N	J	H	F	E	D													
WAVEMETER—COAXIAL Micrometer	430								L	M	S	C									
In Case	440								L	M	S	C									
Waveguide MICROMETER Absorbtion	450											C	A	B	X	G	K	T			
Transmission	451											C	A	B	X	G	K	T			
Direct Reading	460													B	X						

*Parenthesis indicates insert letter for Waveguide size

Choose from America's most complete catalog of Microwave test equipment and components listing more than 1000 standard items . . .

PLUS

Special designs manufactured to your specifications . . .

OR

Produced from your Blueprints in production or prototype quantities.

Your inquiries invited for design, development and production of MICROWAVE-RADAR component parts and test equipment in the frequency range of 100-90,000 megacyles.

FREE!

Latest DOUGLAS catalog!

WRITE TODAY for your copy of the Douglas Catalog featuring more than 1000 standard components in stock — more than any other source in the field.

and now: DOUGLAS RESEARCH CORP.

provides **RESEARCH • DEVELOPMENT • ENGINEERING** which includes

• ANTENNAS • R.F. ASSEMBLIES • WAVEGUIDE COMPONENTS • COAXIAL COMPONENTS

and in addition, manufacturing of Radar r.f. front ends and antennas, Microwave communications r.f. front ends and antennas. Write for additional information.

FERRITE MICROWAVE COMPONENTS

(To commercial and MIL specs)

- **ISOLATORS**
  - **WAVEGUIDE:** From L Band to V Band low and high power design. Includes: test equipment isolators covering full waveguide band, microwave relay isolators, miniature isolators, and special designs featuring temperature compensated units.
  - **COAXIAL:** Compact coaxial isolators cover very broad bandwidths from UHF to X Band. Other coaxial ferrite devices can be used as TWT amplitude regulators, variable attenuators, modulators, and phase shifters.
- **CIRCULATORS**
  - **FARADAY ROTATORS:** These circulators (3-port and 4-port versions) are available with 20% bandwidths. Narrow band units are miniaturized for airborne systems. Low and high power designs are available.
  - **DIFFERENTIAL TYPES:** L Band to Ka Band and up to 20% bandwidths. Features are: high isolation, low loss, and maximum waveguide power capabilities. The low loss is ideal for parametric amplifier use.
  - **JUNCTION TYPE:** These 3-port circulators are available in the WYE and TEE waveguide types. WYE type coaxial units are also available. The combination of units gives complete coverage from UHF to V Band. Features: compact and lightweight for airborne applications.
- **SWITCH**
  - **ROTATIONAL TYPES:** Ferrite devices offer a variety of switching functions. Features: fast switching time to less than 1 μsec, constant input VSWR while switching, and high power applications. Applications: used in time sharing two antennas with one receiver and one transmitter.
- **VARIABLE ATTENUATORS & MODULATORS**
  Numerous ferrite configurations are used for electronically controlled modulator and attenuator applications.
- **SPECIAL DESIGNS**
  A thoroughly experienced engineering staff is available for consultation on your special applications. Our chemical laboratory supplies special formulations of ferrite materials to enable our engineering department to meet your most difficult component requirements.

• **FERROTEC** has complete sales representation in all principal cities in the U.S., Canada, and in foreign countries

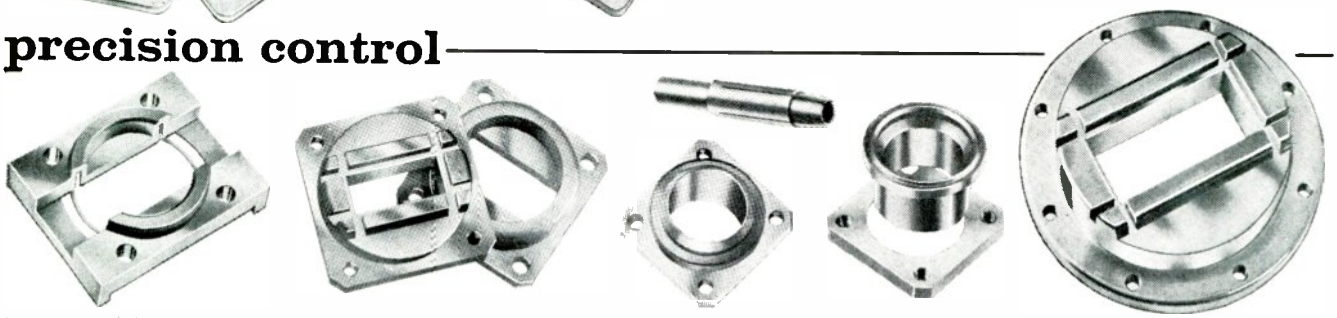
NEW—small precision forgings

To facilitate processing of orders for fast delivery of small Microwave flanges used in commercial and government projects, Leonard's Precision Manufacturing Co., Inc., now offers precision forgings of these flanges.

The U6-210, 596A and 600A flanges have precision-held sockets which eliminate milling of the hub. By maintaining one size throughout the socket area, assembly of parts is made easier and more efficient. Adjustment of jigs and fixtures due to size variations of slot milled parts is thus reduced.

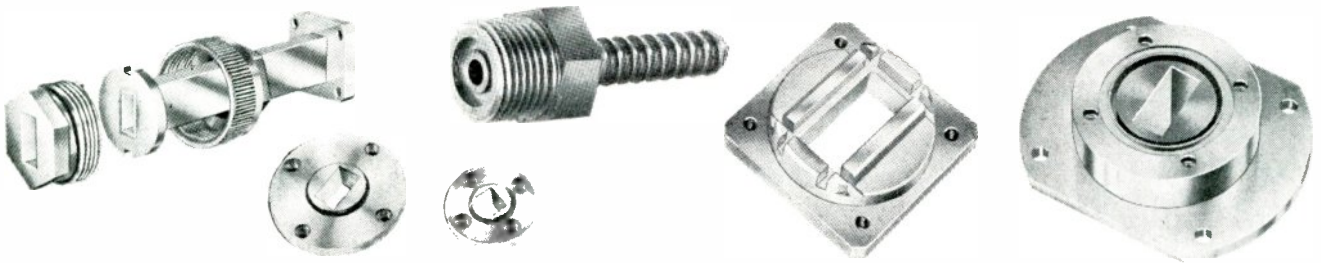
precision control



Small precision parts are machined from specified metals and the most close tolerances are held—.0005 if necessary. Original specifications are maintained on production orders. In the case of pilot models, specifications are not only held, but to further control the project, all jigs and fixtures are made by skilled mechanics.

TYPICAL PRODUCTS	MATERIALS MACHINED		USERS
adapters	bar stock, forgings, or castings		Component Parts for Radio, T. V., Radar, Electronics, Automotive, Communication, Aircraft Industries.
connectors	aluminum	teflon	
couplings for rigid co-axial lines	brass	polyethylene	
insular parts	bronze	OFHC copper	
screw machine parts	copper	tellurium	
wave guide flanges	plastic	silver	
specializing in microwave flanges	nylon	stainless steel	
	lucite	steel	

precision machining



At Leonard's Precision Manufacturing Company, Inc., the function of Quality Control is not delegated to an Inspection Department as such; it is an integral part of every mechanic's job. Precision can only be maintained if everyone is constantly measuring and improving the quality of his work.

INSPECTION TOOLS. To properly measure specified tolerances, Leonard's Precision Manufacturing Company, Inc., maintains a complete set of inspection instruments:

Gage-Plug, round ground, thread, height. **Micrometers**-Depth, calipers, thread. **Indicators**-Dial. **Blocks**-Granite. **Verniers. Parallels.**

WORK-IN-PROCESS INSPECTION is part of every major operation. As an example, one out of every five pieces is checked in both the grooving and drilling operations.

FINAL INSPECTION, as a rule, is made by a journeyman. His job is made easy because of the series of previous inspections a product run goes through before completion. Short run orders receive 100% inspection and production runs are checked every 25 pieces. This continuous quality control program is an assurance of a precision product.

consumer service

DEPENDABILITY

Every request for quotation is thoroughly analyzed for workability of specified metals, for general feasibility of production—for maintenance of tolerances. Delivery dates once promised are maintained. It is a company policy to "refuse" orders if delivery schedules cannot be met.

ADVISORY SERVICE

Based on a "decade" of intricate machining, Leonard's Precision Manufacturing Company, Inc., offers its "technical know-how" to industry in a continual effort to make a better product. Changes are suggested only if they will improve the end product—tolerances are never changed.

LIECO

FOR

MICROWAVE

In addition to an extensive product line, LIECO can supply microwave components and system assembles for small and large quantity production to customer's specifications. LIECO's capabilities in Research, Development, Design and Reliability Assurance are available for meeting requirements in the following fields:

ANTENNAS: Airborne, Marine, U.H.F. Microwave, Arrays, Slotted Arrays, R F Heads.

ANTENNAS Accessories: Feed Systems, Tuning Units, Rotary joints, Filters, Sector Scanners.

ATTENUATORS: Variable, Flap, Precision, Fixed.

ADAPTERS: Waveguide Flange to Flange, Waveguide to Coax, Waveguide tapered, Rigid Coax to Coax.

BENDS & TWISTS: Waveguide: Bends E & H Plane 0°-180°, Twists 0°-90°

BOLOMETERS: Waveguide: Bolometer (millimeter).

COUPLERS: Directional Antenna: 7/8" Coax line. Crossguide, Multi-hole, Branch Guide Rotary.

DETECTORS: Crystal, Bolometer, Single, Dual, Tunable, Fixed Tuned.

DIVIDERS: Waveguide: Power Divider.

DUMMY LOADS: Waveguide: High Power, Water Cooled; Coaxial.

FILTERS: R F, Waveguide, Coaxial.

FLANGES: Waveguide, Coaxial, Standard & Special.

GASKETS: RF Spring Finger.

HORNS: Microwave Horns, Gain Standard.

JOINTS: Microwave Rotary Joints, Continuous & Sector Scan.

MIXERS: Microwave Crystal, Crystal Coaxial & Waveguide.

MOUNTS: Microwave Bolometer, Crystal.

PHASE SHIFTER: Microwave Phase, Dielectric, Line Stretchers.

SHORTS: Waveguide & Coax, Adjustable, Fixed.

SWITCHES: Waveguide Switches. Manual, Motor Driven SPDT, DPDT, SP-Multi-Throw.

SCANNERS: Microwave Sector.

TEES: Coaxial, Waveguide, Series, Shunt, Hybrid.

TERMINATIONS: Microwave Low Power, High Power, Waveguide, Coaxial.

TRANSITIONS: Microwave Waveguide to Waveguide, Coax to Coax, Waveguide to Coax, tapered.

TUBING: Waveguide: Rigid Waveguide, Flexible.

TUNER: Waveguide. E-H, Slide Screw, Micrometer Driven.

WAVEGUIDE: Rigid, Flexible.

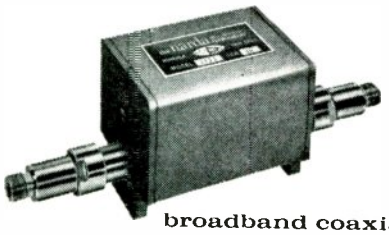
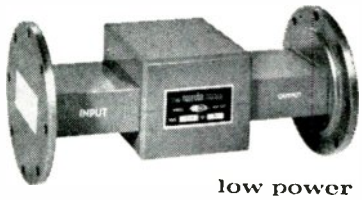
World Radio History

new! NARDA ferrite isolators:



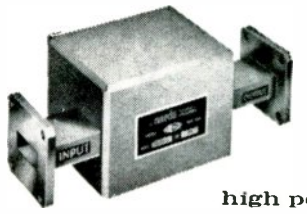
broadband coaxial

Excellent electrical characteristics with extreme versatility! 7/8" coaxial line construction allows higher power operation with 7/8" connectors, up to 20 kw peak, 400 watts average. (Normally supplied with Type N, 3/8" connectors; 10 kw peak, 10 watts average.) Features 15 db isolation and 1 db max. insertion loss. VSWR is 1.25 max. based on 2:1 load mismatch; 1.15 max. into matched load. Model 1233: 2.0-4.0 kmc; model 1233-1: 3.0-5.5 kmc; $450. each.



low power broadband waveguide

Provide maximum load isolation and minimum insertion loss over full standard waveguide frequency ranges. Extremely useful for maintaining signal source stability and eliminating long line and frequency pulling effects. Front-to-back ratios are the highest available on the market today: C Band—26:1, $250; XN Band—25:1, $225; XB Band—30:1, $235; X Band—30:1, $220.



high power broadband waveguide

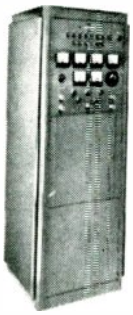
The only line of high power isolators that covers all of X Band with just two models (8.2-10.0 kmc and 10.0-12.4 kmc), each with front/back ratio of 40:1. Input power rating: 250 kw peak, 300 watts average, achieved through use of special high Curie temperature ferrite materials. VSWR is 1.05 max. with matched load; 1.10 max. with 3:1 mismatch. Only $175 each. Model with same VSWR, 28:1 front/back ratio, 300 kw peak, and 300 watts average, 7.05-10.0 kmc, $195.

consult NARDA for: Circulators • Phase Shifters • Modulators • Attenuators • Special Isolators

bolometers & thermistors:

The complete line of Bolometers (barretters) and Thermistors for all frequency ranges, including cylindrical, crystal, disc, and miniature configurations.

modulators & test instruments:



A line of Microwave Modulators, designed to operate a maximum number of existing magnetrons, without any alterations to the modulator. Provision has also been made for quickly converting these units to handle any new or uncommon pulse microwave tubes. All units feature silicon rectifiers and diodes for increased life and more reliable operation. Complete information on request.

Narda Microwave test instruments are designed to offer you something *more* than competition. Whether you require Power Meters, Klystron Power Supplies, and Radar Performance Checkers, VSWR Amplifiers, Impedance Meters, or any other Narda instruments, you'll be pleased with their precision workmanship, close adherence to specifications, excellent reliability, and exclusive features.

waveguide & coaxial equipment:

Narda's full catalog includes a complete line of UHF and microwave hardware, all of the highest quality. Most of our products are available for immediate delivery; flexible production schedules permit prompt shipment of even those items not regularly on the shelf.

free catalog:

We'll be glad to send you Narda's newest catalog. Just drop us a line, indicating the microwave areas in which you are most interested. Address: Department IRED-61-3.

New Microwave Component Catalog Lists 7317 Stock Units

You'll want a copy of the new Microlab 72 page Microwave Component Catalog which includes newly designed **TERMINATIONS, FIXED** and **TURRET ATTENUATORS** (miniaturized, up to 12,000 mc; and high power, up to 15w; precision units with improved VSWR and attenuation values); **HIGH** and **LOW PASS FILTERS; COAXIAL TUNERS; RESISTIVE** and **REACTIVE POWER DIVIDERS; COAXIAL CONNECTORS; CRYSTAL MOUNTS; MONITOR TEES; DC BLOCKS; DC SHORTS; SIGNAL SAMPLERS.**

Catalog also includes **Design Section** for each product and a special article on the **Application of Matrix Algebra to the Design of Microwave Networks.**

PORTCHESTER

THE SPECIALIST IN THE FIELD

FOR LINK SYSTEMS WAVEGUIDES

Portchester is a company devoted exclusively to the design and manufacture of waveguide link components. Through specialization, Portchester has developed advanced engineering abilities and economical, streamlined production facilities capable of producing complete assemblies under our own rigid testing and quality control. See us for:

Tees • Loads • Converters • Hybrids • Couplers • Tuning Units
Waveguide Filters • Attenuators • Bends & Twists • Waveguide
Discriminators • Antenna Feed Horns • Crystal Mounts • Klystron
Mounts • Waveguide Cavities • Wavemeters

MICROWAVE COAXIAL COMPONENTS

The complete Sage catalogue includes twenty-three lines of coaxial and waveguide components, covering the frequency range from DC through Q-Band. The tables below highlight three of the coaxial lines.

TEMLINE HYBRIDS

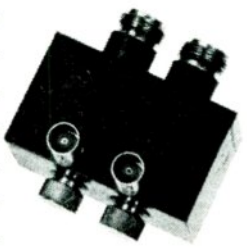
Model No.	Frequency Range	Minimum Directivity	Max. VSWR	Body Dim. ⅞ x 1⅜ x	Price
748	60-125 mc	30db	1.20	2 21/16	$225.00
749	125-250 mc	20db	1.20	1 11/16	175.00
750	250-500 mc	20db	1.20	6 3/16	175.00
751	500-1000mc	20db	1.25	3 15/16	175.00
752	1000-2000mc	20db	1.25	2 3/16	175.00
753	2000-4000mc	20db	1.25	1 1/16	175.00

Coupling: 3db ± 0.5db

COAXIAL BALANCED MIXERS

Model No.	Frequency Range	Output	Body Dim. 1 7/16 x 1 3/8 x	Crystals Supplied	Price
2491	125-250 mc	Dual	11 11/16	(2) IN416E	$300.00
2493		Single			350.00
2501	250-500 mc	Dual	6 1/16	(2) IN416E	300.00
2503		Single			350.00
2511	500-1000mc	Dual	3 15/16	(2) IN416E	300.00
2513		Single			350.00
2521	1000-2000mc	Dual	2 3/16	(2) IN416E	300.00
2523		Single			350.00
2531	2000-4000mc	Dual	2 3/16	(2) IN416E	300.00
2533		Single			350.00
2541	4000-8000mc	Dual	2 3/16	(2) IN415E	300.00
2543		Single			350.00

30 or 60mc IF



COAXIAL ROTARY JOINTS

Model No.	Frequency Range	Maximum VSWR	Maximum Insertion Loss	Price
305*	DC-12,400mc	1.15 DC-5000mc	Less than 0.1db	$100.00
305W*		1.30 5000-12,400mc		110.00
320**	800-12,000mc	1.10 800-6000mc	0.3db 800-1200mc	125.00
320W**		1.20 6000-8000mc	0.2db 1200-3000mc	135.00
		1.30 8000-12,000mc	0.1db 3000-12,000mc	

*Contacting junction **Capacitively coupled

NOTE: Models 305W and 320W are weatherized versions of Models 305 and 320, respectively.

Engineering inquiries concerning special requirements are invited.

World Radio History

TRG INC.

Total capability in millimeter test bench and system components 26 to 220 kmc.

FERRITE DEVICES
- Complete ferrite duplexers
- Four port circulators
- Three port reciprocal switches
- Variable attenuations
- Modulators
- On-off switches
- Isolators

LOW LOSS CIRCULAR WAVEGUIDE COMPONENTS
- Mode filters
- Corrugated bends
- Rectangular to circular mode transitions
- Rectangular to TE_{11} transitions
- Dual mode transducers
- Rotary joints

TEST BENCH
- Slotted lines
- Directional couplers
- Wavemeters
- Variable attenuators
- Precision attenuators
- Phase shifters
- Detector mounts
- E/H tuners
- Slide screw tuners
- Sliding short circuits
- Transitions
- Tees
- Twists
- Bends
- Terminations
- Drill Jigs

SYSTEMS COMPONENTS
- Duplexers
- Single hybrid rings
- Triple hybrid rings
- Balanced mixers
- Waveguide switches
- Ferrite switches
- Antennas
- Rotary joints
- Flexible waveguide
- Receiver front ends

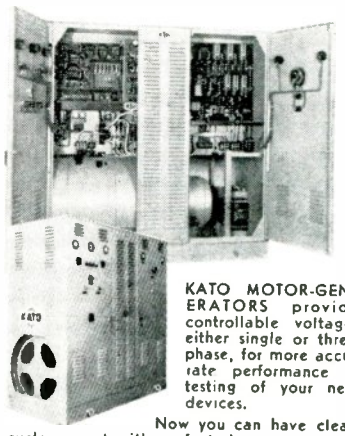
CLEAN POWER!



KATO MOTOR-GENERATORS provide controllable voltage, either single or three phase, for more accurate performance in testing of your new devices.

Now you can have clean 60 cycle current with perfect sign waves, complete control of harmonics, wave form and absolute voltage control with Kato Motor Generators.

Generator speeds from 720 RPM up to 3600 RPM at 60 cycles.

400 cycle generators—complete range up to 300 KW.

You can depend on Kato Engineering to solve your particular power problem

WRIGHT MOTORS

A Dependable Source for Precision Servos and Rotary Components

Wright Division of Sperry Rand offers design engineers faced with new challenges a dependable source for precision servos and rotary components.

Wright Motors meet the most exacting demands of critical Defense and Commercial applications. And when adaptations are required to answer your specific requirements, Wright has the qualified engineering and production capabilities to serve with sureness and dispatch.

A catalog containing data on our complete line is available upon request. You are also invited to write for the name and address of your nearest Wright Motors representative.

POWER SUPPLIES

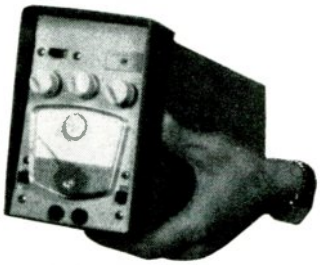
ANDERS

your assurance in reliability

NEW in '62!

OMNI-Power Supplies.

With versatility in mounting, meeting 90% of transistorized power requirements. Can be rack mounted, used on bench, or used as a modular unit. Three models available, 40W, 160W, and 500W. Each with four ranges 0-8, 0-16, 0-32, and 0-50 volts with graduated current 800 MA to 50 amps. OMNI-Power: means compactness, long life.



MODEL OMNI-POWER 40W

Send for bulletin on the complete ANDERS line of power supply units:

- Transistorized
- Vacuum Tube
- Solid State

We welcome the opportunity to quote on your special needs.

To improve performance of POWER SUPPLIES

specify

Inductrol* Induction Voltage Regulators

Voltage fluctuations can cause electronic tube failure, make equipment operate erratically, increase replacement parts costs. Inductrol regulators operate on the induction principle. This means precise voltage control and high reliability because **no brushes or tubes** are used. G-E Inductrol regulators are virtually maintenance free.

More information appears opposite General Electric "Voltage Regulator" listing in Directory II, Class 72.

*Registered trade-mark of General Electric Co.

REGULATED POWER MODULES ??

R|P|M*

*REGULATED POWER MODULE
*PATENT APPLIED FOR

FOR MILITARY (MIL-E-16400-B) INDUSTRIAL APPLICATIONS

HIGHER RELIABILITY FOR MILITARY APPLICATIONS . . . higher environmental immunity to shock, vibration and humidity . . . 5 year life expectancy in continuous use . . . extended operating temperature —20°C to +65°C, wide choice of D. C. Voltages.

HIGHER RELIABILITY FOR INDUSTRIAL APPLICATIONS . . . super-rugged construction and MIL hardware . . . all tubes clamped. Wide choice of voltage and current ranges, 125-425 volts . . . 50 to 400 milliamps. 6.3VAC OUTPUTS at ample capacities. RPM units are custom designed for compactness and most efficient use of space.

SPECIFICATIONS — ALL MODELS

input 105-125 V. A. C., 50/60/400 cycles.

outputs Voltage ranges as shown in the table, continuously variable. Current zero to full load as shown. Outputs floating — either positive or negative may be grounded.

6.3 V. A. C. centertapped at Currents shown in table.

regulation 0.05% regulation for NL to FL, or line changes of ±10%, under any conditions of load current or line voltage within limits stated.

ripple 1 mV RMS maximum under any conditions of load current or line voltage within limits stated.

transient response Output voltage returns to within regulation limits within 25 microseconds in response to a 50% step change in the load.

stability Maximum long term stability is assured by the use of 20 ppm error-sensing resistors, and by preaging every RPM unit.

output impedance Maximum values as shown in the table.

remote sensing Terminals for remote sensing are brought out on the terminal board.

multiple operation RPM's may be paired off in series or parallel to achieve additional voltage or current capacities.

ambient temperature Industrial units: 0-50°C operating.

ambient temperature Industrial units: 0-50°C operating. Military units: —20 to +65°C operating. All units: —55° to +85°C storage.

construction One-piece, cast aluminum housing, baked enamel finish. Input and output terminals compactly grouped for access through single, round access hole in chassis. Mounting by four 10-32 screws in any position.

ELECTRONICALLY REGULATED D. C. CONSTANT VOLTAGE POWER SUPPLIES

The output voltage is continuously variable from 200 to 325 volts D.C. for load currents of 0 to 100 M.A. with an input voltage of 105 to 125 volts 60 cycle. Regulation is better than 1%. An isolated A.C. voltage of 6.3 volts at 3 amperes is available at the output terminal connections.

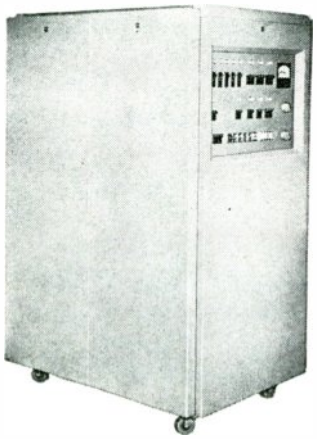
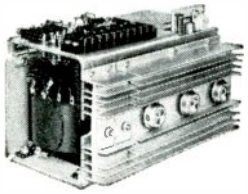
ENGINEERED AND BUILT BY ACME ELECTRIC *Means* DEPENDABILITY

When dependable performance is the major factor, your best source of supply is Acme Electric. We offer the cooperation of an engineering staff well qualified by experience to assist in your design problems. These engineers have at their command all the modern facilities essential to manufacturing magnetic components. We invite your inspection of these facilities.

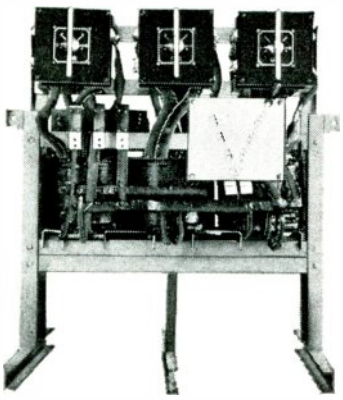
DC REGULATED POWER SUPPLIES



Individually designed to the specific power requirements of the application. Acme Electric designed units are used with electronic business machines, industrial, research and military systems.



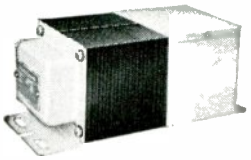
A typical production design incorporating transistorized panel, transformer, saturable reactor, rectifier and components into a compact dependable power supply.

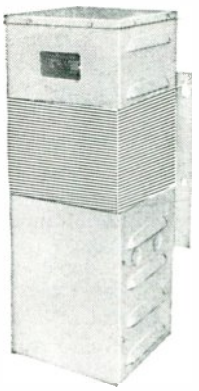


Magnet power supply module designed for an Alternating Gradient Synchrotron research project. Output power rating 175 KW dc. Also available in ratings to 1000 KW dc.

CONSTANT VOLTAGE STABILIZERS

All designs are for continuous duty service with regulation ±1% of normal regardless of variations of input voltage. Current limiting design protects unit against overloads. Available in standard stock models from 15 va thru 2 kva. Primary voltage 95-130; 190-260. Secondary voltage: 6.3; 120; 240. Write for catalog.





MINIATURE AND HIGH TEMPERATURE TRANSFORMERS

Our experience in designing and producing transformers for high temperature operation is of definite value if you need a supply source for such components. Several hundred designs have been produced successfully. Write for catalog.

BURMAC
FOR THE FINEST IN ELECTRONICS

Serving the radar and microwave industry as a prime source of

- POWER SUPPLIES
- PULSE MODULATORS
- PULSE COMPONENTS

through its integrated laboratory, test and production facilities under the supervision of most competent and creative senior engineers.

Technical data and illustrated literature describing Burmac equipment now reliably operating in universities, government installations and major corporate areas throughout the country is available.

Special attention particularly given to unique application problems. Contact our representative in your area or our Development Staff direct.

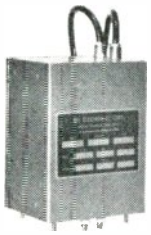
HIGH VOLTAGE EQUIPMENT by

All Del products represent the ultimate in quality. Their design and manufacture incorporate only the finest materials and workmanship to assure thoroughly dependable operation in industrial and research applications.

Standard Power Supplies and Transformers are available from stock. Others can be built to your specific requirements with output up to 250 KV and 50 KW.

POWER SUPPLIES



COMPACT HIGH VOLTAGE POWER SERIES

Model No.	Output Voltage	Rated Current	Dimensions	Wt.
2.5—2—1	0—2.5KV	2MA	3" x 2½" x 4½"	3⅜
5—2—1	0—5KV	2MA	3" x 3½" x 4½"	4¼
10—1—1	0—10KV	1.25MA	3" x 3½" x 4⅞"	5½
15—1—1	0—15KV	1.25MA	4¼" x 5⅛" x 5¾"	11¾
20—1—1	0—20KV	1.25MA	4¼" x 5⅛" x 6¾"	14¾
25—1—2	0—25KV	1.25MA	4¾" x 6" x 7¼"	20
30—1—2	0—30KV	1.25MA	5" x 6½" x 7¾"	24¼
40—2—1	0—40KV	2MA	8¼" x 6¼" x 7"	32

These supplies feature reversible polarity, low ripple, shielded polyethylene output cables, selenium rectifiers in an epoxy filled hermetically sealed can. Extremely compact design for mounting on chassis. Input: 115 V—60-400 cycles. High current units also available.

METER MULTIPLIERS

Del Electronic's line of multipliers are designed and built to provide high voltage DC measurements with safety and minimum corona at reasonable cost. Each unit consists of resistors immersed in high grade insulating oil and hermetically sealed grounded case. A neon lamp is permanently connected across the meter terminals for safety. All units are designed for use with 100 ua full scale meter. Can be furnished with panel type 4½" rectangular 100 ua meter (2% accuracy), with KV scale to match.

Type	Maximum Voltage in Kilovolts	Case Dimensions (Max.) W	D	H	Insulator Height

These fully instrumented D.C. Power supplies feature unexposed high voltage components. H.V. components immersed in tank filled with high grade insulating oil and large, easy-to-read KV and MA meters mounted on front panel, and many other control features.

REGULATED POWER SUPPLIES

HIGH VOLTAGE

TRANSISTORIZED SERIES TRHV

INPUT: 115 V 60 CYCLES

The TRHV line is the result of a new approach to an old problem. These power supplies are all solid state. Reference and regulating circuitry is accomplished at low voltage. Units are completely self-contained and require only 115V A.C. excitation to be operative. Series TRHV are rugged and feature good line, load and thermal stability. Operating temperature range is —20°C to +55°C. Also available for 400 cps operation.

60V—7.5—1	0—60	0—7.5	1% or 60MV	1% or 60MV	3MV RMS

SCR TYPE—Silicon Controlled Rectifier Regulator

Designed to supply well regulated DC at high current. In wide usage where ripple and response time characteristics are not too critical. Intended to replace the older, more cumbersome magnetic amplifier types.

MODEL SCR	OUTPUT VOLTS	OUTPUT AMPS	STATIC REGULATION 105V-125V Line	STATIC REGULATION N.L. to F.L.	RIPPLE
32V—15A—1	0/16	16/32	0—15	5% or 150MV	5% or 150MV	200MV RMS
60V—7.5A—1	0/30	30/60	0—7.5	5% or 300MV	5% or 300MV	400MV RMS

SILICON AND SELENIUM
DC POWER SUPPLIES

MODEL G50-50R: Input 220V, 3P 60cps. Output 0-50VDC, 0-50A.
MODEL G30-100: Input 220V, 3P, 60cps. Output 0-30VDC, 0-100A.
AIRCRAFT BATTERY ELIMINATOR: Input 220V 3P 60cps. Output 0-30VDC 200A.
AIRCRAFT BATTERY ELIMINATOR: Rack or Bench. Input 115V, 60cps. Output 0-30VDC, 0-20A. **Price $200.**
REGULATED POWER SUPPLY. Input 115V, 60 cps. Output 5-30VDC, 0-40A, Regulation ±1%
MODEL GX-24-1: Input 115V, 60cps. Output 24VDC, 1A.
PORTABLE BATTERY CHARGER: Input 115V 60 cps. Output 6, 12 VDC 20A.
MODEL G92F: Input 115V, 60cps. Output 0-30VDC, 0-10A. **PRICE $145.**
MODEL A10: Input 115 or 230V, 60cps. Output 115V, 125W. **PRICE $63.**
MODEL G30-40F: Input 115 or 230V, 60cps Output 0-32VDC, 0-40A. **PRICE $325.**
MODEL G30-10FR: Input 115V, 60cps. Output 0-30VDC, 0-10A. **PRICE $185.**
MODEL GX30-10: Rack. Input 115V, 60cps. Output 30VDC, 0-10A. **PRICE $125.**
MODEL G48-6FM: Rack. Input 115V, 60cps. Output 0-48VDC, 0-6A. **PRICE $190**
MODEL GS 14-15F. Input 115V, 60cps. Output 0-14VDC, 0-15A. **PRICE $125**
MODEL GX30-5: Input 115V, 60cps. Output 30 VDC, 0-5A. **PRICE $70.**
MODEL G-115: Input 115 or 230V, 60cps. Output 0-32VDC, 0-50A. **PRICE $375.**
MODEL G94F: Input 115V, 60cps. Output 0-300VDC, 0-1A. **PRICE $240.**
MODEL GX30-20: Input 115V, 60cps. Output 0-34VDC, 0-20A. **PRICE $185.**

Other models plus full line of plating power supplies also available.
Catalog material available.

Additional features: meters, rated for continuous duty, excellent regulation and ripple, heavy duty components and construction, special designs at small additional cost.

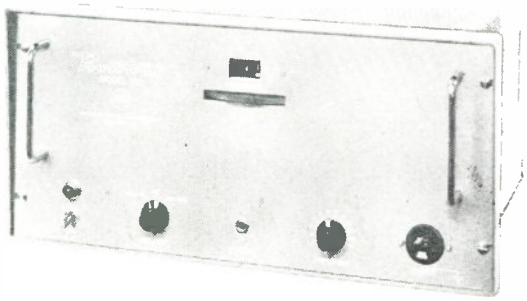
NEW Powertron
AC ELECTRONIC GENERATOR

MODEL 150
$525.00



PRECISION AC POWER SUPPLY FOR LABORATORY & PRODUCTION USE

SPECIFICATIONS

Power Output	160 V.A.	Total Distortion	Less than 1%
Fixed Frequency	400 CPS (other freq. avail.)	Regulation	Less than 1%
Variable Frequency	350-450 CPS	Operates with load of any power factor	
External Frequency	50-4000 CPS	Small size	8¾" x 19" Panel

Also Available — Model 250 — 250 VA Power Output

Representatives in Principal Cities

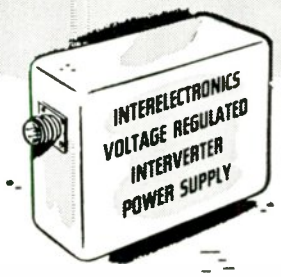
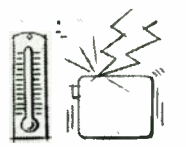
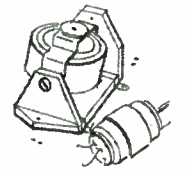
Guildline Instruments, Ltd., Canada, 45s

PROVEN RELIABILITY—
SOLID-STATE POWER INVERTERS
over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—







Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. Wide input range (18 to 32 volts DC), high conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2% with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards).

Complies with MIL specs. for shock (100G 11 mlsc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (1-26600).

AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit or actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call LUdlow 4-6200 in New York.

INTERELECTRONICS CORPORATION
2432 Grand Concourse, New York 58, N. Y.

kepco®

REGULATED DC POWER SUPPLIES

FEATURING:

ABC GROUP

High-Quality performance at low cost; Portable and rack-mountable for test bench and systems applications.

REGULATION: 0.05%; RIPPLE: 0.5mv rms; voltage/current regulation; remote programming; adjustable current limiting; overload protection.

ABC 30–0.3	0–30v dc @ 300ma	$99.00
ABC 30–0.3M*	0–30v dc @ 300ma	$119.00
ABC 40–0.5	0–40v dc @ 500ma	$139.00
ABC 40–0.5M*	0–40v dc @ 500ma	$159.00

*Suffix "M" denotes metered unit.
Write for complete specifications.

KS GROUP

An advanced semiconductor design for precise, versatile performance in higher current ranges.

REGULATION & STABILITY: 0.1%/0.01%; voltage/current regulation; remote programming; current limiting; overload protection.

KS 36–30	0–36v dc @ 30amp
KS 36–30M*	0–36v dc @ 30amp
KS 36–30X**	0–36v dc @ 30amp
KS 36–30MX	0–36v dc @ 30amp

*Suffix "M" denotes metered unit.
**Suffix "X" denotes 0.01% Regulation.
Write for complete specifications.

PR GROUP

A flexible new general-purpose line of semi-conductor power supplies. Adjustable wide-range outputs.

± 1% line regulation; semi-regulated for load. Many standard modifications available.

FOR COMPLETE SPECIFICATIONS ON MORE THAN 175 STANDARD MODEL POWER SUPPLIES, SEND FOR KEPCO CATALOG B-611.

World Radio History

PARTS ARE PART OF CUSTOM POWER...
BUT THE BIG PART IS BRAIN POWER

NJE leads the custom power supply field because of its unparalleled engineering experience... experience that turns simple hardware into sophisticated power sources for computers, military equipment and systems for automation.

Very often your supply must be designed from the ground up, with specialists attacking a completely new problem. In other cases, we can modify an existing design to fit your needs in order to speed delivery and reduce costs.

NJE's completely new plant includes all research and development, engineering, crafting, sheet metal work, stock, painting, meter calibration, transformer production, assembly and testing — all under one roof!

Here are just a few of the leading projects now using NJE power supplies and systems: ■ U. S. Navy computer memory power supply ■ "Hustler" ground support power supply system ■ Radar system power supply ■ Hawk missile check-out ■ F-105 flight simulator power supply system ■ Atlas missile check-out ■ Nike Zeus.

For complete details on custom designs and a catalog on one of America's widest line of standards, write today!

NJE CORPORATION

For *Constant Current*

0.01 μ amp. - 30 amp.

- For diode aging and life test
- For diode PIV test
- For transistor avalanche test
- For gyro torquer supply
- For calibration

North Hills **CURRENT GOVERNORS** are widely used by manufacturers and users of current sensitive devices. Of particular interest is the programmable feature in all models, since the current may be electronically pulsed, modulated or programmed.

Features included are as follows: Constant current over wide voltage range, high accuracy and stability, rapid manual or automatic selection of desired current level, current may be electronically pulsed, modulated, and programmed, inline readout, chopper amplifier, temperature compensated sampling resistors and reference elements, oven controlled reference, and use of high quality components and workmanship throughout.

Applications include forward and reverse testing of diodes, measurement and testing of gyro torquers, transistors, clutches, solenoids, magnetic cores, batteries, fuses, meters, bolometers, thermistors, precision light filaments, transducers, potentiometers, relays and other current sensitive devices.

Our staff engineers are always available for consultation on any current control problems you may encounter. Why not call today?

Model (No. all units operate from 115 V AC ± 10%)	Regulated Output Current	Output Voltage	Regulation Load and Line	Absolute Accuracy	Stability Short Term	Ripple (RMS)	Size Rack Mounted W"H"D"	Net Wgt	Typical Application

RECOGNIZED RELIABILITY

CONSTANT | VOLTAGE / CURRENT

from the SAME TERMINALS *with* AUTOMATIC TRANSFER TO EITHER MODE

The Power Designs Models 4005 and 2020 Power Supplies add a new dimension to the application of d-c sources for laboratory instrumentation. Truly universal, these instruments may be operated as a *constant voltage* source, a *constant current* source, a *constant voltage* source with *adjustable current limiting* or a *constant current* source with *adjustable voltage limiting*.

The Models 4005 and 2020 employ solid state devices exclusively in a proprietary circuit trademarked AMBITROL.*

*TM

AMBITROL* is a dual regulator system permitting continuous control of voltage or current with automatic electronic cross-over to either mode of operation.

These supplies also feature remote voltage programming, remote current programming, dual concentric controls for coarse and fine adjustment of voltage or current and the HEATRAN® circuit for electronic control of power transistor dissipation.

MODEL 4005

CONSTANT VOLTAGE

Range: 0-40 vdc, 0-0.5 amperes, cont. adjust.

Regulation: .05% or 10 millivolts max. for line or load variations.

Ripple: .0005% or 250 microvolts maximum.

Response Time: Less than 50 microseconds.

Source Z: 0.1 ohms to 20 kc, 0.7 ohms to 1 mc.

CONSTANT CURRENT

Range: 25 to 500 milliamperes, cont. adjust.

Regulation: .02% or 100 microamperes max., for line or load variations.

Voltage compliance: Output current constant to full rated output voltage of 40 volts.

Ripple Content: .005% or 20 microamperes max.

Source Z: 400,000 ohms approximately.

MODEL 2020

CONSTANT VOLTAGE

Range: 0-20 vdc, 0-2 amperes, cont. adjust.

Regulation: .05% or 10 millivolts max. for line or load variations.

Ripple: .0005% or 250 microvolts maximum.

Response Time: Less than 50 microseconds.

Source Z: 0.1 ohms to 20 kc, 0.7 ohms to 1 mc.

CONSTANT CURRENT

Range: 25 ma to 2.0 amp., cont. adjust.

Regulation: .05% or 250 microamperes max., for line or load variations.

Voltage compliance: Output current constant to full rated output voltage of 20 volts.

Ripple Content: .01% or 25 microamperes max.

Source Z: 100,000 ohms approximately.

PRAXICON

The PI-9000 Series Power Supplies of which Model PI-9028 is illustrated, utilize an advanced technique for obtaining regulated DC Power at extremely high efficiency by means of switching circuitry which takes energy from the AC source in discrete pulses. These pulses are integrated by the regulator system to supply the load demand. Regulation is achieved by electronic control of pulse amplitude, pulse width, and pulse repetition rate.

PI-9028 2-28 VDC at 2 AMP. **$99.50**

Constant Current Supplies

RI-081	0-81 Ma	0-1000V
RI-234	0-230 Ma	0-350V

A series of high-voltage power supplies providing a stable and ripple-free high-voltage output over a wide range, practically independent of line voltage input or load current variations.

These supplies are completely self-contained and AC operated, and compactly housed in ventilated cabinets designed for either relay-rack mounting or bench use. All operating controls are mounted on front panel; output terminals and input power connection on back.

High-voltage rectifier is a full-wave silicon doubler. Output voltage is continuously variable over entire range in each case, usually variable stepwise in conjunction with a vernier control.

Among special features are molded components — rectifiers, transformers, etc. — cast in epoxy resin, for superior insulation and trouble-free performance.

Any of these supplies can be modified by using meters, polarity switches, co-ax connectors, wire-wound resistors, etc. — or special designs can be built to meet specialized requirements.

The range of any of these supplies can be made to start at zero voltage.

Features

Either positive or negative of any supply may be grounded

Regulation: .01 to .001%

Line Stability: .05 to .005%

Long-term Stability: .01-.05% per hour, about 0.1% per day

Impedance: 1 to 5 Ohms

Ripple: 0.5 to 3 Mv P-P

Standard tubes used

Millimeter Wave Generators

FROM MILLIWATTS TO KILOWATTS

HIGH VOLTAGE POWER SUPPLIES AND EQUIPMENT

We have sold quantities of these power supplies to laboratories, industrial concerns, the government and universities. Only the best available selected material goes into these units, so that you will have many years of dependable service. Only a few of our standard models are shown below. Quotations on special supplies cheerfully given.

PRECISE MEASUREMENTS COMPANY

HIGH VOLTAGE POWER SUPPLIES

One of the most popular power supplies on the market. Completely redesigned for greater ruggedness and convenience of operation. Widely used for powering electronic equipment and for routine breakdown and insulation testing. Output voltage is well filtered D.C. which is adjustable with convenient front panel control. Input is 115 Volt 60 cycle A.C. Larger 6" precision 1% mirror scale movement available on order. Regulated models offer closely stabilized output voltage regardless of line or load changes

Model	Max. Voltage	Regulated 100 Microamps	Unregulated 1 MA.	Unregulated 5 MA.
6000-1	1,000		$150.00	$200.00
6000	2,500	120.00	175.00	225.00
6005	5,000	135.00	200.00	250.00
6010	10,000	145.00	225.00	275.00
6015	15,000	155.00	250.00	300.00
6025	25,000	205.00	275.00	350.00

Note. Regulated power supplies are of the radio frequency type and adjust from approximately 20% to full rated voltage. The 1 and 5 milliampere types are transformer operated and have a range of zero to full voltage output. These are recommended for industrial service applications.

Mirror Scale Higher Accuracy Meter. Recommended for more exact calibration or test purposes. Add $50.00 to any meter equipped power supply

For additional built-in current meter (both meters are 3 inch size), including automatic meter protector circuit, add $50.00 to any power.

INDUSTRIAL POWER SUPPLIES

Regulated Types Available

Standard hum level 5% or less. .01% to 1% ripple available. All power supplies have automatic overload cutout control circuits. Regulated models available.

These industrial type power supplies are built for service and efficiency. All are of the transformer type and employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is greatly simplified and a number of safety features are built in for maximum protection of personnel and equipment. Output is continuously variable from zero to full rated value. Polarity reversing models (as illustrated) can be had at additional cost.

Model	Voltage	Current	Price
F-500V	0-500	3 Amp	$800.00
F-6001	0-1000	2 Amp	975.00
F-6002	0-2000	1 Amp	985.00

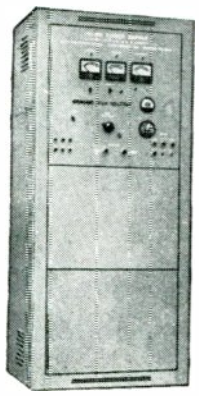
F-6050-T	0-50,000	½ MA	600.00
F-6100-T	0-100,000	½ MA	1100.00

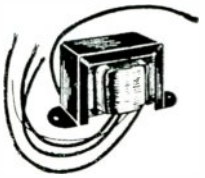
HEAVY DUTY POWER SUPPLIES



For use in applications where high voltages at extra high currents are required. Illustrated is our 100 KW Model, rated for 0 to 7,000 Volts at 14 Amperes DC. This unit is housed in a single convenient cabinet. Output voltage is regulated against line and load changes. Voltage is smoothly adjustable from zero to full output. Automatic circuits protect against overvoltage or over current conditions, turning off main power in a split second. Use of special transformer construction allows constant load drain at full rated output. All power supplies in this series are available with fixed or adjustable output and with or without regulation.

Model	Voltage	Current
A-10	0-1000	5 amperes
A-30	0-3000	5 amperes
A-31	0-3000	10 amperes
A-32	0-3000	20 amperes
A-50	0-5000	5 amperes
A-51	0-5000	10 amperes
A-72	0-7000	15 amperes
A-100	0-10,000	5 amperes
A-110	0-10,000	10 amperes
A-300	0-30,000	5 amperes

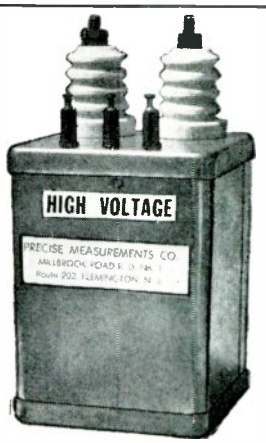
TRANSFORMERS, HIGH VOLTAGE



For experimental, industrial, or production use. These units are small and compact and rated for constant service. Primary designed for 115 Volts, 60 Cycle. Secondary is isolated. Only standard models are listed. We can wind specials for any frequency or voltage. Metering windings available.

Model	Voltage	Model	Voltage
1 KVT	1 KV	10 KVT	10 KV
2 KVT	2 KV	15 KVT	15 KV
3 KVT	3 KV	25 KVT	25 KV
5 KVT	5 KV	50 KVT	50 KV

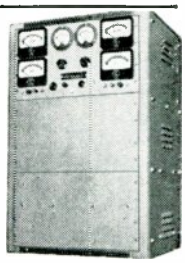
PACKAGED POWER SUPPLIES



These conveniently packaged power units will be found ideal for applications requiring minimum size and weight. Features isolated high voltage terminals permitting either the positive or negative side to be grounded. Rectifier tubes are operated from separate filament transformers so that DC output voltage can be varied from zero to full rated value. Selenium rectifier types have extra cells to assure operation under high line voltage or light loading. All standard units have well filtered DC output. Power packs with AC output available on order.

Model	Output Voltage	Current	Model	Output Voltage	Current
05-KV-5MA	500 Volts DC	5 Ma.	20-KV-1MA	20 KV DC	1 Ma.
1-KV-5MA	1 KV DC	5 Ma.	20-KV-5MA	20 KV DC	5 Ma.
2-KV-5MA	2 KV DC	5 Ma.	30-KV-1MA	30 KV DC	1 Ma.
5-KV-1MA	5 KV DC	1 Ma.	30-KV-5MA	30 KV DC	5 Ma.
5-KV-5MA	5 KV DC	5 Ma.	50-KV-1MA	50 KV DC	1 Ma.
10-KV-1MA	10 KV DC	1 Ma.	50-KV-5MA	50 KV DC	5 Ma.
10-KV-5MA	10 KV DC	5 Ma.	75-KV-1MA	75 KV DC	1 Ma.
15-KV-1MA	15 KV DC	1 Ma.	100-KV-1MA	100 KV DC	1 Ma.
15-KV-5MA	15 KV DC	5 Ma.			

CONSTANT CURRENT POWER SUPPLIES



Designed for application where output current must remain constant regardless of loading resistance changes. Used for magnet fields, plating applications, gaseous lamps. Dependable magnetic current stabilizer has no moving parts, no tubes, no transistors to replace. Simply set current to desired level, no balancing or other adjustments needed. Ideal for lamp operation since operating state ionizing voltage in no way affects lamp current. Standard hum level 5%. Lower hum levels available on order.

Model	Maximum Voltage	Maximum Current
C-25-700	25 Volts	700 Amperes
C-70-70	70 Volts	70 Amperes
C-500-10	500 Volts	10 Amperes
C-Duel 500-10	500 or 1,000 Volts	10 or 20 Amperes
C-800-2	800 Volts	2 Amperes
C-1000-100	1000 Volts	100 Amperes

Duel 500 V - 500 V, 10 Ampere Power Supply. Isolated outputs may be seried or paralleled.

AC INSULATION AND BREAKDOWN TESTERS

Used in testing insulation where AC voltages are desired. Dual instruments are also available which provide choice of AC or DC output with simple toggle switch selection. Units include kilovolt-meter, current meter and automatic overload cutout circuits.

Model	Voltage	VA	Price AC	Price AC and DC
3000	0 to 3,000	75	$150.00	$ 250.00
3010	0 to 3,000	300	250.00	400.00
3050	0 to 3,000	1,500	500.00	650.00
3100	0 to 6,000	3,000	700.00	1,100.00
5000	0 to 5,000	75	175.00	300.00
1000	0 to 10,000	75	200.00	350.00
1500	0 to 15,000	75	250.00	AC only
2500-AC	0 to 25,000	75	400.00	AC only
2500-DC	0 to 25,000	75	DC only	400.00

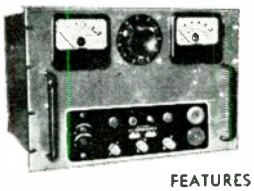
15	TR40	8¾"	19"	14"	C

FEATURES

- Transistorized.
- Regulation ±½% line and load.
- Remote Sensing.
- Zener Diode Reference.
- Short Circuit Protection.
- Controls include power swirch, fuses, pilot light, main voltage control and vernier, and output binding posts.
- 2% Accuracy Panel Meters.
- Vacuum Varnish Impregnated Magnetic Components.

Bulletin No. 105

NEW! 0-32 V.D.C. 100 Amps.



1% Ripple

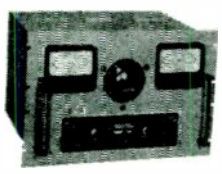
Input: 208 V.A.C., 60 Cycles, 3 Phase

Model KM100

FEATURES

- Only 12¼" H x 19" W x 17" D.
- Fully self-protecting circuit.
- Magnetic contactor starting.
- Adjustable D.C. overcurrent control.
- Overload indicator and reset button.
- 4½" Rect., 2% Acc. Meters.
- Silicon Type Rectifiers.
- Regulation: 1/10 Load 35 Volts.
  Full Load 32 Volts.

Bulletin No. 104



AIRCRAFT BATTERY SUBSTITUTE

Specifically designed to operate rotating equipment

OUTPUT: 0-30 V.D.C., 20 Amperes.
RIPPLE: Less than ½%.
INPUT: 115 V.A.C., 60 C.P.S. 1 ϕ.
REGULATION: 1/10 Load 35 Volts
Full Load 30 Volts

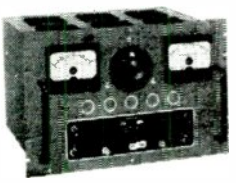
FEATURES: Ammeter overcurrent protection circuit prevents needle 'slam' when starting inverters & motors.

MODEL KM88.....Rack Mount
MODEL KM88D.....Rack Mount with Dust Cover
MODEL KM88B. ...Bench Cabinet

Bulletin No. 100B

NON-DESTRUCTIVE INSULATION TESTER

Voltage Range:
0-5 KVAC RMS Continuously Adjustable
Controls:
Power Switch, Test Voltage Adjust., H.V. Circuit Breaker Trip Adj. Calibrated 10ua to 3000ua. Guard Circuit "ON-OFF", Leakage Indicator Lamp, Leakage Reset and Pilot Lamp. (Internal Audible Alarm)
Input:
115 VAC 60 cycles, single phase
Size/Wt:
7½" W x 3⅛" D x 8½" H — 4½ lbs.
MODEL HV 53
Bulletin 1400



DUAL RANGE POWER SUPPLY

OUTPUT: 0-32/64 V.D.C., 40/20 Amps.
RIPPLE: 0.3% R.M.S.
INPUT: 115 V.A.C., 60 C.P.S. 1ϕ.
FEATURES: Thermal overload protection, indicating line and load fuses, overload warning light, dual range voltmeter.
MODEL KM95....Rack Mount
MODEL KM95D..Rack Mount with Dust Cover
MODEL KM95B..Bench Cabinet

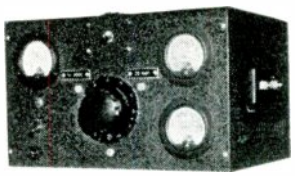
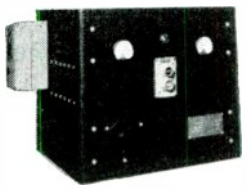
REGULATED DC POWER SUPPLIES



Silicon-Selenium

MAGNETIC AMPLIFIER ± 1% Voltage Regulation

- Greater reliability
- Fast response time
- Greater stability
- Operable under extreme environmental conditions
- No tubes—no warm-up
- Highly efficient



Models available: from 5 amperes to 1500 amperes, 6 volts to 250 volts.

DC TO DC HIGH VOLTAGE UNITS

THE VARIA•VOLT "KING"

THE VICTORY 16KV INFRA-RED POWER SUPPLY

Small but potent. So small that it—and the flashlight battery that powers it—can fit in the palm of a man's hand. This new power supply is designed for use with infra-red equipment which enables military men to work and fight at night. Only one inch in diameter and two and one-half inches long, it is capable of maintaining an output of 16,000 volts. Encapsulated for maximum moisture and humidity protection. Durable nickel plated finish.

ELECTRICAL SPECIFICATIONS

Power supply operates from one "C" cell (1.52 VDC) battery.
Voltage output 15,800 to 16,000 when loaded 1×10^{-9} Amps.
At a load of 1×10^{-7} amps the voltage change is not more than 300 VDC.
At a load of 5×10^{-7} amps the voltage is not less than 15,000 VDC.
Input current at 10^{-9} amps is less than 26 MA.
Ripple at 70°F is not greater than 1%
Voltage rise is in not more than 5 seconds.
Voltage will rise under load to a min. of 15,000 VDC when loaded 3×10^{-7} amps.
Physical size 1.000" dia. × 2.410" long.
Negative output from a special High Voltage Header.
- 10KV, 12 KV and 20 KV units available upon request

THE NEW VARIA•VOLT

A HIGHLY EFFICIENT AND ADJUSTABLE TRANSISTORIZED HIGH VOLTAGE UNIT

FEATURING:
Improved Load Regulation
Improved Temperature Stability (E out ± 10% 0°C-50°C)

- Miniaturized
- Rugged Design to Meet MIL-E-5272
- Encapsulated for Maximum Moisture and Humidity Protection
- Output Voltage Adjustable
- Isolated DC Input and Output
- Output up to 3KV
- May be Powered by Flashlight or other standard cells
- 7 Pin Miniature Connector—Glass to Metal Hermetic Seal
- Enamel Finish to MIL-E-15090B Except for Color
- Can be used with standard MIL approved 7 Pin Miniature Tube Clamps to lock in position for extreme shock or vibration applications
- Silicon Rectifiers

NO TALLER THAN A CIGARETTE
diameter 1.000"
overall length 3.437"
case length 3.000"
average weight 4 oz.

HIGHLY REGULATED AC TO DC UNITS • VICTORY VARIANTS

NOW for the first time through Victory's advanced electrical and mechanical design—a new power supply. Operate the power unit at 1% regulation, remove the operating key and add either a .25% or .05% regulator.

Operating key and special connector design permit complete interchangeability. This allows you to change regulation without any change of wiring or removing supply from its mounting position.

FEATURES

- Encapsulated Transformer and Choke for maximum moisture and humidity protection.
- Output voltage variable for 5% minimum adjustment on models using regulators.
- Aluminum construction for lightweight and maximum corrosion resistance.
- Isolated AC input, DC output.
- Victory specifications are conservative. Derating is not necessary.
- Remote sensing.
- Heat dissipating thermal design. (No heat sink required even at elevated temperatures).
- Short Circuit protected output.
- Overload protected output.
- Rugged design to meet MIL-E-5272.
- Regulators of complete semiconductor design.

- No Down Time
- Maximum Reliability
- Ruggedness
- Flexibility
- Advanced Electrical Design
- Advanced Mechanical Design

PAT. APP. FOR

Power unit can operate separately as a line regulator ± 1%.

Regulator can operate separately for line and load when supplied a DC input voltage

Combined sections form a highly regulated power supply for line and load and can operate without an additional heat sink.

PHYSICAL SIZE
$4\frac{13}{16}$"x$4\frac{1}{2}$"x$1\frac{1}{2}$"H

"WE KNOW HOW"

VICTORY ELECTRONICS, Inc.

50 BOND STREET, WESTBURY, L. I. EDGEWOOD 4-8892-7-8

DC TO AC
THE VARIA-VERTER

HERE'S THE ANSWER to industry's increasing need for compact, economical, versatile and reliable sources of 400-cycle power for testing and operation of aircraft and missile components.
WITH VARIA-VERTER, you buy only the power-source you currently need—yet you can easily and inexpensively convert or expand as your needs alter and increase. If a present application, for instance, requires only 25 volt-amperes, you can fulfill that requirement with minimum investment . . . yet with assurance that you will NOT have to purchase an additional, costly regulator if you later need to "step up" to 50 or 100 v.a.

ONLY VARIA-VERTER OFFERS ALL THESE FEATURES

- Encapsulated transformer for maximum moisture humidity protection.
- Isolated input and output.
- Aluminum construction for lightweight and maximum corrosion resistance.
- Complete semi-conductor design.
- Victory specifications are conservative. Derating is not necessary.
- Short circuit protected output.
- Frequency is adjustable for a minimum of 5% (regulated models only).
- Can be operated on resistive or inductive loads.
- Modular structure for interchangeability of the regulator to power unit means greater reliability.
- Heat dissipating thermal design. No additional heat sink required.
- Rugged design to meet MIL-E-5272.

THE VARIA•VERTER

Physical Size $4\frac{1}{2}$"x$4\frac{13}{16}$" x$1\frac{7}{8}$"H

3 Highly Regulated Inverters With One Separate Regulator

Other models available upon request

BECAUSE the Regulator (upper unit) is an integral, independent subcomponent, increasing your power output is now as easy as changing a radio tube! When you go from 25 to 50, or 100 VA, you merely replace the power unit—the old regulator is easily connected to the new power unit, with virtually no downtime—means greater reliability and versatility.

MODEL: ELECTRICAL SPECIFICATIONS
DA 115X-.2R— 25V.A.
(Regulator DA 115XR + PWR Unit DA 115X .2B)
DA 115X-.5R— 50V.A.
(Regulator DA 115XR + PWR Unit DA 115X . B)
DA 115X-1R—1005V.A.
(Regulator DA 115XR + PWR Unit DA 115X .5(B)
INPUT: 24 to 30 Volts D.C.
OUTPUT: 115 Volts A.C. 400 C.P.S. Square Wave
FREQUENCY REGULATION: ±1% Line and Load
VOLTAGE REGULATION: ±2.5% Line or Load

INVERTER

Physical Size $4\frac{1}{2}$"x$4\frac{13}{16}$" x$1\frac{7}{8}$"H

Model: DA 115X—1
Input: 28 Volts D.C.
Output: 115 Volts A.C. 400 C.P.S. square wave, unregulated, 100 V.A.

AC TO DC POWER SUPPLY

Physical Size 5⅝"x5⅞" x5⅞"H

Model: AD 28—5
Input: 115 Volts A.C. 60 C.P.S.
Output: 28 Volts D.C. 5 Amp. (Regulation Line or Load ±2%)

FREQUENCY CHANGER

Physical Size 5⅝"x5⅞" x7⅝"H

Combination 100VA Inverter and a 28 VDC supply

FOR CONVERTING 60-cycle, single-phase, power-line current to 400 cycles, the two sections shown are used together. For field-testing away from the power line, or for other applications where the source must be 28-volt d.c., the lower section is used. The upper section, by itself, is an unregulated d.c. to a.c. inverter! (115V 400 cycle Square wave) combined they form a frequency changer.
Model: DA—115X—1 + AD 28—5—100V.A.
Input: 115 Volts A.C. 60 C.P.S.
Output: 115 Volts A.C. 400 C.P.S. Square Wave, Unregulated

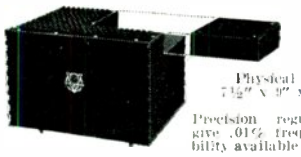
WIDE RANGE SINE WAVE INVERTER

SEPARABLE REGULATOR CAN BE USED ON SINE WAVE OR SQUARE WAVE VARIA-VERTER



Physical Size 7½" x 9" x 6" H

Precision regulation to give .01% frequency stability available on request.

ELECTRICAL SPECIFICATIONS

INPUT: 18-31 VDC Output frequency: 400 cycles
OUTPUT VOLTAGE: 115 VAC
OUTPUT POWER: 100 VA
VOLTAGE REGULATION: ±3%
FREQUENCY REGULATION: ±1%
HARMONIC DISTORTION: 4% max.

In Addition To The Regular Features of VARIA-VERTERS, Added Advantages Of The VARIA-VERTER SINE WAVE INVERTER Are:

- High Efficiency
- Low Harmonic Distortion
- Operation Over Wider Range Of Input Voltage
- Voltage And Frequency Regulation
- Independent Adjustment Of Voltage And Frequency
- Separable Regulator

DC TO DC CONVERTERS

STATIC MOUNT TO MOUNT REPLACEMENTS FOR DYNAMOTORS

Model pictured has triple output:
1—250 VDC-250 MA
2— 45 VDC- 10 MA
3—115 VAC 400 cycle square wave 30 VA rating. Frequency is regulated to ± 3%. Input 24-30 VDC

Transistorized mount to mount dynamotor replacements offer these advantages:

- Lighter weight
- Higher efficiency
- No brushes
- Improved reliability
- Low starting current
- Instantaneous starting
- No commutator problem at high altitude
- Reduces ambient temp. in equipment
- Longer life
- No maintenance
- No moving parts

DIRECT REPLACEMENTS for VIBRATOR POWER SUPPLIES and GENEMOTORS

PHYSICAL SIZE
3½"x2⅝"x2½"H

Model pictured
150 volts 300MA

Offering these advantages:

- High efficiency (up to 90%)
- Low starting current
- No maintenance
- Improved reliability
- No moving parts
- Light weight

Power ratings up to 50 watts
Ripple less than 1% RMS
Inputs available: 12 or 28 VDC

Available in any voltage from 100 VDC to 400 VDC (tolerance of output voltage 5%)
Higher power units up to 1000 watts on special order.
Other input and output voltages upon request.

DYNAMŪ® magnetic recording heads by Maico

There's a DYNAMŪ recording head to fit almost any production application. Maico engineers have designed them in a choice of frequency responses to fit any application from dictating machines to professional high-fidelity equipment. DYNAMŪ heads come in sizes and mountings to fit commonly used brackets. They use common impedances (which can be varied if desired).

DYNAMŪ's careful manufacturing and 100% inspection, with the resulting closely held tolerances, virtually eliminate rejections on your production line. Long life is built in, particularly in the metal-faced models designed for long, continuous use. Frequency response is stable because of the balanced design of DYNAMŪ heads.

DYNAMŪ erase heads, also designed to fit existing circuitry and hardware, provide clean erasure with low current requirements.

NOTES: All the above heads can be supplied with different impedances and lead lengths. Specifications are subject to change for product improvement without notice.

CUSTOMIZED MODIFICATIONS of standard DYNAMŪ heads can be made to meet your special requirements for commercial recorders. Maico also supplies special DYNAMŪ heads for telemetry, digital or other military and industrial instrumentation applications. We welcome an opportunity to consult with you on any special requirement you have.

Bradley®
PRODUCT

tailored to your specifications

12 ampere stud silicon rectifiers (USAF) IN1199-IN1206

Bradley silicon rectifiers are designed for wide ranges of application. This new 12 ampere stud silicon rectifier, qualified to MIL-E-1/1108, is available with ratings from 50 to 600 volts. These 12 amp. diodes are also available in high voltage assemblies with compensating networks of resistors and capacitors (for example, 50,000 volts at 3 amps.), as well as in standard and special configurations. This development brings the industry still another product in the ever increasing Bradley line of silicon, selenium and copper oxide rectifiers and diodes. Data sheets available on request.

HIGH VOLTAGE CARTRIDGE TYPE RECTIFIERS

The NAE cartridge type rectifiers are designed for applications requiring up to 26,000 volts and for currents up to 250 milliamperes. They are fabricated from series connected high PIV junctions and hermetically sealed in ceramic tubes for easy fuse clip mounting

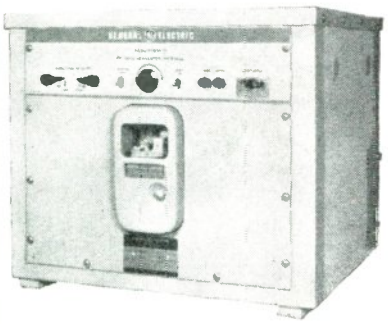
For Electronic Applications



RELIABLE

General Electric Inductrol* Induction Voltage Regulators

General Electric's complete line of 50-, 60-, and 400-cycle Inductrol regulators gives you extra values in *reliability* and *compactness*. In ratings up to 600 volts, 750 load kva—single phase, and up to 2000 load kva—three phase, you get these special features:

- **SIMPLE, NO-BRUSH DESIGN**—fewer maintenance problems.
- **HIGH SHORT-CIRCUIT STRENGTH**—will withstand up to 25 times normal current, for 2 seconds.
- **HIGH OVERLOAD CAPACITY**—will withstand up to 100% overloads for one hour.
- **HIGH EFFICIENCY**—97% to over 99% at full load.
- **NO HARMFUL WAVEFORM DISTORTION.**
- **ECONOMICAL, COMPACT DESIGN**—requires less floor space.
- **DRIFT-FREE CONTROLS**—voltage automatically held to ± 1% bandwidth.

FOR MORE INFORMATION about General Electric's complete line of Inductrol regulators, contact the voltage regulator representative at your nearby General Electric Apparatus Sales Office. Or, write to General Electric Company, Section 998-45, Schenectady 5, New York.

*Registered trade-mark of General Electric Co.

"Guess They Forgot the Surgistor"

MORE FAILURES of electronic equipments are caused by the destructive inrush surge currents at "Turn On" than any other factor.

A SURGISTOR connected in series with either the AC power line or the filament supply will effectively cushion the starting surge current providing full protection for the equipment. After a 10-15 second Protection Period, the Surge Limiting Resistance is automatically shorted out restoring full voltage to the circuits.

117 Volt Types (AC-DC)

No.	Watts of Load	Starting Ohms	List Price
4125-1	75-150	125	1.95
4100-2	100-275	100	1.95

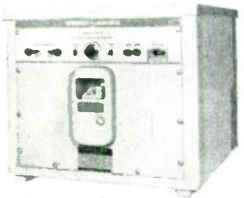
SOLVE YOUR VOLTAGE PROBLEMS WITH
Inductrol* Induction Voltage Regulators



Voltage fluctuations can cause electronic tube failure, make equipment operate erratically, increase replacement parts costs. Inductrol regulators operate on the induction principle. This means precise voltage control and high reliability because **no brushes or tubes** are used. G-E Inductrol regulators are virtually maintenance free.

Inductrol regulator reliability and accuracy of operation can improve the performance of computers, TV transmitters, radio & radar equipment, X-ray equipment, equipment testing devices, and instrument calibration devices.

More information appears opposite G-E listing in this Class No.
*Registered trade-mark of General Electric Co.

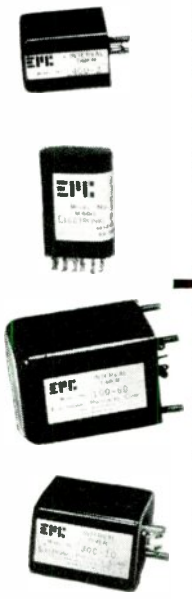
MICRO-MINIATURE • ULTRA-RELIABLE • ULTRA-PRECISION • SOPHISTICATED



SOLID STATE
INTERVAL TIMERS
and
TIME DELAY RELAYS

AVAILABLE FEATURES:
- Time delays from one millisecond to fifteen minutes
- Program timers (multi-outputs) up to several days
- Instant reset • Instant relay turn-on • 18-32 VDC
- Adjustable externally, remotely, or pre-set
- Reverse polarity protected • Temperature compensated
- Noise filtered • Transient suppressed
- Repeat-cycle • Sequencers • Pulsers
- Modules • Multiples
- Positive or negative output • Up to 6 PDT @ 10 amps.
- Variety of sizes, configurations, header styles, & mountings
- Hermetically sealed and potted for shock and vibration protection

. . . Specially designed and manufactured models can be tailored to your requirements thru our field engineering services. Bulletins available. Write today:

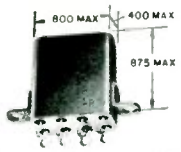
ALLIED CONTROL RELAYS

MILITARY RELAYS

SUBMINIATURE

TYPE KHJ-6D
DPDT ● DC

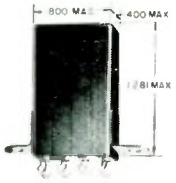


OPERATING CONDITIONS for KHJ-6D

Contact Rating: Low level up to 2 amps. non-inductive at 29 volts d-c or 115 volts a-c. 3 amp. contacts available on request.
Ambient Temperature: —65°C to +125°C
Vibration: 5-28 cps at 0.5 in. double amplitude. 28-2000 cps at 20g.
Shock: 50g operational.
Terminals: 0.2 in. grid spaced plug-in, printed circuit or hooked type solder terminals.

SENSITIVE

TYPE JSH-6D
DPDT ● DC

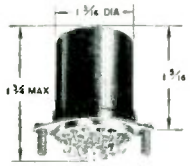


OPERATING CONDITIONS for JSH-6D

Average Pull-in Power at 25°C: SPDT-25 milliwatts; DPDT-40 milliwatts.
Contact Rating: 2 amps. non-inductive at 29 volts d-c or 1 amp. at 115 volts a-c. Low level contacts are available on request.
Ambient Temperature: —65°C to +125°C
Vibration: 5-55 cps at 0.12 in. double amplitude; 55-2000 cps at 20g.
Shock: 50g operational.
Weight: 1.1 ounce maximum.

MINIATURE

TYPE MHJ-18
6PDT ● AC or DC



OPERATING CONDITIONS for MHJ-18

Contact Rating: Low level up to 5 amps. non-inductive at 29 volts d-c or 2 amps. at 115 volts a-c.
Ambient Temperature: —65°C to +125°C
Vibration: 5-28 cps at 0.5 in. double amplitude; 28-2000 cps at 20g.
Shock: 50g standard.
Weight: 4.2 ounces maximum.
AC: This relay is supplied with self contained diodes for 60 to 400 cps operation.

OTHER RELAY TYPES	Electrical Characteristics: Maximum Contact Pile-Up	Contact Rating Amps.	Coil Operation	Max. Basic Dimensions: Width & Length		Seated Height
JH-6D	DPDT	5	DC	.400	.800	.906

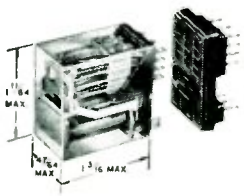
MHY-12	4PDT	10	AC or DC	1.197 dia.		1.328

COMMERCIAL RELAYS

TELEPHONE

TYPE T-154
4PDT ● DC



OPERATING CONDITIONS for T-154

Contact Rating: 2 amps. resistive or 1 amp. inductive at 29 volts d-c or 115 volts a-c. Low level or 5 amp. contacts available.
Nominal Coil Power: 700 milliwatts.
Minimum Coil Power: DPDT-125 milliwatts; 4PDT-300 milliwatts.
Dielectric: 1000 volts rms at sea level.
Terminals: Open relay—plug-in solder lugs or octal plug. Sealed relay—hooked type solder terminals, 14-pin miniature plug or octal plug.
Enclosure: Open, dust cover or hermetically sealed.

OTHER RELAY TYPES	Electrical Characteristics: Maximum Contact Pile-Up	Contact Rating Amps.	Coil Operation	Max. Basic Dimensions: Width & Length		Seated Height
LK	6PDT	2	DC	1.078	1.718	1.890

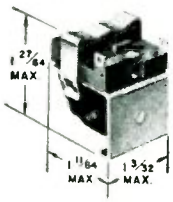
TAH	4PDT	2	DC	.953	1.343	1.593

GENERAL PURPOSE

TYPE FC-3D
SPDT ● DC



OPERATING CONDITIONS for FC-3D

Contact Rating: 2 amps. resistive or 1 amp. inductive at 29 volts d-c or 115 volts a-c.
Nominal Coil Power: 2.0 watts.
Minimum Coil Power: 300 milliwatts.
Capacity: Closed contacts to frame or between open contacts 3.0 mmf; open contacts to frame 1.5 mmf.
Dielectric Strength: 1000 volts rms at sea level.
Terminals: Solder lugs or "Miniature Faston" solderless tabs.

OTHER RELAY TYPES	Electrical Characteristics: Maximum Contact Pile-Up	Contact Rating Amps.	Coil Operation	Max. Basic Dimensions: Width & Length		Seated Height
AS-3	SPDT	5	AC or DC	1.000	1.687	1.296

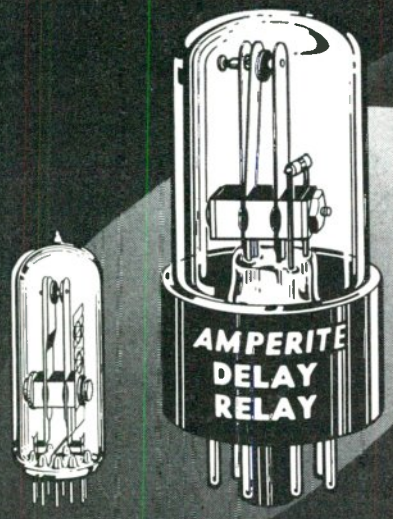
AMPERITE PREFERRED

by design engineers—because they're
MOST COMPACT • SIMPLEST • MOST ECONOMICAL
HERMETICALLY SEALED



Thermostatic DELAY RELAYS

2 to 180 Seconds

Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.

Hermetically sealed. Not affected by altitude, moisture, or climate changes.

SPST only—normally open or closed.

Compensated for ambient temperature changes from —55° to +70° C. Heaters consume approximately 2 W. and may be operated continuously. The units are **rugged, explosion-proof, long-lived,** and—**inexpensive!**

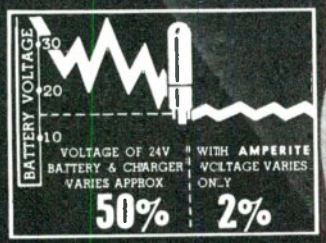
Also — **Amperite Differential Relays:** Used for automatic overload, under-voltage or under-current protection.

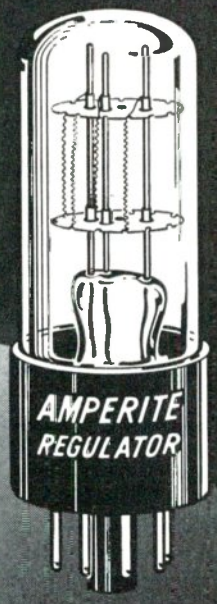
TYPES: Standard Radio Octal, and 9-Pin Miniature . . . **List Price, $4.00.** Standard Delays

PROBLEM? Send for Bulletin No. TR-81

BALLAST REGULATORS

Amperite Regulators are designed to keep the current in a circuit **automatically regulated** at a definite value (for example, 0.5 amp.) . . . For currents of 60 ma. to 5 amps. Operate on A.C., D.C., or Pulsating Current.





Hermetically sealed, they are not affected by changes in altitude, ambient temperature (—55° to +90° C.), or humidity . . . Rugged, light, compact, most inexpensive . . . . . **List Price, $3.00.**

NEW RELAY

Branson Corp. now offers — for the first time — a truly miniaturized relay with a high order of operational reliability. Fully capable of meeting military requirements, the Type JR provides the circuit engineer with a new dimension in design flexibility.

The small space requirements of the new component approximate those of many transistors. This high density packing compatibility means excellent volumetric efficiency in circuit board applications.

Contact Arrangement . . . . . 1 Form C (SPDT)
Contact Rating..Dry circuit or 1 amp 28VDC resistive
Life . . . . . 100,000 operations min.
Operate Time . . . . . 3 MS max.
Release Time . . . . . 3 MS max.

Available in several combinations of case, header and terminal style.

Shock . . . . . 50 G's 11 milliseconds
Vibration . . . . . 10-2000 cps 30 G's
Temperature . . . . . —65°C to +125°C

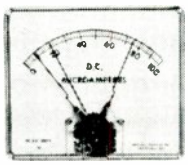
API METER-RELAYS

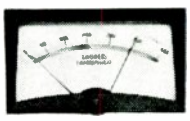
Indicating meters with built-in locking contacts for control or alarm. Trip point adjustable.

Ranges: 0-5 microamp. to 0-50 amp., 0-5 millivolts to 0-500 volts AC or DC. (Min. AC voltage range 0-250 Mv.) Thermocouple temp. ranges, —400 to +3000°F.



Model 451-C

Model 461-C



Model 561-C

Life: 10 to 20 million operations.

Accuracy: Repeatability: ±1%. Indicating: ±2% of full scale at any point of dial. Can be 1%.

Contacts: Rating: Standard is 10-25 milliamperes at 75-125 volts DC. Optional ratings to 250 Ma, 6 to 250 volts, DC.

Arrangement: High Limit (makes on increase of signal), Low Limit (makes on decrease of signal), Double (both high and low contacts).

Case Styles: Ruggedized-sealed metal cases are 2½, 3½, and 4½" round. Black Phenolic . . . glass front 4½", 5", and 6" rectangular case. Clear Plastic Front 2½, 3¼, and 4½" rectangular.

MIL Specs: Shock: 1 and 3-foot drops, 400 lb. hammer, 3 planes. Vibration: MIL-M-10304B. Salt Spray: QQ-M-151A. Temp.: —30°/+70°C. Sealing: MIL-M-6A

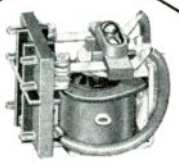
Everything UNDER CONTROL

BY GUARDIAN®



Series 1200

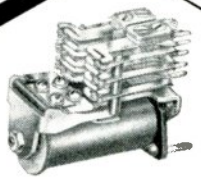
GENERAL PURPOSE RELAYS

A complete variety of basic controls ranging from small multi-contact relays to sensitive and heavy-duty power types.

General Purpose Catalog "B"

Telephone Type Catalog "C"

The fact is established that Guardian general purpose relays, telephone type relays and aircraft controls are the standard of comparison when original equipment designers and government technicians specify electromagnetic controls. Catalogs B - C - D - and E contain completely detailed information. All designs are basic and available in innumerable variations. Write for catalogs on your business stationery.

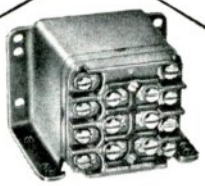


Series 695-T

TELEPHONE TYPE RELAYS

Sensitive units for precision instrumentation and communications to heavier duty types for industrial use.

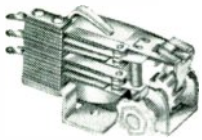
Aircraft Catalog "D"



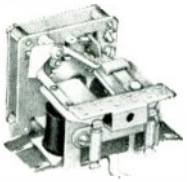
Series 3005
10 Amperes
4 P.D.T.

AIRCRAFT CONTROLS

Relays, solenoid contactors, control switches, grip assemblies and miniaturized units. Features Guardian exclusive hermetic sealing techniques. Many units meet and surpass AN, MS, MIL and/or JAN specifications.



Series 670
Impulse Ratchet



M.E.R. Stepper

Switch Catalog "E"

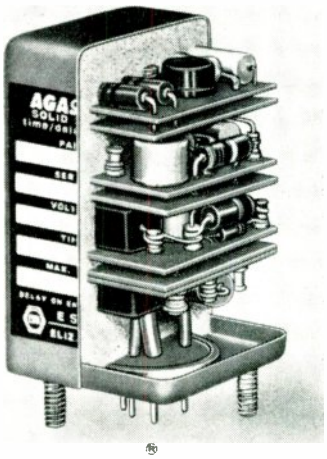
NEW SOLID STATE

time/delay/relays



...with traditional AGASTAT® reliability!

Now available . . . *solid state* AGASTAT time/delay/relays with accuracy and reliability essential for critical missile and computer applications.

Advanced design . . . uses modular construction for versatility, rapid delivery on custom units. Specially selected, matched and tested components assure highest reliability and uniformity.

Six basic types . . . cover timing ranges from 0.01 sec. to 10 hrs. Only 1 5/16" sq. . . . hermetically sealed . . . immune to transients and voltage variations. Operation — 18-32 vdc, pull-in or drop-out. Load current up to 5 amps. Write for brochure . . . contains full technical details. Dept. S3-1462.

AGASTAT TIMING INSTRUMENTS
ESNA ELASTIC STOP NUT CORPORATION OF AMERICA

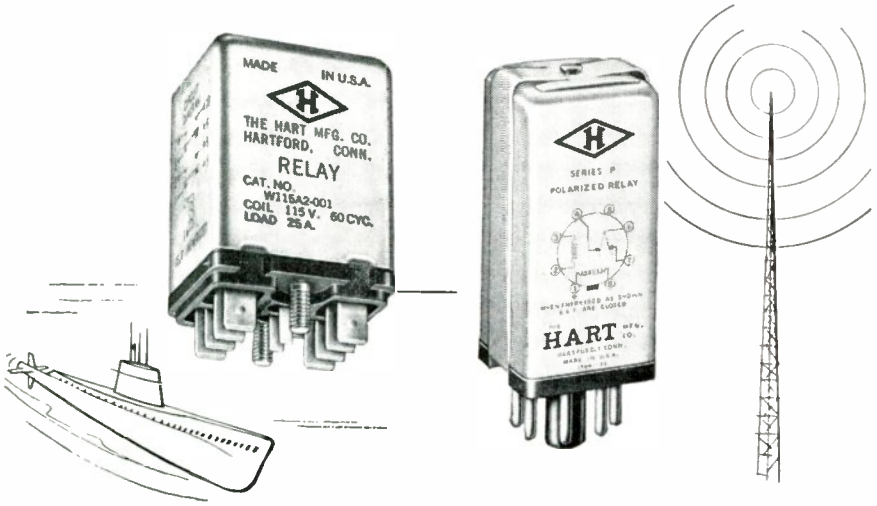
Heart of the Control System



"DIAMOND H" Relays

Look into the heart of the control system for a missile, a computer, a nuclear submarine, or a great many other critical applications. You might be surprised how often you'll find "Diamond H" relays.

Unless, of course, you're one of the increasing number of engineers who've already selected "Diamond H" relays for a spot where they just have to work despite all sorts of adverse conditions.

Hart makes relays of three basic types: miniature, hermetically sealed, aircraft-missile relays (Series R/S); high speed, sensitive, polarized relays (Series P), and general purpose AC, DC relays (Series W).

Technical literature outlining the wide range of characteristics available with each type relay is yours for the asking. You'll find "Diamond H" engineers uncommonly adept at working out a variation of the basic designs to meet your set of specific requirements.

Tell us your needs . . . by phone, wire or letter.

THE HART MANUFACTURING COMPANY
265 Bartholomew Ave., Hartford 1, Conn.

KURMAN ANNOUNCES "MIGHTY-MITE" *THE ASTRORELAY*

Brooklyn 22, N.Y. The smallest and lightest series of 4 POLE DOUBLE THROW RELAYS featuring high shock-vibration immunity, extreme reliability, low input power consumption, and meeting all the requirements of MIL-R-5757D, have been designed and made available by Kurman Electric Company, a Subsidiary of Crescent Petroleum Corp. This new Space-Age Relay, the Astrorelay, weighs approximately ½ oz., and meets the rugged demands of the missile and computer field.

This unique 4 Pole Double Throw micro-miniature relay, not larger than a postage stamp and the same size as Kurman KX-2C, offers excellent vibration immunity 30 G's 10-5000 CPS; 40 G's 10-2000 CPS. Special versions are available featuring vibration immunity of 50 G's 10-5000 CPS. The Astrorelay will meet 100 G shock test requirements.

Standard voltage ranges available are 6, 12, 24 volts. The relay will operate over a minus 65–+ 125 degrees C temperature range with a pull in power of approximately 250 milliwatts. Standard 4 pole double throw contact arrangement offers operation at any load from dry circuit, up to 2 amperes at 28 VDC resistive, featuring a contact resistance of less than 30 milliohms. Operate speed at nominal voltage will be approximately 8 milliseconds including a 2 millisecond maximum contact bounce. Drop out speed will be less than 4 milliseconds. In spite of the extremely small size, the insulation resistance is in excess of 1000 megohms, the relay will withstand a high potential break down test of 750 volts AC between any mutually insulated terminals or terminals in case. Dimensions are 0.875 x 0.800 x 0.400.

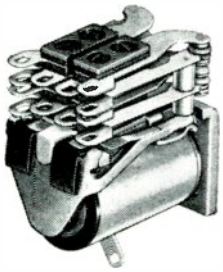
PRICE ELECTRIC RELAYS

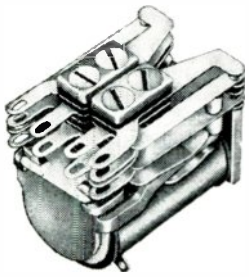
TELEPHONE
SERIES 5400
Miniature General-Purpose

To 4PDT. DC operated.* Contact ratings to 10 Amps. Coils for standard voltages to 120 VDC. Vibration-15G through 500 cycles. Shock-30G. Open (solder lugs or printed circuit tabs); Hermetically Sealed (plug-in and solder terminals).



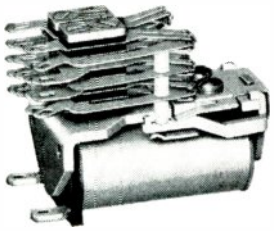
TELEPHONE
SERIES 5700
Midget General-Purpose

To 4PDT. AC or DC operated. Contact ratings to 10 Amps; single or bifurcated contacts available. Coils for standard voltages to 120 VDC or 230 VAC. Available to meet requirements of MIL-R-5757D, Types RY3JA1A4L01 and RY4JA1A2L02. Open or Hermetically Sealed (plug-in, solder terminals, AN connector).



TELEPHONE
SERIES 5600
Intermediate General-Purpose

To 6PDT. DC operated.* Contact ratings to 10 Amps; single or bifurcated contacts available. Coils for standard voltages to 120 VDC; special construction available for slow operate and/or release. Open or Hermetically Sealed (plug-in and solder terminals).

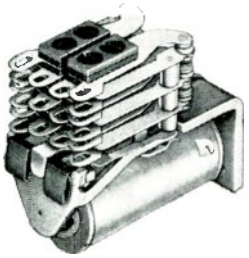


TELEPHONE
SERIES 5350
Small General-Purpose

To 6PDT. DC operated.* Contact ratings to 5 Amps. Coils for standard voltages to 120 VDC. Shock-30G. Vibrations—some styles to 10G through 500 cycles. Open or Hermetically Sealed (plug-in, and solder terminals).

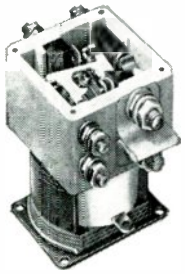
SENSITIVE
SERIES 5300
Small Sensitive

To DPDT. DC operated.* Contact rating 2 Amps to 26.5 VDC or 115 VAC. Standard sensitivity—20 milliwatts per pole; also available 10 milliwatts per pole sensitivity. Shock-30G. Vibration to 10G through 500 cycles available. Open or Hermetically Sealed (plug-in, and solder terminals).



HIGH CURRENT ROTARY
SERIES 8200

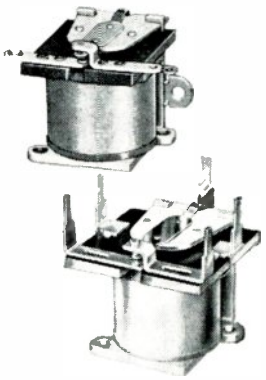
To 4PNO. DC operated.* Contact ratings to 200 Amps. Standard operating voltage-26.5 VDC. Temperature range —65° to +125°C. Shock-70G. Vibration-30G to 500 cycles. Open or Hermetically Sealed.



**Suitable for AC operation with rectifiers.*

GENERAL PURPOSE
STYLES 1001 & 1005

SPDT. AC or DC operated. Standard contact ratings of 1 and 3 Amps; 10 Amp rating available on special order. Style 1001 has solder lugs and frame mounting. Style 1005 for printed circuit applications. Ideal for TV, automotive, and appliance control circuit applications.



MULTIPOLE
SERIES 2100

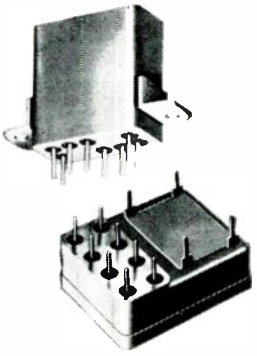
To 6PDT. AC or DC operated. Contact ratings to 15 Amps single break, 30 Amps double break. Coils for standard voltages to 120 VDC or 230 VAC. Open or Hermetically Sealed (plug-in and solder terminals).

MICRO-MINIATURE
STYLES 6 & 6A

DPDT. DC operated.* Lightweight, crystal can type relay is simple, reliable and versatile. Ideal for miniaturized assemblies. Termination can be provided to meet most requirements.

Style 6A is designed specifically for use in printed circuitry. Installed height is approximately 0.44[D].

Style 6 is available to meet requirements of MIL-R-5757D, Type RY4NA3B3L01.



SUB-MINIATURE
STYLE 506

DPDT. DC operated.* For Low-Level Circuits and General Purpose use. Available with isolated contact chamber for reliable low-level circuit switching. Solder or plug type termination. Available to meet requirements of MIL-R-5757D, Type RY4LA3B3L01.

SUB-MINIATURE
STYLES 300 & 520

6 PDT. DC operated.* A General Purpose relay of simple design and high reliability. Available with isolated contact chambers for reliable low-level circuit switching. Available to meet requirements of MIL-R-5757D, Types RY4LC2A3L01 and RY4LC3B3L01.

reson-ator

FREQUENCY SELECTIVE DEVICES

RESONANT REED RELAYS AND OSCILLATOR CONTROLS

Reson-ator Resonant Reed Relays and Oscillator Controls are precision electro-mechanical devices engineered to provide the finest, most economical method of detection and generation of frequencies in the audio range. Ideal for any application requiring the stability and long life characteristic of this tuning fork type device.

- SIGNALING SYSTEMS
- DATA TRANSMISSION
- TONE GENERATORS
- FREQUENCY STANDARDS
- REMOTE CONTROL
- FREQUENCY DETECTION
- AUDIO FILTERS
- TELEMETERING

Brief Specifications—

Frequencies—67 cps to 1600 cps

Coil Resistances—1 to 1500 ohms DC

Temperature stability—±.0025%/°C from −40°C to +100°C

Reference 25°C

Enclosure—Drawn copper can, .750" x .750" x 3.281" overall. Provided with standard 7 pin hermetic seal header.

Relay Bandwidths—To suit customers requirements. From ±.1% to ±4%

Complete specifications and application data available upon request.

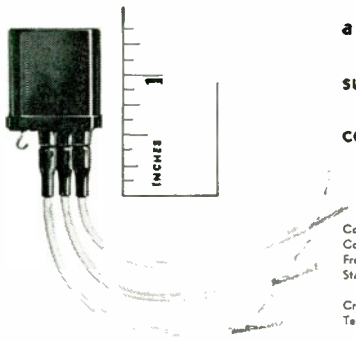
TELEX/AEMCO *Now Offers*



SUBMINIATURE COAXIAL RELAY

a truly

subminiature

coaxial relay

SPECIFICATIONS

Contact arrangement	1 form C (SPDT)
Contact rating	1 watt r. f.—50 ohms
Frequency range	20 to 400 mc
Standing wave ratio	1.25 to 1 over the frequency range
Crosstalk	50 db down
Temperature range	−55 C to 100 C

At last! A truly subminiature coaxial. Created by TELEX-AEMCO engineers to meet requirements of ultra-compact air borne and portable communication equipment. Designed to withstand severe shock and vibration requirements.

Mountings, cables, connectors, and coil characteristics can be supplied to your specifications.

Limited production is now available. Call or wire today. Identify inquiry as type 95 subminiature coaxial relay.

(Pat. Pend.)

a division of Telex, Inc.

TELEX/AEMCO
Mankato, Minnesota

TWX 1042
Ph. 8-6288

A new and complete catalog of TELEX AEMCO relay and timer products is now ready for you. Write on your letterhead for your free copy today.

Your inquiry about special relay requirements is invited. TELEX/AEMCO specializes in the design and production of special design relay products. Send us your specifications. Your inquiry will receive prompt and courteous attention.

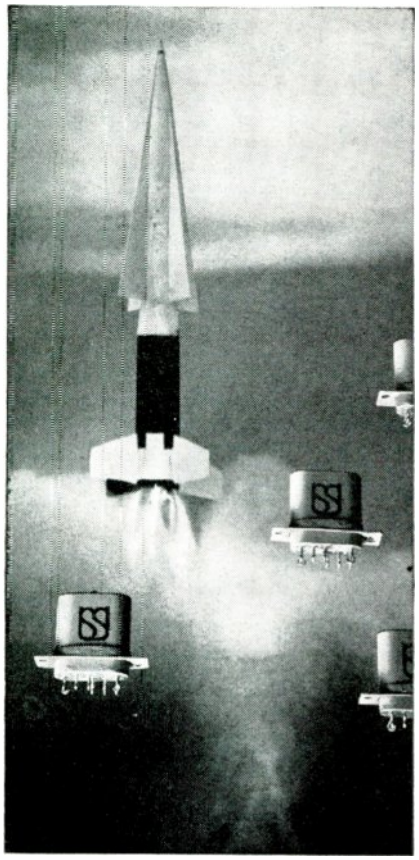
RELAY NEWS from Union Switch & Signal



Contact Redundancy in New UNION Crystal Case Relays

The UNION 2-pole double throw General Purpose Crystal Case Relay is designed to consistently meet the requirements of Mil-R-5757D and Mil-R-5757/10. Its essential features . . . from minimum size to optimum reliability . . . permit it to be used in aircraft, guided missiles, shipboard and ground control electronic equipment.

A unique torsion-wire armature suspension system and a rugged all-welded frame construction provide a high level of vibration and shock immunity. Contact redundancy, which assures reliability in dry circuit and higher level contact loads, is provided through the use of bifurcated contacts.

Available with 0.2″ grid-spaced header or "S" type header, with various mountings, terminals, and operating voltages. Write for Bulletin 1064.

Why UNION Relays Are So Dependable

There's a good reason why our relays are the standard for reliability. For years, we've been building tough, reliable relays for use in airborne and guided missile electronic equipment and similar vital applications where perfect operation under severe environmental conditions is mandatory.

Our engineers created a compact 6-PDT miniature relay with just three major assemblies . . . instead of a fistful of small parts. This was accomplished by using a balanced rotary-type armature that provided a maximum resistance to the severe shock and vibration environment of aircraft and guided missiles. The rotary principle of operation is utilized in all our relays.

We have a reputation for building reliable electronic components and we intend to maintain our tradition for building reliable relays. And we supply these quality relays in quantity. Stocks are now available for prototype requirements in New York, Pittsburgh, Dallas and Los Angeles.

New 4-PDT-10-amp Relay Most Compact Rotary Type Available

This new durable relay is designed to meet the requirements of Mil-R-6106. It's a rugged relay featuring exceptionally sturdy terminals and husky contacts for high current applications. Glass-coated cylindrical contact actuators attached to the rotary armature provide square mating of contact surfaces, thereby assuring longer relay life. The balanced rotary armature provides maximum resistance to severe shock and vibration.

This small 4-PDT-10-Ampere relay is currently available with 115VAC and various DC operating voltages. Various mounting styles are provided. Write for bulletin 1069.

For additional information, write for Bulletin 1017 or call Churchill 2-5000 in Pittsburgh.

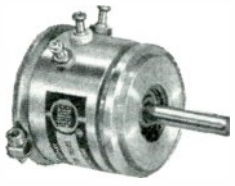
BORG MICROPOT® POTENTIOMETERS

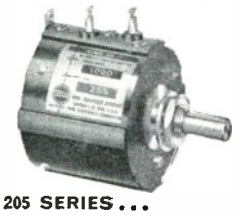
2100 SERIES . . .

7/8″ diameter. 3 and 10-turn models. Resistances 10 to 40K (3-turn); 25 to 120K (10-turn). ±.5% standard linearity accuracy. −55°C to +125°C range. Request data sheets 160, 161.



2400 SERIES . . .

Single-turn series. 7/8″, 1-7/16″, 2″, 3″ diameters. Resistances to 200K. ±1% to ±.5% standard linearity accuracy. −55°C to +125 C range. Request data sheets 186, 189, 190, 191.

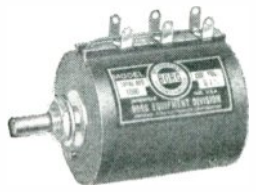


205 SERIES . . .

1-3/4″ diameter. 3 and 10-turn models. Resistances 10 to 50K (3-turn); 1.15 to 100K (10-turn). ±.5% to ±.05% standard linearity accuracy. −55 C to +105°C range. Request data sheets 131, 162.

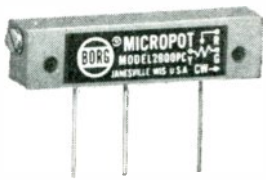
900 SERIES . . .

2″ diameter. 3 and 10-turn models. Resistances 15 to 60K (3-turn); 25 to 100K (10-turn). ±.5% to ±.05% standard linearity accuracy. −55 C to +125 C range. Request data sheets 128, 129.



1100 SERIES . . .

1-13/16″ diameter. 10-turn. Economically priced. Resistances 25 to 100K. ±.5% to ±.1% standard linearity accuracy. −55 C to +105 C range. Low-cost precision. Request data sheet 132.

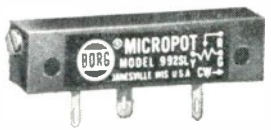


2800 SERIES . . .

High-temperature, wirewound trimmer. −60 C to +175 C range. Each unit 100% tested against leakage. Resistances 10 to 50K. 1-1/4″ length. 3 terminal types. Data sheet 173.

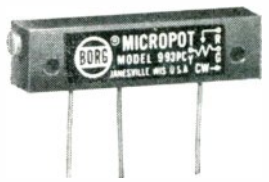
990 SERIES . . .

High temperature, wirewound trimmer. −60 C to +175°C range. Sealed against leakage. Resistances 10 to 50K. Four terminal types. 1-1/4″ length. Data sheet 196.



992 SERIES . . .

Wirewound trimmer. −55°C to +105°C operating temperature. Resistances 10 to 50K. Three terminal types. 1-1/4″ length. Economically priced. Request data sheet 172.



993 SERIES . . .

Carbon film element trimmer. −55 C to +105 C range. Resistances 20K to 1 megohm. Three terminal types. 1-1/4″ length. Economically priced. Request data sheet 172.

BORG MICRODIAL® TURNS-COUNTING DIALS

3000 SERIES . . .

Concentric-scale. 1″ dia. or 1-5/32″ with finger-tip brake. 10-turns. Designed for 2100 and 2440 Micropot units; fine for any Micropot. Colors available. Data sheet 187.

1300 SERIES . . .

Direct-reading—3, 4, 5-digit models. 10, 100, 1000 turns. 1.8″ to 2-1/16″ dia. Brake optional. Reduce reading errors with in-line numerals. Data sheets 135, 136.

1320 SERIES . . .

Concentric-Scale type. 10-turns. 1-3/4″ diameter. Finger-tip brake optional. Bright or satin chrome, gloss or dull black or combinations. Data sheet 138.

1330 SERIES . . .

Direct-reading, digital type. 10-turns. High style design. Internal, red or white light. Choice of colors. 1-3/4″ dia. Finger-tip brake optional. Data sheet 164.

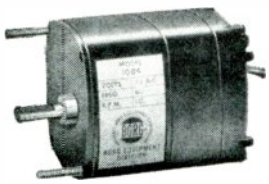
1360 SERIES . . .

High style design. Attractive profile, colors. Molded numerals and lines. Won't scale or rub off. 1-3/4″ diameter. 10-turns. Fingertip brake. Data sheet 137.

BORG MOTORS—FREQUENCY STANDARDS

1000 SERIES . . .

Sub-fractional H.P. instrument motors. Synchronous and induction. Two and 4-pole. Reversible. With or without gear trains. 1/750 to 1/2000 H.P. Request data sheet 139.



1060 SERIES . . .

Sub-fractional H.P. induction type control motors. Low inertia, high resistance squirrel-cage rotors. Variable speed, reversible. Gear trains available. Request data sheet 165.

Borg Frequency and Time Standards provide up to 1000 times the accuracy of conventional frequency comparisons. Stability of ±5 parts in 10^{10} per day after 21 days of continuous operation. Complete with Frequency Monitoring clock and Standby Power Supply. Request Bulletin 198.

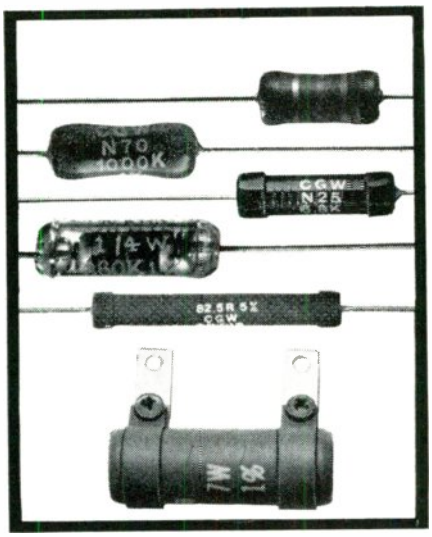
CORNING TIN OXIDE RESISTORS

In recent 30,000 hour load life tests at 140% of rated load, tin oxide resistors showed a 1% drift capability . . . a good indication of their inherent stability and reliable performance.



N • To MIL-R-10509B. ¼, ½, 1 and 2W. Derating to 140°C. 10R to 4.2 megohms.

N • To MIL-R-10509C, Char. B. ⅛, ¼, and ½W. Derating to 150°C.

NF • MIL-R-10509C. Fusion sealed in glass for the ultimate in performance. 10 ohm to 360K, derating to 150°C.

LPI • Low power for radio, tv, etc. 3, 4, 5, 7, and 10W. From 10 ohms to 110K.

C • General purpose resistor priced to compete with composition types in ½, 1 and 2W sizes. From 10 ohms to 1.4 megohms.

R • 7 to 115W at 250°C. Derating to 235°C. 10 ohms to 1 megohm. MIL-R-11804C.

S • High temperature to MIL-R-11804C in 1, 2 and 4W at 40°C. Derating to ½ power at 120°C. 10R to 4.2 megohms.

WC-5 • Water cooled. 10 to 300 ohms, dissipating up to 5 KW.

H • High frequency for dummy antennas, circuit loading, damping, etc. 5 to 140W. 10 ohms to 1 megohm.

HL • For high power dummy antennas and circuit loading. 250 to 6000W.

Write for data sheets.

WIRE WOUND
Miniature Power Resistors

Carefully designed, precision made under stringent quality controls for critical electronic circuits where space is at a premium.

Types RS - HS - PRS - RLS - RSE
(Available with Weldable Leads)

Resistance range from .05 ohm to 175K ohms, depending on type; tolerance range from .05% to .3%

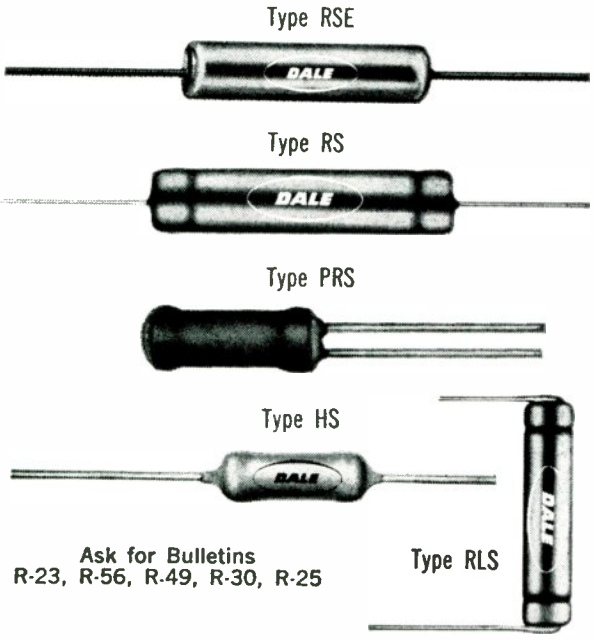
TYPE RS with axial leads in eight wattages—½, 1, 2, 2.5, 3, 5, 7, 10; ten sizes.

TYPE HS with axial leads in eight wattages -1.25, 3.75, 3, 3.25, 4.25, 6.5, 9, 13; nine sizes.

TYPE PRS with parallel leads in four wattages—3, 5, 7, 10; five sizes.

TYPE RLS with radial leads in six wattages—1, 2, 3, 5, 7, 10; eight sizes.

TYPE RSE in metal housing for clip mounting; five wattages—2, 3, 5, 7, 10; seven sizes.



Ask for Bulletins
R-23, R-56, R-49, R-30, R-25

Types NS - NLS

Non-inductive characteristics. Five wattages—2, 3, 5, 7, 10; six sizes. Resistance range from 1 ohm to 37K ohms, depending on size and type; tolerance range from .05% to 3%.

TYPE NS with axial leads; TYPE NLS with radial leads.

Ask for Bulletin R-34

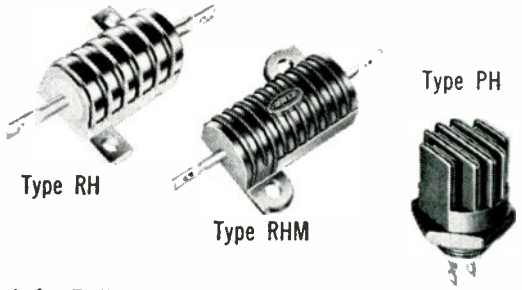
Types RH - RHM - PH

Silicone sealed in aluminum metal housing. TYPE RH and RHM have tabs for mounting to heat sink; TYPE PH designed for mounting through hole in chassis or heat sink.

TYPE RH six wattages—5, 10, 25, 50, 100, 250; resistance range from 0.1 ohm to 175K ohms.

TYPE RHM-25—25 watts for unprecedented reliability.

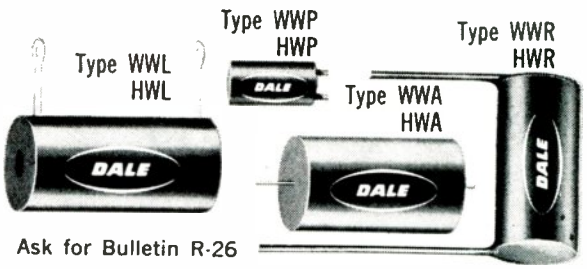
TYPE PH three wattages—10, 25, 100; resistance range from 0.1 ohm to 60K ohms. Tolerance range from .05% to 3%.



Ask for Bulletins R-21, R-36

Types WW - HW

Precision, encapsulated, bobbin-type, non-inductive. HW prefix denotes high temperature characteristics. Rated at .1 watt to 2.5 watts, depending on size and type; resistance range from .1 ohm to 6 megohms; tolerance range from .02% to 3%. Available with axial leads, lugs, radial leads and parallel leads.



Ask for Bulletin R-26

Deposited Carbon and Metal Film Resistors

(Available with Weldable Leads)

Carefully designed, precision made under stringent quality controls to assure stability and accurate, dependable performance in high frequency applications.

Type DC

Resistance range from 1 ohm to 200 megohms; tolerance 1% or higher as specified. TYPE DC in seven wattages—1/10, 1/8, 1/4, 1/2, 1, 2, 5; ten sizes.

Type DC

Ask for Bulletin R-24

Types MC - DCF - DCH
(Insulated)

TYPE MC is a deposited carbon resistor completely insulated and protected from environmental and mechanical damage by molded housing; resistance range from 1 ohm to 50 megohms. Available in five wattages—1/8, 1/4, 1/2, 1, 2; five sizes in standard tolerance of 1%.

TYPE DCF has a new coating material which provides a completely insulated resistor, yet maintains sub-miniature size. Resistance range from 1 ohm to 50 megohms; six wattages—1/10, 1/8, 1/4, 1/2, 1, 2; nine sizes in standard tolerance of 1%.

TYPE DCH hermetically sealed in non-hygroscopic ceramic envelopes; seven wattages—1/10, 1/8, 1/4, 1/2, 1, 2, 5; ten sizes.

Type MC

Type DCF

Type DCH

Ask for Bulletins R-35, R-42, R-27

Type MF

Combines advantages of Dale's molding techniques with advanced high vacuum metal film procedures. It has inherently good R.F. characteristics, low noise levels, high stability, complete insulation. Resistance range from 100 ohms to 4 megohms, depending on size; tolerance 1%. Five wattages—1/8, 1/4, 1/2, 1, 2; five sizes. Temperature coefficient ±50 and ±100 P.P.M.

Type MF

Ask for Bulletin R-43

WIRE WOUND Trimmer Potentiometers

Series 1200 - 1100 - 900 - 600 - 1500 - 5000

Produced under stringently controlled conditions to assure highest quality and reliability. Welded construction throughout; sealed to protect against moisture and potting compounds.

SERIES 1200—A truly outstanding miniature T-Pot; three terminal configurations for standard or printed circuit mounting; 10 to 50K ohms; 5% tolerance; 1 watt.

SERIES 1100—Miniature, high temperature; three terminal configurations for standard mounting; 10 to 100K ohms; 10% tolerance; 1 watt.

SERIES 900—Sub-miniature, three terminal configurations for standard or printed circuit mounting; 10 to 30K ohms; 5% tolerance; 1 watt.

SERIES 600—Sub-miniature; eight terminal configurations for standard, panel or printed circuit mounting; 10 to 30K ohms; 5% tolerance; 1 watt.

SERIES 1500—Miniature, nine terminal configurations for standard, panel or printed circuit mounting; 10 to 50K ohms; 5% tolerance, 1 watt.

SERIES 5000—New sub-miniature space saving, square configuration; 100 to 50K ohms; 5% tolerance; 1 watt.

Ask for Bulletins R-51, R-50, R-59, R-60, R-61

Series 100 - 200 - 300

Designed to give excellent performance for normal circuit problems where economy is of prime importance, yet dependable performance is a necessity.

SERIES 100—Five terminal configurations; 10 to 50K ohms; 5% tolerance; rated at .8 watt.

SERIES 200—Five terminal configurations; 10 to 50K ohms; 10% tolerance; rated at .5 watt.

SERIES 300—Two terminal configurations; 100 to 20 K ohms; 15% tolerance; rated at .25 watt.

RELIABLE PRODUCTS

FOR MILITARY & COMMERCIAL APPLICATIONS

Most CENTRALAB products are available for immediate delivery in industrial quantities at factory prices, from CENTRALAB stocking distributors.

HOT MOLDED COMPOSITION VARIABLE RESISTORS

Meet MIL-R-94 environmental and test requirements. Provide smooth noise-free operation and high stability for which hot molded units are well known.

2 WATT @ 500V—Raised resistance track reduces surface contamination. Wide clearance between bushing and collector track for increased high voltage stability. Carbon collector and pick-off brushes.

1-3/32" diam., 5/8" deep. 500 ohms—5 meg, linear taper; 10K-2.5 meg log taper.

3/4 WATT @ 350V—Metal enclosed units, available with triple "O" ring shaft seal. 23/32" diam., 1/2" deep. Same resistances as 2 watt unit.

1/2 WATT @ 350V—Similar construction as 3/4 watt. 1/2" diam., 15/32" deep. 100 ohms—5 meg, lin. taper.

1/3 WATT at 350V TRIMMER—locking type variable fixed resistor. Extremely resistant to shock vibration, acceleration, can be encapsulated. 19/32" diam., 11/32" deep. 50 ohms—5 meg, linear taper.

Write for Group G bulletins.

ELECTRONIC SWITCHES

Subminiature rotary—15/16" diam. for military and high reliability applications. Rating 0.5 amp. at 6VDC, 100 ma. at 110VAC. Laminated phenolic, steatite, single or multiple sections.

Miniature rotary—1-1/4" diam. for military and high reliability applications. Rated 2.0 amps. at 15VDC and 250 ma. at 110VAC. Available single or multiple ceramic, Mycalex and phenolic sections.

Standard rotary—1-5/16" diam. laminated phenolic or steatite insulation, single or multiple sections. Rating 2 amps. at 15-VDC. 150 ma. at 110VAC. (Resistive load.)

Heavy-duty power—For transmitter, industrial control, laboratory testing, military, commercial. 2-13/16" diam. 7-1/2 amp. rating at 110VAC. 25,000 cycles minimum.

Spring return—1-5/16" diam., coil or C-type springs, phenolic, steatite, single or multiple sections.

Specialized—Lever, slide, tone, tuner sections, others.

Write for Group P bulletins.

PACKAGED CIRCUITS

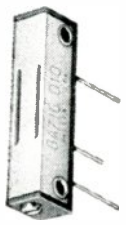
Complete computer and Radio-TV circuits, amplifiers, oscillators, detector networks, resistor networks—including transistors, capacitors, resistors, wiring and inductance, manufactured to your specific performance limits.

PEC* circuits result in substantial savings in assembly costs. These high reliability packaged circuits can be supplied in a wide variety of terminals for printed circuit board applications.

1/2W. resistors meet applicable MIL-R-11 specifications, 50 ohms to 50 megs. Capacitors up to .01 mmf.

Write for Group Y bulletins.

*Trade Mark



VARIABLE RESISTORS

1/4W. Linear Motion, wirewound 100 to 20K ohms and composition 10K to 2.5 meg. .250" x .325" x 1.250".

1/10W. Microminiature, 0.286" diam: **Ultraminiature**, 0.502" diam; **Subminiature**, 5/8" diam; 500 ohms to 10 megs. **1/4W. and 1/2W. Subminiature**—For instruments and military. 43/64" diam. 500 ohms to 2.5 megs.

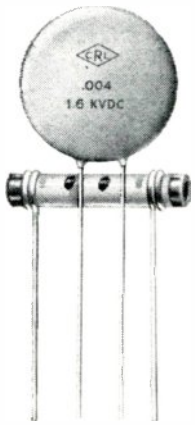
1/4W. Multiple Miniature—Up to 4 variable and 9 fixed resistors on a 3/4" x 2-1/4" steatite plate. 1000 ohms to 5 megs.

1/2W. Standard—For radio, TV. Single, Twin or dual-concentric. 15/16" diam. 250 ohms to 10 megs.

1-1/2W. Wirewound—for military and instruments. 11/16" diam., 5/16" deep. 4 ohms to 30K ohms.

2-5W. Wirewound—For instruments and TV. Single or dual-concentric. 1-5/32" diam. 1 ohm thru 100K ohms. Also available as 20 watt audio L and Bridged T Pad attenuators.

Write for Group B bulletins.



CERAMIC CAPACITORS

Ultraminiature—3 to 10VDC, 0.22—2.2 mfd.—for low power factor transistor applications.

Temperature compensating—Discs, tubulars, 150 v to 6,000 VDCW. 1 mmf.—0.1 mf. Capacitance +100 to —5250 ppm.

Bypass—Coupling—Discs, tubulars, 150 v to 6,000 VDCW, 1 mmf.—0.1 mf.

High Voltage—High Accuracy—High Voltage types, up to 30,000 VDCW, High Accuracy types, ± 1% tolerance, 500 VDCW, up to 2,500 mmf.

Trimmer—Tubular or flat. Meet MIL-C-81A specifications. 1 mmf. to 400 mmf. 500 VDCW.

Feed-thru—10—5000 mmf., 500—1,500 VDCW, bushing, shoulder, ring, eyelet, resistor-capacitor combinations.

Specialties—Stand-off, button-shape, potted, other capacitors.

Write for Group D bulletins.

ENGINEERED CERAMICS

High alumina—85%, 95%, 99%—for high frequency, high temperature applications close tolerance (±.00025") designs. L6A Jan-I-10 grade.

Grade Jan-I-10-L5A steatite, Grade L2A Corderite, and Grade L2A Electrical Porcelain. For applications where high dielectric and compressive strength, high dimensional stability, low loss and low power factor are required, there is a CENTRALAB ceramic material for the job.

CENTRALAB also specializes in metalizing of ceramics, for hermetic seals or mechanical attachment of other ceramic or metal parts.

MICROWAVE RESISTORS by FILMOHM

NEW FLEXIBLE DISK RESISTORS
Rugged — virtually non-breakable METAL FILM fibreglass base disk resistor. Low T.C., stable, standard dimensions to fit all coaxial line sizes, ready for assembly—no soldering required. Used for terminations, Tee pads, Pi pads, matching structures.

NEW MICROWAVE BOLOMETERS DISK TYPE
Broadband 500 to 10,000 mc/s. Wollaston wire types, controlled sensitivity, gold electrodes, matched elements; Maximum VSWR in the standard mount less than 1.5 to 1.

NEW TWT ATTENUATOR RODS
Precision controlled pyrolitic carbon films . . . unaffected by tube bake-out and assembly — uniformity and reproductivity guaranteed by R.F. reflectometer calibration of each rod.

FOR RELIABILITY . . . STABILITY, UNIFORMITY

FILMOHM Metal Film Resistors offer:
high stability • low temperature coefficient • tinned electrodes • micro-thin resistance film (even at highest frequencies) • quality-controlled dimensions, electrical and high temperature characteristics. Choose from a wide variety of shapes, sizes, base materials for a precision-engineered FILMOHM Microwave Resistor to suit your requirements.

FILMCARD
Metal film Fibreglass resistance card for all low power attenuators and terminations. Available in a wide range of resistivities. Easily fabricated. Ask about new FILMCARD KIT.

COAXIAL DISCS AND RODS
Metal resistance film fused to PYREX base, sealed with micro-thin quartz coating. From BNC to largest line size. Bulletin M-1-1.

METALLIZED GLASS ATTENUATOR ELEMENTS
Standard plates available for L through K bands.

FOTOCERAM* ATTENUATOR ELEMENTS
Ruggedized precision attenuator elements. Withstands severe shock and vibration.
*Reg. T.M. Corning Glass Wks., Corning, N. Y.

FILMOHM METALLIZED MICA
For use as rotary and guillotine attenuator elements. Ideal for mm. frequencies. Available in large sheets or fabricated parts. From .001" to .005" thick.

COAXIAL TERMINATION RESISTORS
Metal film, ceramic base resistors for 3/8" line coaxial terminations. Useable up to 10 KMC.

CERAMIC DISC RESISTORS
New, low cost, ruggedized disc resistors for coaxial terminations.

FLEXIBLE RESISTANCE CARD
Completely flexible thin plastic resistance card. May be laminated to cavities for use as mode suppressors.

HI-POWER COAXIAL LOAD RESISTORS
Metal film tubular glass resistors, non-inductive, for dummy loads and terminations. Standard and special sizes to 2' long.

STRIPLINE RESISTORS
Mica-base resistors as thin as copper stripline. Cement directly into stripline circuits.

MICRO-MODULE RESISTORS
Available on special order utilizing glass, ceramic or mica base. Custom-designed to suit your micro-miniature applications.

OTHER PRODUCTS AVAILABLE
FLEXIBLE DISC RESISTORS • METAL FILM CERAMIC TUBULAR RESISTORS • CRYSTAL RESISTORS

Proven performance in the most severe environments!

H-H "Gray Line" RESISTORS

• Wide Range of Fixed Resistors

• Flat and Stack Mounting Power Resistors

• Axial-lead Types from 2 to 10 Watts

• Adjustable Resistors from 10 to 200 Watts

H-H "Gray Line" precision made resistors are available in a wide range of types . . . incorporate design and construction features that assure dependable performance in critical applications. Non-crazing and high temperature enamel, stronger core, welded wire connections, higher shock resistance and immunity to salt spray and humidity insure high reliability.

"Gray Line" fixed, ferrule, axial and adjustable resistors comply with MIL-R-26 specifications.

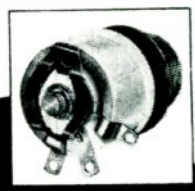
The reliable line with wide range design flexibility!

Standard Types from 5 to 1000 Watts



H-H "Gray Line" RHEOSTATS

MIL and Custom Types to Your 'Specs'

"Gray Line" Rheostats are exceptionally rugged . . . feature proven principles of construction that meet the most exacting specifications. Special design features assure long life and protection under extremes of humidity and abnormal atmospheric conditions. The "buss bar" contact arm automatically adjusts for complete, continuous contact and smooth, flexible control. H-H blue-gray, high temperature enamel is thermo shock proof, gives increased service life.

Hardwick Hindle "Gray Line" Rheostats, Resistors, and Potentiometers are available nationwide at all H-H authorized distributors.

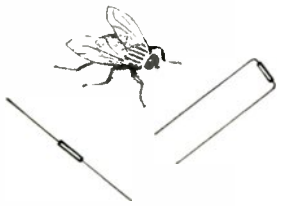
New!

ACTUAL SIZE



SUB-MINIATURE WIRE WOUND RESISTORS

100 PHYSICAL SIZES

Precision Resistors, Type TX (temperatures to +85°C ambient), and Type SX (temperatures to +125°C ambient), are unsurpassed in uniformity of performance.

New winding techniques mass-produce resistors free from dangerous "cross-overs" and insulation breakdowns. Maximum **reliability** is assured . . . and . . . at mass-production prices.

According to your need, PRECISION'S Type TX Resistors may be had in the size and resistance value you want for your circuit. Terminals may be either axial or radial. Tolerances are standard from ±1% to ±1/20%. Where extreme accuracies are required, tolerances to ±1/100% may be obtained . . . inductively or non-inductively wound.

Military requirements are to PRECISION'S specifications.

PHYSICAL SIZE: Available in 100 sizes, ranging from diameters from 1/16" through 3/8" and lengths from 3/16" to 1-1/2".

RESISTANCE RANGES: From .01 ohm through 5.0 megohm — in any resistance value required or decimal part thereof.

ACCURACY: ±5% to ±1/20%. Tolerances ±1/50% to ±1/100% (absolute) available on specification.

TEMPERATURE COEFF. OF RESISTANCE: Standard ±0.0005%°C. throughout. Special temperature coefficient ±5000 ppm° to ±1 ppm°C.

For complete information about PRECISION'S Sub-Miniature Type TX Resistors, write to:

ONE COMPLETE RESISTOR SOURCE

1. Fixed, Wirewound, Power type Resistors, to MIL-R-26C and the commercial equivalents, in vitreous enamel or cement coatings, 5 watts to 200 watts.
2. Adjustable, Wirewound, power resistors in vitreous enamel or cement, 5 watts to 200 watts.
3. Precision, Wirewound Resistors, to MIL-R 93 and commercial.
4. Power-Precision wirewound resistors, Silicone coated, axial leads, 0.01 to 10% tol. (trade name—TECHSILOHM)
5. Power resistors, aluminized housing, RP types, MIL-R-18546B. (Trade name—Power pack)
6. Multisection wirewound, resistors, vitreous enamel and cement.
7. Printed circuit resistors.
8. Deposited carbon resistors in accordance with MIL-R-10509C.
9. Metal Film, Fixed, resistors, high stability ¼ watt to 10 watts.
10. Flat stacked mounted resistors 10 watts to 60 watts.
11. Special resistors for every application.
12. Non-Inductive Resistors.
13. Wirewound heater elements.

TECH-OHM RESISTOR maintains over 500,000 resistors in stock and solicits your requirements based on quality, price, service, delivery and 13 years' experience.

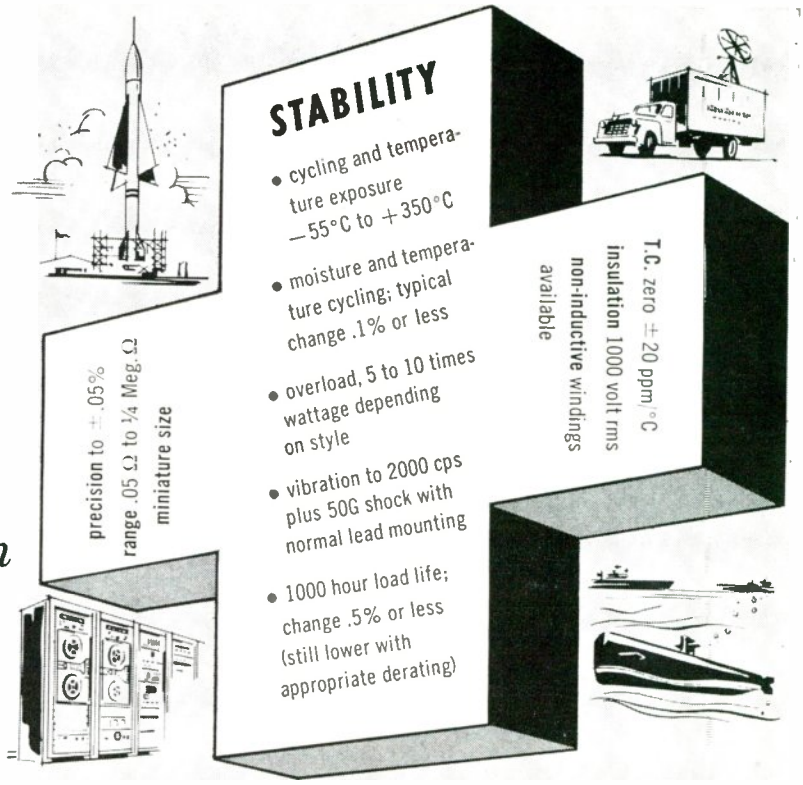
SAGE POWER RESISTORS

offer this unequaled combination of ***PLUS*** *features:*



these PLUS values mean trouble-free performance and long life reliability in your equipment.

Sage Electronics alone enjoys a position of product leadership in this field based on:

- 12 years specialized experience in miniature power resistors.
- exclusive use of high stability precision wire.
- introduction of newly developed Impervohm® coating, which offers superior protection in all combinations of moisture, temperature and voltage. Impervohm® also is highly resistant to ultrasonic solvent wash.

SPECIFY THESE SAGE SILICOHM® RESISTORS

TYPE "CS" CLIPPER METAL SHEATHED RESISTORS

Similar in all respects to Type "S", fully insulated plus addition of metal sleeve for heat sink mounting in spring clip holders.

Style	Rating Watts
	full heat sink rating
CS3W	6
CSR5W	10
CSS7W	14
CSR7W	16
CS10W	20

TYPE "S" IMPERVOHM® COATED POWER RESISTORS

Meet or exceed MIL-R-26C requirements.

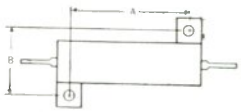
Style	Rating Watts	Body Length	Body Diameter	Resistance Range, Ohms*
S1W	1	.406	.094	.5 — 10,000 (1800)
SA1W	1	.500	.125	.5 — 15,000 (3300)
SB1W	1	.687	.125	.5 — 24,000 (5300)
SA2W	2	.500	.187	.5 — 18,000 (3900)
SB2W	2	.812	.187	.5 — 33,000 (7500)
S2W	3	.625	.250	.5 — 25,000 (5500)
S3W	3	.750	.250	.5 — 35,000 (8000)
SS5W	5	.875	.312	.1 — 60,000 (13,500)
SR5W	5	1.000	.312	.1 — 75,000 (17,000)
SS7W	7	1.250	.312	.1 — 100,000 (22,000)
SR7W	8	1.375	.375	.05 — 140,000 (32,000)
SS10W	10	1.812	.375	.05 — 200,000 (43,000)
S10W	10	1.937	.375	.05 — 250,000 (49,000)

TYPE "M" METAL CLAD CHASSIS MOUNT RESISTORS

Aluminum housed resistors for heat sink mounting. SAGE Type "M" units feature less temperature rise than other similar resistors. Lower hot spot means longer service life and exceptional stability.

Meet or exceed requirements of MIL-R-18546 and MIL-R-8781 (USAF).

Dielectric strength to 2500 volts rms.



Style	Rating Watts	Resistance Range, Ohms*	A	B
M10W	14	.5 — 35,000 (5500)	.562	.625
M25W	25	.1 — 60,000 (13,500)	.719	.781
M50W	50	.05 — 200,000 (43,000)	1.562	.844

NOTE: All dimensions are inches nominal.

**Parenthetical figures show maximum values for .001 diameter wire.*

Complete specifications available on request.

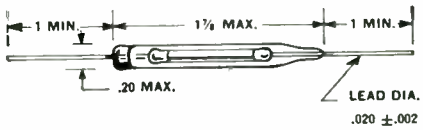
RX5	200 ohm to 200 Meg	1,2,5 Note 3	—.0002	—0.05	2000	10	200	3¹⁵⁄₁₆	.413	1½
RX8	100 ohm to 10 Meg	1,2,5	—.0002	—0.05	750	2	200	1½	.240	1⅜

NOTE: 1: 1% and 2% tolerance available only below 20 meg.
2: 1%, 2% and 5% tolerance available only below 100 meg.
3: 1% and 2% tolerance available only below 100 meg.

HI-MEG RESISTORS



GLASS SEAL: HI-MEGS are vacuum sealed in a glass envelope which is treated with a special silicone varnish which keeps the resistor relatively free from the effects of moisture.

RESISTANCE: HI-MEG resistors are available in values from 10^8 to 10^{14} ohms.

TOLERANCE: HI-MEG resistors can be supplied in the following tolerances: 1% below 10^{12} ohms, 2% and 5% below 10^{13} ohms, and 10% over the entire range.

MAXIMUM WORKING VOLTAGE: 1000 volts.

MAXIMUM OPERATING AMBIENT TEMPERATURE: 100° C.

POWER RATING: The power rating for any HI-MEG resistor is equal to one divided by the resistance in megohms.

For details, circle #510 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

VITROHM RESISTORS

STOCK RESISTORS

Ward Leonard offers the largest selection of stock resistor types and sizes. Seven distinct stock resistor types are available for immediate shipment from the plant or your local *A.I.D*istributor. Resistors ranging from 2 to 200 watts and with resistance values from 1 to 250,000 ohms are designed to meet a multitude of needs and applications. The secret of Ward Leonard Vitrohm Resistor dependability, accuracy and consistency lies in the balanced design of every component in each resistor.

CATALOG 15

Hard covered 64 page "CATALOG No. 15" on our complete line of stock and made-to-order resistors and resistor parts available. Illustrated with complete information, it contains ratings, graphs, dimensional drawings and tables. Write for one today.

METOHM RESISTORS

Exceeding MIL-R-10509D

METOHM Resistors are Result-Engineered Molded metal film precision resistors and are now offered for a multitude of commercial, industrial, and military electronic requirements. METOHM Resistors feature high stability, reliability and accuracy in combination with low and controllable temperature coefficients. METOHM Resistors come in three standard sizes — 1/8, 1/4, and 1/2 watts. For more information write for CATALOG 50.

type	application	watt ratings	resistance values (in ohms)
fixed 	General usage for voltage dropping, current limiting, etc. Electronic and industrial apparatus such as communication, instrument, motor control, appliance, transportation and similar equipment. Available in tapped and multi-section forms.	5 to 200	1 to 250,000
adjustable 	Circuits requiring adjustability. Voltage dividing or regulating purposes in control equipment, rectifiers, voltage and speed regulators, etc.	10 to 200	1 to 150,000
stripohm 	Equipment where space saving is a limiting design factor. Aviation, communication and navigation equipment. Available in fixed, adjustable, tapped and multi-section forms.	20 to 75	1 to 65,000
axiohm 	Apparatus requiring quick, easy installation of resistors and where space is limited. Radio and electronic equipment, communication, instrument and similar apparatus requiring miniature power resistors.	2 to 12.5	1 to 75,000
non-inductive 	High frequency circuits where tubular resistors with low values of inductance and distributed capacitance are required. Radio and other electronic apparatus such as therapeutic, transmitter, telephone, etc.	35 to 160	1 to 1,000
plaqohm	Where a compact power resistor having low values of inductance and distributed capacitance is required. High frequency electronic equipment including laboratory test, induction heating, transmitter, etc. Available in fixed and tapped forms.	25 to 150	1 to 10,000
discohm	On equipments where a miniature power resistor with low values of inductance and distributed capacitance is needed. High frequency electronic circuits in diathermy, carrier telephone and similar equipment.	24	1 to 4,000

Available from Stock — See your local Authorized Industrial Distributor

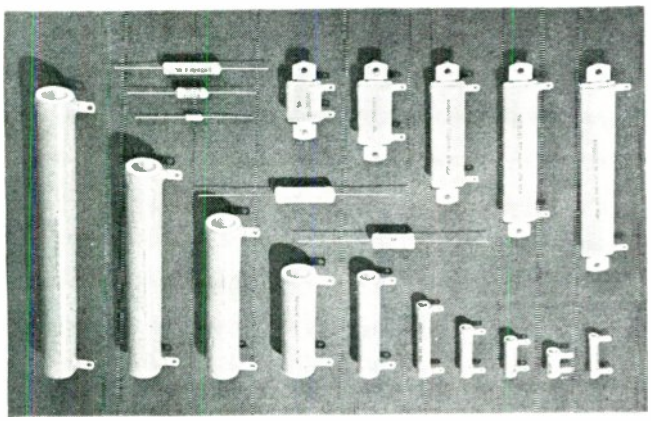
World Radio History

RIBFLEX

Ribflex resistors consist of a metal alloy resistance ribbon, reflexed, wound on edge on a ceramic core and held in place with vitreous enamel. Available in fixed, adjustable, tapped and multi-section forms. Used for intermittent and continuous-duty circuits where high wattage must be dissipated in a relatively small space such as in industrial motor controls, load banks, etc. CATALOG 15.

MIL RESISTORS



Ward Leonard manufactures a full line of Vitrohm resistors designed to meet the requirements of specifications MIL-R-26C and MIL-R-15109. The MIL-R-26C resistors, applied in electronic and electrically operated Military equipment, must successfully withstand a series of severe tests including thermal shock, humidity, electrolysis, momentary overload, etc. MIL-R-15109 resistors with suitable mountings are designed for HI-shock applications. BULLETIN 12.

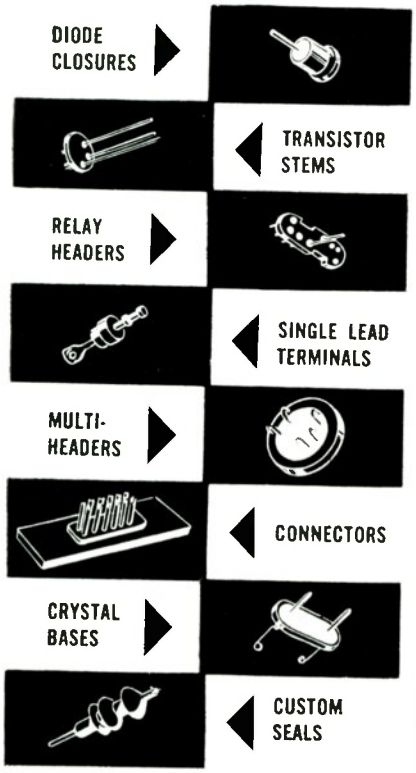
Sealed Rite by Hermetite

HERMETIC SEALS

- Glass to Metal
- Copper Seals
- Ceramic to Metal
- Hi-temp Seals



For high reliability in your seal requirements, whether they are standard or custom designed, Hermetite is your prime source. Our seals are not only designed to meet your requirements, but are made to surpass your specifications. Our highly skilled engineering staff is ready to assist you with designs for special applications.

SEALS
(Hermetic)

Long experience in the semiconductor field has enabled us to develop hermetic sealing to the absolute in protection against corrosion and contamination, thus assuring the same characteristics out in space as at sea level on earth.

Our expert engineering group is at your disposal and will be pleased to offer assistance on any specific problem.

Your inquiries are invited.

Tronex, Inc.
MANUFACTURER OF GLASS TO METAL SEALS

SEMI-CONDUCTOR SEALS. Reliability of product really begins with reliability of source. Tronex seals offer highest quality and reliability that permit you to build superior semi-conductor devices.

MINIATURE RELAY HEADERS. Tronex headers consistently meet the high standard of exacting specifications required in the relay, electronic and military applications.

CUSTOM DESIGNED HEADERS. General analysis of your seal problem by our extensive Engineering Section will solve your individual problem by our aid in designing and manufacturing a product tailored to your requirements.

Tronex, Inc. invite you to communicate with us to take advantage of Tronex services.

Operating temperature, all types, −50 to +75° C.
[1]Average DC resistance measured at 2 foot-candles, 2870° K. and 25° C ambient.
[2]With and without heat sink.
[3]Designed to replace previous plastic types. [4]At 25° C ambient. [5]S denotes side view cell.

Salient Charactertistics:

- Hermetically Sealed Glass Enclosures.
- A Variety of Spectral Response and Resistance.
- The High Sensitivity and Fast Response of Cadmium Selenide.
- Power Dissipation to ½ watt, continuous.
- High Ratio of Light to Dark Current at low light levels.
- Stable and closely controlled Parameters.
- NEW !

Low Resistance "L" types for Transistor and other low voltage applications!

Are you on the mailing list for Clairex Technical Information? If not, contact our representative or write direct to Dept. A1.

Clairex Photoconductive Cells . . . variable resistors controlled by light . . . unique design components for automation and control.

Your local distributor may be able to supply Clairex Photoconductors from stock. If not call or write our New York office for direct and immediate service, or contact our technical representative in your area listed below.

Priced from $1.15 to $4.00 depending upon quantity for all types listed.

IF YOU DESIGN IN THE FIELDS OF

FANON

SILICON DIFFUSED JUNCTION MESA POWER TRANSISTORS

- High Power Transistors
- High Wattage Dissipation
- High Reliability in Extreme Conditions
- Proven in: Power Amplifiers; Power Converters; Power Switching; Power Supply Regulators; DC & Servo Amplifiers; Relay Replacements

Supplied in three standard case styles and all popular types. As of June 1, 1961, the types listed are available for immediate delivery.

STYLE TO-3

	Types	
75 Watts @ 25°C	2N1487	2N1490
43 Watts @ 100°C	2N1488	2N1069
Max. 7.5 Amp I_c	2N1489	2N1070
Max. 100 Volts V_c		

SQUARE STYLE

	Types	
85 Watts @ 25°C	2N389	2N1210
45 Watts @ 100°C	2N424	2N1211
Max. 7.5 Amp I_c	2N389A	2N1620
Max. 100 Volts V_c	2N424A	

DOUBLE-ENDED STUD STYLE

	Types
85 Watts @ 25°C	2N1616
45 Watts @ 100°C	2N1617
Max. 7.5 Amp I_c	2N1618
Max. 100 Volts V_c	

Fanon has the power transistor you want today.

DIODES

SUBMINIATURE GLASS DIODES

Germanium Gold Bonded in these types:

- **COMPUTER**
- **HIGH RESISTANCE**
- **HIGH CONDUCTANCE**
- **GENERAL PURPOSE**
- **MILITARY TYPES:**

1N128	1N270	1N277
1N198	1N276	1N281

Basic features include high forward conductance . . . recovery times in millimicroseconds . . . high inverse resistance . . . ruggedized mechanical construction . . . exceptional uniformity of characteristics.

Silicon Junction in the following types:

- **FAST SWITCHING (0.15 to 1.0μ Sec.)**
- **GENERAL PURPOSE**
- **MILITARY TYPES:**

1N457	1N459	1N662
1N458	1N643	1N663
	1N658	

Designed to meet the most stringent commercial and military requirements, these diodes combine fast switching and high forward conductance, while protecting against thermal runaway at high voltages and temperatures up to 150°C.

TRANSISTORS

POWER TRANSISTORS

Germanium in the following types:

- **SWITCHING 5 – 8 – 15 – 25 amperes plus 3 ampere Spacesaver design**
- **AMPLIFIER 2 – 4 watts plus 2 watt Spacesaver design**
- **MILITARY TYPES:**

2N297A	2N1011	2N1120

Excellent for applications involving power converters, audio amplifiers, voltage regulated power supplies and high current switching circuits.

Features include low thermal resistance, low base input voltage, low saturation voltage and superior current gain.

The 8 ampere switching series can replace the more costly ring emitter types in 3 to 8 ampere service. The 25 ampere series offers exceptionally low saturation voltage and is available with either pin type or solder lug terminals.

The Spacesaver design not only offers smaller size and lower mass but better frequency response and faster switching characteristics.

RECTIFIERS

DIFFUSED SILICON JUNCTION RECTIFIERS

Designed for maximum reliability under the most severe military and commercial applications, Clevite rectifiers offer these advantages: High dissipation — 600 mw — High voltage — up to 600 volts — High temperature — up to 150 ma at 150°C.

GENERAL INSTRUMENT SEMICONDUCTOR DIVISION

One Dependable Source For All Your Transistor Needs

General Instrument is your source for silicon planar expitaxial transistors and silicon microtransistors, as well as germanium computer, drift, MAT** and MADT† types • Highest quality and long semiconductor life are assured through detailed research, careful product development and advanced production techniques. Complete specifications, engineering life test data and design curves are available on all General Instrument transistors, including the representative types listed here • Call the General Instrument sales office or franchised distributor nearest you or write today for Catalog SR-2099 to General Instrument Semiconductor Division, 65 Gouverneur Street, Newark 4, New Jersey.

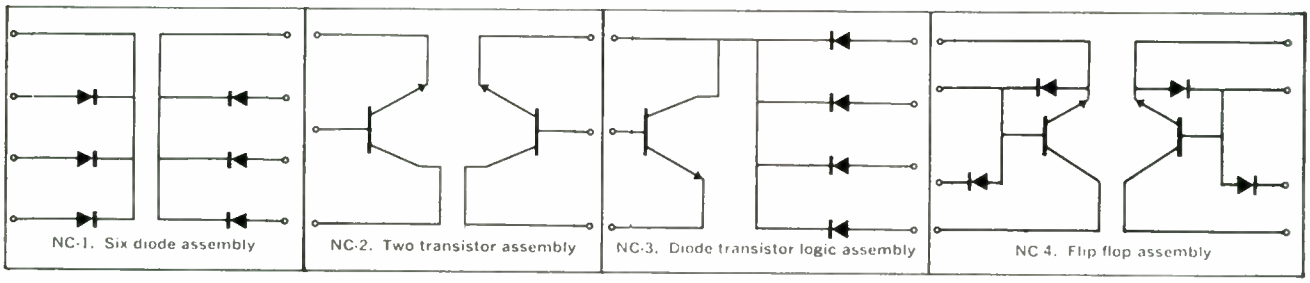
GENERAL INSTRUMENT NANOCIRCUITS

General Instrument Nanocircuits greatly simplify the fabrication of the most sophisticated electronic systems. Using either ceramic or metal master substrates, as many as nine diodes and two transistors can be mounted in a single standard TO-5 transistor package • The following circuit diagrams indicate a few of the types of assemblies which are available immediately.



NC-1. Six diode assembly

NC-2. Two transistor assembly

NC-3. Diode transistor logic assembly

NC-4. Flip flop assembly

One Dependable Source For All Your Semiconductor Needs

In addition to a complete line of silicon power rectifiers and silicon and germanium diodes, General Instrument also makes encapsulated circuit modules to fit any electrical or physical requirements ("Circuit-Caps"), precision wire-wound resistors and microminiature computer logic circuits ("Nanocircuits") ■

GENERAL INSTRUMENT SEMICONDUCTOR DIVISION

One Dependable Source For All Your Diode Needs

All General Instrument silicon diodes and germanium glass diodes are designed for long life and highest reliability in critical military and industrial applications. They exceed the most rigid requirements of mechanical, electrical, moisture-resistance and thermal-stability specifications ■ For details on the full line, write for Catalog SR-1045B.

One Dependable Source For All Your Rectifier Needs

General Instrument silicon power rectifiers are designed to exceed the most stringent requirements for reliability and performance in military and industrial applications ■ The wide range of General Instrument rectifier types, some of which are listed here, includes: top hats, 7/16"-hex medium-power studs, high-power diodes, plastic-encapsulated units, 7/16"-hex high-power studs, 1 1/16"-hex high-power studs, insulated studs, all JAN top hats, rectifier stacks, high-voltage cartridges, and custom packages for special needs.

Packaged Assemblies

General Instrument will package transistors, diodes and rectifiers in any configuration, including "Nano-circuits" ■ Complete circuit encapsulations, featuring compactness and extremely rugged construction with exceptional reliability, have long been made in our extensive packaging facilities. Numerous configurations are available off the shelf ■ Also available are such other standard devices as: high voltage silicon rectifier assemblies silicon rectifiers and modulator quads ■ Write for brochure entitled: "Circuit-Caps."

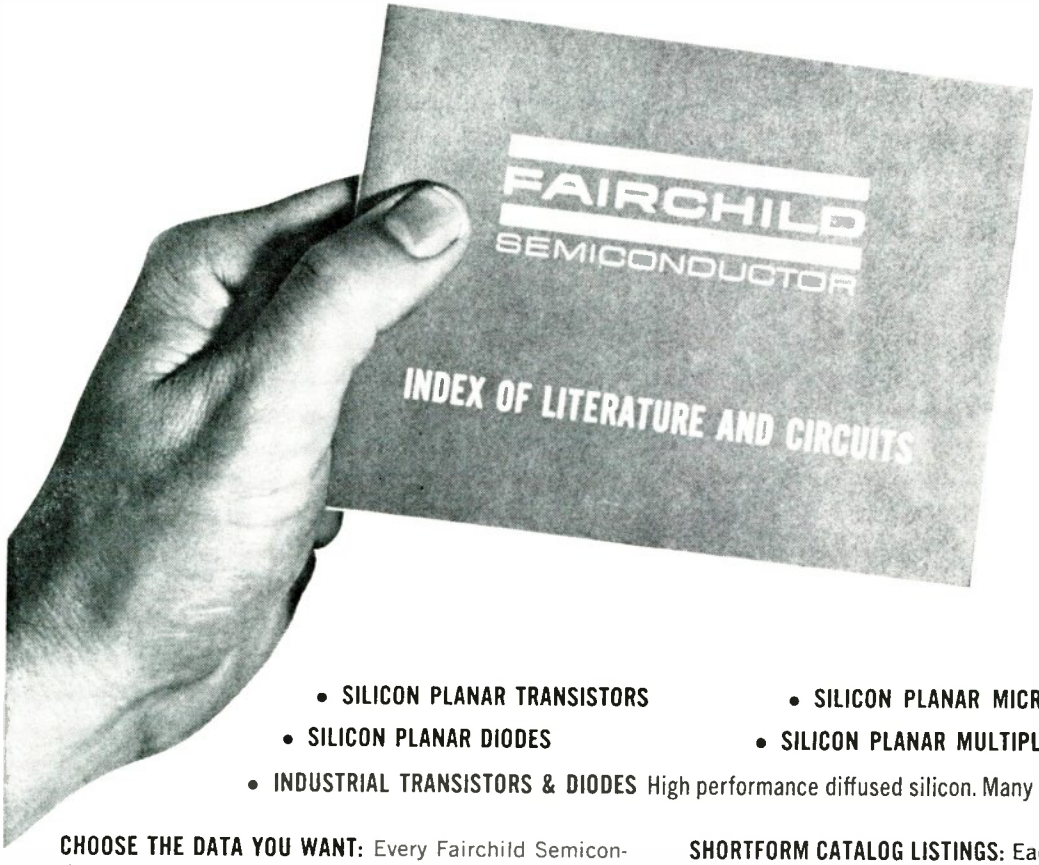
COMPLETE TECHNICAL DATA
UPDATED AUTOMATICALLY



- **SILICON PLANAR TRANSISTORS**
- **SILICON PLANAR MICROLOGIC ELEMENTS**
- **SILICON PLANAR DIODES**
- **SILICON PLANAR MULTIPLES**
- **INDUSTRIAL TRANSISTORS & DIODES** High performance diffused silicon. Many Planar types available

CHOOSE THE DATA YOU WANT: Every Fairchild Semiconductor product data sheet, application note, technical paper, catalog and brochure is reference-numbered in this handy pocket size booklet. A return postage card inside the back cover lists the numbers; circle the appropriate number; mail the card and you will get all the data you want . . . promptly!

TECHNICAL ARTICLES: Informative technical articles and applications papers. Updating lists sent periodically.

SHORTFORM CATALOG LISTINGS: Each Fairchild Semiconductor product listed with abbreviated (but pertinent) specifications as a ready guide to products in which you may have further interest.

SELECTED CIRCUITS: A wide range of useful circuit diagrams with reference numbers to circle for further information and product specifications.

Mail the coupon or write direct to the address below for your free copy of this useful reference tool.

PLANAR PROCESS . . . PLANAR PRODUCTS . . . PLANAR RELIABILITY

The Planar Process developed by Fairchild Semiconductor protects the device from the start of manufacture with an integral silicon oxide surface; junctions are formed under the oxide surface, never exposed to contamination.

Planar products from Fairchild include high reliability transistors, diodes, multiples (more than 100 combinations of multiple transistor and/or diode dice mounted on single headers) and Micrologic Elements (a family of integrated functional logic building blocks capable of performing the total logic and control functions in computers).

Planar reliability has been demonstrated in millions of hours of storage and operating life tests in a wide range of device types. Reliability reports available on many devices, both transistor and diode.

Silicon Junction Diodes

All vacuum alloyed and soldered

In addition to offering such standard features as:

- **hermetically sealed**
- **subminiature package**
- **rugged construction**
- **high temperature operation**
- **efficient rectification**

United is using exclusively high vacuum for all operations where metallic parts are joined, to prevent the remotest possibility of contamination.

BOWMAR REGIONAL SALES OFFICES . . .

Bowmar offers the system designer an integrated, "one stop" capability for all types and quantities of precision control instrumentation. Many precision components and assemblies are available for IMMEDIATE DELIVERY; and specialized units can be redesigned or newly created to satisfy your exact requirements. Additionally, Bowmar's wide experience can be utilized to engineer and produce complete weight and space saving servo packages, to impart maximum reliablity and performance to the overall system.

ULTRA-RELIABLE ENCODER MODULES

to your specs.

SERVO DRIVEN LINEAR/SECANT ENCODER

Package shown weighs only 18 oz., is 1 7/8" square x 6 1/2" long and contains all of the following within the case.

Servo amplifier • Servo motor • 11 bit (2,048 count) binary, self-selecting, V-scan, non-ambiguous encoder (Guidance Controls Mod. ADC 11-11) • 10-turn follow-up pot. • 200:1 ratio gear train • Encoder driver circuit • 11 bit output decoding logic • Track/memory relays • Trimming pots and resistor network • Input and output through 32 pin connector

Guidance Controls Corp. invites your inquiries for servo driven systems of all types.

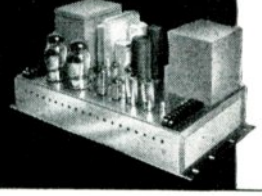
RADIONICS Model SPA-1 VELOCITY SERVO POWER AMPLIFIER . . .

is a 90 watt amplifier specifically designed for use with low-inertia close-coupled a-c servo-tachometer combinations to provide a truly high performance velocity servo system.

The following performance characteristics substantiate the above:



- **Undistorted power output: 90 watts at 60 cps.**
- **Output impedances: Output voltages of 70 and 115 volts, with a buck-boost winding of 5, 10, and 20 volts, for maximum stall-torque adjustment.**
- **Inputs: AC servo drive signal and a-c tach signal mixed with separate gain controls. 20 mv to either channel for full output. Amplifier hum and noise referred to input is 20 microvolts.**
- **Provisions for velocity servo operation:**
  - **Excitation and reference phase shift networks for both servo motor and tachometer.**
  - **Center-tapped drive-signal voltage source for direction of rotation reversal.**
  - **Adjustable tachometer feedback release control to allow maximum slewing rates as a straight servo.**
  - **Compensation for tachometer residual hum prevents motor drift with no signal.**

For further information write for technical data on Model SPA-1 amplifier.

TELEX® HEADSETS

MAGNA-TWIN® MARK III—Developed specially for language learning field, aircraft, ham and commercial broadcasting. Provides true response and reproduction of vowels and consonants; suitable for all electronics applications presently used in American schools. Fully adjustable, weighs only 12 oz. Frequency response: 50 to 9,000 cps. Sensitivity: average 118 db for 1 mw input measured into a 6 c.c. coupler. Impedance to DC resistance ratio: 10:1. Headphone impedances: 500 to 600, 10,000 and 50,000 ohms. Others up to 200,000 ohms available on request. Reluctance, carbon, ceramic and magnetic noise-canceling microphones are optional.

DYNA-TWIN®—Custom-designed, balanced receivers provide unusually sensitive stereophonic reproduction. Dynamic receiver elements also assure exceptional high fidelity monaural listening. Weighs only 12 oz. Foam rubber muff seals and fully adjustable headbands allow use over long periods without discomfort or fatigue. Frequency response: 30 to 15,000 cps based on 10:1 subjective loudness ratio re 90 phons. Sensitivity: better than 90 db SPL for 1 mw input. Input required: 15 mw. Maximum input: 1 watt. Comfortable listening level: 1 mw.

TV "LISTENER"® — New "Listener" is designed to provide unique private listening features for home and institutional uses. Attach any radio, TV or central system without soldering. "Listener" switch turns set speaker on or off; user listens in private through Earset®. Built-in volume control is excellent for persons with a hearing loss. Second listener can use unit with optional second Earset®. Case is high impact plastic; will not crack or break with normal use. 15' flexible cord has built-in strain relief. 5' Earset® cord is flex-tested for assurance of long life.

TWINSET®—FAA approved. For commercial, amateur, and industrial uses. The standard on many airlines. Light and comfortable, just 1.6 oz. Signal piped directly into ears means less background noise and less signal loss. Frequency response: 50 to 5,000 cps. Sensitivity: 120 db above .000204 dynes per sq. cm. for 1 mw input. Impedances: 1,000, 500 (FAA approved) and 64 ohms. Volume control cords optional.

BOOM-MIKE HEADSET—Rugged, but weighs only 3.5 oz. Used on Pan American's 707 Jet Clipper; countless ham radio, TV, ship-to-shore, classroom, secretarial uses. Frequency response: to 5,000 cps. Sensitivity: 120 db above .0002 dynes per sq. cm. per mw input. Receiver impedance: 500 ohms. Available with double or single receiver, split phones. Choice of reluctance, dynamic, crystal, carbon or ceramic mikes with various impedances.

For complete information on these and other TELEX listening devices and accessories, write today.

World Radio History

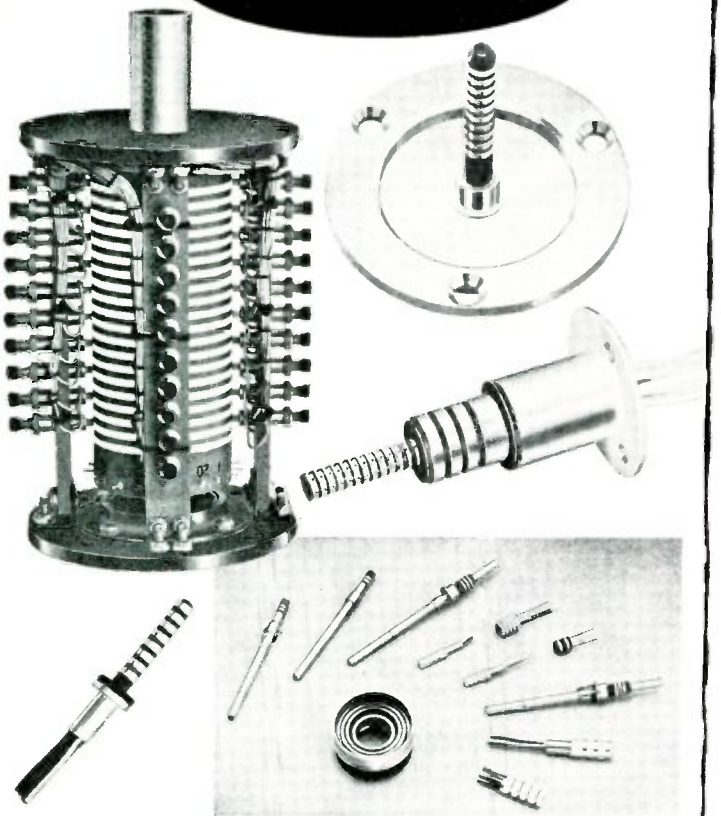
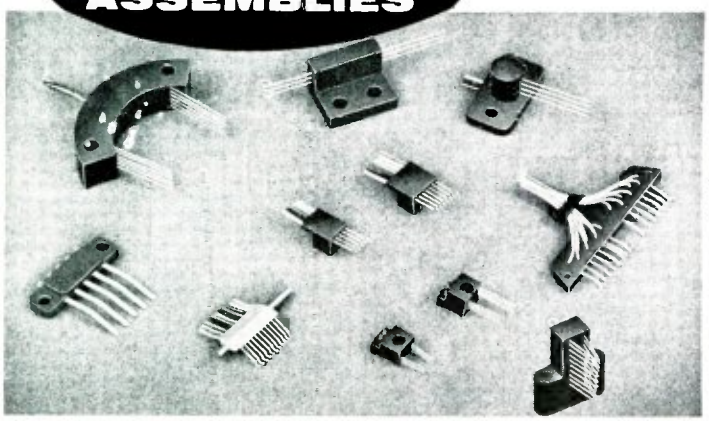
Airflyte ELECTRONICS CO.

Shown here are just a few examples of our products. We invite your inquiry on the development and production to your specifications. Avail yourself of our engineering facilities to carry-through from design . . . to prototype . . . to mass production. Hundreds of stock molds eliminate tooling in most cases.

SLIP RING ASSEMBLIES



BRUSH BLOCK ASSEMBLIES



COMMUTATING SWITCHES

HIGH SPEED ROTARY SWITCHES FOR TELEMETERING, SAMPLING, PROGRAMING AND ANALOG-DIGITAL CONVERSION.

Airflyte's production facilities are geared to produce standard and non-standard commutators at "off-the-shelf" prices. Featuring noise-free performance through the use of solid gold alloy commutating surfaces . . . and exclusive drum construction for maximum life, uniform wear and close angular tolerance. We will supply packaged units (as illustrated) or component commutators and/or brush blocks. All products designed to meet MIL-E 5272 and MIL-E 5400 and other special environmental specifications.

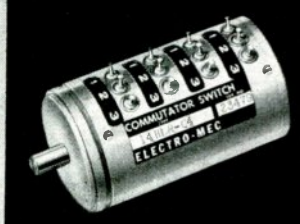
• ELECTRO-MEC • RELIABILITY • ELECTRO-MEC • PRECISION • ELECTRO-MEC • RELIABILITY • ELECTRO-MEC • PRECISION • ELECTRO-MEC • RELIABILITY

Backed by over 10 years experience in building **Precision POTENTIOMETERS** and **DIGITOMETERS** we are now offering to you the NEW

ELECTRO-MEC
Rotary Switch



You will find the same high standards of workmanship resulting in heretofore **unobtainable ACCURACY.**

This switch is presently used in aircraft and missiles.

Available in single or multi-gang assemblies and/or in combination with potentiometers of all sizes.

Certified calibration data supplied with each instrument.

For Engineering Data Sheet giving further details, please write
or telephone ST 6-3402

Teletype: NY4-2126

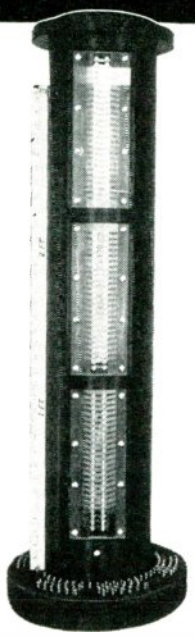
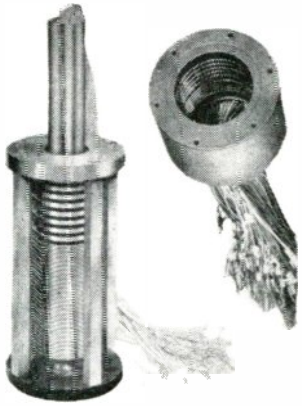
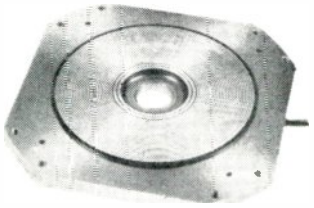
SLIP-RINGS
and
ROTARY SWITCHING
ASSEMBLIES

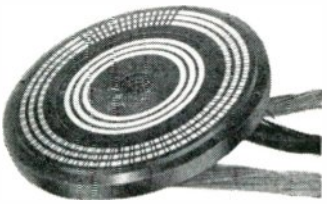


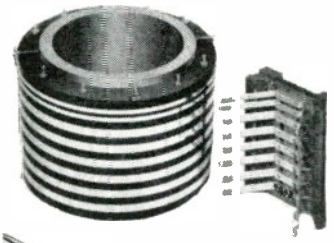
designed and built to your performance specifications

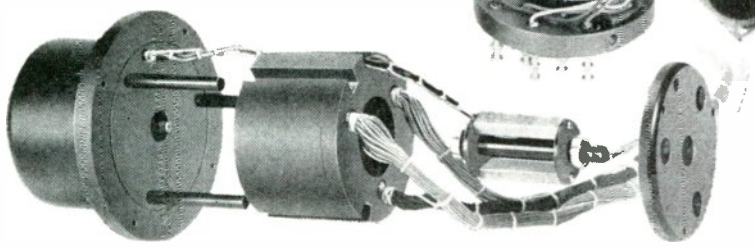
- *Single-circuit or multi-circuit*
- *Low-current or high-current*
- *Drum-type or pancake*
- *Internal or external rings*
- *Continuous or segmented*











Your performance specification is our standard in designing and building slip-rings for such services as: gyros, radar antennas, inertial-guidance systems, instruments, telemetering, programming, sampling, sequence selecting, and thermocouple, thermistor, and strain-gage circuits.

Bulletin 61-01 gives details of representative ELECTRO SWITCH slip-ring designs and includes a convenient check list for your use in specifying slip-rings and rotary switching and selector assemblies. Write today for your free copy.

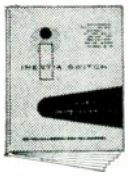
U.S. patents issued and pending

THIS is the actual size of the world's simplest acceleration switch.

It represents a totally new concept in acceleration sensing devices. Weight: about one ounce. Only one moving part: a precision ground ball held by an alnico magnet. The ball is released to close or open an electric circuit when the force of acceleration exceeds the magnet's pull.

It's as simple as that. Yet this versatile I-S design makes possible switches that respond axially, radially, or omnidirectionally, from 0.01 g to 500 gs. With adjustable g settings, if you desire. Automatic reset is optional. Closure time is variable. Accurate within 0.1%. Meets all applicable Mil specs.



But more than an ingenious design, the I-S switch represents an important attitude . . . an attitude that produces only equipment of sound and simple design and reliable performance, of uses limited only by your needs.

Try us; write today for descriptive brochure ID62

INERTIA SWITCH, INC. 311 West 43rd St., New York 36 • JUdson 6-5880

Inertia Switch invites research and development inquiries in the acceleration sensitive field.

For details, circle #543 on Reader Service Card

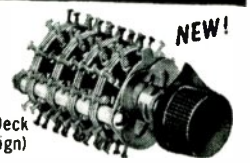
World Radio History

UNIQUE SUB-MINIATURE INSTRUMENT TYPE ROTARY GOV'T-QUALITY TOGGLE J-B-T SWITCHES

- Nominal 1" Dia.
- 12—Positions
- MIL-Materials
- Accelerated Snap-Action Detent
- More Contacts per Deck (patented wafer design)



Series 5000 Provides up to 8 Poles per Deck

Newest in the J-B-T switch family are 1" subminiature Series 5000 and 7000, used exclusively where miniaturized electrical or electronic devices require savings in space or weight and where performance requirements are high. Patented wafer construction provides unusual amount of switching capability per deck. Made with MIL type materials including silver alloy wafer contacts, gold-plated. **See Bulletin SM-11A.**

ROTARY AND LEVER SWITCHES

Catalog 558-G shows the more familiar J-B-T instrument-type rotary selector switches, laminated or molded types, in 14 and 20 positions, providing extra contacts in minimum space. 1 to 6 decks (more in some models). Variations are made as 6-pole, double-throw per deck, also 3-4-5 and 6-position lever types. Molded models available in bonded and ruggedized construction.

TOGGLE SWITCHES AN, JAN, or MIL

J-B-T manufactures over 140 models of single pole, double pole, or 4 pole toggle switches for MIL-S-3950A and other government quality construction. Heavy duty types feature solid coin silver contacts and rocker arms unique to J-B-T for consistently low contact resistance. Medium duty types use double-grip, self-cleaning contacts. Bulletin TS-6C gives details.

Switch to Kulka TOGGLE SWITCHES

Designed and built for long, rugged, dependable service, Kulka Toggle Switches provide positive, precise switching for electronic and electrical circuits. Made to Joint Army and Navy Specifications JAN-S-23, MIL-S-21195, MIL-S-6745 and MIL-S-3950A. Available in SPST, SPDT, DPST and DPDT types, DC and AC up to 1600 cps.

NOW . . . YOUR CHOICE OF TERMINALS

SCREW — SOLDER — OR TAB

Now, specify the terminal type best suited to your needs. Standard screw terminal, hole-through solder type, or male tab for accepting Burndy, AMP or Kent female slip-on connectors.

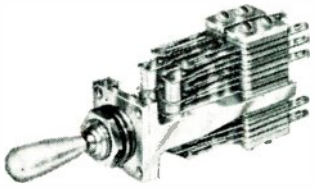
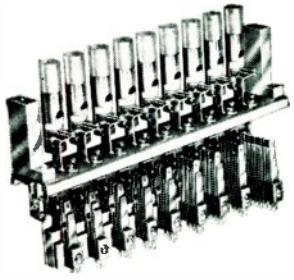
MOSSMAN SWITCHES

PUSH BUTTON • LEVER • TURN





Mossman lever, turn, push and interlocking push button switches are flexibly designed for adaptation to a great variety of electrical switching applications. All Mossman switches are designed for rugged, reliable service, constructed largely with non-ferrous, quality materials, carefully assembled.

R F PRODUCTS

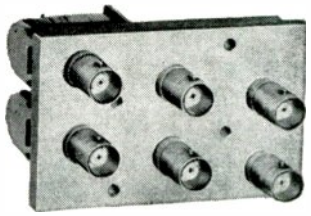
NEW DIMENSIONS IN R F CAPABILITY...

R F Products is a new division of Amphenol-Borg Electronics Corporation. It specializes in the design, manufacture and marketing of radio frequency components and assemblies under the widely known and highly respected trade names of **Amphenol, DK** and **IPC.**

DK PRECISION-BUILT COAXIAL SWITCHES

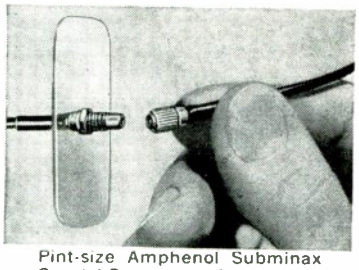
R F Products can usually supply the coaxial switch you need from factory inventory. But if you have a special requirement that can't be met by one of our standard stocked switches, R F Products' engineering group is prepared to design the switch that will—and fast. Over 5000 different DK coaxial switch designs tailored to specific customers applications demonstrate the depth and creative capability of RF Products engineering staff.

Your DK coaxial switch catalog will be sent on request.



Series 323 DK coaxial switches are compact high-density designs for complex multi-position, multi-pole switching.

AMPHENOL IPC COAXIAL CONNECTORS



Pint-size Amphenol Subminax Coaxial Connectors feature full-size electrical characteristics.

R F Products offers a wider range of UG and commercial types of radio-frequency connector designs than any other manufacturer in the industry. Each Amphenol and IPC coaxial connector is engineered to satisfy all standards and most special requirements.

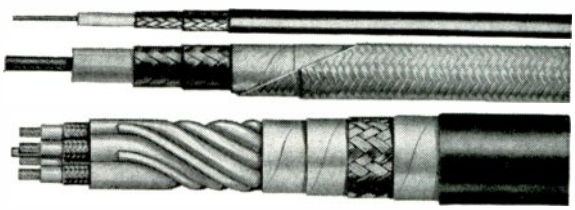
Behind the well-known quality of these coaxial connectors are new dimensions in service and engineering that are yours when you specify connectors by R F Products.

Send for your copies of the Amphenol and IPC coaxial connector catalogs.

AMPHENOL COAXIAL CABLE AND WIRE

R F Products can deliver from stock the largest selection of RG type cables in the world. Add this ability to Amphenol coaxial cable's hard-won reputation for engineering leadership—the first flexible cable to withstand continuous operation at 1000° F., for example—and you get an idea of R F Products' capability to serve you.

Write for R F Products catalog W-61.



There is an Amphenol Coaxial Cable to fit your requirement.

SPECIAL PRODUCTS BY TELEX®

MULTIPLE ARRAY SWITCH*—Special modular construction allows more circuits; use any number of buttons to stack any number of custom arrays up to 92. Each button represents an 8 pole single or 4 pole double throw, normally opened or closed. In many applications this will allow the elimination of relays. All or any button and detent can be interlocked. Absence of complex multiplicity of parts extends reliability over 500,000 operations.

NEON INDICATOR LIGHTS*—Transistor driven, they combine advantages of low current drain with low voltage operation. Supply is 24V DC nominal, signal is -6V DC to trigger. Eliminates auxiliary power supplies and permits operation from logic circuits. Low power requirement allows operation as a two-terminal device by combining signal and supply voltages. Life expectancy is a nominal 25,000 hours for NE-2H @ .5 ma lamp current. Each meets MIL. STD. 202 specifications.

*Variations in sizes and shapes to specification.

World Radio History

SEALECTRO QUALITY COMPONENTS

THE ORIGINAL PRESS-FIT® TEFLON*TERMINALS

Over 600,000 catalogued numbers. The fast, easy, dependable way to make connections. Teflon body withstands high heat, vibration, shock, and temperature cycling. Sealectro provides complete services, including engineering, design, chassis preparation tools, and the world's most complete line of teflon terminals in all standard EIA colors.

- ★ **SUBMINIATURE STAND-OFFS** — The ultimate in space-saving terminals for sub-miniaturization programs
- ★ **SUBMINIATURE FEED-THRUS** — For facilitating connections through chassis or casing in subminiature components and assemblies
- ★ **PROBES AND PLUGS** — Companion units for connectors and test jacks
- ★ **MINIATURE STAND-OFFS** — For components and assemblies stressing higher operating voltages rather than space-saving
- ★ **MINIATURE FEED-THRUS** — Wide selection of bushing diameters and lengths for making connections through chassis or casing
- ★ **CONNECTORS AND TEST JACKS** — Breakaway connectors (male and female) miniature test point jacks (female) accepting test probes.

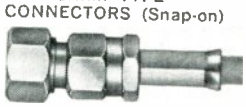
SUPERIOR CONHEX SUB-MINIATURE RF CONNECTORS

SCREW-ON CONNECTORS

SNAP-ON CONNECTORS

NEW CRIMP-TYPE CONNECTORS (Screw-on)

NEW CRIMP-TYPE CONNECTORS (Snap-on)



Superior electrical and mechanical characteristics. Available as either Clamp-On or Crimp-On types for Scew-On or Snap-On connections. Connector to cable connections in either type are stronger than the cable itself. Wide range of types in both 50-ohm and 75-ohm impedance. Captivated contacts insure proper engagement of mating parts. Design prevents distortion of cable, thus eliminating electrical characteristic changes.

- ★ STRAIGHT CABLE PLUG AND JACKS
- ★ BULKHEAD RECEPTACLES
- ★ CABLE FEED-THRUS
- ★ RIGHT ANGLE PLUGS
- ★ CABLE TERMINATIONS
- ★ PRINTED WIRING RECEPTACLES
- ★ TEE ADAPTORS
- ★ BNC AND TNC CABLE PLUGS

★ ADAPTORS, BNC, TNC, N, TO CONHEX JACKS AND PLUGS.

SEALECTOBOARD

CORDLESS PROGRAM BOARDS

An exclusive Sealectro design permitting complete switching, programming and component interpositioning without patchcords in minimum space. Shorting pins, or component holders, are merely inserted at desired X- and Y-axis coordinate. Standard boards available. Custom designed and made boards to fit any X- and Y-axes requirements. Save money. Assure top dependability. Save space. Provide fast, simple operation. Incorporate the Sealectoboard in all equipment requiring multi-point switching, programming or component interposing.

KULKA

TERMINAL BLOCKS

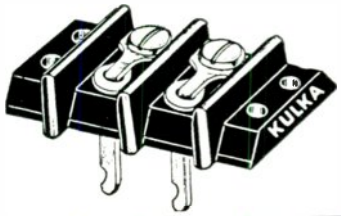
MOLDED BARRIER CONSTRUCTION

Kulka terminal blocks, used extensively in electrical and electronic assemblies, eliminate splicing, increase insulation, stop leakages and shorts, and generally simplify wiring work.

Molded of high tensile strength bakelite for general commercial use, they are available in other materials made in full compliance with latest military specifications, MIL-M-14E, covering CFG, MFE, MME, MDG, MAI-60, GDI-30, PM14, and other types of special plastics.

Kulka terminal blocks are made in many styles and sizes for varied applications. With 1 to 26 terminals, depending on size. Supplied with or without marker strips which may be printed or plain, or blocks can be engraved.

WIDEST SELECTION OF TYPES AND SIZES

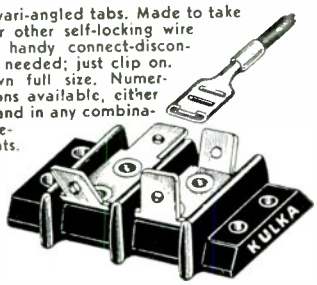


Used extensively in electronic and electrical assemblies, Kulka Terminal Blocks eliminate splicing, increase insulation, stop leakage and shorts, and simplify wiring. In widest range of types, sizes, insulating materials, terminals, etc. Here shown are two types of popular 600 Series. There's a Kulka Terminal Block for every need!

"KLIPTITE" BLOCKS

Available with vari-angled tabs. Made to take AMP, Burndy or other self-locking wire lugs. Fast and handy connect-disconnect; no screws needed; just clip on. 800 Series shown full size. Numerous tab variations available, either flat or angled, and in any combination to meet special requirements.

SERIES 800
Shown full size



MINIATURE BLOCKS

409 Series is ideal for miniaturization. Shown full size. Only 4⅜" long for 21 terminals. 5/16" wide with barrier. Also available with one-sided and two-sided soldering lug. Also with threaded holes taking 4-40 screws for mounting through chassis, if desired.

PRINTED-CIRCUIT TERMINALS

Simplify those external connections to printed-circuit boards, no matter how jammed up. Kulka 520 Series miniature terminal blocks mount on board. Terminal pins below slip into standard mounting holes for dip-soldering. Screw terminals. Readily connected or disconnected. 2 to 24 terminals. Entire assembly can be encapsulated.

MILITARY TERMINAL BOARDS

Heavy-duty terminal blocks in the widest range of types, materials, sizes. Here shown one-quarter size is a Military Terminal Board made to drawing 9000, Series S6505 B, 73214, Rev. H. Supplied in MAI-60 glass-filled Alkyd as per MIL-M-14 with latest revision. Threaded studs of manganese-bronze, molded in plastic. Slotted brass nuts. Typical of the "specials" developed and produced by Kulka.

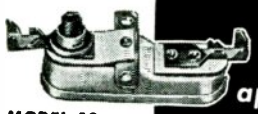
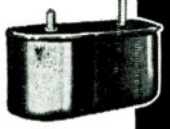
Rugged, Precision
MINIATURE THERMOSTATS



MODEL 13

For your precise applications:

- MISSILES
- ELECTRONIC CONTROL
- AIRCRAFT
- COMPUTERS
- AUTOPILOTS
- TRANSISTOR PROTECTION



MODEL 24

MODEL 11

Illustrations shown full size

★ ***Hermetically Sealed***
★ ***Strain Relief Protected***

The quality of Ulanet miniature thermostats has been proved by years of dependable operation under the most extreme conditions. Their inherent accuracy and rapid response has been the leading reason for their final choice in so many critical applications. Get in touch with Ulanet for the answer to your heat control problems.

NEW!
Hermetically Sealed Surface-Sensing Miniature Thermostat

The only unit that meets the most stringent aircraft and military applications.

Send for Bulletin 100 for full details and dimensional drawings.

FM Series—The only metal thermostats that withstand mechanical clamping or pinching of cartridge without affecting set calibration.

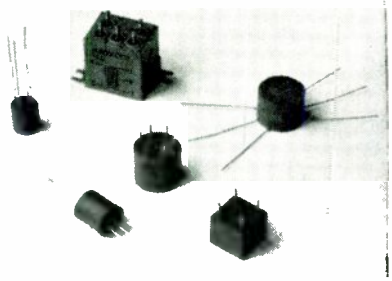
PULSE TRANSFORMERS



Pulse widths available from 50 millimicrosecs to 25 microsecs in a variety of configurations.

Sub-Miniaturization at its very best. Encapsulated, potted, molded and plug-in types.

F & W has specialized equipment and skilled operators, so necessary to handle the extremely fine wire sizes and exacting assembly work required in the production of Pulse Transformers.

Let us quote on your special Pulse Transformer requirements.

To improve output of TRANSFORMERS

specify

Inductrol* Induction Voltage Regulators

Voltage fluctuations can cause electronic tube failure, make equipment operate erratically, increase replacement parts costs. Inductrol regulators operate on the induction principle. This means precise voltage control and high reliability because **no brushes or tubes** are used. G-E Inductrol regulators are virtually maintenance free.

More information appears opposite General Electric "Voltage Regulator" listing in Directory II, Class 72.

*Registered trade-mark of General Electric Co.

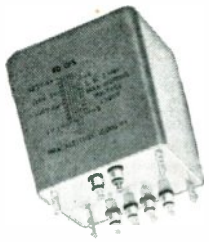
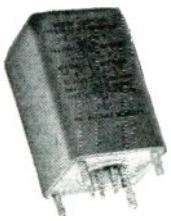
World Radio History

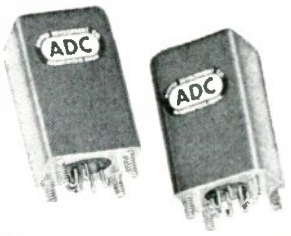
ADC TRANSFORMERS · FILTERS · REACTORS JACKS & PLUGS · JACK PANELS



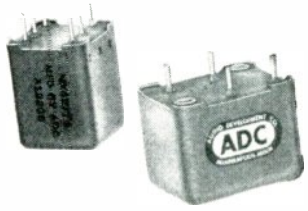
Military Standard POWER Transformers—Types MS-90016 through MS-90036.



Military Stancard AUDIO Transformers—Types MS-90000 through MS-90008.



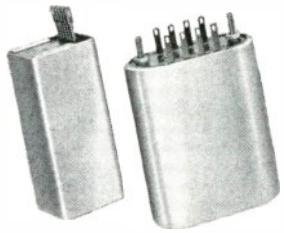
Sub-Miniature, hermetically sealed, low frequency inductors and transformers.



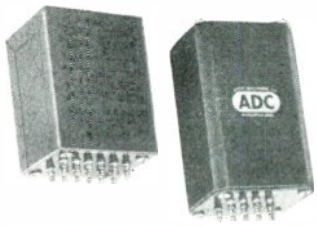
Transformers and filters for TRANSISTOR and PRINTED CIRCUIT applications to meet MIL-T-27A Grade 5, Class R or S.

Toroids—Hermetically sealed or open units for all frequency ranges.

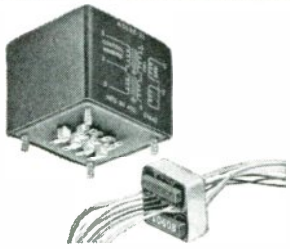
Filters—Sub-Audio to 1.5 mcs.



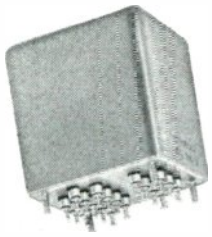
Telephone Coils—Mechanically and electrically interchangeable with Western Electric.



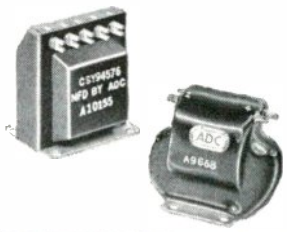
Broadcast Quality Transformers—Standard of the Industry.



Magnetic Amplifiers and Saturable Transformers—For servo motor control; DC-DC Power Supplies, and switching silicon controlled rectifiers.

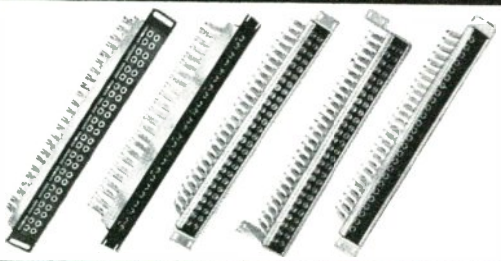


Balanced Modulators—Designs over a wide range up to 500 kcs.

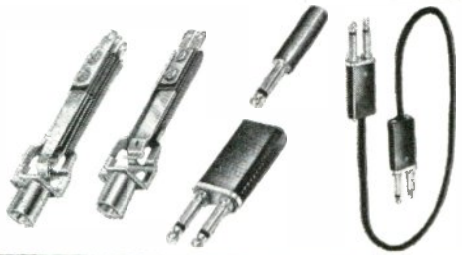


Encapsulated Transformers—Using custom epoxy compounds for military and commercial applications.

Terminal Blocks—Molded to your specifications. Six popular sizes in stock.



Jack Panels—Several size panels in stock.



Plugs, Patch Cords and Jacks—Standard in the communication industry. Long frame telephone type jacks; wide variety; two and three conductor.

Government Approved Qualification Testing Laboratory.

FREED QUALITY

HERMETICALLY SEALED, MIL-T-27A PULSE TRANSFORMERS

- Maximum power efficiency and optimum pulse performance.
- For use in blocking oscillator, interstage coupling and low level output circuits.
- Ruggedized construction — Grade 4.
- Series or parallel connection of windings for optimum turns ratio.

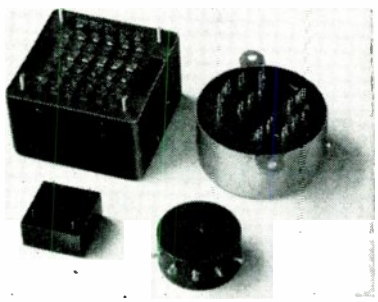
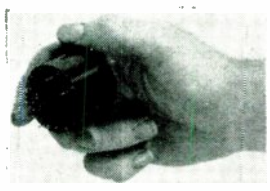
TOROIDAL TRANSFORMERS



All Forbes and Wagner Transformers are produced to meet specific circuit specifications. We can design to solve your problem or build to your own design. Our experience covers miniature, encapsulated, potted, molded, plug-in types. Let us show you what this experience can do for you.

TOROID WINDINGS



We are equipped with the most modern, precision type Toroidal Coil Winding Machines covering a wide range of core and wire sizes. Illustration shows a miniature Toroidal Assembly for use in a magnetic amplifier.

ELECTRAN *Transformers*

Transformers, Saturable Reactors, Chokes, Special Windings and Electronic Devices. Milliwatts to 50 KVA, single or polyphase in all frequencies.

Complete design and engineering service. All modern techniques, encapsulation, casting, military and commercial construction.

And, we've got one asset you'll find especially helpful: WE *TRY* HARDER!

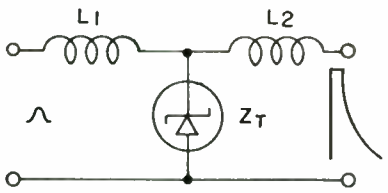
§ 84

PROTECT TRANSISTORS FROM LETHAL TRANSIENT VOLTAGE PULSES

BY USING A GREEN DEVIL

DE SPIKER



SIMPLE AND INEXPENSIVE IN CONSTRUCTION—CLASSICAL IN OPERATION

L_1 is a small High-Q inductor which provides the time delay necessary to POSITIVELY insure the breakdown of the zenor diode, Z_T, prior to the pulse reaching the transistor. L_2 is a Low-Q inductance which helps Z_T dissipate the pulse energy. Thus, the full impact of the incident transient pulse never gets to the transistor.

Available in many stock sizes—with capabilities for carrying from 1 to 30 amps. D.C. Fully encapsulated for many years of reliable service.

Frequency range on some of these units is as wide as 100 kc to 100 mc. Data sheets with individual curves are available upon request

North Hills wideband transformers have been designed for low insertion loss (less than 1 db) and good matching characteristics over wide frequency ranges. Balanced windings feature extremely low unbalanced voltages and have a center tap. Complete specifications are available upon request.

Three case styles are offered. Series AA models are potted in metal cases with a terminal board on the bottom and two 6-32 spade mounting bolts. Series BA are hermetically sealed with glass terminals at the case ends and two 4-40 studs on the bottom for mounting. Series BB is similar to BA except that the unbalanced connection is provided by a BNC connector.

A great variety of different requirements is being met by special designs. Your specifications for custom wideband transformers may be submitted for quotation.

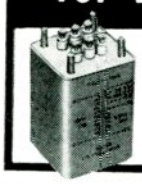
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

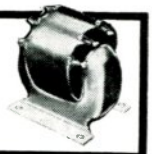
World Radio History

CUSTOM DESIGNED TRANSFORMERS for RELIABILITY



HERMETIC
Ceramic compression terminals. Stud type mounting. Schematic. Baked enamel finish, MIL-T-27A.

ENCAPSULATED HIPERSIL
Bracket mounting. Epoxy impregnation and coating. Resists environmental extremes.



SUB-MINIATURE MIL CASE
Hermetic. Ceramic compression terminals. ¾" x ¾" x 1⅛" H. Wt. 1⅛ oz. MIL-T-27A Grade 4, class R.

MINIATURE MOLDED
Epoxy cast. Resists environmental extremes. For plug-in printed circuits. .040 pins ⅞" x 1⁵⁄₃₂" x ⅞" H. Wt. 1¾ oz.

ENCAPSULATED POWER
Bracket mounting. Used in portable equipment where terminals must be brought out from Transformer.

HIGH TEMPERATURE OPEN FRAME
For Airborne Applications, Teflon, Mylar, and Silicone insulations used. Flat bracket mounting.

HERMETIC
High compression glass bead terminals. Rectangular flange mounting. Full schematic information.

TOROIDS
Precision Inductors, Audio Transformers, Power Transformers, DC-DC Converter Switching Transformers

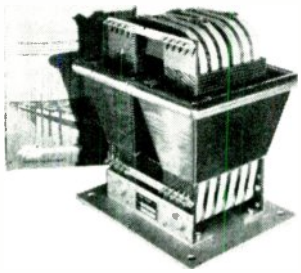
very high voltage high reliability pulse products



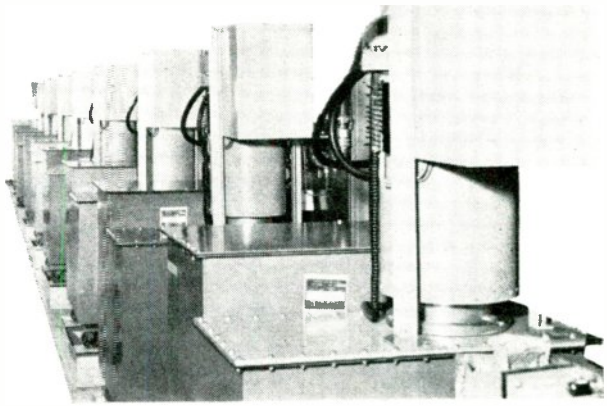
PEARSON PULSE TRANSFORMERS
High voltage custom units designed to meet any specification or system application. We supply complete tanked pulse transformer systems, including filament and pulse current transformers, voltage dividers, heat exchanger, tube socket, all bushings, internal bypassing and connections.

Unit at left, compared with the size of a telephone directory, is rated at 250 kv, 2.5 μsec. and 100 kw average power.

PEARSON PULSE CURRENT TRANSFORMERS
For precision pulse shape and amplitude viewing and wide band waveform viewing. Pulse currents from milliamperes to ten thousands of amperes at voltages up to 300 kv. Fast rise-time - 20 mμsec. Droop - 0.1% to 0.0005% per μsec. High output amplitude accuracy of +1%, —0%.

PEARSON PULSE VOLTAGE DIVIDERS
For monitoring pulse voltages up to 300 kv. Voltage division ratio adjustable from 3000 to 6000 : 1. Droop - 0.01% per μsec. for one megohm cable termination.

ALL PEARSON PULSE PRODUCTS ARE NOW UNCONDITIONALLY GUARANTEED FOR TWO YEARS.



Nine Pearson pulse transformers driving klystron amplifiers in a linac built by Applied Radiation Corporation, Walnut Creek, California. These 200 kv units are tanked complete with pulse shape monitoring, filament transformer, bushings, heat exchanger and klystron socket.

COLD CATHODE TUBES

- count
- readout
- store
- compute
- sort
- control
- time
- switch

GCA10G

GS10H

TWO NEW TUBES

GCA10G — A recently developed tube for the direct coupling of a readout tube to a Dekatron without the need of any additional amplifiers.

GS10H — New, low cost, miniature selector with access to all cathodes. Seated height — 1 1/32".

Dekatron Tubes — Full line of twelve types for totalizing, sorting, programming or controlling. High speed (up to 20,000 cps). Reliable up to 100,000 hours — low current.

Voltage Reference Tube — Useful in high-level stages of DC amplifiers. No jump in characteristic. Constant internal resistance.

Computer Trigger Tube — Inexpensive subminiature tubes especially designed for computer application. Widely used for slow-speed storage applications.

Tetrode Trigger Tube — Designed for Dekatron coupling, readout circuits and bi-directional counting. Reliable in self-quench circuits. Drift-free operation.

Baird-Atomic has more different types of cold cathode counting tubes than anyone! All have been field proven... all feature rugged construction, low power requirements and simple circuitry. And B/A tubes are backed by extensive applications engineering service and a network of distributors in the U. S. and Canada.

For more information on Baird-Atomic tubes and services, send today for HANDBOOK OF COUNTING TUBES. Price $1.00.

BAIRD-ATOMIC, INC.
33 University Road · Cambridge 38, Mass.

Engineers and scientists: *Investigate challenging opportunities with Baird-Atomic. Write Industrial Relations Director. All qualified applicants will receive consideration for employment without regard to race, creed, color or national origin.*

ONE METER TO FOUR MILLIMETERS

New Litton Electron Tubes for Advanced Applications

A. L-3403 KLYSTRON TUBE: One of our super power pulse klystrons for use in long range space radar detection and tracking.

B. L-3270 BROADBAND KLYSTRON: A 2 megawatt L-band klystron offering long life, high peak power, 8 percent bandwidth. Other broadband klystrons, using the exclusive Litton Skirtron techniques, are available with higher power in the L through S-band region with .002-.004 duty cycles.

C. L-3455 HIGH POWER MAGNETRON: A new magnetron delivering a minimum of 2 megawatts peak power at 406-450 mc. with a .002 duty cycle.

D. L-3458 HIGH TEMPERATURE PULSE MAGNETRON: Provides long life operation at ambient temperatures in excess of 662°F. Many hours of 900°F. operation have been achieved in X-band tests.

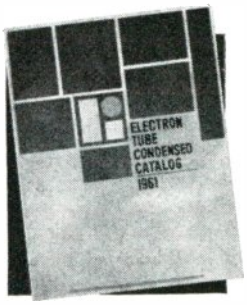
E. L-3629 FLOATING DRIFT TUBE KLYSTRON: High power, water-cooled klystron oscillator fixed tuned at 33,000-37,000 mc. Power output: 15 watts CW minimum. Other tubes available for immediate delivery from 12-4 mm. wavelength.

F. L-3472 TWT: PPM focused traveling wave tube offers higher CW power — 10 watts minimum — and wider bandwidth in a compact 3-lb. size. Operates in the range of 7,000-11,000 mc. One of a line of TWT's including a 1000-watt X-band pulse tube.

G. MICROTRON: The L-3189, one-kilowatt CW magnetron, is accompanied in package form by an electromagnet and filter assembly, high voltage and filament and isolation transformers. Only 6-second warm-up. Two year warranty for domestic microwave cooking.

H. L-3430 CUBE MINIATURE MAGNETRON: A one-kilowatt miniature magnetron, fixed tuned at 9300 ± 30 mc, weighing less than 9 ounces and no bigger than a normal X-band waveguide flange. Developments at other power levels and frequencies are planned.

I. L-3408 SWITCH TUBE: Provides switching at relatively low control voltage levels with an efficiency of 95 percent. Features high voltage holdoff, high current handling. Collector ratings: 150 Kv; 20 Amps; 10 KW dissipation.



For information on our tube line, exclusive of classified types, send for the 1961 Electron Tube Condensed Catalog. Write to: Marketing Dept., Electron Tube Division, 960 Industrial Road, San Carlos, California

Cathode Ray Equipment

Cathode Ray Tubes. Industrial and Military Single and Multi-Gun.

Magnetic, electrostatic, high-resolution, large screen — bright display types; metal to glass, fiber optics face plates; flying spot scanners.

Excellent linearity, uniform screen characteristics, and long life, at remarkably economical prices.

IMAGE INSTRUMENTS, INC.

Double – Ended
ELECTROSTORE
— for —
● PICTURE STORAGE
● SCAN CONVERSION
● ANALOG PROCESSING

Provides independent scanning of both input and output of storage tube. Also gives instantaneous recording and continuous readout as well as continuous and variable, or instantaneous erasure. Readout may be with scans completely different from those used in recording. "Reads" and "Writes" simultaneously. No film, no tape, no processing required.

Write for complete specifications or ask for data related to your own particular image-storage problem.

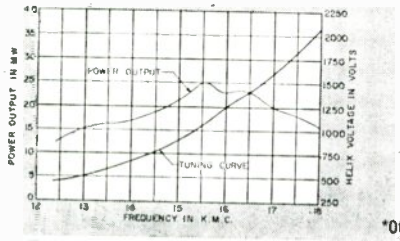
STEWART
Backward Wave Oscillators

Stewart BWOs offer more uniform power output vs. frequency characteristics and electronic tunability over a greater bandwidth than conventional tube designs. Each Stewart BWO is **guaranteed for a minimum of 500 operating hours.**

Standard types are listed below; in addition, Stewart engineers will produce, in either experimental or production quantities, oscillators covering partial or octave bandwidths. Inquiries are invited on permanent-magnet-focused tubes and traveling wave amplifiers.

Performance Curves
Type OD 12-18 BWO

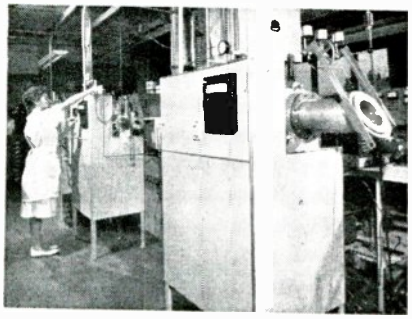


TYPE #	FREQ. RANGE* Gc	POWER** Min-Max, mw
OD 1-2	1-2	50-200
OD 1-2.6	1-2.6	50-200
OD 2-4	2-4	30-120
OD 3.7-5.9	3.7-5.9	30-45
OD 4-8	4-8	10-70
OD 5.2-8.3	5.2-8.3	10-40
OD 6-11	7-11	10-40
OD 6-12	6-12	10-30
OD 7-13	8.2-12.4	10-15
OD 10-15	10-15.5	10-20
OD 12-18	12.4-18	10-25
OD 15-22	15-22	10-20
OD 18-27	18-27	10-20
OD 26-40	26.5-40	5-20

*Other bands also avail. **Higher min. power on special order

STEWART Controlled Atmosphere FURNACES

- cleaner operation
- faster heating and cooling
- lower operating cost
- exceptional ease of maintenance; long service life
- air or controlled atmosphere, with single or mixed gases
- accurate pyrometer control of temperature
- utilizes thermal tube as heating element instead of conventional, wire-wound ceramic muffles



STEWART
Precision Resistance
WELDERS

- complete package unit; built-in electronic timer
- 27 precision controlled heat positions; automatic or manual firing; 1/120 or 1/60 sec. weld time
- portable, lightweight; no installation, no holes to drill
- flexible cable foot control, operable from any location
- universal electrode mount; instantly adjustable
- fully adjustable weld pressures

**This regulation is the change in voltage over the useful range of current from MIN. to MAX.

Commonly Used Models in T-9 Size

TYPE	NOM. VOLTAGE	TOLERANCE	NOM. TEST PT.	CURRENT IN μa MIN.	MAX.	PEAK	REGULATION**
GV9A-600	600	±15V	1000μa	50	1500	2000	25V
GV9A-1000	1000	±25V	1000μa	50	1750	2200	45V
GV9A-2000	2000	±50V	1000μa	50	3500	4200	80V
GV9A-3000	3000	±75V	1000μa	50	2700	7000	110V

**This regulation is the change in voltage over the useful range of current from MIN. to MAX.

* T-3 size voltage regulators are available in any desired nominal voltage ±2% from 400 volts to 2000 volts at the customary test point of 50 ua. T-5½ size voltage regulators are available in any desired nominal voltage ±3% from 400 volts to 6000 volts at the nominal test point at 100 ua. Metal regulators are available in any desired voltage ±500 volts from 7½ KV. to 27½ KV. at the customary test point of 500 ua. All other characteristics such as maximum and minimum currents, regulation, etc., may be interpolated from the table.

1962 IRE DIRECTORY

Directory III
Materials & Services

Electronic Hardware, Fabricators and Services, Machinery & Tools, Materials & Production

23 major groups
270 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment

II. Components

III. Materials & Services

Within these three basic directories, 112 major product and service groups are numbered consecutively throughout. Under each of these 112 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing all products in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25H
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

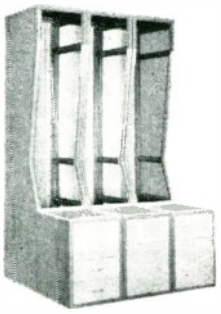
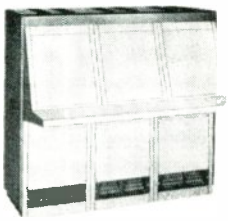
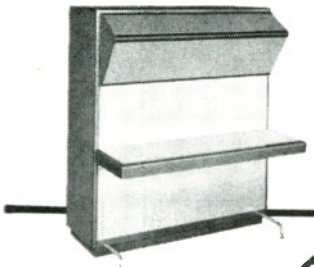
AMCO 1000 G's CERTIFIED SHOCK TESTS



Aluminum



Semi-Custom



Custom

Amco Aluminum and Semi-Custom Modular Frames qualify for Airborne, Shipboard and Ground Support Applications

Certified Independent Tests prove Amco Aluminum and Semi-Custom Frames withstand shock & vibration under Mil E-5272C; Procedure XI (5–500cps), Procedure III (approx. 1000g's shock Mil-S901), Procedure II (15g's and drop Mil-S4456). Write for Test Report Supplement E.

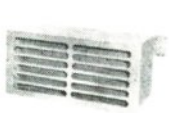
ALUMINUM . . . Unique! Meets any size . . . Flush or recessed mounting of panels. Almost any shape from 13 basic parts . . . 3 castings & 10 extrusions. Units from 6″ to 20 ft.; slopes from 0° to 90° standard. MilSpecs 6062-T6 extrusions and 356-T6 castings.

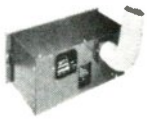
SEMI-CUSTOM . . . Heavy-duty, more internal clearance . . . 14 ga. box-channel steel frames, 12 ga. gusseting provides exceptional rigidity both front-to-back and side-to-side. Frames based on 22 1/16″ increments provides clearance for recessing 19″ wide panels. Meets EIA Standards.

CUSTOM . . . When space and appearance are critical . . . 16 ga. double-channel steel frames, based on increments of 19 1/16″ widths, supports in excess of 3000 lbs. Multi-width panels and cowlings give single-unit appearance with series mounted racks. Meets EIA Standards.

Amco manufactures all necessary blowers, chassis slides, doors and drawers, writing surfaces, cowling lights and other accessories. **Check the extra savings you get thru Amco's combined-discount system of racks and accessories.** *PLUS FREE ASSEMBLY.*

Amco is your one complete source of Modular Instrument Enclosure Systems and Accessories. Write today for catalog of complete specifications.





REALISTIC 3 WEEK DELIVERY

World Radio History

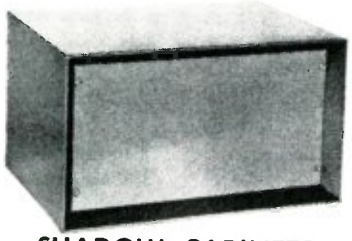
TRANS-AIRE BLOWERS

Bud Trans-aire Blowers are ideal for use where excessive heat is generated by equipment in an enclosed rack, cabinet or console. They have thermal overload protection and automatic re-set. These blowers occupy less area, and a smaller panel space than others having similar air displacement capability. They are the lowest priced units of equal capacity and performance. Available in three sizes with air displacement from 100 cfm. to 700 cfm.



SHADOW CABINETS

An extremely versatile housing since both front and rear panels as well as bottom may be removed for installation or servicing purposes. Unusually attractive appearance is created by recessing the front panel one inch as well as by beveling the front. The recessed front panel prevents accidental movement of controls, knobs and switches attached to it. The two piece body is made of 18 gauge steel and the panels of 16 gauge steel. Four sizes available. Finished in light gray hammertone. Four rubber feet supplied.

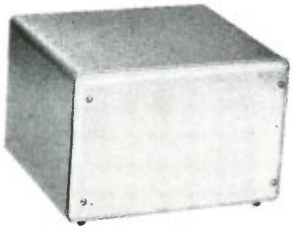
CREATE THE IDEAL ENVIRONMENT FOR YOUR ELECTRONIC EQUIPMENT WITH THESE BUD PRODUCTS

COWL-TYPE MINIBOXES

Bud Cowl-Type Miniboxes have a projecting cover which reduces glare from overhead lighting. It also provides protection for controls and dials. Cover has two box braces to which the bottom is attached by means of sheet metal screws. When assembled, this type of construction results in a sturdy, rigid housing. The unit may be table mounted or hung from a wall. Fabricated of .040 aluminum and furnished natural or with light gray hammertone finish. Four sizes available.

CONTOUR UTILITY CABINETS

This Bud Utility Cabinet is a very practical housing with symmetry and strength. All parts are fabricated from 20 gauge steel to provide strength and rigidity. Both front and rear panels are removable, the front panel being solid while the rear panel is louvered to provide ventilation. The body is finished in smooth dark gray enamel and the panels in light gray enamel. Four rubber feet supplied. Six sizes available.



See these new Bud Products at your Authorized Bud Distributor or write us for literature.

STANTRON

Stantron's broad line of cabinetry comprises the widest range of modular elements available. It combines unequalled flexibility, accessibility, capacity, and economy with the professional styling and superb workmanship ordinarily associated with expensive custom housings. Over 170 standard modular elements.

Authoritative Reference Data:

How to Specify Electronic Wire and Related Products...

from Alpha ...40 years of applied engineering know-how

ALPHLEX TUBING: Catalog contains complete description of the entire line of eight Alphlex tubing products. Applications and all pertinent engineering specifications are listed in easy-reading charts. Highlighting the catalog is the Alphlex line of Teflon Tubing — a high temperature tubing (260° C.)

ALPHLEX ZIPPER TUBING: The most up-to-date and complete engineering brochure on the Alphlex line of Zipper Tubing. Featured is complete information on all 5 types of Zipper Tubing, and the unique handtool that simplifies closing.

SHIELDING AND BRAIDING: Applications, descriptions and all engineering data on Alpha Shielding and Braiding. Specifications on the 3 different types, Flat Braid, Oval Commercial Braid and Tubular Braid to military spec QQ-B-575 are provided. A special glossary is included.

ALPHLEX LACING CORDS AND TAPES: Types, materials and finishes for Round, Flat Braided, and Government Spec Cords and Tapes are included in the brochure. Alpha stocks a complete line of Lacing Cord for immediate delivery.

ALPHLEX SHRINKABLE TUBING: The newest addition to the Alphlex line of Tubing is Heat Shrinkable Tubing. This tubing, featuring controlled shrinkage, forms a tight mechanical bond seconds after heat is applied. Sizes, physical properties and a complete "How to Use" section are included.

ALL-NEW ALPHA ELECTRONIC WIRE AND CABLE CATALOG: 52 pages of complete engineering information describing the entire Alpha line of over 6000 electronic wire, cable and tubing products. Included in this comprehensive book are Military Specification breakdowns, plus complete descriptions and applications of all Alpha products. The catalog highlights such new products as:

- Retractile Coil Cords and Extension Cord Sets
- Teflon Cables
- Heat Shrinkable Tubing
- Teflon Tubing
- Zipper Tubing
- Shielding and Braiding

A special section describes Alpha facilities such as Striping, Cutting, Stripping, Tinning, Color Jackets, Short-Run Cables and the fabrication of Harnesses and Assemblies.

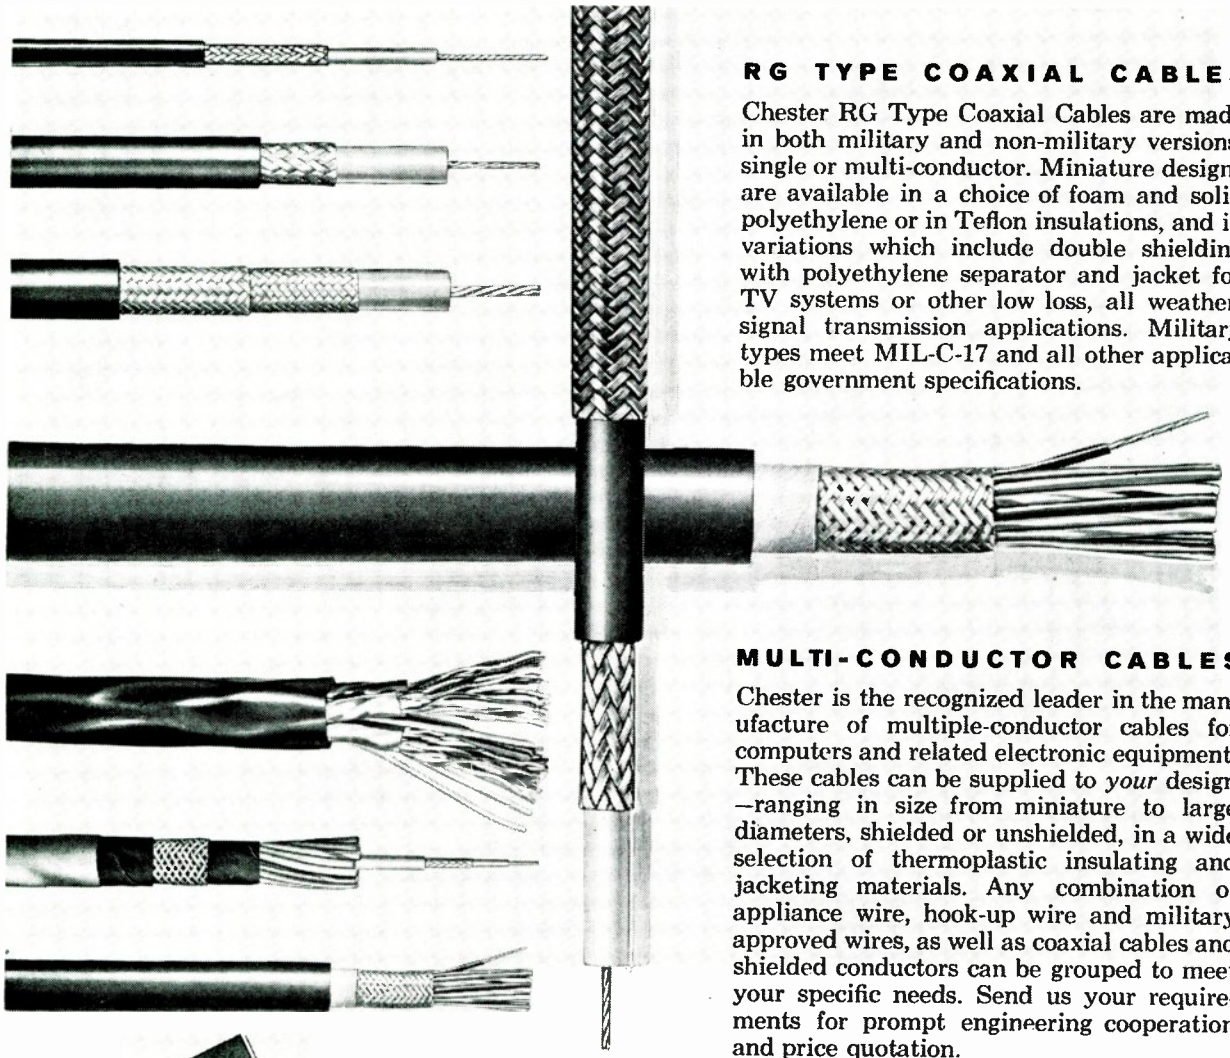
CHESTER

SPECIALISTS IN QUALITY CABLE CONSTRUCTION FOR THE ELECTRONIC INDUSTRY

Single conductors or any number of pairs . . . for coaxial and control applications. As a "specialist in specials" Chester concentrates on meeting the increasing demands of both military and commercial electronics for plastic insulated wire and cable – particularly coaxial cables and multi-conductor constructions. Typical types are shown here. All Chester products may be varied in conducting, insulating, jacketing, shielding or armoring materials to meet your particular needs.



RG TYPE COAXIAL CABLES

Chester RG Type Coaxial Cables are made in both military and non-military versions, single or multi-conductor. Miniature designs are available in a choice of foam and solid polyethylene or in Teflon insulations, and in variations which include double shielding with polyethylene separator and jacket for TV systems or other low loss, all weather, signal transmission applications. Military types meet MIL-C-17 and all other applicable government specifications.

MULTI-CONDUCTOR CABLES

Chester is the recognized leader in the manufacture of multiple-conductor cables for computers and related electronic equipment. These cables can be supplied to *your* design –ranging in size from miniature to large diameters, shielded or unshielded, in a wide selection of thermoplastic insulating and jacketing materials. Any combination of appliance wire, hook-up wire and military approved wires, as well as coaxial cables and shielded conductors can be grouped to meet your specific needs. Send us your requirements for prompt engineering cooperation and price quotation.

NEW, Chester's fact-packed coaxial cable selection guide. Write for your free copy.

HITEMP

A DIVISION OF SIMPLEX WIRE & CABLE CO.

Specialists in High Temperature Mil-Spec Wires and Cables

MIL-C-17B **NAS-703** **MIL-W16878C** **MIL-W-7139A** **MIL-W-19583**

"HITEMP FX" MAGNET WIRE A cross linked polymer with excellent mechanical properties for 260°C and plus continuous operation.

CERAMIC FILM INSULATED MAGNET WIRE—"CERAMATEMP" A flexible magnet wire for operation at 1000oF. Available in sizes 20 to 36 AWG in single and heavy thicknesses.

TEFLON MAGNET WIRE—"TEMPRITE" Sizes 14 to 50 AWG, single, heavy, triple or quadruple thicknesses, conforming to MIL-W-19583 (NAVY). Heavy triple and quadruple coatings. Available in 8 solid colors to conform with MIL Std. 104.

SPECIAL TEFLON MAGNET WIRE—"TEMPRITE X" Same characteristics and sizes as regular Temprite, but specially processed for severe abrasion applications.

MODIFIED RESIN ENAMEL MAGNET WIRE—"THERMISTER-L" Sizes 14 to 42 AWG inclusive. Used for temperatures from −54°C to +155°C. Available in single or heavy thicknesses. Conforms to MIL-W-19583 (NAVY) except for temperature rating.

CABLES Complete cable assemblies and fabrication.

MINIATURE EXTRUDED TEFLON HOOK-UP WIRE—"MX AND MXR" Available in sizes 22 to 32 AWG with standard or reinforced conductor. This special 300 volt thin wall insulated wire is a boon to miniaturization.

TEFLON HOOK-UP WIRE—"TEMPRENE" Fused Teflon tape insulation on wire sizes 8 to 32 AWG. Two or three color striped combinations, plus 10 solid colors. Conforms to MIL-W-16878C (E and EE).

TEFLON EXTRUDED HOOK-UP WIRE—"TEMPREX" Sizes 10 to 32 AWG, in both striped and solid colors. Conforms to MIL-W-16878C (E and EE).

SUB-MINIATURE TEFLON LEAD WIRE—"DQT" Solid copper conductors with Teflon film insulation rated at 300 volts. Available in sizes 20 to 32 AWG, and in 8 solid colors.

TEFLON INSULATED LEAD WIRE—"TEMPCLAD" Teflon insulated lead wire with an outer covering of Teflon impregnated glass fiber braid. Sizes 10 to 28 AWG in 8 solid colors.

100X EXTRUDED HOOK-UP WIRES AND JACKETED CABLES To all applicable military specifications. Sizes 4 to 32 AWG.

FLEXIBLE TEFLON TUBING—"TEMPRENE NON-RIGID" Sizes 10 to 26, solid colors and special striped combinations. Also large diameters ⅛" to 1" in 12" lengths.

"HIWRAP" Unfused, fused and bondable Teflon tape.

TEFLON EXTRUDED TUBING—"TEMPREX TUBING" Sizes 2 to 30 AWG. Fourteen solid colors.

100% SHIELDED WIRES Seamless tube of solid metal (copper, nickel, stainless steel) formed over single or multiple insulated wires to afford 100% shielding for RF or radiation applications

SHIELDED AND JACKETED MINIATURE CABLES Consist of Temprene or Temprex Conductors, shielded and jacketed for high temperature operation. Jackets available in fiberglass braids, teflon or silicone saturated, fused teflon tape, or vinyl insulation.

RIBBON CABLE ASSEMBLIES—"TEMPBRAID" 100% Teflon, flexible, flat ribbon multi-conductor cables. Available in from 2 to 30 conductors in sizes 12 to 32 AWG.

MINIATURE LOW NOISE COAXIAL CABLES Available in 50, 75 and 95 ohm impedances and attenuations of 28, 20 and 15 db/100 ft. at 400 mc., respectively.

MINIATURE LOW CAPACITANCE COAXIAL CABLES Available in 8.5 or 10.5 mmfd./ft. capacitance ratings.

MINIATURE COAXIAL CABLES Consist of 50, 75 and 95 ohm cables, shielded and jacketed for applications up to +250°C. QPL approved for conformance to MIL-C-17B.

HEATER CABLES Teflon insulated for 600 volt operation. Size 12 to 26 AWG.

HIGH TEMPERATURE AIRCRAFT WIRE For 600 volt service at 400°F. Conforms to MIL-W-7139A (AER). Available in sizes 6 to 22 AWG, in 6 solid colors.

TEFLON MARKING FLUID Teflon printing ink available in black. Can be used for printing codes, etc., on Teflon.

SURFACE TREATED TEFLON WIRES Adherence of varnishes and compounds on Teflon hook-up and magnet wires now practical. Available in 10 solid colors. Conforms with MIL Std. 104.

REINFORCED STANDARD CONDUCTORS—"HIGH STRENGTH" Mechanically improved conductors Teflon insulated to meet all reuirements of MIL-W-16878C. Available in sizes 24 to 32 AWG.

"WRAP-IT" 100% Teflon pipe thread sealer.

FILM and FABRIC INSULATED MAGNET WIRES

Film Insulations: Enamel, EZ-Sol (nylon), Hud-Sol (polyurethane), Formvar, Siliclad (silicone), Nyform, Nypoly, Isonel & ML (220°C), each single or heavy. Sizes 14 to 56. Fabric Insulations: Celanese, Nylon, Silk, Cotton & Orlon, each single or double. All solid & tracer colors, Sizes AWG 20 and finer. Combinations of Film & Fabric insulations available.

SPECIALS: High Frequency Litzendraht. Voice Coil. Bifilar & Trifilar. Pig-Tail leads. Braided Wires. Loop Wires. Silver plated Nickel. Aluminum. Special Servings of Nylon & Celanese in colors.

SINGLE END and STRANDED BARE CONDUCTORS

Copper (ETP & OFHC), Brasses, Bronzes, Other Copper Alloys, Aluminum, Silver, Zinc, Cadmium, Nickel, Tin, Lead, Monel, Stainless Steel, and Copper Coated Steel. Most metals available plated with Silver, Nickel, Tin (Hot Dip & Electro), Tin-Lead Alloys and Gold.

Concentric, Unilay, Bunched, and Rope Stranding, regular and reinforced, in finished Sizes AWG 4 to 32.

FINE WIRE AT ITS FINEST

6E-16	16 (26 x 30)	0.074	10.00
6E-14	14 (37 x 29)	0.092	17.10

MINIATURE TEFLON COAXIAL CABLES (MIL-C-17)
Temperature Rating: −90° C. to +250° C.

	RG-188/U	RG-196/U	RG-187/U	RG-195/U
Impedance (ohms)	50 ±2	50 ±2	75 ±3	95 ±3
Dielectric Strength (Volts RMS, Min.)	2000	2000	2000	2000
Corona (Volts RMS, Min.)	1200	1000	1200	1500
Attenuation (BD/100 ft. Max.)	20	29	21	17
Conductor (S.P. Stranded copperweld)	(7 x 34)	30 (7 x 38)	30 (7 x 38)	30 (7 x 38)
Max. O.D.	0.110"	0.080"	0.110"	0.155"

Teflon jackets are available in solid colors and spiral striped combinations.
Special jacketing materials are available as required.

INSO

INSULATED WITH A FUSED TEFLON LAMINATE

WIRE and CABLE

Made by Teflon specialists for applications demanding highest quality and top reliability

- Maximum space and weight savings.
- Stays put in any position, any form.
- Perfectly concentric Teflon insulation.
- Can be furnished surface-treated for encapsulation with no discoloring, no reduction in dielectric strength.

Other products and services

TYPE "E" and "EE" (MIL-W-16878) wire and cable.

SPECIAL CABLES engineered to your specific environmental and space requirements utilizing INSO miniature or standard wire constructions.

FUSE-FLEX—A flexible thin wall tubing with an insulation of 6 Mil (0.006") wall fused-film Teflon, a dielectric strength of 5000 volts RMS minimum, and a temperature rating of −90° C. to +250° C. Available in sizes from No. 30 AWG through No. 10 AWG. Also available in other wall thicknesses to solve your particular problems.

LIGHTWEIGHT, LOW BULK, POWER CONDUCTORS (MIL-W-16878)
Insulation: 8 Mil (0.008") to 20 Mil (0.020") Wall Fused Teflon Laminate 3-Ply
600 Volts RMS Service; Dielectric Strength 2.2 KV; AC Spark Test 3.0 KV
Temperature Rating: −90° C to +250° C

INSO PART NO.	AWG AND STRANDING	DIAM. OVER INSULATION (NOMINAL)	WEIGHT IN LBS. PER M FT.
10E-14	14(37x29)	0.099"	16.9

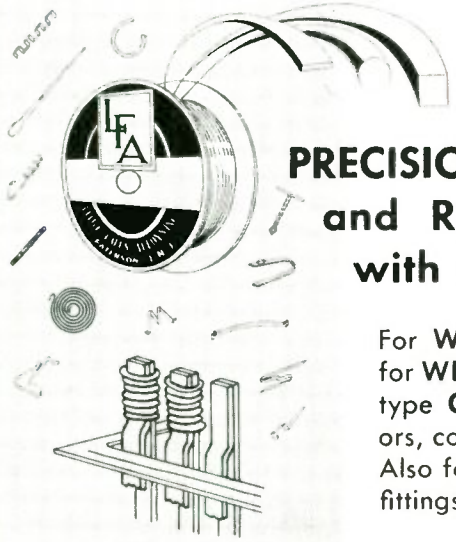
World Radio History



PRECISION - Square, Flat and Rectangular Wire with Controlled Edges

For **WELDED** electronic circuitry, for **WIRE-WRAP** and **PLUG** or **PIN** type **CONNECTORS** for computors, control systems, missiles, etc., Also for springs, terminals, forms, fittings, prongs, contacts and clips.

Silvercoate ® Beryllium Copper — Brass — Bronze — ni-clad-ti Titanium — Aluminum — Hot Solder Dipped — Tinned — etc.

Square and rectangular shaped wires are frequently used in modern "wrapped" terminal and pin or plug type connectors. For this application the edges must be finished quite sharp (usually .003 radius corners or less) but without a burr or flashing. Also required are **closely controlled dimensional tolerances** and smooth finish. Uniformity of temper is essential. Therefore close control of all facets of wire manufacturing is of paramount importance.

LITTLE FALLS ALLOYS, INC. 189 CALDWELL AVENUE, PATERSON 1, NEW JERSEY

HIGH TEMPERATURE WIRE AND CABLE

***HOOK-UP WIRE**
MIL Spec & Ultra-Thin Wall.

Teflon — Extruded, Spiral Wrapped, and FLEXOLON wire, Types E-EE-ET-K-KK and KT to MIL-W-16878D and Types C & A to NAS-703 (−90° to +250°C). Teflon—Extruded Wire to MIL-W-27300 (USAF).

Vinyl — Extruded, and parallel wrapped. Types B-C to MIL-W-16878D and Types C & A to NAS-702 (−55° to +105°C). Types LW-MW to MIL-W-76A (−40° to +80°C). Super-flexible wire (−40° to +20°C).

***COAXIAL CABLE**
Solid Teflon Core and Air Dielectric Designed to MIL-C-17C (RG Specs.) (−90° to +250°C).

MULTI-CONDUCTORS
Standard and Custom Designed to Military and Commercial Specs.

AIRFRAME WIRE
Designed to MIL-W-7139B (−90° to +250 C).

*Immediate shipment from extensive stock.

Now! TROUBLE-FREE SCREEN PRINTING!

STAINLESS STEEL WIRE CLOTH (mesh specifications to 500 x 500). Controlled quality now permits the reproduction of the finest detail combined with the longest runs in printed circuit, resistor and capacitor design.

PERLON MONOFILAMENT FABRIC...all mesh specifications. The unique synthetic fabric with the "built-in" resilience which permits accurate screen printing over rough surfaces and into concave areas.

SCREEN STAR PHOTO EMULSION #71 and (heavy viscosity) #82. The... trouble-free... coating that adheres equally well to all screen fabrics and will develop the sharpest photographic detail into a smooth, tough and insoluble stencil. *Write:*

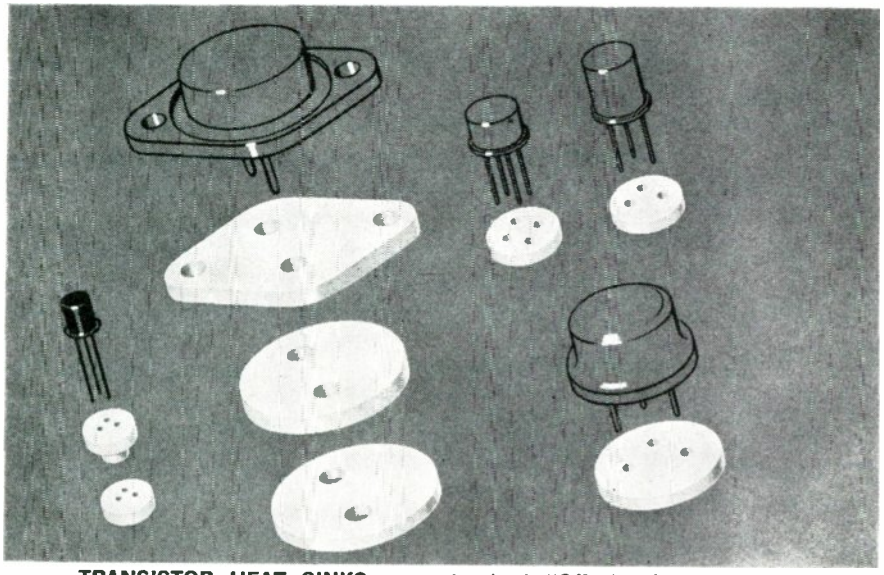
BERLOX®
(BERYLLIUM OXIDE)

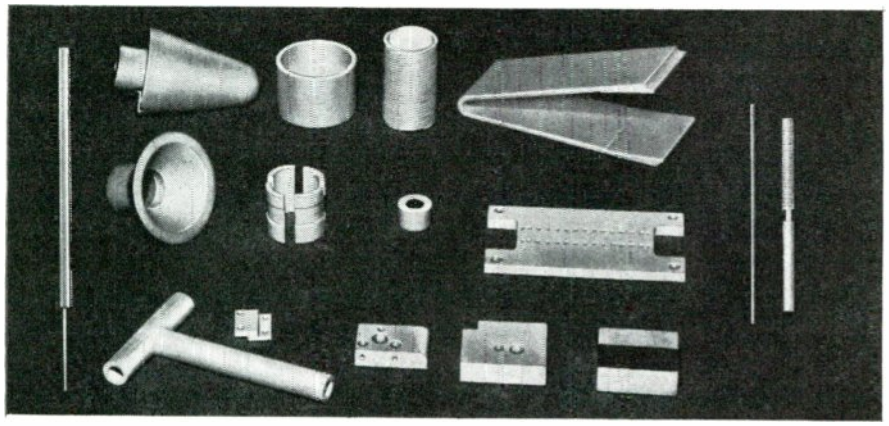
CRITICAL TEMPERATURE, PRECISION COMPONENTS

National Beryllia's complete facilities can provide you with a wide range of precision ceramics for your every requirement. Important properties include:

- High electrical resistivity
- Extremely resistant to shock vibration and moisture
- Excellent Thermal conductivity
- Increased Transistor Output and Life



TRANSISTOR HEAT SINKS . . . a standard "Off the Shelf" line of of Berlox® beryllia heat sinks is available in (JEDEC) TO Numbers: 3, 5, 8, 9, 11, 12, 16, 18, 33, 38 and 39.



STANDARD BERLOX® ITEMS . . . a full line including: thermocouple protection tubing, swageable insulator beads, micro-module wafers, crucibles, combustion boats, tubes, rods and bars in various sizes. Many other precision components such as microwave windows, circuit substates and insulators can be fabricated on a custom basis. These components are also available in Aluminum Oxide, Magnox, Thorox and Zirox.

METALLIZING . . . complete facilities available for high temperature sealing and brazing.

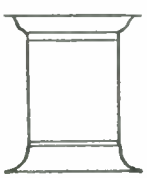
Precision Technical Ceramics and Composites



CFI Corporation
Dept. IRE
Cottage Place
Mineola, N.Y.
PI 6-0571

CFI Corporation provides integrated skills and facilities specifically adapted to the design, prototype development and production of high-temperature ceramics, components, ceramic-metal vacuum composites, glass-metal seals and specialized body compositions.

Typical ceramic products include modular forms, spacer and abrasion-resistant elements, metallized parts, multi-terminal composites, compact high-temperature power lead through elements and envelope assemblies.

Body compositions comprise high Alumina, Steatite, Forsterite, and customized materials, such as Series 1000 LOSSY ceramic for microwave attenuation.

For complete details on CFI custom-designed ceramics and ceramic-metal composites to fit your specifications, call CFI today. We're ready to work with you right now!

World Radio History

on applications where

TOP QUALITY CERAMICS

are essential

insist on

Isolantite

the first name in steatite

Leading electronic manufacturers depend on the original, pre-war quality of all ISOLANTITE products *because* it saves them time-money-production headaches.

It will pay you to secure quotations from Isolantite.

a few "ISO" PRODUCTS

- Bushing, Stand-off and Antenna Insulators
- Beads, Washers
- Bobbins
- Supports, Coil Forms
- Sleeves
- Standard and Special Designs of all types of Pressed, Extruded or Machined Steatite Components.
- Low Loss Silicone Alloy

Isolantite MANUFACTURING CORP. Stirling, N. J.

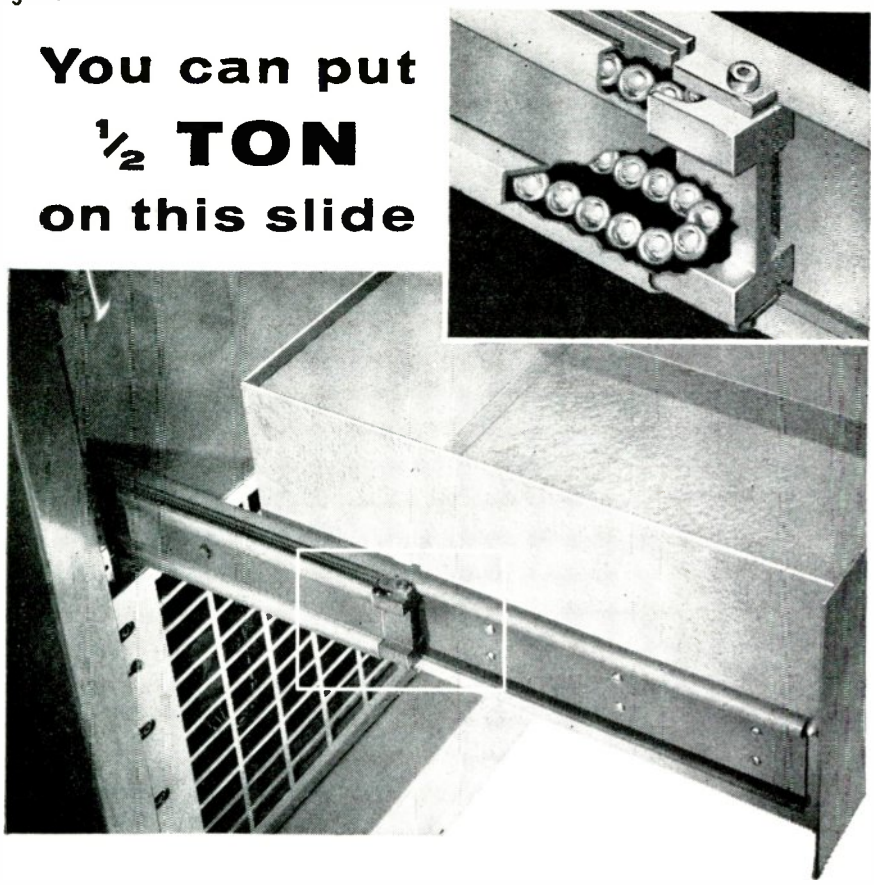
World Radio History

You can put ½ TON on this slide



New Heavy-Duty Slide from Chassis-Trak

Now you can rack-mount your heaviest electronic gear, yet keep it readily accessible for checking and servicing. A new heavy-duty Circulating Ball Slide, developed by Chassis-Trak, will easily support equipment in the 1000 lb. range, *even under extreme shock and vibration conditions.* Secret of the slide's strength is its Circulating Ball design *(see phantom view above).* Weight is distributed evenly over the balls which rotate in the direction of the pull, resulting in easy sliding action.

The new Circulating Ball Slide is permanently dry-lubricated with Poxylube 75, a bonded molybdenum disulfide film which assures smooth operation for the life of the slide. Easily assembled with standard hardware, the slide is available in lengths from 16" to 24" in two-inch increments and in lengths up to 60" in six-inch increments. Each track is only 1⅛" wide and 3" high, requiring much less chassis space than other slides in this heavy-duty range.

Get full details on the new CB Slide today.

CHASSIS-TRAK ...the IDEAL SLIDE

APPROVED for MILITARY INSTALLATIONS

Three distinct but related types—each is ideal for specific applications. Each is adaptable to the others' functions by simple interchange of chassis-mounted sections. Engineered to permit mounting standard 17" chassis without modification in 17¾" opening. Equally adaptable to wider cabinets and numerous other applications.

Extra strong construction and wide, solid bearing surfaces assure exceptional rigidity and endurance of high shock loads and vibration. Standard load range 50 to 175 lbs.—heavy duty units to 275 lbs. 10"-24" long in 2" increments—extension brackets available for deeper cabinets. Slide thickness .25" to .4375" maximum.

Roller Types Available

ELECTRONIC CHEMICALS

B&A BAKER & ADAMSON QUALITY

Special "Electronic Grade" chemicals—with metallic and other undesirable impurities held to extremely low limits—for the manufacture of semiconductors, tubes and other electronic devices . . .

All B&A® Electronic Grade Chemicals are Available in Small and Bulk Packages

Acetone
Aluminum Nitrate, Crystal and Basic
Ammonia, Aqua
Ammonium Citrate
Ammonium Hydroxide
Ammonium Hydroxide, Reagent, A.C.S.
Barium Nitrate
Calcium Acetate
Calcium Nitrate, Tetrahydrate
Carbon Tetrachloride
Ether, Anhydrous
Fluoborate Plating Solutions for Printed Circuits
Germanium Dioxide
Germanium, First Reduction Metal
Germanium, Intrinsic Metal
Glycerine
Hydrochloric Acid
Hydrofluoric Acid
Hydrogen Peroxide, 3% Solution
Hydrogen Peroxide, 30%
Hydrogen Peroxide, 30% "Stabilized"
Indium Fluoborate, Solution
Manganous Nitrate, Reagent and Electronic
Metallic Compounds for Ferrite Production
Methyl Alcohol, Absolute (Methanol) Acetone Free
Nickel Chloride
Nickel Sulfate
Nitric Acid and Fuming Nitric Acid
Oxalic Acid, Reagent, A.C.S.
Potassium Hydroxide, Solution
Propyl Alcohol, Iso
Sodium Carbonate, Monohydrate
Sodium Hydroxide, Solution
Sodium Hypophosphite
Strontium Nitrate
Sulfur Hexafluoride for Gaseous Insulation
Sulfuric Acid
Toluene
Trichloroethylene
Xylene
Zinc Sulfide

Many other chemicals available in Reagent, A.C.S. or other high purity grades.

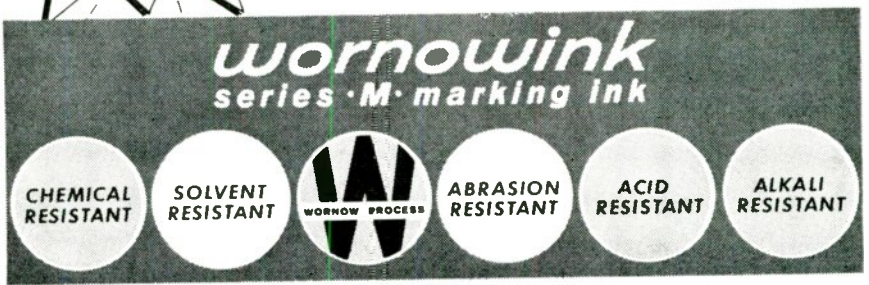
PERMANENT MARKING INKS

with OUTSTANDING ADHESION to GLASS, METAL and THERMOSETTING PLASTICS!



for durable marking of electrical and electronic products and components! Costly rejections of components will soon be a thing of the past—thanks to Wornowink, Series M! This brand new epoxy marking ink remains legible under solvent and ultrasonic cleaning conditions. Until its development, it has been necessary to reject components, housings, and assemblies at various production stages when repeated handling, flux removal, and chemical cleaning obliterated their markings. Designed for application by marking machine, stamp pad and roller printing, the inks are supplied in the ten RETMA nominal colors standardized by the Electronic Industries Association. Cured inks conform to militarily-approved specifications. Write today for free samples and literature!

TELECOMMUNICATIONS CONSULTANTS
• For 10 years, MSI has been serving the Industry including U.S. and International Governments.
• MSI has served Oil and Gas Companies, Power and Telephone Utilities, Broadcast and Industrial users, Federal, State and Local Governments, Transportation companies and Foreign Countries.
• MSI makes feasibility studies, does physical terrain surveys, engineers systems and supervises construction of Telecommunication networks—wire, carrier, radio, microwave, scatter, and television.
• MSI has also successfully done Independent Market Research and advised on advanced product development for the largest manufacturers of electronic communications equipment.
• MSI provides expert consultation in the preparation of proposals for extensive telecommunications networks in related military projects.
• We will gladly furnish our client list and the MSI successful performance history. Our experience is worldwide.

COST ESTIMATES PREPARED

Nationwide Service

- **For your bid proposals**
- **For checking your own estimates**
- **For your "make or buy" decisions**
- **For impartial appraisals**

Accurately and professionally executed, our estimates are a detailed breakdown giving you material costs, weights, man hours of labor in all classifications, sources of supply for raw materials, purchased items, alternate design and material suggestions, and all other information needed for your presentation.

For prompt service, phone

You find facts faster with the IRE DIRECTORY

Because the product listings in the IRE DIRECTORY are logically arranged the way an engineer thinks, under three great major classifications that cover the entire radio-engineering field, you can find the product you want, and the names of the firms who make it, faster and more easily than in "terminology-index" types of listings. Advertisements are logically positioned near the product listings which describe them, to give you more information on the companies you'll want to deal with, and the easy-to-use Reader Service Card brings you quick additional data.

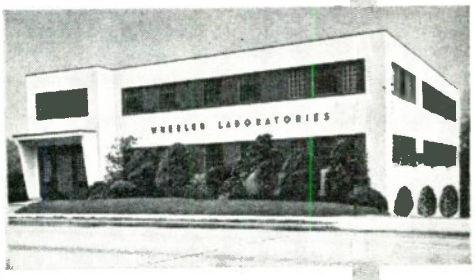
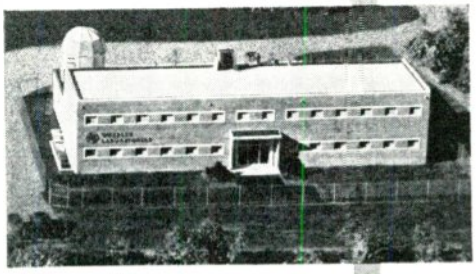
WHEELER LABORATORIES, INC.

ON LONG ISLAND/A SUBSIDIARY OF HAZELTINE CORPORATION

Main Office and Microwave Laboratory
Great Neck, New York





Antenna Laboratory and Test Range
Smithtown, New York

In the field of microwave engineering, Wheeler Laboratories occupies a unique position as an industrial laboratory devoted exclusively to consulting and development.

As a service to many prominent laboratories and manufacturers, WL designs radar and communication antennas, waveguide components, and microwave assemblies. Your inquiries are invited.

BRADY Self-Sticking PERMA-CODE WIRE MARKERS

Positive "around-the-wire" identification for the electronic industry. Brady markers tell which wire goes where—quickly . . . increase production, cut costs . . . conform to NEMA-ASA, and MIL specifications. 3 stock sizes: 1½", ¾" and ½". 9 job tested materials.

- MINIATURE MARKERS permanently identify wires under 3/32" dia.
- BLUE-STREAK® RELEASE COATING assures fast distortion-free application.
- WRITE FOR FREE WORKING SAMPLES!

W. H. BRADY CO. 734 West Glendale Avenue Milwaukee 9, Wis. • Est. 1914 73

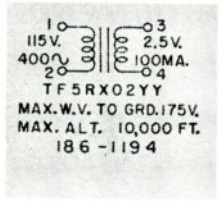
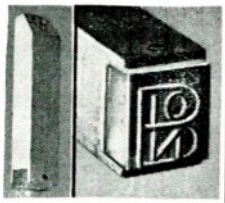
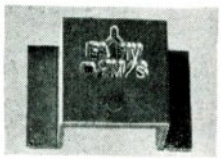
CLEAN, EASY READING
STAMPS



SCHEMATIC STAMPS
Lines, figures and numbers are sharp and easy-to-read. Schematics are quickly positioned in the proper location. Stamps are accurately made to your requirements. Send blueprint or drawing for quotation.

VINYLITE PIN AND PEG STAMPS
Inspection, detail, salvage, test and acceptance stamps precision made to fit your applications. Pin design provides for positive holding. Vinylite stamps for marking with acids, opaque oil-base inks.





STENCIL MASKS
Precision engraved stencil masks provide for speedy, clear spray-gun markings on chassis, parts and sub-assemblies. Send either parts or blueprint for quotation.

Prompt deliveries on all stamps and stencil masks.

DIMCO-GRAY
SNAPSLIDE FASTENERS

PROVIDE VIBRATION-PROOF HOLDING AND QUICK, FOOL-PROOF RELEASE!

APPROVED UNDER ARMY-NAVY STANDARDS

Here's a simple, easy means of securely fastening assemblies to withstand shock or vibration, *and yet allow quick removal for inspection or repair.* Instant snap action engages or releases fastener . . . no tools are required! After installation, fasteners never need adjustment . . . even with repeated use.

Three sizes available for different load requirements. Large and medium sizes are made of corrosion-resistant *stainless steel.* Small size is made of nickel-plated brass. Stock parts fit various thicknesses of flanges and mounting plates . . . special parts can also be supplied.

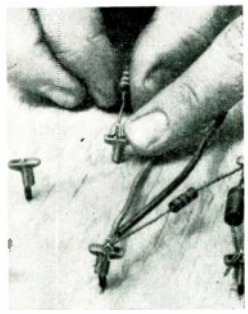
NEW! HARNESS CABLE BOARD CONNECTOR

Saves up to 30% in Construction Time

Drives Into Wood Like a "Nail"!!



- Drives into place in seconds. Eliminates hole drilling, screws, nuts and washers. Saves time in processing and construction.
- Holds wire ends in a firm vise-like grip. Patented E-Z-HOOK won't cut, nick or kink them. Reduces rejects and salvage.
- Easy finger-tip operation. E-Z-HOOK "Nail" Clips speed wire placing—makes it easier. Increases production—improves morale.
- Save time—money—material. Use "Nail" Clips to cut cable costs. To improve quality and production. To reduce rejects and salvage.

E-Z-HOOKs

Value Engineered for Maximum Efficiency, Performance and Savings

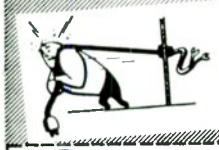
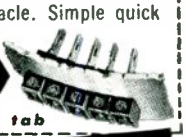
Heyco Nylon BUSHINGS



STRAIN RELIEFS
The insulating bushing that anchors a cord set to an electrically operated machine or appliance.

JUNCTION-TERMINAL BUSHINGS
Eliminate "pig-tails"—Miniature size. Snap-in assembly, color or number coded. Can be used as plug-in receptacle. Simple quick disconnect.

ACCORDIAN TYPE
Fit curved surfaces
Nylon bushing — brass tab



HEYCO NYLON Snap Bushings

10 Sizes for holes from 3/8" to 1 3/4" dia.—various inside diameters. Snap locks into panels up to 1/8" thick.

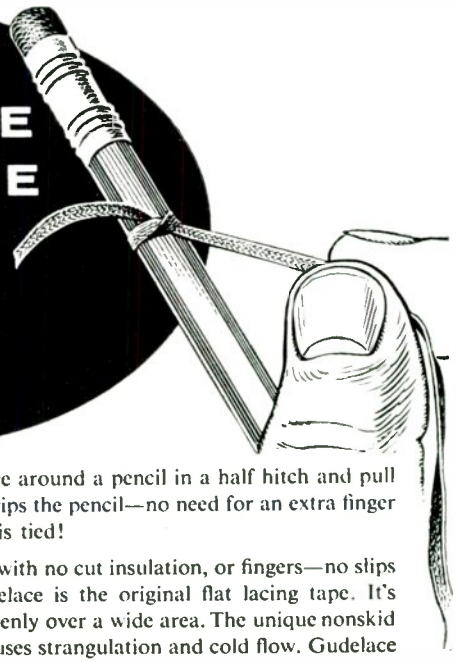
GUDELACE TAKES THE SLIPS OUT OF LACING



Try this simple test. Tie a piece of Gudelace around a pencil in a half hitch and pull one end. Gudelace's flat, nonskid surface grips the pencil—no need for an extra finger to hold Gudelace in place while the knot is tied!

Gudelace makes lacing easier and faster, with no cut insulation, or fingers—no slips or rejects—and that's *real* economy. Gudelace is the original flat lacing tape. It's engineered to *stay* flat, distributing stress evenly over a wide area. The unique nonskid surface eliminates the too-tight pull that causes strangulation and cold flow. Gudelace is made of sturdy nylon mesh, combined with special microcrystalline wax, for outstanding strength, toughness, and stability.

Write for a free sample and test it yourself. See how Gudelace takes the slips—and the problems—out of lacing.

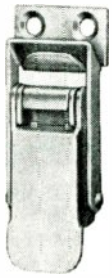
NEW

COMPRESSION CATCHES
ADJUSTABLE CATCHES
HANDLES and GRAPPLES

(all to Armed Forces qualifications)

FOR INSTRUMENT CASES • TRANSIT CASES • CONTAINERS

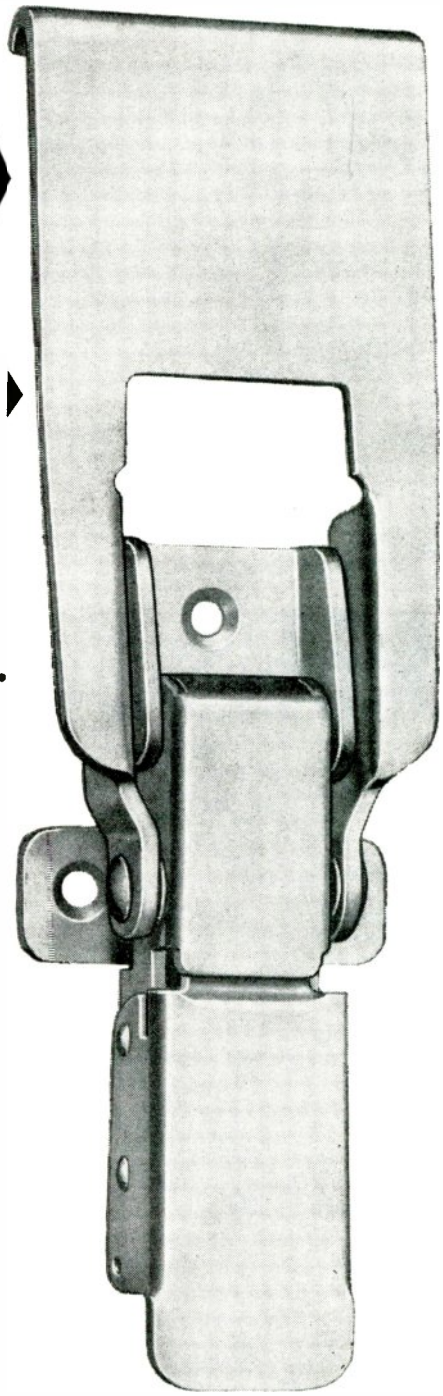
No. VHC 340-2
(actual size)



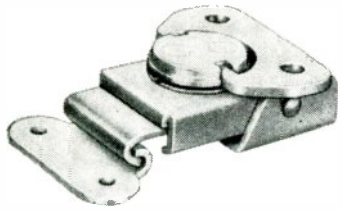
A WIDE RANGE of STYLES and SIZES from junior..... to GIANT

COMPRESSION SPRING CATCHES, No. 340 series, are miniature in size. Preloaded to 12 lbs. Standard 18 lb. holding tension. Cold rolled steel, plated or finished to specifications, or stainless steel. Styles with lever straight, as illustrated, or with up-sweep or down-sweep.

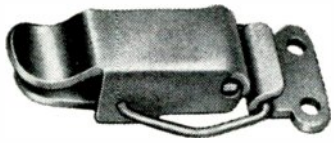
ADJUSTABLE CATCHES for varied applications (also recessed), No. 250 series, provide secure holding, easy engagement, rapid release. Steel or aluminum base. Designed to function up to 1,000 lbs. (manual operation). Stress strength to 3,000 lbs. (steel base). Styles with lever straight, as illustrated, or with up-sweep or down-sweep. Hole for wire seal and slot for 3/8" "Navy" seal.



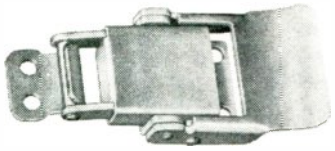
No. VHC 250-6S
(actual size)



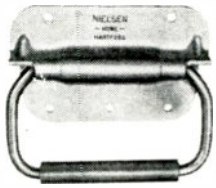
TURN CATCH No. HC-360 designed for manual pull-down operation of 100 lbs. Ultimate strength 1,000 lbs.



HEAVY-DUTY PULL-DOWN CATCH No. HC201 with holes for fastening or for welding applications. Available in plated finishes; also of brass, stainless steel, or aluminum materials.



COMPRESSION SPRING DRAW PULL CATCH No. SC-B-83314-42 with springs concealed. Provides 70 lbs. holding tension on standard specification.



SURFACE HANDLE No. H945 to meet Armed Forces Specification MIL-T-945.

A varied line of Catches, Surface and Recessed Chest Handles, and Carrying Handles to meet commercial as well as Armed Forces requirements. Descriptive literature on request. Inquiries invited on design and application problems.

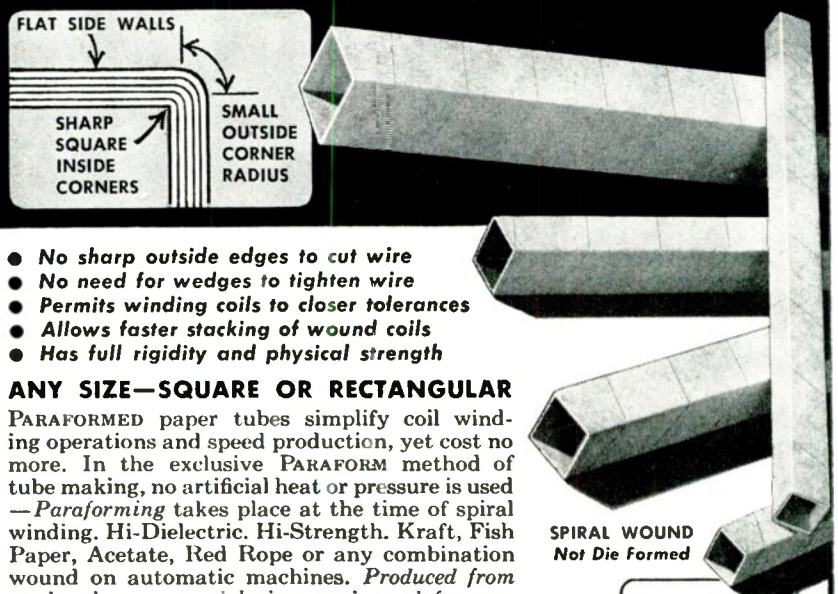
Better Coils begin with PARAFORMED PAPER TUBES



- *No sharp outside edges to cut wire*
- *No need for wedges to tighten wire*
- *Permits winding coils to closer tolerances*
- *Allows faster stacking of wound coils*
- *Has full rigidity and physical strength*

ANY SIZE—SQUARE OR RECTANGULAR

PARAFORMED paper tubes simplify coil winding operations and speed production, yet cost no more. In the exclusive PARAFORM method of tube making, no artificial heat or pressure is used —*Paraforming* takes place at the time of spiral winding. Hi-Dielectric. Hi-Strength. Kraft, Fish Paper, Acetate, Red Rope or any combination wound on automatic machines. *Produced from stock arbors or special sizes engineered for you.* Can also be supplied in regular or with slight bow.

Write on company letterhead for **STOCK ARBOR LIST** *of over 2000 sizes*

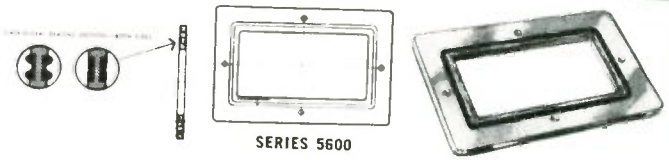
Parker SEAL COMPANY

Culver City, California and Cleveland, Ohio

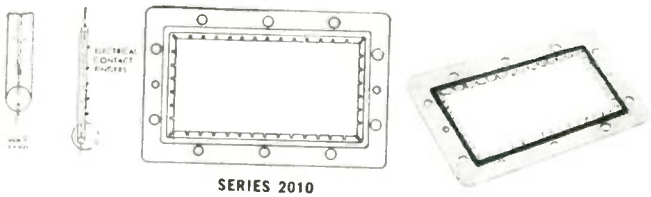
A DIVISION OF PARKER-HANNIFIN CORPORATION

WAVE GUIDE SEALS

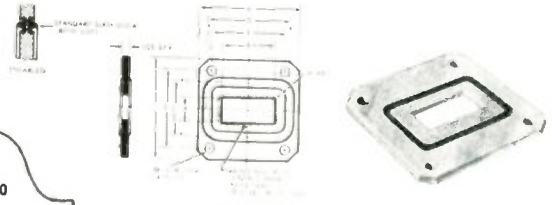
Parker Seal Company's metal retained seals are based upon controlled confinement of a seal "gland" that has a "memory", either induced or inherent. All tolerance factors of the seal are taken care of in the design and manufacture, thus obtaining significant benefits and considerable savings. This unique application of the proven theory that rubber resists deformation result in a far superior seal. These seals have all been laboratory and field tested. They are in use in many hundreds of applications throughout industry, military as well as commercial. Electro-O-Seals are especially designed to provide the ultimate in sealing effectiveness, plus complete electrical continuity for prevention of R/F leakage in wave guide or micro-wave applications—equipment, guides, "clean rooms", data machines, etc.



SERIES 5600

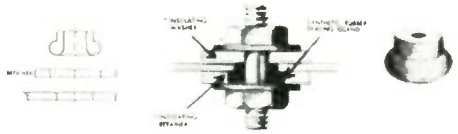


SERIES 2010



SERIES 5620

TERMINAL SEALS SERIES 5000



Specially designed to seal the style of terminal illustrated, these seals provide sealing effectiveness with good anti-arcing conditions. The gland only is furnished and they are available as standards in sizes 4, 6, and 10, for both general purposes and extreme temperature usage.

BOLT AND STUD SEALS

SERIES 800

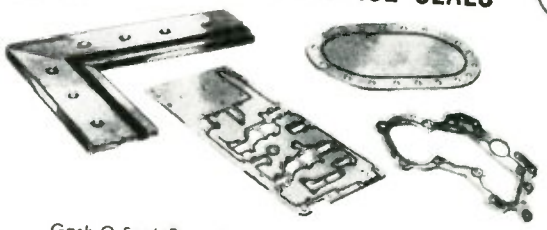
Series 800 Lock-O-Seals® provide unequalled sealing effectiveness for purposes intended. They are available in the small sizes 2 thru 6 and meet the same usage specifications as series 600.

BOLT AND STUD SEALS

SERIES 600

Series 600 Stat-O-Seals® provide the finest mechanical sealing for bolts, studs, rivets and some other fasteners and fittings. The seal is mechanically bonded, one-piece construction with proven sealing effectiveness. They are very economical and easy to assemble. Available in sizes —8 thru 2" for nearly all types of fluids and uses from —80° to +375°F. (500° intermittent)

FLANGE & ORIFICE SEALS



Gask-O-Seals® and Strip-O-Seal are the finest seals for the purpose available. They provide positive sealing while affording many other advantages. They afford the design engineer with a design tool that allows considerable freedom from worries about leakage under difficult conditions. They can be made to meet almost any configuration requirement to seal almost any fluid, from high vacuum to 20,000 PSI, covering a temperature range from —80° to 350°F. (500° intermittent)

O-RINGS

Parker O-rings have been proven superior in actual use. They are available in all standard sizes and in specials and in compounds to meet nearly every requirement as to fluids, recommended pressures and temperatures, meeting all military as well as industrial specifications.

RICHCO CABLE CLAMPS FOR ⅛" TO 2½" CORD OR CABLE

Nylon Ethocel

Neoprene Cushioned Aluminum

PLASTIC — Nylon or Ethocel • Strong • Lightweight • Resistant to Shock, Chemicals, Corrosion • High Dielectric • Approved for Military Use.

METAL — Plain Aluminum or Neoprene Cushioned for Insulation and Strain Relief.

RICHCO WIRE TIES

Standard or Button Types
Strong and Tough
Easily Assembled or Disassembled
Polyethylene or Nylon

4 WAYS TO END ALL CORD AND CABLE SERVICE FAILURES *Economically*

PROTECT YOUR PRODUCT

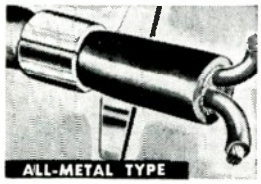
at point of strain

Protect product salability too—by insuring long life for cords, cables and conductors. Genuine "GRIPMASTER" Strain Reliefs provide these vital features—

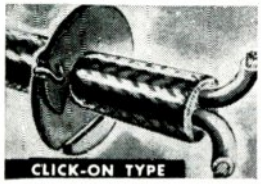
- ★ Anchor cords to housing
- ★ Eliminate taping or threading
- ★ Prevent unraveling
- ★ Prevent cord pull damage
- ★ All sizes and styles
- ★ Easy to apply
- ★ Inexpensive

Gripmaster Strain Reliefs are "tremendous trifles" that make good products better!

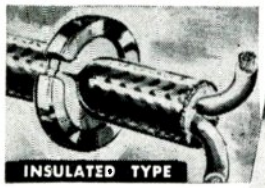
Ask for Samples.



ALL-METAL TYPE



CLICK-ON TYPE



INSULATED TYPE

WIRE BINDING SLEEVES—Preventing fraying of cord ends, these specially-treated rubber tubes are available in five sizes to fit wires to .790

GRIPMASTER STRAIN RELIEFS

Interruptions due to cable and cord connection failures are eliminated because they anchor the cord to the product at the point of strain. GRIPMASTER Strain Reliefs can withstand pulls up to 100 lbs., and are acceptable to Underwriters Laboratories. All types Reg. U. S. Pat. Off.

DEE PRINTED CIRCUIT SOLDER POTS

Proven design with precise controls. Mechanical type dial thermometers to indicate solder temperature. Hydraulic thermostats. Walls and bottom of the solder cavities are smooth and free of all obstructions.

Temperature range 300° to 600° F. Temperature swing ±2°. Wide variety of sizes up to eight feet long. All voltages.

Send for bulletin.

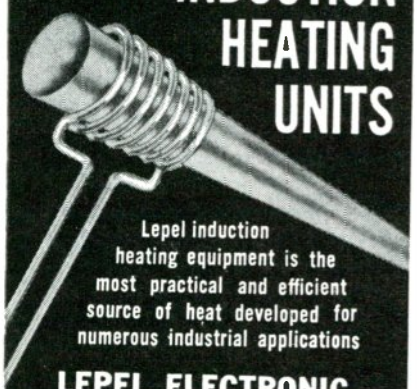
Lepel
High Frequency
INDUCTION HEATING UNITS



Lepel induction heating equipment is the most practical and efficient source of heat developed for numerous industrial applications

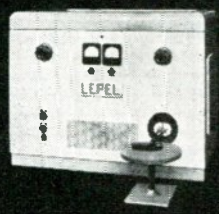
LEPEL ELECTRONIC TUBE GENERATORS

STANDARD UNITS
Frequencies: 180 Kc to 600 Kc
Sizes: 1 Kw to 100 Kw output

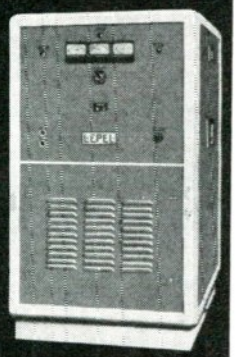
MEGACYCLE UNITS
Frequencies: 3 Mc to 50 Mc
Sizes: 2½ Kw to 20 Kw output

DUAL FREQUENCY UNITS
Sizes: 5 Kw, 10 Kw & 20 Kw output

LEPEL SPARK GAP CONVERTERS
Frequencies: 400 Kc to 900 Kc
Sizes: 2 Kw to 30 Kw input



BRAZING
SOLDERING
HARDENING
ANNEALING
MELTING
BOMBARDING
ZONE REFINING
CRYSTAL GROWING
PLASMA TORCH



LEPEL LABORATORY SERVICE
Lepel maintains a fully equipped laboratory where experienced induction heating engineers will process your work samples and submit complete laboratory reports and recommendations without any obligation.

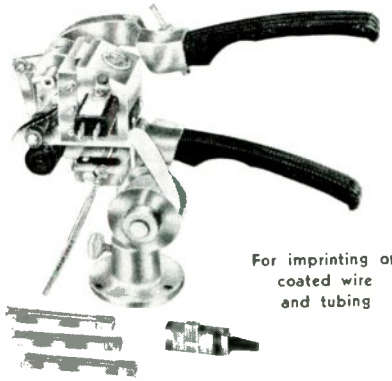
The New Model HTT Portable Wire Marking Tool



For imprinting on coated wire and tubing

This small portable wire marking tool is sold complete, electrically heated, marking tapes type and wire guides. To operate, simply set type in holder, push or pull coated wire through guide, press and mark the wire where you want.

This tool is guaranteed by ACKERMAN GOULD, manufacturers of marking equipment for 35 years.

For Production Requirements we offer three models . . . MM-2—MM-4—MM-6 . . . as well as specials to meet your marking needs.

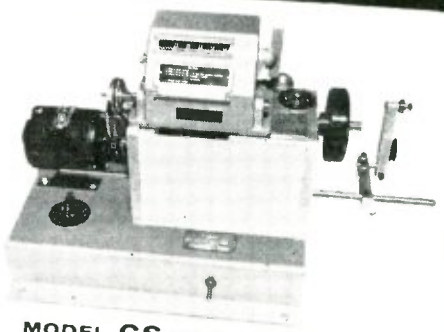
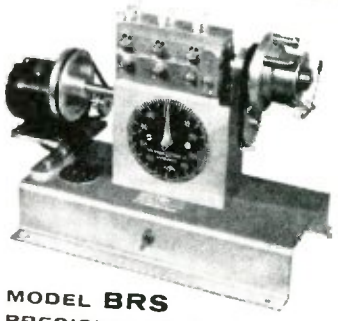
World Radio History

The most advanced coil winding equipment in the world today!



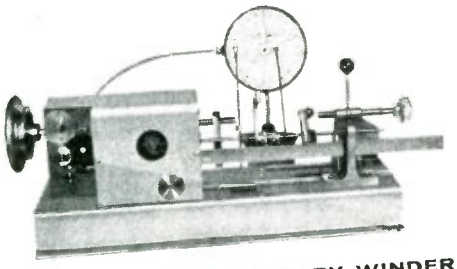
MODEL CS BOBBIN WINDER

Pictured is the current version of our most popular bobbin winder having increased capacities. A complete line of single and multiple units is available.



MODEL BRS PRECISION STRIP WINDER

This is one of a group of single-layer machines to wind on continuous or precut strips or mandrels of various shapes.



MODEL WX LABORATORY WINDER

The world's most versatile winding machine for all types of radio frequency coils as well as bobbins, transformers, resistors, etc. Features continuous gain or feed adjustment and our exclusive adjustable cam.

MODEL CK-SL AUTOMATIC WINDER

The machine illustrated produces more than 20 completed coils a minute without operator attention. This is one of a large family of completely automatic or semi-automatic machines.

MODEL MP HAND WINDER

Coils with up to 60 turns produced in a single stroke of the lever.

BARNSTEAD

ONE STATION-ONE LOCATION TRANSISTOR WASHER

Eliminates need to maintain large "clean" areas thus reducing operating costs. Reduces transporting and handling. Cleaning and rinsing costs are sharply reduced because unit is largely regenerative.

Both ultra pure hot water and Freon rinsing systems are designed for continuous recirculation and repurification. 3-gallon per hour Still supplies make-up water. Freshly distilled Freon is continuously fed into Freon rinse chamber. Contaminated Freon returns by gravity to a Freon Recovery Still.

COOLING WATER REPURIFYING SYSTEM

Adds thousands of hours to UHF transmitting tube life. Saves additional hours of maintenance ordinarily spent in citric acid cleaning procedures within the cooling system.

Write for Bulletin #166 on complete line of Barnstead Transistor Washers, and Bulletin #149 on Cooling Loops.

***ultrasonics* Cleans parts in seconds**

CIRCOSONIC® Multi-Purpose cleaning units pay for themselves in quick order by radically cutting costs and saving labor. They are ideal for removing excess solder flux, fingerprints, lint, waxes, polishing compounds from such parts as gears, bearings, instruments and hundreds of other applications.

CIRCOSONIC units are available in a wide range of sizes to serve your every cleaning need. CIRCO engineers will be pleased to offer technical assistance and recommend the specific units to fit your needs.

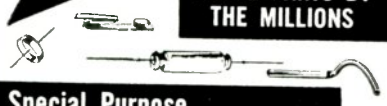
PRECISION RESISTANCE WELDING EQUIPMENT

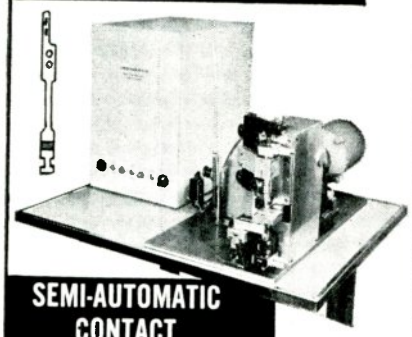
TWEEZER WELD

SMALL PARTS BY THE MILLIONS



Special Purpose Welding Machines

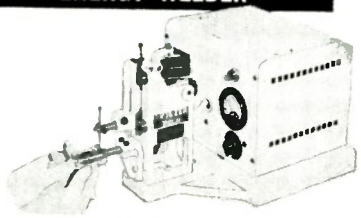
- SEMI-CONDUCTOR EQUIPMENT
- BUTT WELDERS
- CONTACT WELDERS
- ASSEMBLY MACHINES



SEMI-AUTOMATIC CONTACT WELDING MACHINE

. . . which feeds, welds and cuts off contact material automatically — all in one operation. Tweezer Weld has complete design facilities for special purpose welding equipment, and facilities available for producing parts for your special needs on a production basis at our plant.

BENCH MOUNTED STORED ENERGY WELDER



- TW5 low friction welding head
- Stored energy panel of 80 Watt second capacity
- Discharge time of 0.0008 to 0.0012 second
- Permits welding of difficult materials . . . copper, silver, tungsten, etc.
- Reliable welds without discoloration, deformation, metallurgical change
- Welding head interchangeable for increased pressure (TW3 head), or for hard-to-get-to assemblies (Plier type electrode)

Complete line of bench heads and controls available for varied purposes

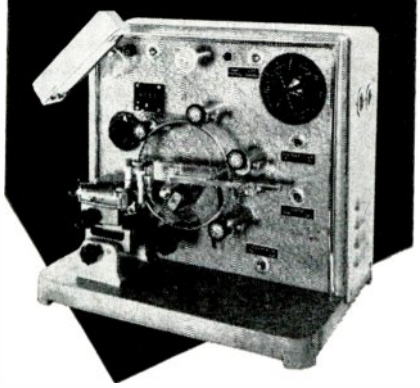
electro devices

FASTER AND IMPROVED MEANS OF WINDING TOROIDAL CORES



Due to the unique method of winding from the bottom or the top of the patented shuttle, the only changes required are adjustment for core size and selection of a shuttle. (There are no heads to buy or change over.) All setups are accomplished by the operator. The Model D-6 will load and wind simultaneously from the wire spool, through the shuttle, to the toroid, a decided time saver.

SPECIFICATIONS FOR MODEL D-6

Finished Core Size: O.D. 2"; I.D. .055"; Height 2 inches. **Wire Sizes:** #22 A.W.G. to #50 A.W.G. (ary type insulation or combinations such as Litz, Trifilar, Teflon, Niobian). **Shuttles:** Cross Section .055" — .093" — .125" — .186" — .250". All 6" dia. **Sliders:** New patented slider, factory adjusted for tension remains in shuttle, both loading and winding. Finished toroid removed and new toroid installed without removing shuttle or slider. **Core Rotation:** Automatic 360 degree or any segment thereof. Forward and Reverse Precise winding control. Automatic progressive bank winding feature (available as an optional accessory). **Counting:** Positive transistorized electronic counter. True turn count. Also used as wire footage counter. Predetermined electronic counters available (as an optional accessory). **Shuttle Speed:** Adjustable 0-1000 R.P.M. **Core Speed:** Core speed synchronized with shuttle speed for precision layer winding. **Dimensions:** 17"l., 14" w., 15½" h.

For Mag. Amp. work large diam. shuttles allow as much as 2" wound height with a .055" diam. I.D. Shuttle is driven and controlled by outside rollers that permit winding from bottom of shuttle. The Model D-6 winds Niobian wire successfully.

It is not necessary to remove the shuttle or slider for loading, winding, removing or installing the core. .055" shuttle winds wire as large as A.W.G. #30 on a very small size core.

Wind to Inductance.
Adapter available to use your comparator or bridge in winding to inductance directly on EDI Toroid Winder Model D 6.
Write, sending your requirement for information and pricing.

MINIATURE WELDERS

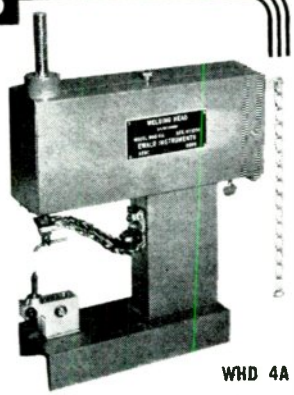
• **BENCH WELDING HEAD WHD 4A** • Pressure adjustable with calibrated scale 1 to 25 lbs. Foot or air operation. Linear motion in ball bushings. Stroke 2". Low inertia. Easy to set up and to jig up.

• **MINIATURE HEAD WHD 5A** • For every small work. Wire welds .0003 to .010" dia., other very small work. Pressure 1 ounce to 3 lbs. Ball bearing operation, ultra low inertia. Electrodes ⅛ or 1/16 dia.

• **STORED ENERGY POWER SUPPLIES** • Models from 3.6 to 150 watt-second capacity.

• **AC POWER SUPPLIES** • Synchronous and non-synchronous timer power supplies. ½ to 5 KVA. ½ to 10 cycle or .05 to 2 seconds timer.

Tapwelders for potentiometers—Portable Thermocouple welders and tackers—Handwelding tools—Pulse magnet chargers—Stripping machines for shielded cable.



Submit parts for sample welds and ask for data sheet

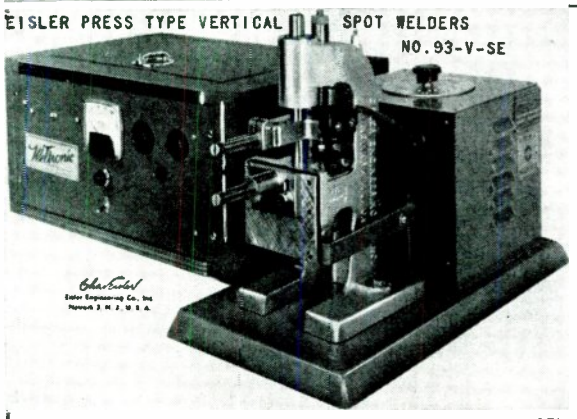
EISLER PRESS TYPE VERTICAL SPOT WELDERS NO. 93-V-SE



Eisler makes precision press type bench spot welders, foot or air operated. Made up to 150 K.V.A. supplied with synchronous or non-synchronous timers and stored energy units. For the manufacturing of electronic tubes and miniature parts. We also make a complete line of glass working equipment for the electronic industry.

SLICE CRYSTALS
with the fully automatic
FITCHBURG
SEMICONDUCTOR SLICING MACHINE

- Automatic back-off mechanism prevents surface imperfections.
- Wafer thickness adjustable from 0.025 to 0.007 ± 0.0005".
- Spindle speed controlled up to 9,200 rpm by a Variac.
- Ingot sections easily mounted.
- New orienting table with accuracy ± 1' of arc available.

GREEN PANTOGRAPH ENGRAVERS

● ELIMINATE DELAYS!

● KEEP YOUR OPERATING COSTS WHERE THEY SHOULD BE!

PORTABLE 40-POUND BENCH MODEL 106

You Make Your Own Engraved Nameplates!

Here is a speedy, economical 2 or 3-dimensional engraver used by thousands of dollar-conscious companies. It features 5 positive, accurate pantographic ratios; ball bearing spindle with 3 speeds up to 14,000 rpm. Is supplied with one copy carrier that accepts all standard master type sizes. Will actually work up to 10" by any width. Height of pantograph and position of cutter are continuously adjustable.

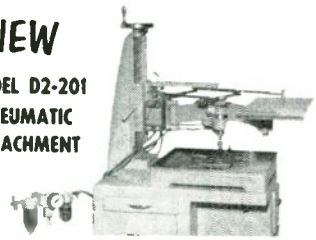
MODEL D-2 HEAVY-DUTY 2-DIMENSIONAL

Pantograph for milling, drilling and engraving.

Vertical adjustment of copy table automatic with Pantograph. Features: unobstructed on 3 sides to take large work; micrometer adjustment for depth of cut; ball bearing construction throughout; spindle speeds up to 26,000 rpm for engraving or machining; vertical range over 10", ratios 2 to 1 to infinity — master copy area 26" x 10"

NEW

MODEL D2-201 PNEUMATIC ATTACHMENT



for use with Model D2 Pantograph Engraver to rapidly drill holes in printed circuits by tracing templates. Drills as many as 100 holes per minute. Equipped with foot switch; spindle air cylinder; regulating valve and pressure gauge; filter and oiler. It's ready to use as soon as it's attached to an air compressor

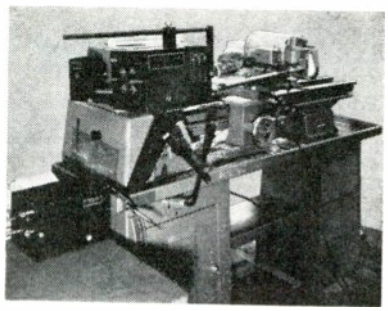
NOW AVAILABLE!

FEN-LATHE-THREAD-MILLER PORTABLE

Reduces Production Time—Provides Closer Tolerances



SPECIAL FEATURES

- Retains Tool Shape
- Works Thread Cutting Closer to Shoulders Within .001"
- Provides Full, Clean Cut Threads at End of Cut, Eliminating Undercut
- Stops Automatically at End of Desired Length of Thread Cut

THIS HIGHLY EFFICIENT THREAD CUTTER—offers many advantages. It reduces set up and cutting time—increases accuracy of thread work—an average worker, using the *same cutter* can obtain close tolerances in the cutting of difficult materials—(★) from brittle plastics and fibre glass, Beryllium, to tough stainless steel and the newer metals like TITANIUM.

Its versatility is demonstrated by its ability to fit 9" to 20" Screw Cutting Engine Lathes . . . Ranges from: 4 to 200 threads per inch . . . Ideal for cutting Multiple Threads . . . Mills 60° Acme and Square Threads.

ALUMINUM, STEEL & BRASS CONSTRUCTION. (U.S. PATENT NUMBER 2776604—other patents pending.) MANY, MANY USES: the making of special Taps and Dies when they are not available . . . for all Tool Rooms where occasion Threads are needed . . . for Instrument and Machine Shops and all Moldmakers . . . for Mechanical & Research Laboratories . . . as portable equipment for ships, submarines, and mobile units of all types.

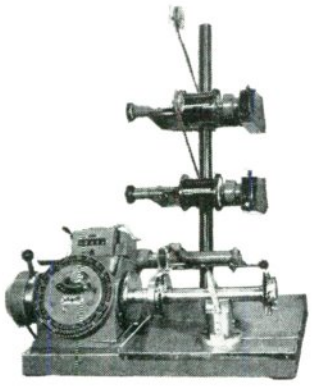
CUT WINDING COSTS *automatically*

WITH THE MOST COMPLETE LINE OF AUTOMATIC COIL WINDING EQUIPMENT EVER OFFERED TO THE ELECTRICAL/ELECTRONICS INDUSTRIES

MICAFIL

TWO EXAMPLES FROM THE MICAFIL LINE

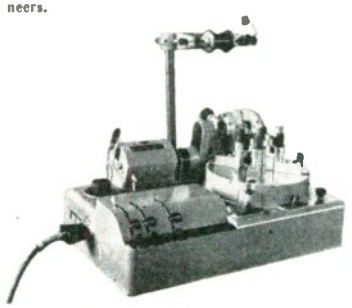


Type OFA series of coil winders

- ▲ Stepless adjustable traverse feed – no cams – no change gears – just DIAL your wire size even while machine is running.
- ▲ Wire feed ranges in 5 groups from #56 up to #9 AWG
- ▲ Winding speeds up to 18,000 rpm.
- ▲ Accurate micrometer adjustment of layer width – no cams.
- ▲ Constant-distance wire guide, adjusts automatically to increasing coil diameter.
- ▲ The MICAFIL Building Block System – buy what you need – nothing more – add other functional attachments later on.
- ▲ Single and multiple winding.
- ▲ Automatic paper interleaving attachments.
- ▲ World-renowned Swiss workmanship.
- ▲ Installed and serviced by factory-trained engineers.

Type RW-P Toroidal Winding Machine for automatic winding of precision potentiometers.

- ▲ Smallest wire size to be wound – .0004 inches.
- ▲ Automatic winding for sectors up to 300° or 360° continuous.
- ▲ Core feed adjustable from .00004 inches to .024 inches per turn.
- ▲ Adjustable wire tension.
- ▲ World-renowned Swiss workmanship.
- ▲ Installed and serviced by factory-trained engineers.



1001 *Call us* and let our experienced engineers solve your winding problems.

SOMETHING NEW HAS BEEN ADDED

For your Hoffman planetary lapping machine—A thickness controller with automatic shutoff—Enables lapping consecutive loads to the same thickness with controlled uniformity.

TO HELP YOUR PRODUCTION

We offer our line of cutting and lapping machines for processing silicon, germanium, quartz, glass, ceramics and many metals.

AND WHEN YOU NEED

More production—our facilities are available for custom cutting or lapping of your material. Plus—we have a fully equipped machine shop and offer our services on design and manufacture of parts or equipments.

QUARTZ CRYSTAL BLANKS

There are no better anywhere. Cut from the best quality quartz to your most exacting specs. May we quote you on any cut, angle and tolerance, size, shape, quantity, etc. We will meet your delivery requirements.

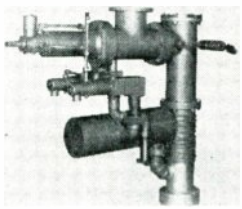
HIGH VACUUM SYSTEM
Air or Manually operated from 2-6 inch



These units provide a complete vacuum pumping system integrally mounted with all necessary connections for instrumentation. This includes a non-corrosive full opening, air operated solenoid controlled or manual high vacuum valve with roughing line connection, a low loss liquid cold trap with a quick coupling vacuum seal connection for the high vacuum gauge tube, a water cooled stainless steel diffusion pump, a noncorrosive high capacity ballast tank, non-corrosive bellows sealed roughing and foreline valves. Connections for measuring foreline and roughing pressures plus solenoid controlled pump vent valve and chamber vent backfill valve are included. The automatic system features short and large vacuum lines which provide for excellent performance and continued trouble-free operation.

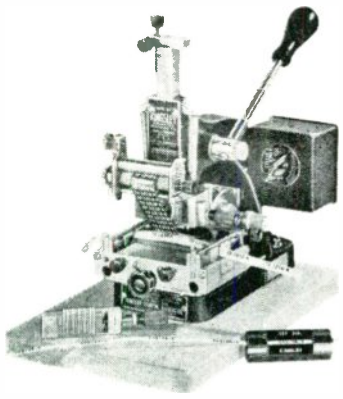
SIMPLIFY WIRE ASSEMBLY



CODE MARK YOUR OWN WIRE WITH A KINGSLEY WIRE-MARKING MACHINE

Now you can permanently mark each wire with its own individual circuit number, at any desired spacing. You can reduce wire inventories because only one color of wire is necessary for as many codes as desired.

Simplify your assembly methods and speed production with the same machine that has proved so successful in the aircraft industry. Special machines are available for marking flexible vinyl sleeves.

Write for complete information.

KINGSLEY MACHINE CO.
850 Cahuenga, Hollywood 38, Calif.

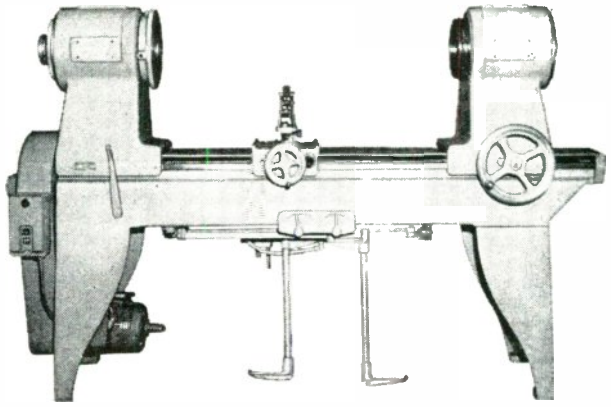
GLASS WORKING
LATHES



MODEL ESA

STANDARD EQUIPMENT

- Two face plates
- One collet draw-in bar
- One 6-fire seven jet burner assembly
- Hand carburetion control
- Foot pedal control of air or nitrogen supply and of oxygen-gas volume
- Main air valve controlling air in either or both spindles
- ½ h.p. Motor, 230 volt, three phase, single speed, 60 cycle, AC
- Face plate wrench
- One motor belt
- One motor pulley

General Specifications

Variable Speed Drive — Electronic Control (As shown) Available at extra cost

Maximum length overall	84″	Spindle hole diameter	7¼″
Maximum width overall	24″	Radial clearance above apron	13¾″
Maximum length spindle nose to spindle nose	47″	Net weight	Approx. 1250 pounds
		Approx. shipping weight	1500 pounds

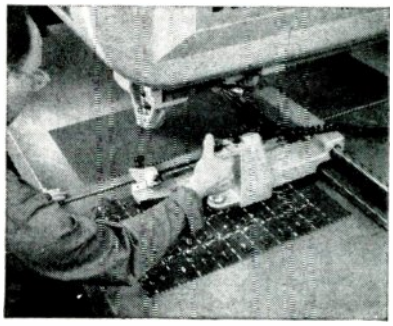
PUNCH COMPLICATED PATTERNS FAST WITH STRIPPIT FABRICATORS

SUPER 30. Handles flat or formed workpieces 60″ wide...any length. Both the Super 30 and the 15A punch round and shaped holes up to 3½″ diameter, to ¼″ thick material...notch 90° corners—rectangular, radii, vee and special shape edge notches —up to ⅛″ capacity...nibble straight line or contour shear up to 38″ diameter circle, at 165 strokes a minute in ⅛″ material.

STRIPPIT DUPLICATOR
For low cost production runs on the Super 30 or 15A, the STRIPPIT Duplicator functions like a pantograph to reproduce any hole pattern from a drilled or punched template. No custom dies needed to turn out precision sheet metal parts.



NEW 15A. Designed for workpieces up to 30″ wide...any length...the new 15A Fabricator offers all the speed and accuracy of the Super 30. Each machine, with its own universal tool holder, makes it possible to interchange standard and special tools in seconds to minimize down-time. Flat punched parts produced require no deburring. Multi-stop micrometric gaging system positions work rapidly to exact layout specifications.

Outstanding...
IN EVERY RESPECT
THE Vactronic 450 LINE

Specially designed for high vacuum applications in research, production and testing.

Kingpin of the Vactronic 450 Line, the HVE-450, the most compact evaporator now available... providing clean, convenient and effective control of varied high vacuum operations.

Also available from Vactronic... the HVS-450 precision-built, high efficiency Vacuum Station and the dependable HVBS-450 Basic Vacuum System, furnishing Manual or Pneumatic control... a complete complement of the following high vacuum components separately available:

HVP-450 Oil Vapor Diffusion Pump, CBF-450 Baffle, CVP-450 Cold Trap, CVS-450 and AVS-450 High Vacuum Valves, and RGH-450-NP Roughing Manifold.

Experienced Engineering... Advanced Design... Critical Construction

Send for special brochure describing the 450 Line

Wyrco CIRCUIT BOARD PRINTER

- Completely automatic machine cycle with optional manual control for setup procedures
- Precision design and rigid construction assure consistently accurate alignment of screen with circuit board
- Fully adjustable to accommodate wide size ranges of screen frames and circuit patterns
- Controlled wiper travel, wiper speed, and wiper pressure result in a uniform deposition of resist coating
- Requires only ac power—no external air or vacuum connections

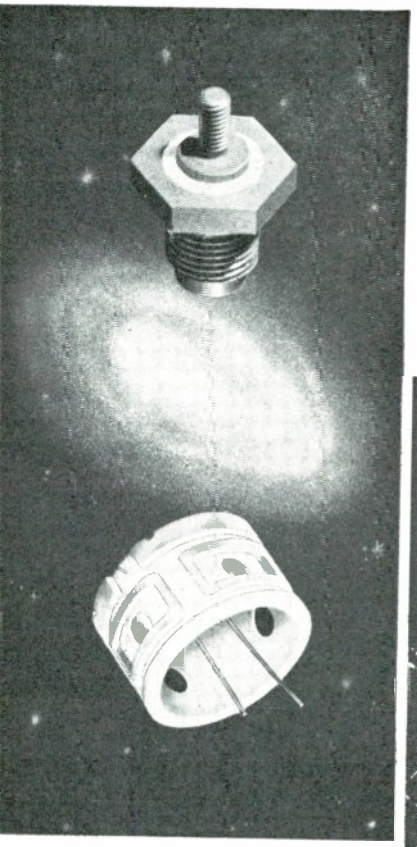
For the most **critical** design applications...

the MYCALEX family

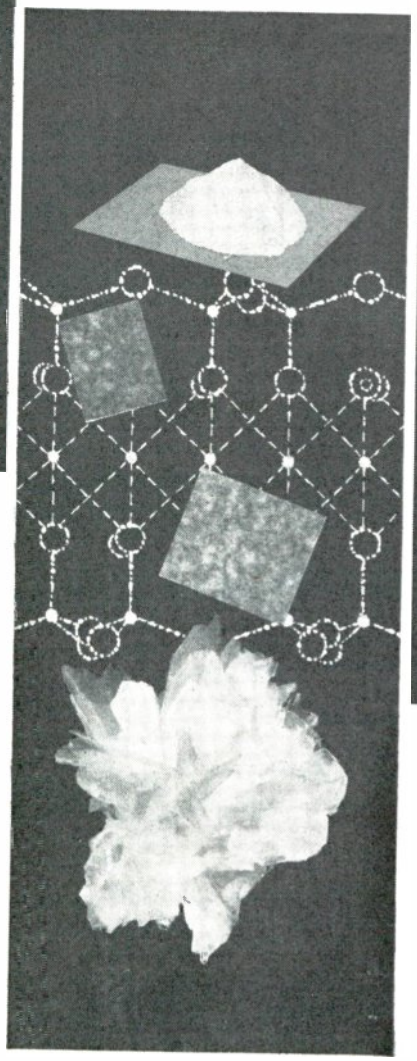


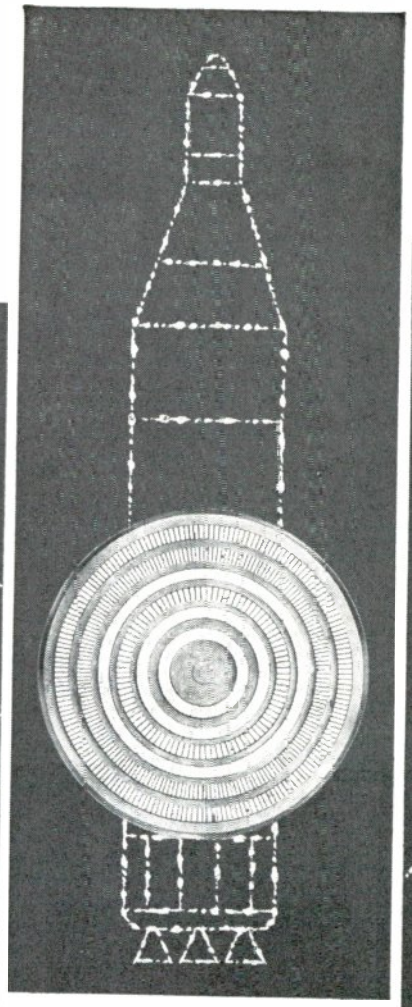
SUPRAMICA® ceramoplastics: exclusive formulations of synthetic mica and special electrical-grade glasses. **New** — SUPRAMICA 620 "BB" ceramoplastic for true high-temperature hermetic seals (helium leakage less than 2 x 10^{-10} after severe environmental tests).

MYCALEX® glass-bonded mica: quality natural mica and electrical-grade glasses. Offer high dielectric strength, high arc resistance, high-temperature capabilities.

Both formulations offer total dimensional stability in precision-molded and precision-fabricated grades.

SYNTHAMICA® synthetic mica: a fusion of silica, alumina, magnesia, and alkali fluorides . . . chemically pure, offering a wide range of superior properties for the most demanding dielectric applications.





MYCALEX commutation switches and plates: high-reliability, miniaturized electromechanical devices for missiles, multiplexing, telemetering, timing, time-division and control switching. Now up to 540 contacts on a 3" O.D. plate!

MYCALEX tube and transistor sockets: a line of precision-molded, glass-bonded mica and ceramoplastics for UHF, VHF, and similar high-reliability applications.

NEW FROM 3M

Color-Coded ELECTRICAL INSULATING PAPERS

For the first time . . . a line of unique color-coded electrical insulating papers for layer insulations in small coils and transformers.

Now, each caliper, in both rolls and sheets, is conveniently color-coded to take the guesswork out of selecting and using the right caliper of insulating paper. Manufacturing operations, inventory control and general handling will be expedited by quick, easy identification of the exact caliper needed for the job. The complete line of electrical insulating papers includes:

"Insulglass"—a highly dense, supercalendared glassine now being used by many coil manufacturers. Calipers range from .0007 to .003.

"Coiltronic"—a machine-finished condenser type paper made from high grade, special washed pulps. Calipers range from .0015 to .005.

For more information about these new color-coded insulating papers call or write:

World Radio History

WHERE SHARING PAYS OFF

SOME YEARS AGO we pointed out in "Proceedings of the IRE" that an amazing and unique characteristic of scientific men is their sense of responsibility to the past and to the future, expressed in their sharing with one another the new findings and discoveries of their science. The fact that engineers share information is a major contribution to the amazing growth of industrial progress and to our high standard of living.

Design Engineers seem to have an impelling need to publish. It is important and fortunate that they have had magazines *in which to publish*. Of course, their articles make these magazines possible, just as the publishing organization's faith and courage gives them the vehicle for communication. A magazine is a three-way team of author, medium, and reader—mutually dependent.

Such a contribution of one to the other is the vital service of the periodical. The thundering pace of radio-electronics and its expression in communications; glorious hi-fi music; the brilliant, full-color picture; and that same radio principle bringing in a new era in industrial controls which makes automation practical; the amazing time-and-effort-saving electronic computer; and new fabulous developments already being discovered in research which will be made practical by the radio engineer—all these *could not have been possible* without the publication as a means of collating and organizing information, and distributing it to those who needed it and *knew how to work with it*.

These are generalities! But "Proceedings of the IRE" *is specific*. The Superheterodyne circuit, FM, TV, radar, the computer, color TV, the transistor, scatter propagation, solid state electronics (stereatronics) all were presented and developed *article by article* in the history-making issues of "Proceedings of the IRE." The impact on industry of this broad exchange of information among engineers has been enormous, creating new markets and even new ways of life.

FM is an excellent illustration of this "sharing." Consider particularly the "lead out time" needed in FM. In December 1935, an article by Armstrong (an IRE Member) in "Proceedings of the IRE" proved conclusively to the engineering world that frequency modulation was an improvement *and practical*. (Today, FM is the audio side of every TV receiver.) This was the fourteenth article on frequency modulation *that had appeared in "Proceedings of the IRE,"* eight of them by Armstrong. It is now known that some of these articles which defined the weakness that had to be corrected, as well as some that amplified the discovery by further independent research, all helped make the final perfection possible.

At that time, in all the world, only four other articles on the subject had appeared. These were condensations of the "discussion" in "Proceedings of the IRE." Yet the final "Proceedings" article was published six years before the first FM broadcasting station went on the air. Engineers needed every bit of this "lead-out time" to do their work. The early publication in "Proceedings of the IRE" gave them just that; and thousands of engineers, who had followed this series, knew in December, 1935 that a great change had come and that they must design and tool up for it. Armstrong shared, "Proceedings" published, and an industry profited!

This is the traditional service of the "old-line" magazine. The author "shared"—the magazine "published"—the reader "studied" and industry progressed mightily through the three-way contribution. Truly, the reader contributes attention! This kind of publishing wins such attention, more than any other kind! It does the ground-work and sales-conviction building that comes years ahead of the final product news.

Advertising shares! The informative "ad" follows exactly the same pattern with exactly the same results. Again and again, display copy in "Proceedings of the IRE" has announced new developments or highlighted the engineering usage of a staple item. Year-after-year, we have seen tiny businesses start sharing their helpful information with readers in "Proceedings of the IRE" and as a result reap orders, prosper and grow. Today in aggregate, they are the giant industry identified as "Electronics."

It is said that the fundamental result of a magazine is to define a market. Since 1913, "Proceedings of the IRE" has defined an unfolding technical radio and electronics market by articles that stimulated the use of new products, and by presenting the manufacturers' stories of these new components, instruments and systems to engineers eager for as many new devices as would serve them well.

ABOVE AVERAGE YIELD

To the stockholder, the phrase **above average yield** identifies stocks or bonds producing income in excess of the average income produced by other securities in the same price range. It's a kind of extra dividend on the stockholder's investment.

In the materials processing field, the phrase **above average yield** has a similarly happy connotation. It means a return of usable materials in excess of the average produced by other processing services. Here, too, **above average yield** is a kind of extra dividend on your investment.

Semiconductor Specialties Corporation, the first complete materials processing service, offers **above average yield** in the processing of semiconductor materials. Thoroughly experienced in materials processing and device engineering, the Semiconductor Specialties staff is equipped to process germanium, silicon, quartz, ferrites, ceramics, intermetalics, III-V compounds and other exotic materials.

New B. F. Goodrich microwave absorber facilities improve testing reliability

Complete range of absorbers now available for accurate testing of components and systems

New facilities, recently completed by B.F.Goodrich, now offer a variety of broadband absorbers, resonant types tuned to desired frequency, and even complete anechoic chamber installations.

With these advanced products, plus the technical assistance of BFG specialists, you can now simulate free space conditions without leaving your location, provide year-round all-weather antenna testing, and eliminate undesirable reflections on antenna test ranges.

B.F.Goodrich microwave absorbers are made to exacting military specifications, and are carefully tested in our laboratory prior to shipment. For specifics on how we can help you improve radar performance, write *B. F. Goodrich Sponge Products, 239 Derby Place, Shelton, Conn.*

FABRICATING MICROMODULES TO MOBILE ROOMS

Magnetic Shields Custom Fabricated to Any Size or Shape

The industry's widest range of production facilities . . . in 3 factories:
PRESS FORMING AND DRAWING • HYDROFORMING • SPINNING • HAND FABRICATION OF PROTOTYPES

Already Tooled for Samples or Production

- Simple designs to elaborate complexes.
- Single or multiple laminae constructions.
- Micromodule size to a completely prefabricated mobile shielded room weighing 5 tons which can be transported anywhere — an achievement unique with Magnetic Shield Division.*

ALSO AVAILABLE

- Processed stock for fabrication in your own plant.
- Co-operative design facilities.

Use this SINGLE CONVENIENT SOURCE for all magnetic shielding requirements. Saves you countless design hours . . . helps speed your project . . . lowers your costs.

We recommend NETIC and CO-NETIC magnetic shielding materials because they are non-shock sensitive, non-retentive, do not require periodic annealing and provide completely effective shielding for optimum results.

NETIC and CO-NETIC are widely specified for satellite, missile, protecting recording tapes, data processing and for innumerable other military, scientific and laboratory applications as well as for commercial applications.

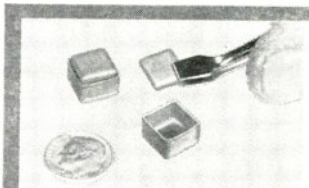
MAGNETIC SHIELD DIVISION

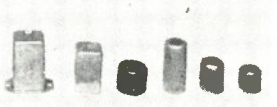
Perfection Mica Company

1322 N. ELSTON AVENUE, CHICAGO 22, ILLINOIS

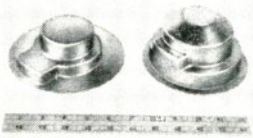
ORIGINATORS OF PERMANENTLY EFFECTIVE NETIC CO-NETIC MAGNETIC SHIELDING



Micro miniature shield and cover, punch press operation.

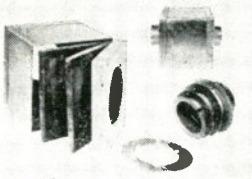


Sequence of shield cans, punch press or spinning.

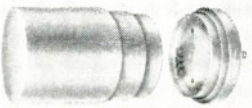


Complex configuration multi-lamina shield, hydroformed.

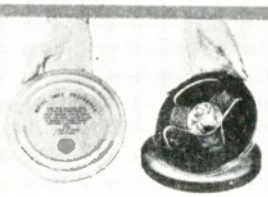
CRT shield illustrating combination of hand fabrication, spinning and sizing.



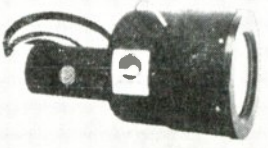
Backward wave tube shield assembly design, involving hand fabrication and hydroform or spinning.



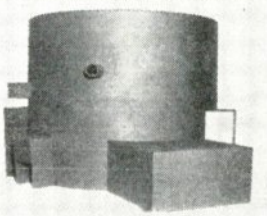
Special purpose shield, hand fabrication (levitated gyro).



Tape preserver can be spun, hydroformed or punch press fabricated.



Data storage tube shield, hydroform or spinning, plus hand fabrication.



Large fabricated special structure (shaker table shield), approx. 60″ dia. and 57″ high.

Composite photo demonstrating that magnetic shielding qualities of NETIC alloy material are not affected by vibration, shock, (including dropping), etc.

Make your Ferrites with

HIGH PURITY
MAPICO®
FERRIC OXIDES
for TOP performance

These reactive synthetic MAPICOS, some especially developed for ferrite manufacture, are over 99% pure Fe_2O_3. Choice of suitable characteristics is made easy—many variations in particle-size and shape are available. Careful control contributes to uniformity of packing and shrinkage. Our iron oxide production experience and our ferrite research can help you accomplish best results. Manufactured in modern plants by modern methods. Experienced Columbian technicians are ready to cooperate in any problem involving the use of iron oxides for ferrite manufacture. For full data write today. Samples for testing provided on request.

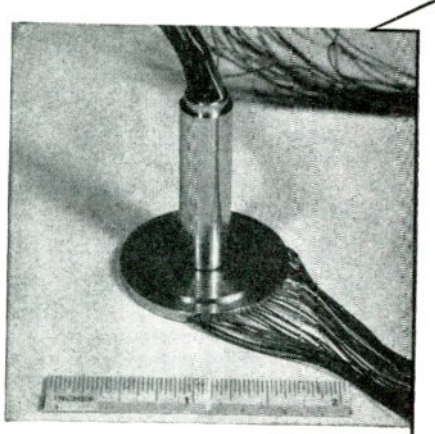
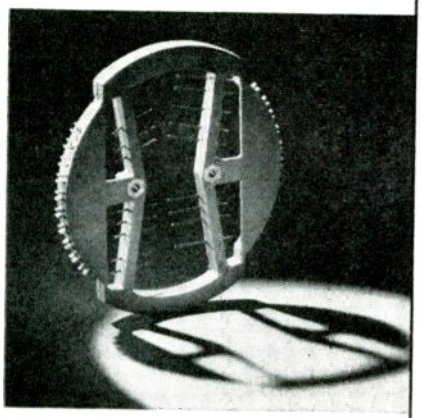
NEY OFFERS



COMPLETE ASSEMBLIES

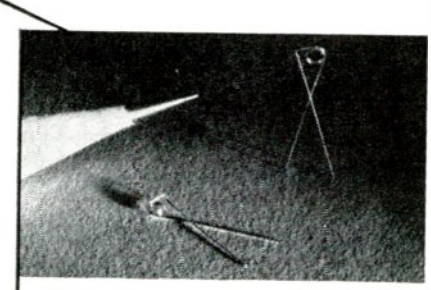
This 32-ring slip ring assembly was developed for the Instrumentation Laboratory, M.I.T., for use in the Navy's Polaris Missile Development Program. On such projects, Ney can work to customers' specifications or will go further and undertake the complete design and manufacturing functions.



MOLDED ASSEMBLIES

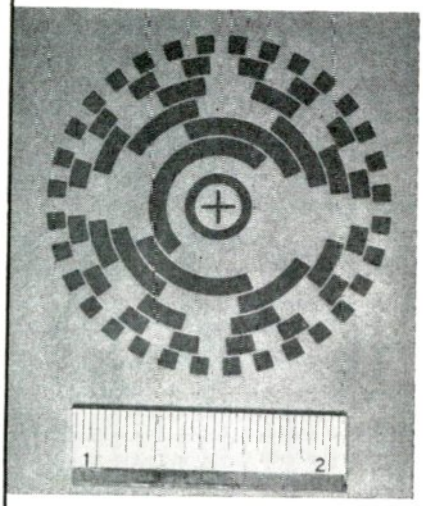
Ney molded assemblies save tremendously in handling time and expense of assembly operations. A series of brushes molded into a single assembly at the desired angle minimize the cost of lining up, and the desired gram pressure can be assured by deflection of straight wires. Three types of molding are used, injection, transfer and casting.

Write Dept. P for detailed information, or call our Engineering Department (Hartford, CHapel 2-2281).



PRECIOUS METALS AND PARTS

Ney manufactures its own precious metal alloys which are available as strips, wire or fine wire. Ney also manufactures precious metal parts, stamped, machined, formed or welded. Here again, Ney will work to customers' specifications or supply the design engineering function.



NEYBOND AND NEYETCH

NEYBOND is a new development in which thin sheets or stamped patterns of precious metal alloys are bonded to a rigid insulator. NEYBOND gives the advantages of solid, homogeneous, proven precious metal alloys, exceptional peel strength, absence of porosity and base metal migration and surface contamination, and elimination of rejects due to pits, inclusions and flaky plating. It is also now possible to fabricate flat Neyoro G NEYBOND patterns by an etching process called NEYETCH, thus eliminating expensive machining or stamping operations, and allowing manufacture of complex configurations for commutators almost unlimited in shape.

The BEST SOLUBLE PRECIOUS METALS for ELECTROPLATING

TECHNIC, INC
PRODUCTS OF RESEARCH

OROTHERM HT . . . Heat resistant 24Kt Acid Bright Gold, extremely low porosity, hard and ductile.

OROSENE 999 . . . 24Kt Acid Bright Gold, tight grain, superior throwing and leveling power.

OROMERSE . . . A neutral Immersion Gold. Plates direct on copper, brass, nickel, iron, lead and solder.

HG BRIGHT GOLD . . . 23+Kt Low Stress, Hard and Bright operates at room temperature, without free cyanide.

INDUSTRIAL 24KT GOLD . . . Ultra Pure Aqueous Potassium Gold Cyanide for soft stressless pure gold electroplates.

RHENIUM-A . . . Highest melting point of any platable metal, very low arc erosion, fair electrical conductivity and very stable contact resistance.

RHODIUM SULPHATE T.P. . . . For High Purity, Low Stress fine grain Rhodium electroplating.

PLATINUM T.P. . . . The first practical bright hard and pore-free platinum plating bath.

PALLADIUM R.T. . . . A highly efficient soluble Palladium for plating at room temperature.

Information on these products, or on any problem involving the electrodeposition of precious metals, are available without obligation.

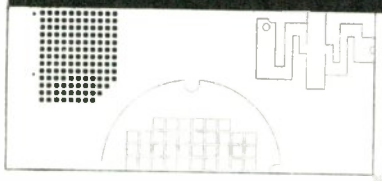
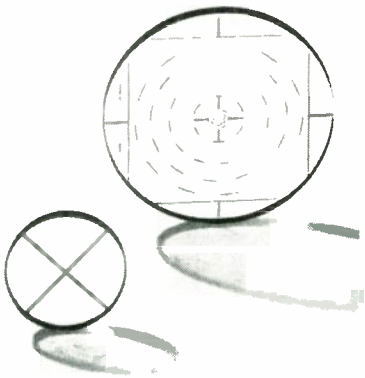
BUCKBEE MEARS

PHOTO-MECHANICAL REPRODUCTION to tolerances of ±.000039



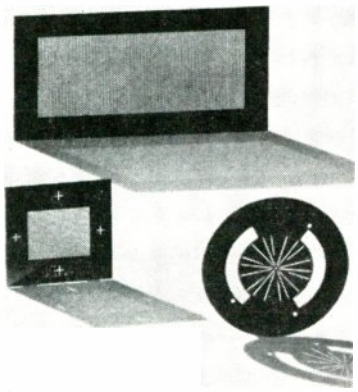
Anything that can be drawn in line can be reproduced on glass or in metal. Sizes up to 20 feet have been produced to tolerances of ±.015. Small quantities are practical at moderate cost because no dies are required.



GLASS ETCHING DATA

Calibrated dials, straight and cross line rulings, scales, special purpose reticles and prisms suggest a few of the items produced. Glass may be coated or lines filled permanently with a choice of compounds.

DESIGN VERSATILITY	GLASS TYPES	LINEAR & ANGULAR TOLERANCES	LINE WIDTH TOLERANCES	FILLING MEDIA
Fire Control Reticles	Polished Ordinary Plate	Up to 3" ±.0001	.0005 to .001 ±.0001	Titanium Dioxide
Test Fixture Reticles	Water White Plate	Up to 6" ±.0005	.001 to .002 ±.0002	Ferric Oxide Red
Concave or Convex Reticles	Optical Crown	Up to 12" ±.002	.002 to .005 ±.0004	Ferric Oxide Black
Reticles for Guidance Systems Resolution Targets	Boro Silicate Crown	Up to 24" ±.004	.005 to .010 ± .0005	Ferric Oxide Yellow
Calibrated Dials	Baryta Flint	Angles ±0° 0' 30"	.010 to .050 ± .001	Conductive Metallic Silver
Light Chopper Disks	Pyrex			



METAL ETCHING DATA

Etching does not change the molecular structure, leaves no burrs to remove. Round, square, oval or slotted holes may be etched. Patterns are etched through metal of these thicknesses: Copper to .030, nickel and alloys to .020, stainless steel to .025, molybdenum to .008. Surface etching on any thickness.

DESIGNS AND TYPES	METALS	DIMENSIONAL TOLERANCES
Fire Control Reticles	Copper and Copper Alloys	Linear to 3" ±.0002
Reticles for Optical Instruments	Nickel and Nickel Alloys	Linear to 12" ±.001
Scales	Cupro Nickel	Linear to 24" ± 003
Calibrated Dials	Spring Steel	Angular ±0° 0' 30"
Reticles for Guidance Systems	Stainless Steel	Line Widths to .002 ± 0001
Micro Component Parts for Control Systems	Aluminum	Line Widths to .005 ± 0005
Curved Surface Etched Parts	Cold Rolled Steel	Line Widths to .010 ±.001
Cylindrical Surface Etching	Molybdenum	Line Widths over .010 15% of Metal Thickness
Mechanical Parts Too Complicated for Die Stamping	Tungsten, Lead, Inconel	

ELECTRO FORMED MESH DATA

Evaporation masks for mesa transistors in miniature and subminiature sizes. Micro mesh sieves and screens are standard production. For all work a special ruling engine draws up to 2,000 lines per inch (straight or cross line, calibrated dials, scales and reticles), to linear and concentric circle accuracies of ±.000039.

MESH LINES PER INCH	SIZE in INCHES	MESH LINES PER INCH	SIZE in INCHES
1,000	4½ x 4½	120	4½ x 5
750	4⅛ x 4⅛	100	9 x 9⅛
500	5¼ x 5¼	100	6 x 6⅛
500	8 x 8	100	4½ x 4¼
400	8 x 8	100 x 30	13¾ x 16¼
300	8½ x 8½	80	11½ Dia
300	3¼ x 3¼	80	6⅛ x 5⅛
250	10 x 10	80	4 x 3⅛
250	9½ x 9½	50	4¼ x 4½
200	10 x 11	50	6 x 5⅛
200	5 x 5	40	5⅛ x 5⅛
200 x 60	2½ x 3¼	40	4¼ x 4¼
150 H.T.	14⅛ x 16⅛	20	4¼ x 4¼

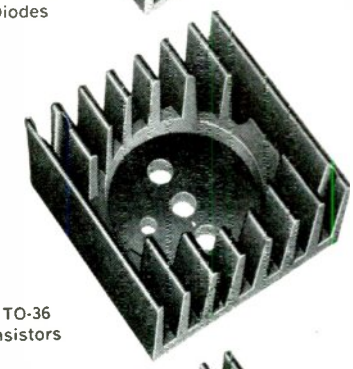
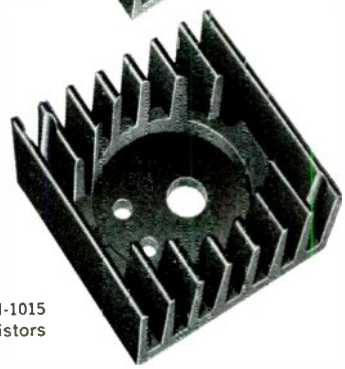
AUGAT

HEAT DISSIPATORS FOR POWER TRANSISTORS

for TO-3 Transistors or Diodes



for TO-36 Transistors



for 2N-1015 Transistors

Augat's new Heat Dissipators utilize a minimum of space and still offer the large radiating surfaces needed for maximum transfer of heat. All Augat dissipators feature a parallel, open-fin construction assuring low thermal resistance. They are readily adaptable to forced air cooling for even lower resistance.

Augat Heat Dissipators are manufactured in three styles to accommodate the TO-3, TO-36 and 2N-1015 transistors or their equivalent.

Write for Bulletin No. HD-261 which describes this new line in full detail.

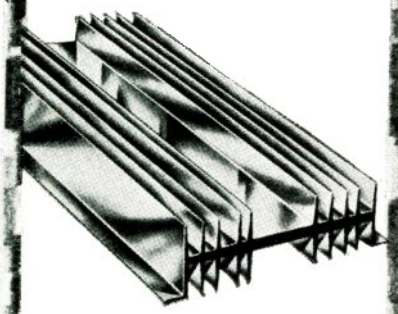
when the HEAT'S on...
...use JASCO®
HEAT SINKS



Transistors perform with maximum efficiency when mounted on Jasco Heat Sinks. Designed to bleed off the heat, as needed, Jasco Heat Sinks increase the reliability of your electronic gear... assure top performance of your product.
Within easy calling distance ... Jasco's staff of expert designers and engineers ... complete research and production facilities... fast service and delivery.

For consultation without obligation ... just give us a call.

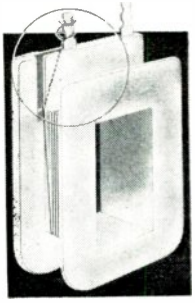
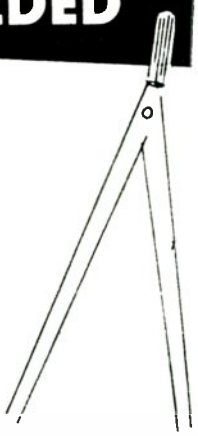
NYLON—Bobbins & Coil Forms

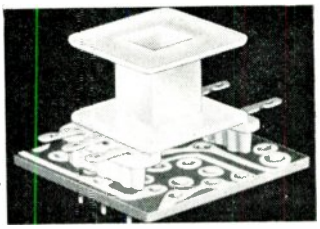
AMERICAN MOLDED



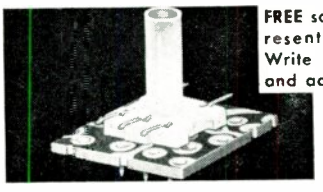
INSULATED LEAD SLOT
Automatically insulates lead and eliminates washers and taping. This revolutionary bobbin speeds up automatic winding.



PRINTED CIRCUIT TRANSFORMER BOBBIN
Complete with lugs, for printed circuit transformers. Eliminates cost and assembly of terminal board! The lugs are embedded in nylon for permanent locations especially designed to prevent wire breakage.



ONE PIECE COIL FORM
Complete with lugs, for printed circuit I. F. and oscillator coils. Integral construction, the tube and base cannot come apart—constant core torque . . . designed to prevent wire breakage.



FREE samples and catalogs. Representatives in major cities. Write to this office for names and addresses.

NO TOOL COST ON STOCK BOBBINS—SPECIAL BOBBINS TO YOUR SPECIFICATIONS

World Radio History

New reading suggestions from McGraw-Hill

1 ANTENNA ENGINEERING HANDBOOK

Contains information on all areas of antenna engineering to help you solve problems in the design and use of antenna systems. **Edited by Henry Jasik, Jasik Laboratories. Prepared by a staff of specialists. 1013 pp., 993 illus. & charts, $22.00**

2 ELECTROMECHANICAL COMPONENTS FOR SERVOMECHANISMS

Clearly explains how to choose and apply rotating components for best system operation. **By Sidney A. Davis, Consulting Electrical Engineer; and Byron K. Ledgerwood, Editor, Control Engineering. 342 pp., 315 illus. & tables, $11.50**

3 DESIGN MANUAL FOR TRANSISTOR CIRCUITS

Provides quick answers to your daily design problems on transistor and other semiconductor circuits. **Edited by John M. Carroll, Managing Editor, Electronics. 390 pp., over 600 illus., $9.50**

4 PROCEEDINGS OF THE SIXTH SYMPOSIUM ON MAGNETISM AND MAGNETIC MATERIALS

Presents the latest survey of current research in magnetism and magnetic materials—covering the work of 260 specialists. **Sponsored by the American Institute of Electrical Engineers and the American Institute of Physics. 399 pp., 309 illus., $10.00**

5 SCIENCE IN SPACE

Outstanding space experts discuss the challenging role of science in the space age—its opportunities . . . problems . . . and applications. **Edited by Lloyd V. Berkner and Hugh Odishaw, both of the National Academy of Sciences. 439 pp., 106 illus. & tables, $7.00**

6 ANALYSIS AND DESIGN OF FEEDBACK CONTROL SYSTEMS

Brings you tested mathematical tools you can use to achieve more precise analysis and design of feedback control systems. **By George J. Thaler, U.S. Naval Postgraduate School; and Robert G. Brown, General Motors Corp. 2nd Ed., 640 pp., 472 diagrams, charts, & tables, $14.50**

7 INFORMATION AND DECISION PROCESSES

Points the way to new dimensions in the field of applied mathematics. 12 authorities explore the nature of information and decision. **Edited by Robert E. Machol, Conductron Corp. 185 pp., 16 illus., $5.95**

8 PRINCIPLES OF INERTIAL NAVIGATION

A basic guide to inertial navigation—its concepts . . . problems . . . systems . . . and components. **By C. Savant, Jr., Hughes Tool Co.; R. Howard, Giannini Controls Corp.; C. Solloway, Jet Propulsion Lab.; and C. Savant, Northrop Corp. 249 pp., 166 illus., $9.75**

9 ELECTRONICS

Fully explains the physical basis and equivalent circuit representation of modern electronic devices. **By Paul M. Chirlian, Stevens Inst. of Tech.; and Armen H. Zemanian, New York Univ. 335 pp., 246 illus., $8.75**

10 AN INTRODUCTION TO THE PRINCIPLES OF COMMUNICATION THEORY

Covers the principles of modern communication theory and its applications in electrical engineering. **By John C. Hancock, Purdue Univ. 253 pp., 200 illus., $9.50**

11 TIME-HARMONIC ELECTROMAGNETIC FIELDS

Outlines effective mathematical techniques for solving electromagnetic engineering problems. Proves theorems, derives formulas, and provides practical engineering applications of the theory. **By Roger F. Harrington, Syracuse Univ. 496 pp., 224 illus., $13.50**

12 THE PHYSICAL THEORY OF TRANSISTORS

Tells how to understand and use the theory determining operation of semiconductor diodes and transistors. **By Leopoldo B. Valdes, Rheem Semiconductor Corp. 366 pp., 180 illus., $10.50**

13 SEMICONDUCTOR DEVICES AND APPLICATIONS

Gives full information on how diodes and transistors function and how they can be used effectively in circuits. **By Richard A. Greiner, Univ. of Wisconsin. 500 pp., 441 illus., $12.50**

14 AN INTRODUCTION TO INFORMATION THEORY

Explains basic concepts of probability theory and introduces information theory concepts and the fundamentals of coding theory. **By Fazlollah M. Reza, Syracuse Univ. 500 pp. over 200 illus., $13.50**

15 ELECTRONIC AMPLIFIER CIRCUITS

Gives facts on both vacuum tube and transistor amplifying devices—discusses practical design results and applications of mathematical theory. **By Joseph M. Pettit and Malcolm M. McWhorter, both of Stanford Univ. 336 pp., 225 illus., $9.75**

16 INTRODUCTORY SYSTEM ANALYSIS

Outlines practical techniques of linear system analysis—with full explanations of basic principles. **By William A. Lynch, and John G. Truxal, both of Polytechnic Institute of Brooklyn. 450 pp., 481 illus., $7.50**

17 ELECTRONIC MEASURING INSTRUMENTS

Thoroughly covers how basic components work . . . what they do . . . how they are used in measurement and control systems. **By Harold E. Soisson, Knolls Atomic Power Laboratory. 352 pp., 328 illus., $7.50**

18 ELECTROMECHANICAL SYSTEM THEORY

Brings you facts on the applications of the unique engineering discipline of lumped-parameter system analysis. **By Herman E. Koenig, Michigan State Univ.; and William A. Blackwell, Southern Methodist Univ. 520 pp., 367 illus., $14.50**

19 TRANSISTORS AND ACTIVE CIRCUITS

Presents practical information to help you solve basic transistor circuit problems. **By John G. Linvill and James F. Gibbons, both of Stanford Univ. 511 pp., 403 illus., charts, & tables, $14.50**

20 METEOR SCIENCE AND ENGINEERING

Gives the vital engineering results of today's changing meteor science and research. **By D. W. R. McKinley, National Research Council, Ottawa, Canada. 309 pp., 124 illus., $12.50**

21 ELECTRICITY AND ELECTRONICS FOR AEROSPACE VEHICLES

Clearly explains theory and shows how it is applied to systems in modern aircraft and rocket-propelled vehicles. **Northrop Institute of Technology. 330 pp., 500 illus., $13.95**

22 GROUND SUPPORT SYSTEMS FOR MISSILES AND AEROSPACE VEHICLES

Presents a complete picture of the weapon systems which form the ground support systems for modern missiles. **By Kenneth Brown, Univ. of Calif., L.A.; and Peter B. Weiser, Space Technology Laboratories. 608 pp., over 200 illus. In Press**

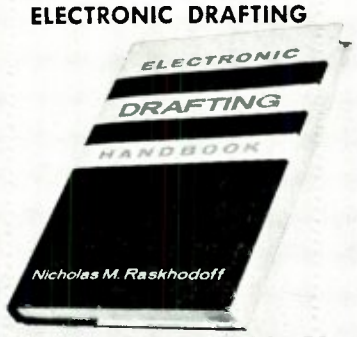
THE ONLY COMPLETE AND UP-TO-DATE GUIDE TO ELECTRONIC DRAFTING



AND THE ONLY BOOK TO INCLUDE SPECIFICATIONS FOR MILITARY EQUIPMENT

Electronic Drafting Handbook, by Nicholas M. Raskhodoff, is a thorough, easy-to-use reference that gives you 400 pages packed with practical information on

Components • Materials • Drafting Techniques • Mechanical Design • Circuit Drawings • Wiring Harnesses • Outline Drawings • Printed Circuits • Graphs • How To Check Drawings •

Plus hundreds of illustrations that guide you step by step to the skills of electronic drafting.

NEW BOOKS

Gyrodynamics
and Its Engineering Applications
By RONALD N. ARNOLD *and* LEONARD MAUNDER
September 1961, 484 pp., $14.00

Digital Computer Design
Its Logic, Circuitry, and Synthesis
By EDWARD L. BRAUN
November 1961, about 600 pp., approx. $15.00

Science and Information Theory
Second edition
By LÉON BRILLOUIN
October 1961, 351 pp.

Physics of the Aurora and Airglow
By J. W. CHAMBERLAIN
June 1961, 704 pp., $16.50

Microwave Engineering
By A. F. HARVEY
October 1961, about 1125 pp.

Crossed-Field Microwave Devices
Editor in Chief: E. OKRESS
Editors: G. MOURIER, J. FEINSTEIN, E. KETTLEWELL
Assistant Editor for Volume 1: G. R. FEASTER
Volume 1, PRINCIPAL ELEMENTS OF CROSSED-FIELD DEVICES
June 1961, 648 pp., 330 illustrations, $22.00
Volume 2, PRINCIPAL TYPES OF CROSSED-FIELD DEVICES
ANALYSIS OF OSCILLATOR SYSTEM PERFORMANCE
REGIONAL PROGRESS AND TRENDS
June 1961, 520 pp., 370 illustrations, $18.00

Ion Production by Electron Impact
By R. I. REED
Late 1961, about 300 pp.

A.P.I.C. Studies in Data Processing, No. 1

Some Commercial Autocodes
A Comparative Study
By E. L. WILLEY, A. D'AGAPEYEFF, MARION TRIBE, B. J. GIBBENS, *and* MICHELLE CLARK
July 1961, 53 pp., 15s./$2.50

Advances in Biological and Medical Physics
Edited by JOHN H. LAWRENCE *and* CORNELIUS A. TOBIAS
Volume 8, *1962, in preparation*

Advances in Computers
Edited by FRANZ L. ALT
Volume 2,
November 1961, about 325 pp.

Advances in Electronics and Electron Physics
Edited by L. MARTON
Volume 15,
October 1961, about 325 pp.

Advances in Space Science and Technology
Edited by FREDERICK I. ORDWAY, III
Volume 3, *August 1961, 482 pp.*

Solid State Physics
Advances in Research and Applications
Edited by FREDERICK SEITZ *and* DAVID TURNBULL
Volume 12, *October 1961, about 475 pp.*
Volume 13, *1962, in preparation*

World Radio History

VAN NOSTRAND BOOKS

FORTHCOMING, NEW AND RECENT

of MERIT AND USEFULNESS

SPACE FLIGHT, Volume II: DYNAMICS

by Krafft A. Ehricke

This book, the second of a three volume work, deals with the actual flight mechanics of space travel. It includes ballistic, orbital perturbations and other methods of calculating orbits of earth satellites; and orbits centered on the sun, as a basis for interplanetary and lunar flight calculations. Numerous tables and diagrams provide a wealth of data.

700 pages, prob. **$17.50**

FUNCTIONAL CIRCUITS AND OSCILLATORS

by Herbert J. Reich

This work deals with the analysis, characteristics, and applications of electronic circuits, generate or employ pulses, nonsinusoidal waves, and sine-wave oscillators. Problems form an integral part of the presentation and many references are given.

500 pages, **$12.50**

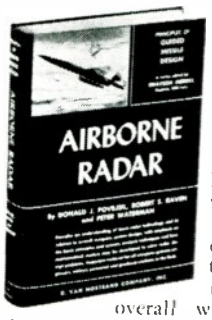
DESIGN FUNDAMENTALS OF ANALOG COMPUTER COMPONENTS

by R. M. Howe

This book explores the design considerations that are necessary in producing components for electronic analog computers. Heavily illustrated.

278 pages, **$7.50**

AIRBORNE RADAR



by Donald J. Povejsil, Robert S. Raven and Peter Waterman

Provided in this volume is an understanding of basic radar technology and its relation to overall weapons system design. *823 pages,* **$17.50**

TRANSISTOR CIRCUIT ANALYSIS AND DESIGN

by Franklin C. Fitchen

This book concentrates squarely on that information which an engineer must have to solve circuit design problems he is likely to encounter. Problems and discussion questions provide practice and serve to introduce more advanced material. *368 pages,* **$9.00**

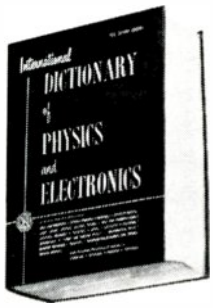
FERRITES

by R. A. Waldron

Described in this book are the nature, structure and magnetic properties of ferrites and includes their preparation properties and applications; the fundamental microwave theory; the theory of cavities; the propagation of waves in waveguides; and the many microwave ferrite devices.

Ready in September

INTERNATIONAL DICTIONARY OF PHYSICS AND ELECTRONICS



The extensive changes reflect recent scientific and technical advances. Includes a review of the development of modern physics against the background of classical physics, and foreign language glossaries in French, German, Russian, Spanish. *1355 pages,* **$27.85**

TRANSISTORS: PRINCIPLES, DESIGN AND APPLICATIONS

by Wolfgang W. Gaertner

This authoritative volume offers a clear and systematic introduction to transistor physics and the principles of transistor applications, with some 2,000 references to recent work on transistors. *650 pages,* **$12.50**

STATISTICAL PROCESSES AND RELIABILITY ENGINEERING

by Dimitris N. Chorafas

A study of the theory and application of mathematical statistics presenting an integrated approach to stochastic processes and their use as a means for prediction and control.

480 pages, **$12.75**

INTRODUCTION TO THE PRACTICAL USE OF LAPLACE TRANSFORMATION

by Gustav Doetsch

Ready in November

A COMBINED CONTROL SYSTEM FOR PROCESS INDUSTRIES

by Ernst Pavlik and Bruno Machei

Ready in November

DESCRIBES MORE THAN 250 TITLES

design, research and production 'tools' that every engineer must have!

Here are just a few of the Rider titles most in demand by engineers coast to coast.

DESIGN OF TRANSISTORIZED CIRCUITS FOR DIGITAL COMPUTERS. *Abraham Pressman, M.S.* **(cloth, $9.95)**

ENCYCLOPEDIA ON CATHODE-RAY OSCILLOSCOPES & THEIR USES (2nd ed. revised & enlarged). *J. F. Rider & S. Uslan.* **(cloth, $27.00)**

BASICS OF DIGITAL COMPUTERS, *John S. Murphy.* **(3 vols., soft cover, $8.40; cloth, $9.50)**

BASICS OF ANALOG COMPUTERS, *Thos. D. Truitt & A. E. Rogers.* **(cloth, $12.50)**

INTERNATIONAL TRANSISTOR SUBSTITUTION GUIDEBOOK (direct substitutions only) *Keats A. Pullen, Jr., Eng. D.* **($1.50)**

VIDEO TAPE RECORDING, *Julian Bernstein.* **(cloth, $8.95)**

UNDERSTANDING MICROWAVES (abridged reprint) *T. J. Young, Ph.D.* **($3.50)**

BASICS OF MISSILE GUIDANCE & SPACE TECHNIQUES, *M. Hobbs, P. E.* **(2 vols., soft cover, $7.80; cloth, $9.00)**

CONDUCTANCE DESIGN OF ACTIVE CIRCUITS, *Keats A. Pullen, Jr., Eng. D.* **(cloth, $9.95)**

CONDUCTANCE CURVE DESIGN MANUAL, *Keats A. Pullen, Jr., Eng. D.* **(stiff cover, $4.25)**

MAGNETIC AMPLIFIERS, Principles and Applications, *Paul Mali.* **($2.45)**

BASIC CARRIER TELEPHONY, *David Talley, E. E.* **(soft cover, $4.25; cloth, $5.75)**

NEW

MAGNETRONS *by Dr. K. Hinkel.* **(hard cover, $3.25)**

ANALYSIS OF BISTABLE MULTIVIBRATOR OPERATION *by P. A. Neeteson.* **(hard cover, $2.90)**

Important publications from PERGAMON PRESS

1. FREQUENCY MODULATION THEORY
(Application to Micro-Wave Links)
I. Fagot, P. Magne
Discusses wave propagation, fundamental concepts of frequency-modulated systems; problems of distortion in connection with propagation phenomena. A complete study of transmission by radio beams of multiple telephonic or TV program signals.
288 pp. (1961) $15.00

2. THE AUTODYNE (A New Electrical Machine)
Otto Benedikt
Full details on an ingenious new electrical machine in the family of rotary amplifiers, devised by Prof. Benedikt; designed to obtain control on any quantity that can be made to depend on direct current, using ordinary fixed-frequency AC power supply.
250 pp. (1961) $10.00

3. THE THEORY OF MICROWAVE VALVES
S. D. Gvozdover
A translation of an important Russian work dealing with the theory of microwave devices which have found constant use in practice, the operation of which can be understood on the basis of one type of oscillation or wave.
527 pp. (1961) $12.50

PERGAMON PRESS, INC.
122 East 55th St., New York 22, N.Y.

ENCYCLOPAEDIC DICTIONARY OF PHYSICS

COMPLETE IN 8 VOLUMES
$298.00 the set

Ed.-in-Chief: J. THEWLIS (Atomic Energy Research Establishment at Harwell)
Assoc. Eds.: D. J. HUGHES (Brookhaven Area, A. E. C.) A. R. MEETHAM (N. P. L. Teddington) and 3,609 of the world's leading mathematicians, chemists and scientists.

Of indispensable value to industry and government, scientists, engineers, chemists, mathematicians and all who work in the physical sciences!

This work covers physics proper, mathematics, astronomy, aerodynamics, hydraulics, geophysics, metrology, physical metallurgy, radiation chemistry, physical chemistry, structural chemistry, crystallography, medical physics, biophysics and photography. A multilingual glossary, included with the set, is a unique compilation of physical terms in 6 languages—English, French, Spanish, German, Russian and Japanese—available separately at $60.00 the copy.

60 sections . . . 15,000 terms . . . subject indexed . . . alphabetically arranged . . . approx. 8,000 pp.

Check box in coupon below to obtain 14-day free examination of Volume I and special offer on the set.

WILEY BOOKS

HANDBOOK OF AUTOMATION, COMPUTATION, AND CONTROL, Volume 3, Systems and Components. Edited by E. M. GRABBE, S. RAMO, and D. E. WOOLDRIDGE, Thompson Ramo Wooldridge Inc. 1961. Approx. 1208 pages. $19.75. Vol. I, Control Fundamentals. 1958. 1020 pages. $18.50. Vol. 2, Computers and Data Processing. 1959. 1096 pages. $18.50.

SCIENTIFIC FOUNDATIONS OF VACUUM TECHNIQUE, Second Edition. By the late SAUL DUSHMAN. Edited by E. M. LAFFERTY, G.E. Research Laboratory. 1961. Approx. 808 pages. Prob. $17.50.

CYBERNETICS: Control and Communication in the Animal and the Machine, Second Edition. By NORBERT WIENER, M.I.T. An M.I.T. Press Book, 1961. 212 pages. $6.50.

MANAGEMENT MODELS AND INDUSTRIAL APPLICATIONS OF LINEAR PROGRAMMING, Volumes I and II. By A. CHARNES, Northwestern Univ., and W. COOPER, Carnegie Institute of Technology. Vol. I. 1961. 467 pages. $11.75. Vol. II. 1961. Approx. 448 pages. Prob. $11.75.

TRANSISTOR LOGIC CIRCUITS. By R. B. HURLEY, IBM, San Jose, Calif. 1961. 363 pages. $10.00.

INTRODUCTION TO FEEDBACK SYSTEMS. By L. D. HARRIS, Univ. of Utah. 1961. Approx. 336 pages. Prob. $10.50.

UNDERSTANDING DIGITAL COMPUTERS. By P. SIEGEL, International Electric Co. 1961. 403 pages. $8.50.

ANALYSIS OF NONLINEAR CONTROL SYSTEMS. By D. GRAHAM and D. T. McRUER, Systems Technology, Inc. 1961. Approx. 424 pages. Prob. $9.75.

STATISTICAL ANALYSIS AND OPTIMIZATION OF SYSTEMS. By E. L. PETERSON, General Electric Co. 1961. 190 pages. $9.75.

BALLISTIC MISSILE AND SPACE VEHICLE SYSTEMS. By H. S. SEIFERT, Stanford Univ. and K. BROWN, John Wiley & Sons, Inc. 1961. 526 pages. $12.00.

INTRODUCTION TO CERAMICS. By W. D. KINGERY, M.I.T. 1960. 781 pages. $15.00.

ITERATIVE ARRAYS OF LOGICAL CIRCUITS. By F. C. HENNIE, III, M.I.T. An M.I.T. Press Research Monograph. 1961. 242 pages. $4.95.

SEQUENTIAL DECODING. By JOHN M. WOZENCRAFT and BARNEY REIFFEN, both of M.I.T. An M.I.T. Press Research Monograph. 1961. 74 pages. $3.75.

THE MATHEMATICAL THEORY OF LINEAR SYSTEMS. By BASIL M. BROWN, Royal Naval College. 1961. 280 pages. $8.00.

ELECTROMAGNETIC THEORY. By ERICK HALLEN, Royal Institute of Technology, Stockholm. In Press.

PROCEEDINGS OF THE FIRST SYMPOSIUM ON ENGINEERING APPLICATIONS OF RANDOM FUNCTION THEORY AND PROBABILITY. Edited by J. L. BOGDANOFF and FRANK KOZIN, both of Purdue University. In Press.

AN INTRODUCTION TO THE THEORY AND PRACTICE OF TRANSISTORS. By J. R. TILLMAN and F. F. ROBERTS, both of Post Office Engineering Research Station, London. 1961. 340 pages. $8.00.

MICROWAVE FERRITES. By P. J. B. CLARRICOATS, The Queen's University, Belfast. 1961. 260 pages. $8.00.

A GUIDE TO FORTRAN PROGRAMMING. By D. D. McCRACKEN, Consultant. 1961. Approx. 100 pages. $2.95.

RFI Problems?

Let ARK ELECTRONICS help you solve them

Complete experience and facilities for:

- Radio Interference Testing to Military Specifications and FCC Regulations
- Weapons and Communications Systems Compatibility Studies
- Electromagnetic Shielding: Custom Design and Testing
- Custom Filters: Designed to your Specifications

Now in our 10th year of specializing in RFI problems and their solution.

ARK ELECTRONICS CORPORATION

PRECIOUS METALS PLATING

electronics plating spoken here . . .

It's difficult enough doing your engineering without worrying about the plating too. Many engineers we've spoken with are glad to find men at Cohan-Epner who thoroughly know their electronic plating; men who talk "tenths" tolerances, who know that "plumbing" doesn't lead to a sink, in short, men who talk your language.

Whether you're setting your plating spec to achieve maximum "Q" in a microwave cavity, or something as advanced as silver plating a dielectric such as boron nitride, whether you are looking for an R.M.S. 3 or just need a component plated right in order to function right, give Cohan-Epner a call.

COHAN EPNER CO., INC. 142 W. 14th St., New York 11, N.Y. CHelsea 3-3411

NEW HYDRAZINE ACTIVATED CORE SOLDER

FLOWS AT IDEAL RATE, LEAVES NO SOLDERING RESIDUES

Non-corrosive HYDRAZINE FLUX,* used industry-wide in liquid form, has now been incorporated into core solder. This fast, efficient flux vaporizes completely at soldering temperatures. It leaves no residue which would support fungus growth. Will not corrode. Conforms to strict military requirements.

In H-32 core solder for the first time, HYDRAZINE FLUX offers more advantages than ever. When flux is normally applied, far more than is actually needed is used. Now, the exact ratio of flux to solder provides for proper wetting. Thereafter the flux decomposes and is eliminated. Cleaning and production time are saved.

TEST HYDRAZINE FLUX AND CORE SOLDER in your own plant. Write for samples of either H-Series Fluxes or H-32 core-solder form and technical literature.

*U.S. Patent No. 2,612,459

Available only from Fairmount and its sales agents

HOW TO CUT YOUR SOLDERING COSTS

-use Dutch Boy® Cored Solder and the new VICI Electric Iron with Replaceable Tips

Replaceable Tips available in all popular shapes and in plain and processed, coated types.

Take the shackles off your soldering lines . . . get profit-boosting productivity . . . equip your operators with this precisely engineered, ruggedly built, long-life "VICI" tool . . . teamed up with fast melting, free-flowing "Dutch Boy" solder.

"VICI" irons are supplied in all wanted wattages and are designed to take replaceable tips of all shapes and sizes.

Nice balance, absence of vibration, comfortably cool handles—these are some of the features of "VICI" irons that earn the admiration of operators . . . that promote faster, better work, hour after hour, day after day.

To match the superlative performance of "VICI" irons, a full line of replaceable plain and coated tips has been provided.

Write for catalog giving complete performance data on "VICI" Electric Irons and information on "Dutch Boy" Solders and Fluxes.

Rely on
"KESTER"
"SOLDERFORMS"
for
TOP PERFORMANCE

Kester "Solderforms" are engineered for soldering single- or multi-phase components. Kester "Solderforms" are:

- fabricated to exacting customer specifications and requirements relative to size, shape and alloy; from high and ultra-high purity metals, available in flux-filled or solid.

Kester "Solderforms" are the answer to efficient and economical assembly line soldering. For top performance, always use Kester "Solderforms."

FREE— Sample assortment of Kester "Solderforms" and complete details.

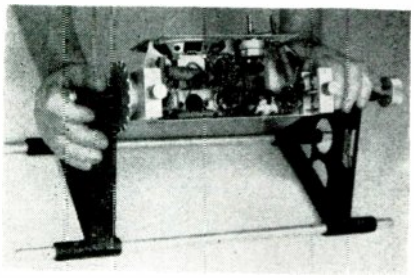
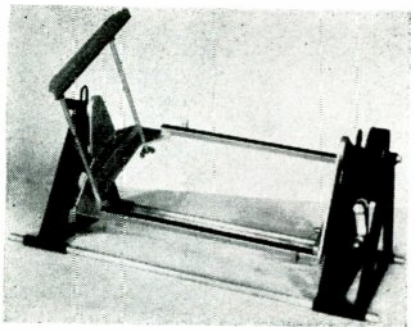
PRODUCTION FIXTURES

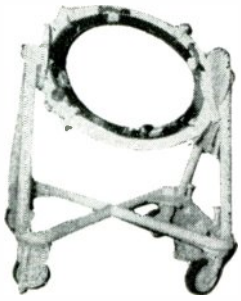


Attention Methods Engineers

Production Tool and Fixture assemblies *save you time and money* in your wiring and assembly departments. "Tiny-Fix," your third hand, positions miniature chassis, terminal boards and connectors in proper alignment which results in quicker and more efficient work.



The S-12-W above differs from our standard friction and index models in that it offers worm drive that gives positive positioning even under heavy stress. The PF-20-C floor model precision fixture is designed to level and rigidly support the bulky but delicate chassis assemblies required by recent developments in the missile and related industries. 36 inch height at pivotal centers permits the rotation of assemblies as wide as 50 inches through 360 degrees in two planes.



Adapters similar to those shown in the assembly fixtures above are designed by our engineering staff to meet your specific requirements.

Write us for our catalog and current list of firms now using our equipment in the electronic industry. For technical information consult with Lester George, Chief Engineer.

WALL PENCIL IRONS

(IDEAL FOR PRINTED CIRCUITS)

with exclusive "Thermostatic Brain" are built for "Production Line Punishment"

Wall irons think for you . . . act for you! Thermostatic "Brain" heats 4 times faster . . . controls heat . . . prevents tip burning. Built for punishment with triple life, precision wound elements guaranteed for the life of the iron. No fragile or moving parts. Ideal for delicate, precision work.

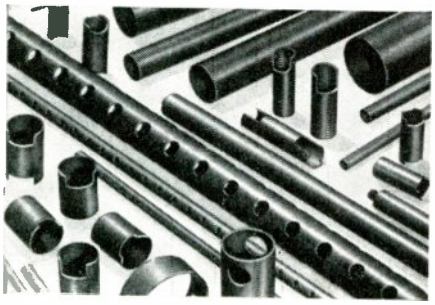
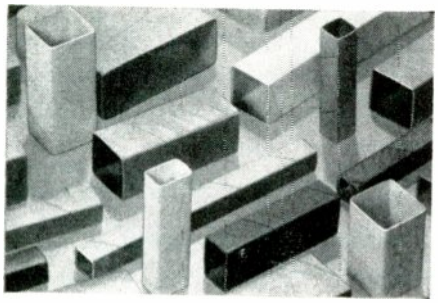
A Complete Line of Coil Forms And Tubing For Any Requirement

- **Any shape, I.D., O.D. or length—threaded, notched or punched.**
- **All dielectric materials, including kraft, fish paper, DuPont Mylar, phenol impregnated, fiber glass and combinations.**
- **Stock delivery on over 2000 arbor list sizes . . . fast delivery on others and specials.**

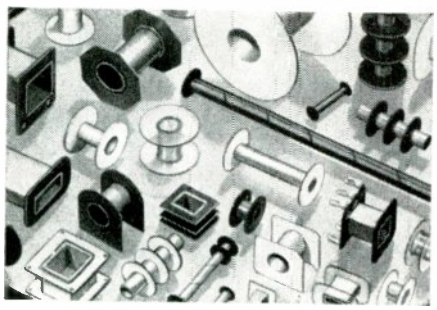
PLUS expert mandrel and fabricating service.



Round Tubes: widest variety available . . . any decimal size to 8" I.D. . . . specials of all types.



Square and Rectangular Tubes, also other shapes . . . any decimal size to 8" I.D. . . . fabricated to any specification.



Bobbins: fabricated or molded . . . any shape or size spool or flange . . . specials of all types.

Request catalogs, arbor list and prices.

Classifications with a System!

The IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. The result is a division of all products and services into three fundamental indexes into which 112 basic classifications have been organized.

For detailed identification, these 112 products and services, grouped in 3 indexes, are further defined into over 1000 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

World Radio History

Distribution

1. Export & Import
2. Jobbers & wholesalers
3. Manufacturers representatives
4. Sales and service
5. Surplus dealers

This section of the IRE DIRECTORY is the complement to manufacturing, which is distribution. It has proved to be a real service to IRE member engineers and executives to put into this book a list of annually checked jobbers, wholesalers, manufacturers representatives, and distributors. Many of these firms are identified further by the initials ERA, as members of the Electronic Representatives Association, NEDA as members of the National Electronic Distributors Association. Permission from these organizations to use their membership lists in order to make this section of the IRE DIRECTORY as complete as possible is gratefully acknowledged. For convenience in locating distributional firms, the listings are arranged geographically under individual state names, the listings within each state being grouped by city names in alphabetical order, so that all firms located in any one city may be grouped together for quicker reference. Listings for foreign firms follow the listings for the United States.

ELECTRONIC SALES SPECIALISTS

For the past 22 years, the Kenneth E. Hughes Company, Inc. has specialized in the sale of electronic equipment and components for some of the best known manufacturers in the industry. This knowledge and experience in electronics is vested in a staff of 8 highly-trained, competent sales engineers in the company's two offices strategically located to effectively cover New York City, New Jersey and Eastern Pennsylvania.

If you manufacture or use electronic equipment and components, you can depend on this specialized electronic sales experience.

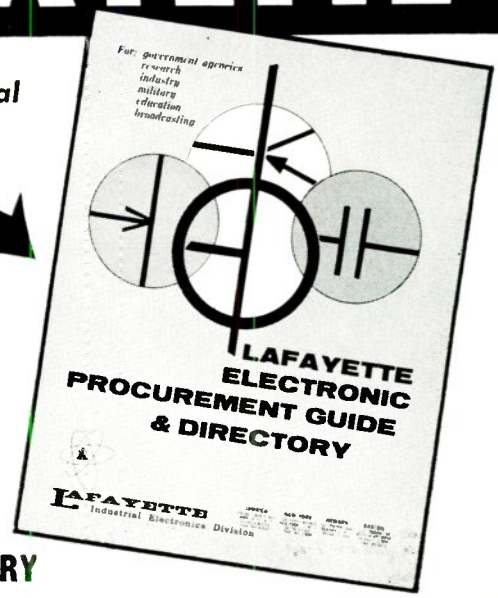
Now Yours For The Asking From

LAFAYETTE

your prime source for everything in industrial electronics

FREE!



LAFAYETTE ELECTRONIC PROCUREMENT GUIDE & DIRECTORY

Not a catalog but a complete guide for electronic procurement and engineering, with data and information designed to save you hours each day.

- **COMMODITY LISTING**—components listed alphabetically by both commercial and Mil-Spec numbers with names of manufacturers.
- **UNRAVELS THE MYSTERIES OF MIL-SPECS**—provides a full understanding of Mil-Spec useage by interpreting numbers as to various characteristics, temperature coefficients, tolerances, etc.
- **Tables, Charts, Formulae & Terminology**—a quick, handy reference you'll use day in and day out, at your fingertips.

Thousands of Electronic Firms Have Expanded Their Purchasing Power Through Lafayette. Has Yours?

We are the Distributors' Supplier . . . Selling

TO DISTRIBUTORS ONLY

Transitube has become widely known as the supplier for all major brand

INDUSTRIAL ELECTRON TUBES and SEMI-CONDUCTORS

to meet rigid government and commercial specifications. Whether your requirements are 1 or 1000 . . . our three modern warehouses, stocked with a current and comprehensive inventory, insure you off-the-shelf delivery at great savings.

Our sales department invites Distributors' inquiries on: POWER • ROCKET • BROADCAST • KLYSTRONS • IGNITRONS • MAGNETRONS • THYRATRONS • RECTIFIERS • RUGGEDIZED • TRANSMITTING • SUBMINIATURES • PHOTOMULTIPLIERS • SPECIAL PURPOSE • CATHODE RAY TUBES • TRANSISTORS

Diethelm & Co., Ltd., Bangkok, Thialand, 1, 3, Main Office: Gordon Enterprises, North Hollywood, Calif.

From servo-mechanisms to electronic computers, "RADIO" is a way of THINKING!

Far-reaching progress in the radio-electronic field is no "happy accident." Television, electronic computers and the "radiation" power of the atom, rapidly being harnessed to industry, were not discovered . . . they were engineered.

From "fission" to "computation," these engineering achievements are accomplished through an enormous process of information exchange—the methodical and brilliant teaming together of engineering *thinking* to solve a problem. In radio this work has been done deliberately by a growing engineering society, through its meetings and published proceedings, which unleash the creative minds of men.

In 1960, "Proceedings of the IRE" published over 2000 text pages, exclusive of product news and departmental features. This is the word-count equivalent of eight 500-page textbooks on radio-electronics for engineers. This "high" in genuine reader service was logically matched by advertising worth over a million dollars, by firms investing in the engineers' reading interest and benefiting by it.

Engineers are educated to specify and buy!

TRADE-NAME INDEX

On the following pages is a list of registered and "coined" trade names submitted to IRE by manufacturers.

2—Sprague Electric Co.
2K—Sterling Transformer Corp.
3C-Bloc—Computer Control Co., Inc.
3C-Pac—Computer Control Co., Inc.
3M—Minnesota Mining & Mfg. Co.
25-I—Bendix Corp.
260—Simpson Electric Co.
2000—Philco Corp.

—A—

ABC—Porter Co., Inc., H. K.
ADI—Applied Dynamics, Inc.
ADI—Southwestern Industrial Electronics Div., Dresser Industries
AEL—American Electronic Labs., Inc.
AEL—Automation Engineering Lab., Inc.
AGF—American Gas Furnace Co.
AH—Arrow-Hart & Hegeman Elec. Co.
ALI—Acton Labs., Inc.
A-Lum-O-Aire—Carey Electronic Eng. Co.
AMF—American Machine & Foundry Co.
A-P—Controls Co. of America
API—Assembly Products, Inc.
ARA—Advanced Research Assoc., Inc.
ARRA—Antenna & Radome Research Assoc.
ATC—Audiotronics Corp.
ATR—American Television & Radio Co.
A.V.C.—Rockbestos Wire & Cable Co.
A.V.R.—Perma-Power Co.
A-Z—Plastic Wire & Cable Corp.
Abco—Abbott & Co.
Able Nasarr—Autonetics Div.
Aboglas—Natvar Corp.
Absolute—Cambridge Filter Corp.
Accudata—Minneapolis-Honeywell Regulator Co.
Accutron—Sheffield Corp.
Accuvac—Green Rectifier Co.
Accwire—AAA Wire Works
Aceohm—Ace Electronics Assoc. Inc.
Acepot—Ace Electonics Assoc. Inc.
Aceset—Ace Electronics Assoc. Inc.
Acetrim—Ace Electronics Assoc. Inc.
Achiever—AC Spark Plug Div.
Acilliscope—AC Spark Plug Div.
Acme—Trimm, Inc.
Acme—United States Steel Corp.
Acme-Mold—Acme Wire Co.
Acou-Stack—Industrial Acoustics Co., Inc.
Acousti-Screen—Rek-O-Kut Inc.
Acoustic Baton—University Loudspeakers, Inc.
Acoustic Gate—Altec Lansing Div.
Acoustigraph—Reed Research Inc.
Acoustiscreen—Audax Inc.
Acrasplit—Entron Inc.
Acro-Bevel—Acromark Co.
Acro-Bulletin—Acromark Co.
Acro-Cast—Acromark Co.
Acro-Etch—Acromark Co.
Acro-Ink—Acromark Co.
Acro-Match—Communications Co., Inc.
Acro-Mu—Acro Div.
Acro-Silasteel—Acromark Co.
Acroboss—Acromark Co.
Acrobronze—Acromark Co.
Acrocel—Acromark Co.
Acrocut—Acromark Co.
Acrodie—Acromark Co.
Acrofibe—Acromark Co.
Acrograve—Acromark Co.
Acrohex—Acromark Co.
Acrojet—Acromark Co.
Acroleaf—Acromark Co.
Acrolite—Acro Div.
Acrolite—Acromark Co.
Acroll—Acromark Co.
Acroloy—Acromark Co.
Acromarker—Acromark Co.
Acroname—Acromark Co.
Acroplac—Acromark Co.
Acroprene—Acromark Co.
Acroprint—Acromark Co.
Acroprinter—Acromark Co.
Acrosign—Acromark Co.
Acrostamp—Acromark Co.
Acrotag—Acromark Co.
Acrotool—Acromark Co.
Acrotype—Acromark Co.
Acrylon—Borden Chemical Co.
Actionator—Minneapolis-Honeywell Regulator Co.
Ad-A Switch—Clarostat Mfg. Co., Inc.
Adac—Kearfott Div.
Adashaft—Centralab Electronics
Add-A-Shelf—Alpha Wire Corp.
Add-A-Unit—Blonder-Tongue Labs. Inc.
Addaplug—Associated Engineering Corp
Adec—American Development Electronics Co.
Adelco—Advance Electronics Co.
Adept 400—Ortronix, Inc.
Adit—Daystrom Inc.
Adjust-A-Cone—Quam-Nichols Co.
Adjust-A-Volt—Standard Electrical Products Co.
Adjustohm—Ward Leonard Electric Co.
Adjustoroid—Burnell & Co., Inc.
Adlake—Adams & Westlake Co.
Adrac—Computer Systems, Inc.
Advance—Driver-Harris Co.
Advinco—Advanced Instrument Corp.
Aeco—American Electric Cable Co.
Aehco—Amatom Electronic Hardware Co., Inc.
Aero-Magnette—Heinemann Electric Co.
Aero-Seal—Breeze Corps., Inc.
Aerocen—Aerovox Corp.
Aerocom—Aeronautical Communications Equip., Inc.
Aerofilm—Aerovox Corp.
Aeroflex—Anchor Plastics Co., Inc.
Aerohead—Giannini Controls Corp.
Aerolene—Aerovox Corp.
Aerolite—Aerovox Corp.
Aeropak—Aero Research Instrument Co., Inc.
Aeroseal—Aero Research Instrument Co., Inc.
Aerosolve—Cambridge Filter Corp.
Aerotape—Packard-Bell Electronics Corp.
Aerotron—Aeronautical Electronics, Inc.
Aerovane—Bendix Corp.
Agaswitch—Elastic Stop Nut Corp. of America
Aico—American Insulator Corp.
Air-Core—Amphenol-Borg Electronics Corp.
Air Dux—Illumitronic Engineering
Air-Meters—Hastings-Raydist, Inc.
Airetest—Sheffield Corp.
Airinductor—Barker & Williamson, Inc.
Airloc—Monadnock Mills
Airpot—Electric Regulator Corp.
Akra Ohm—Shallcross Mfg. Co.
Al—Arrow Radio Co.
Al-Cab—LMB-Heeger, Inc.
Alchrome—Driver Co., Wilbur B.
Alclad—Driver Co., Wilbur B.
Alcoa—Aluminum Co. of America
Alcuplate—Texas Instruments Inc.
Alectral—General Cable Corp.
Algco—Auburn Mfg. Co.
Aliron—Texas Instruments Inc.
Aljak—Amphenol-Borg Electronics Corp.
Alkrothal—Kanthal Corp.
Alloyist—Porter Co., Inc., H. K.
Almag—Alpha Wire Corp.
Alnico—Crucible Steel Co. of America
Alnico—General Electric Co.
Alnico—General Magnetic Corp.
Alnico 5CB—Thomas & Skinner, Inc.
Alnifer—Texas Instruments Inc.
Alpha—Electrovert, Inc.
Alphadyne—Skiatron Electronics & Television Corp.
Alphatron—NRC Equipment Corp.
Alphlex—Alpha Wire Corp.
Alsimag—American Lava Corp.
Alsiplate—Texas Instruments Inc.
Altemp—Alpha Wire Corp.
Alti-Temp—Wincharger Corp.
Altimatic—Air-Marine Motors, Inc.
Altivar—Rotron Mfg. Co., Inc.
Alumalytic—General Electric Co.
Alumaweld—Johnson Mfg. Co., Inc.
Alumel—Hoskins Mfg. Co.
Alundum—Norton Co.
Alusol—Wright Metalcoaters, Inc.
Alv-Flex—Auburn Mfg. Co.
Alvo-Pak—Alvo Nut & Bolt Co., Inc.
Amaircell—American Electric Cable Co.
Amarine—United States Steel Corp.
Amax—American Metal Climax, Inc.
Amberly—Vaco Products Co.
Amberox—Technicraft Co.
Ambirite—Micamold Electronics Mfg. Corp.
Ambraze—American Brasing Alloys Corp.
Amci—Alford Mfg. Co.
Amco—American Metal Climax, Inc.
Amco—Applied Magnetics Corp.
Ameco—American Electronics Co.
Amepco—Borden Chemical Co.
Amer-Construction—United States Steel Corp.

World Radio History

Amer-Dial—Amerac, Inc.
Amer-Ground—United States Steel Corp.
Amer-Led—United States Steel Corp.
Amerap—American Electric Cable Co.
Amerbestos—United States Steel Corp.
Amerclad—United States Steel Corp.
Amercord—United States Steel Corp.
Amerfine—United States Steel Corp.
Amerglass—United States Steel Corp.
Amerhead—United States Steel Corp.
American Beauty—American Electrical Heater Co.
American Connector—Automation Electronics, Inc.
Americore—United States Steel Corp.
Amerite—American Tower Co.
Amerite—United States Steel Corp.
Amerloy—United States Steel Corp.
Amerlum—United States Steel Corp.
Ameroxide—United States Steel Corp.
Amerplastic—American Electric Cable Co.
Amerprene—United States Steel Corp.
Amershield—American Electric Cable Co.
Amersteel—United States Steel Corp.
Amertel—United States Steel Corp.
Amerzone—United States Steel Corp.
Amficon—American Machine & Foundry Co.
Aminco—American Instrument Co., Inc.
Ampec—Centralab Electronics
Amperox—United States Steel Corp.
Ampisolver—American Electronics, Inc.
Amplet—Consolidated Controls Corp.
Amplet—Devol Research Corp.
Ampli-Speed—Electric Machinery Mfg. Co.
Ampli-TUBE—Texas Instruments Inc.
Ampolene—United States Steel Corp.
Amprobe—Pyramid Instrument Corp.
Ampyroe—United States Steel Corp.
Amstat—American Electronics, Inc.
Amvar—United States Steel Corp.
Anastimat—Ilex Optical Co.
Anchor—Townsend Co.
Ancorene—Anchor Plastics Co., Inc.
Anestheton—Invengineering, Inc.
Anesthograph—Epsco Worcester
Anglgear—Airborne Accessories Corp.
Anhydrator—Fisher Co., Inc., Oscar
Antalon—Green Rectifier Co.
Antioch Process—Bean & Co., Morris
Apco—Commercial Plastics Co.
Apcor—Geartronics Corp.
Apelco—Applied Electronics Co.
Appco—Atlas Precision Products Co.
Aqua-Sound—Wintronics
Aquameter—Beckman Instruments, Inc.
Aquapeutic—Coil Co. of America, Inc.
Aquaseal—General Cable Corp.
Aquathene—General Cable Corp.
Aquavox—Winston Electronics
Araldite—Ciba Products Corp.
Arbeit D-V-A—Industrial Development Labs., Inc.
Arco—Rosenberg Bros. & Co.
Aritemp—Aries Labs., Inc.
Ark-Trol—Crouse-Hinds Co.
Arktite—Crouse-Hinds Co.
Armag—Sprague Electric Co.
Armakote—Hatfield Wire & Cable
Armcorp—American Research & Mfg. Corp.
Armite—Spaulding Fibre Co., Inc.
Armo-Lok—Phelps Dodge Copper Products Corp.
Armofoam—Armour Alliance Industries
Armorlokt—United States Steel Corp.
Aroclor—Monsanto Chemical Co.
Arulab—Arenberg Ultrasonic Lab., Inc.
Asco—Automatic Switch Co.
Asenco—Associated Engineering & Mfg. Corp.
Associated—Associated Testing Labs., Inc.
Astra—Lear, Inc.
Atcotrol—Automatic Timing & Controls, Inc.
Atcotronic—Automatic Timing & Controls, Inc.
Atomichron—National Co., Inc.
Atoms—Sprague Electric Co.
Atran—Goodyear Aircraft Corp.
Atronics—Atronic Products, Inc.
Atronics—General Atronics Corp.
Aubestun—Auburn Mfg. Co.
Aud-O-Gril—Parkway Specialties Co.
Audet—Centralab Electronics
Audio Baton—Blonder-Tongue Labs., Inc.
Audiodiscs—Audio Devices, Inc.
Audiofilm—Audio Devices, Inc.
Audiolator—Kay Electric Co.
Audiom—Goodman's Industries, Ltd.
Audiotape—Audio Devices, Inc.
Audiotronix—Audio Electronic Corp.
Auditection—Minneapolis-Honeywell Regulator Co.
Auditorium—Jensen Mfg. Co.
Audograph—Gray Mfg. Co.
Auricon—Bach Auricon, Inc.
Autex—Flight Research, Inc.
Auto Bell—Schulmerich Carillons, Inc.
Auto-Bender—Design Tool Corp.
Auto-Board—Design Tool Corp.
Auto-Bridge—Industrial Instruments, Inc.
Auto-Former—Design Tool Corp.
Auto Pilot—Mitchell Industries, Inc.
Auto-Set-31—Borden Chemical Co.
Auto-Solder—Design Tool Corp.
Auto-Straightener—Design Tool Corp.
Auto-Vox—Kay Electric Co.
Autocomp—Technique Associates
Autocon—Sprague Electric Co.
Autofax—Franklin Electronics, Inc.
Autograf—Moseley Co., F. L.
Autolite—Electric Autolite Co.
Autollizer—North Electric Co.
Automatic Radio—Automatic Radio Mfg. Co., Inc.
Autopositioner—Collins Radio Co.
Autopot—Daystrom-Pacific
AutoRef—Thermo Electric Co., Inc.
Autoreg—C & D Batteries
Autosonic—Powertron Ultrasonics Corp.
Autotune—Collins Radio Co.
Autowell—Southwest Products, Inc.
Autrastat—Ward-Leonard Electric Co.
Avcoat—Avco Corp.
Avcoite—Avco Corp.
Avocet—Avo Limited
Avometer—Avo Limited
Axiette—Goodman's Industries, Ltd.
Aximax—Rotron Mfg. Co., Inc.
Axiohm—Ward-Leonard Electric Co.
Ariom—Goodman's Industries, Ltd.
Axivane—Joy Mfg. Co.

—B—

B-Beads—Pilot Chemicals, Inc.
BD—Beede Electrical Instrument Co., Inc.
BFC—Franklin Co., Inc., Bernard
B-G Wipe—Barta-Griffin Co.
BH—Bentley-Harris Mfg. Co.
BPW—Bradford Components, Inc.
BT—Borden Chemical Co.
BT—Illinois Condenser Co.
BTC—Berkshire Transformer Corp.
BTR—Lord Mfg. Co.
Babycom—Fanon Electronic Industries, Inc.
Bace—Autonetics Div.
Balcap—Balco Research Labs., Inc.
Ballast—Driver Co., Wilbur B.
Ballerina—Newcomb Audio Products Co.
Banc-Lok—Boots Aircraft Nut Corp.
Bandspanner—Webster Mfg.
Bantam—Burndy Corp.
Bantam—Radex Corp.
Bantam—Small Motors, Inc.
Bantom—Aerovox Corp.
Bar-Co—Barium & Chemicals, Inc.
Barex—King Labs., Inc.
Barodyne—U.S. Science Corp.
Barohm—Ward-Leonard Electric Co.
Barratron—Litton Industries
Baseball Antenna—Antenna Specialists Co.
Bass-Superflex—Jensen Mfg. Co.
Bass-Ultraflex—Jensen Mfg. Co.
Batchmaster—Howe Scale Co.
Batchplug—Howe Scale Co.
Battery Scope—Christie Electric Co.
Bauer & Black—Kendall Co.
Beacotron—Tucor, Inc.
Beam-X—Burroughs Corp.
Beamatron—High Vacuum Equipment Corp.
Beamed Power Arrays—Telrex Labs.
Beau-Myte—Bomyte Co.
Beeco—Beemer Engineering Co.
Bel—Bel Fuse, Inc.
Belcap—Sprague Electric Co.
Belco—Radio Development & Research Corp.
Belcon—Radio Development & Research Corp.
Belimiter—Bel Fuse, Inc.
Bemac—Electric Machinery Mfg. Co.
Ben-Har—Bentley-Harris Mfg. Co.
Benchpac—Specific Products
Bend-Amatic—Schmit Engineering Co.
Benflex—Bendix Corp.
Benseal—Bendix Corp.
Beraloy—Driver Co., Wilbur B.
Berylco—Beryllium Corp.
Berylometer—Isotopes Specialties Co.
Beta—Electrovert, Inc.
Betapot—Electro Radiation, Inc.
Bexco—Burke Electric & X-Ray Co., Ltd.
Beyschlag—Wells Co., Inc., Gary
Bi-Seal Self-Bonding—Bishop Mfg. Corp.
Biflex—Altec Lansing Div.
Big Bertha Tri-Band—Telrex Labs.
Big Jack—Kay-Townes Antenna Co.
Biluxor—Par Products Corp.
Biraco—Birnbach Radio Co., Inc.
Birflene—Birnbach Radio Co., Inc.
Birflon—Birnbach Radio Co., Inc.
Birntex—Birnbach Radio Co., Inc.
Black Beauty—Sprague Electric Co.
Blak Ray—Ultra Violet Products, Inc.
Blastaire—Revcor, Inc.
Blastcorder—Geotechnical Corp.
Blu-Cap—Fansteel Metallurgical Corp.
Blu-Ohm—Bradford Components, Inc.
Blu-Red—Associated American Winding Machinery, Inc.
Blue Diamond—Pioneer Gen-E-Motor Corp.

Canseals—Cannon Electric Co.
Capadyne—Mullenbach Div.
Capaswitch—Mullenbach Div.
Capsil—General Instrument Corp.
Caralease—Ram Chemicals, Inc.
Carbofilm—Aerovox Corp.
Carbomite—Continental-Wirt Electronics Corp.
Carbomould—Aerovox Corp.
Carbon-Istors—Kidco, Inc.
Card-O-Timer—Taylor-Emmett Controls, Inc.
Cartrij-Dry—Pyramid Electric Co.
Cary—Applied Physics Corp.
Cascader—Jerrold Electronics Corp.
Cascamite—Borden Chemical Co.
Casco—Borden Chemical Co.
Castorgraf—Grafo Colloids Corp.
Cat—Caterpillar Tractor Co.
Cath-O-Phase—Mured, Inc.
Cathaloy—Superior Tube Co.
Cathedral Series—Cletron, Inc.
Cavitometer—Poole Instruments, Inc.
CeCell—Victoreen Instrument Co.
Ceco—Community Engineering Corp.
Ceco—Continental Electric Co., Inc.
Cedac—Barber-Colman Co.
Ceg-Ohm—Bradford Components, Inc.
Celab—Clark Electronic Labs.
Celoron—Continental-Diamond Fibre Corp.
Cemco—Columbus Electric Mfg. Co.
Cen-Tri-Core—Alpha Metals, Inc.
Cenco—Central Scientific Co.
Centerfind—Sheffield Corp.
Centilator—Kay Electric Co.
Centricores—Magnetic Metals Co.
Cer-Ohm—Bradford Components, Inc.
Cera-Lytic—Sprague Electric Co.
Cera-Mite—Sprague Electric Co.
CerAlloy—Ronson Metals Corp.
Ceramag—Stackpole Carbon Co.
Ceramagnet—Stackpole Carbon Co.
Ceramelex—Erie Resistor Corp.
Ceramic B—Clevite Electronic Components
Ceramicaps—Muter Div.
Ceramicon—Erie Resistor Corp.
Ceramikits—Sprague Electric Co.
CeramiKouple—Smith Mfg. Co., Inc., E. C.
Ceramistor—Gulton Industries, Inc.
Ceramo—Thermo Electric Co., Inc.
Ceratrols—CTS Corp.
Ceroc—Sprague Electric Co.
Cerod—Sprague Electric Co.
Ceron—Sprague Electric Co.
Certain Curtain—Hayes, Inc., C. I.
Cervac—Vacuum Ceramics, Inc.
Challenger—Bogen-Presto Co.
Challenger—Rek-O-Kut, Inc.
Champion—Channel Master Corp.
Change-A-Volt—Carter Motor Co.
Change-Out—Joy Mfg. Co.
Charactron—General Dynamics Electronics
Chem-Blank—United States Chemical Milling Corp.
Chemelec—Garlock Electronic Products
Chemiflex—Technicraft Co.
Chemiglas—Technicraft Co.
Cheminax—Raychem Corp.
Chemipipe—Ethylene Corp.
Chemrod—Chemfab Corp.
Chemtube—Chemfab Corp.
Chi-Tran—Chicago Standard Transformer Corp.
Chief—Plectron Corp.
Chilco—Chicago Miniature Lamp Works
ChimeAtron—Schulmerich Carillons, Inc.
Chopperette—Victory Engineering Corp.
Chromabar—Kay Electric Co.
Chromadot—Kay Electric Co.
Chromapix—Litton Industries
Chromax—Driver-Harris Co.
Chromel—Hoskins Mfg. Co.
Chromomax—Leeds & Northrup Co.
Chronistor—Bergen Labs., Inc.
Chronohm—Bendix Corp.
Chronotron—Bendix Corp.
Cinaxial—Cinaudagraph, Inc.
Cintel—Rank Cintel, Ltd.
Cir-Pak—Instant Circuits Div.
Circle B—Bristol Motors Div.
Circle Ess—Stewart Mfg. Co., F. W.
Circon—Universal Circuit Controls
Circontrol—Universal Circuit Controls
Circosonic—Circo Ultrasonic Corp.
Circuit-Pak—Raytheon Co.
Circuitester—Ultraudio Products
Circuitrace—Sams & Co., Inc., Howard W.
Circutrols—Kollsman Motor Corp.
Citi-Fone—Multi Products Co.
Citizens Broadcaster—Globe Electronics
Clamp Lock—Simmons Fastener Corp.
Clareed—Clare & Co., C. P.
Clarkstan—Pacific Tranducer Corp.
Claro—Clarostat Mfg. Co., Inc.
Classic—Carter Motor Co.
Classic—Newcomb Audio Products Co.
Classmaster—Nuclear-Chicago Corp.
Clear-Lite—Stocker & Yale, Inc.
Clearflex—Columbia Wire & Supply Co.
Clevelite—Cleveland Container Co.
Climaster—Clegg Labs.
Climatite—Triad Transformer Corp.
Clipper—Sage Electronics Corp.
Clipper—Sterling Transformer Corp.
Clorinol—Sprague Electric Co.
Co-Netic—Perfection Mica Co.
Coax-E-Ette—Topic, Inc.
Coax-O-Matic—Tennalab
Coaxitube—Precision Tube Co., Inc.
Coaxwitch—Bird Electronic Corp.
Cobanic—Driver Co., Wilbur B.
Cobenium—Driver Co., Wilbur B.
Cobreflex—University Loudspeakers, Inc.
Cobrid—Sage Labs., Inc.
Cohrlastic—Connecticut Hard Rubber Co.
Coiltenna—Electrend Products Corp.
Coldite—Stackpole Carbon Co.
Color King—Channel Master Corp.

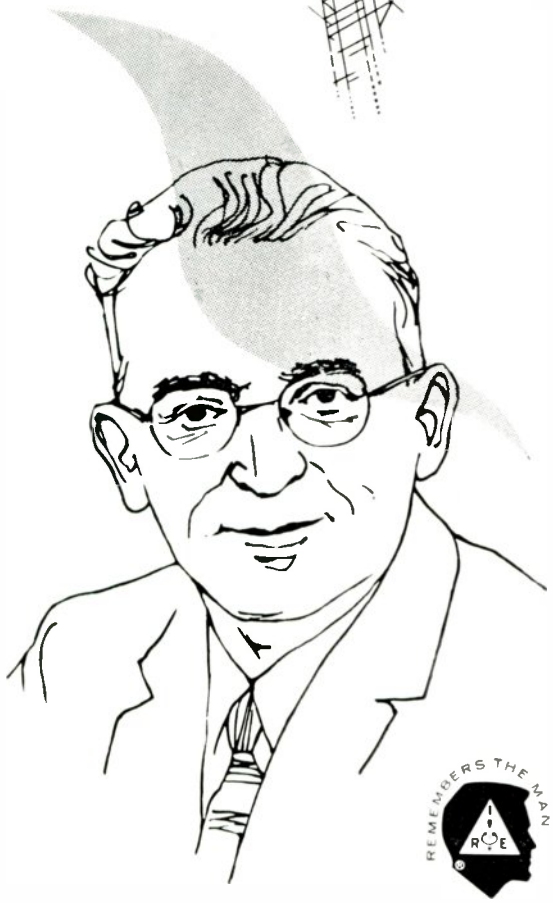
WHY CHASE GHOSTS?



That's exactly what some IRE member-engineers are doing —chasing the ghosts that haunt your TV screen. For years, they've been avidly studying what causes these ghost images, and what to do about them. Their researches have led to quiet but tangible improvements in TV equipment, including antennas, and in your final enjoyment as you watch your home screen.

Last year, outstanding contributions to the theory and technology of antennas were made by Helmut L. Brueckmann, of Fort Monmouth, N. J. The IRE proudly awards him the Harry Diamond Memorial Prize, 1961, saluting him along with countless others who are perfecting the art of radio and television.

The researches and findings of electronics engineers like Mr. Brueckmann are published each month in *Proceedings of the IRE*. Advertise your electronics product in *Proceedings*, and you make your firm a partner in this worthwhile publishing enterprise.

REMEMBERS THE MAN

Proceedings of the IRE

gives to the nation man's finest research in electronics

World Radio History

only KNIGHTS

. . . no pawns

Nobody knows, for certain, just how many electronics engineers there are. The best estimates begin with the IRE membership listing, and take it from there.

Of course, there are more electronics engineers than there are IRE members, just as there are more pawns than knights. IRE is strict about enforcing professional standards. Not just anybody can be admitted, because not every one can read Proceedings. But effective engineers promptly graduate into the IRE.

70,639 IRE members make up the bulk of *Proceedings'* 75,725 readership, at the last audited head-count. Add to this 16,235 potential engineers, all students in 4-year degree colleges, for a grand total of 91,960. (No other publication can match this, but we warn you that these figures even now are outdated!) When most electronics publications can be had free for the asking, these influential engineers *pay* for *Proceedings*—close to a million dollars a year.

They pay because *Proceedings* is what it is—the most highly technical electronics journal published anywhere. Researched, written and edited by engineers for engineers, in electronics research, design, production, development, and management. A monthly, so vital its first reading "life" is a month. Then, after being read, it is filed for future reference, months or even years after other publications have been outdated.

Mindful of the favorable editorial climate of *Proceedings*, conscious of its unchallenged editorial leadership, the great electronics firms of the world advertise in its pages. Be sure you place your message here, too; you will benefit by association.

It's your move, now!

Zyglo—Magnaflux Corp.

World Radio History

the three sides to sell in RADIO AND ELECTRONICS

The fellows who write the big orders in this business know their market. And they know that hitting that market with year-in, year-out consistency is a three-way proposition. The reason is simple. The radio and electronics engineers of America believe in and wholeheartedly support these three *Institute of Radio Engineers'* services.

Proceedings of the IRE

Here's the engineer's monthly fact sheet — with more pages, more editorial features, and more readers than any publication in its field. Over 75,000 radio-electronics engineers read *Proceedings* because they want to know what's going on and they've discovered *Proceedings* is the place to find out. It's on top of the latest developments in this fast-moving, fast-expanding field.

IRE Directory

More than 1,000 pages long, with circulation well above the 70,000 mark, this unique annual covers the radio-electronics industry from stem to stern. In the Directory you'll find a pinpointed classification of 5,500 manufacturers and 2,000 distributors of radio and electronic equipment along with the products they handle. To help you clinch the sale the *IRE Directory* lists business phone numbers. No wonder they call the *IRE Directory* the "Bluebook" of the radio-electronics industry.

Radio Engineering Show

The radio-electronics "spectacular" held annually at New York's mammoth Coliseum. Here's your personal introduction to 70,000 radio-electronics engineers—the men who use the products you sell and manufacture. They're eager to see your new equipment, to listen to your new ideas. This year, don't pass up this golden opportunity to meet them on their home grounds.

For all the details:

The Institute of Radio Engineers

ADVT. DEPT.: 72 W 45th STREET • New York 36, N. Y.
MUrray Hill 2-6606

World Radio History

28 Fields of Special Interest-

The 28 Professional Groups are listed below, together with a brief definition of each, the name of

Aerospace and Navigational Electronics

Annual fee: $3.

The application of electronics to operation and traffic control of aircraft and to navigation of all craft.

Mr. George M. Kirkpatrick, Chairman, General Electric Co., Syracuse, N.Y.

40 Transactions, *6, & *9, Vol. 1, No. 3; Vol. 2, No. 1-3; Vol 4, No. 1, 2, 3; Vol, 5, No. 2, 3, 4; Vol. 6, No. 1, 2, 4: Vol. 7, No. 1, 2, 3, 4; Vol. 8, No. 1, 2.

Antennas and Propagation

Annual fee: $6.

Technical advances in antennas and wave propagation theory and the utilization of techniques or products of this field.

Dr. Harry Fine, Chairman, Applied Propagation Branch FCC, Washington, D.C.

38 Transactions, *Vol. AP-2, No. 2; AP-4, No. 4; AP-5, No. 1-4; AP-6, No. 1, 2, 3, 4; AP-7, No. 1, 2, 3, 4; AP-8, No. 1, 2, 3, 4, 5, 6; AP-9, No. 1, 2, 3, 4, 5.

Audio

Annual fee: $2.

Technology of communication at audio frequencies and of the audio portion of radio frequency systems, including acoustic terminations, recording and reproduction.

Prof. Cyril M. Harris, Chairman, Columbia University, 632 W. 125 St., New York 27, N.Y.

60 Transactions, *Vol. AU-1, No. 6; *Vol. AU-2, No. 4; Vol. AU-3, No. 1, 3, 5; Vol. AU-4, No. 1, 5-6; Vol. AU-5, No. 1, 2, 3, 4, 5, 6; AU-6, No. 1, 2, 3, 4, 5, 6; AU-7, No. 1, 2, 3, 4, 5, 6; AU-8, No. 1, 2, 3, 4, 5, 6; AU-9, No. 1, 2, 3, 4.

Automatic Control

Annual fee: $3.

The theory and application of automatic control techniques including feedback control systems.

Mr. John M. Salzer, Chairman, 909 Berkeley St., Santa Monica, Calif.

14 Transactions, PGAC-3-4-5-6, AC-4, No. 1, 2, 3; AC-5, No. 1, 2, 4; AC-6, No. 1, 2, 3.

Bio-Medical Electronics

Annual fee: $3.

The use of electronic theory and techniques in problems of medicine and biology.

Mr. George N. Webb, Chairman, Dept. of Med. Biophysical Div., Johns Hopkins Hospital, Baltimore 5, Md.

21 Transactions, 8, 9, 11, 12; ME-6, No. 1, 2, 3, 4; ME-7, No. 2, 3, 4; BME-8, No. 1, 2, 3.

Broadcast & Television Receivers

Annual fee: $4.

The design and manufacture of broadcast and television receivers and components and activities related thereto.

Mr. Robert R. Thalner, Chairman, Sylvania Home Electronics, Batavia, N.Y.

29 Transactions, *7, 8; BTR-1, No. 1-3, BTR-2, No. 1-2-3; BTR-3, No. 1-2; BTR-4, No. 2, 3-4; BTR-5, No. 1, 2; BTR-6, No. 1, 2, 3; BTR-7, No. 1, 2.

Broadcasting

Annual fee: $2.

Broadcast transmission systems engineering, including the design and utilization of broadcast equipment.

Mr. Raymond F. Guy, Chairman, 264 Franklin St., Haworth, N.J.

20 Transactions, No. 10, 11, 12, 13, 14; BC-6, No. 1, 2, 3,; BC-7, No. 1, 2, 3

Circuit Theory

Annual fee: $4.

Design and theory of operation of circuits for use in radio and electronic equipment.

Dr. James H. Mulligan, Jr., Chairman, College of Eng., New York University, New York 53, N.Y.

31 Transactions, CT-4, No 3-4; CT-5, No. 1, 2, 3, 4; CT-6, No. 1, 2, 3, 4; CT-7, No. 2, 3, 4; CT-8, No. 1, 2.

Communications Systems

Annual fee: $2.

Radio and wire telephone, telegraph and facsimile in marine, aeronautical, radio-relay, coaxial cable and fixed station services.

Mr. Ralph L. Marks, Chairman, Rome Air Dev. Center, Griffiss AFB, N.Y.

22 Transactions, CS-5, No. 2, 3; CS-6, No. 1, 2; CS-7, No. 1, 3, 4; CS-8, No. 1, 2, 3, 4; CS-9, No. 1, 2.

Component Parts

Annual fee: $3.

The characteristics, limitation, applications, development, performance and reliability of component parts.

Mr. Floyd E. Wenger, Chairman, Headquarters ARDC, Andrews AFB, Washington 25, D.C.

24 Transactions, CP-4, No. 1, 2, 3, 4; CP-5, No. 1, 2, 3, 4; CP-6, No. 1, 2, 3, 4; CP-7, No. 1, 2, 3, 4; CP-8, No. 1, 2.

Education

Annual fee: $3.

To foster improved relations between the electronic and affiliated industries and schools, colleges, and universities.

Mr. George E. Moore, Chairman, Westinghouse Electric Corp., East Pittsburgh, Pa.

14 Transactions, Vol. E-1, No. 3, 4; E-2, No. 1, 2, 3, 4; E-3, No. 1, 2, 3, 4; E-4, No. 1, 2.

Electron Devices

Annual fee: $3.

Electron devices, including particularly electron tubes and solid state devices.

Mr. Willis A. Adcock, Chairman, Texas Instruments Co., Dallas 9, Tex.

34 Transactions, *Vol. ED-1, No. 3, 4; ED-3, No. 2, 4; ED-4, No. 2, 3, 4; ED-5, No. 2, 3, 4; ED-6, No. 1, 3; ED-7, No. 2, 3, 4; ED-8, No. 1, 2, 3, 4.

Electronic Computers

Annual fee: $4.

Design and operation of electronic computers.

Dr. A. A. Cohen, Chairman, Remington-Rand Univac, St. Paul 16, Minn.

39 Transactions, EC-6, No. 2, 3; EC-7, No. 1, 2, 3, 4; EC-8, No. 1, 2, 3, 4; EC-9, No. 1, 2, 3, 4; EC-10, No. 1, 2, 3.

Engineering Management

Annual fee: $3.

Engineering management and administration as applied to technical, industrial and educational activities in the field of electronics.

Mr. T. W. Jarmie, Chairman, Engineered Electronics, 1441 East Chestnut Ave., Santa Ana, Calif.

22 Transactions, EM-3, No. 2; EM-4, No. 1, 3, 4; EM-5, No. 1-4; EM-6, No. 1, 2, 3; EM-7, No. 1, 2, 3, 4; EM-8, No. 1, 2.

Engineering Writing and Speech

Annual fee: $3.

The promotion, study, development, and improvement of the techniques of preparation, organization, processing, editing, and delivery of any form of information in the electronic-engineering and related fields by and to individuals and groups by means of direct or derived methods of communication.

John M. Kinn, Jr., Chairman, IBM Journal, 545 Madison Ave., New York, N.Y.

9 Transactions, Vol. EWS-1, No. 2; EWS-2, No. 1, 2, 3; EWS-3, No. 1; EWS-4, No. 1, 2.

THE INSTITUTE OF RADIO

World Radio History

-IRE's 28 Professional Groups

the group chairman, and publications to date.

* Indicates publications still available

Human Factors in Electronics

Annual fee: $2.

Development and application of human factors and knowledge germane to the design of electronic equipment.

Mr. Robert R. Riesz, Chairman, Bell Tel. Labs, Murray Hill, N.J.

4 Transactions, HFE-1, No. 1, 2; HFE-2, No. 1, 2.

Industrial Electronics

Annual fee: $3.

Electronics pertaining to control, treatment and measurement, specifically, in industrial processes.

Mr. J. E. Eiselein, Chairman, RCA Victor Div., Camden, N. J.

16 Transactions, *PGIE 1, 3, 5, 6, 7, 8, 9, 10, 11; IE-7, No. 1, 2, 3; IE-8, No. 1, 2.

Information Theory

Annual fee: $4.

The theoretical and experimental aspects of information transmission, processing and utilization.

Dr. George L. Turin, Chairman, Dept. of E.E., Univ. of California, Berkeley 4, Calif.

27 Transactions, PGIT-4, IT-1, No. 3; IT-2, No. 3; IT-3, No. 1, 2, 3, 4; IT-4, No. 1, 2, 3, 4; IT-5, No. 1, 2, 3, 4; IT-6, No. 1, 3, 4, 5; IT-7, No. 1, 2, 3.

Instrumentation

Annual fee: $3.

Measurements and instrumentation utilizing electronic techniques.

Mr. Harvey W. Lance, Chairman, Natl. Bureau of Standards, Boulder, Colo.

20 Transactions, PGI-4, Vol. 1-6, No. 2, 3, 4; Vol. 1-7, No. 1, 2, Vol. 1-8, No. 1, 2; Vol. 1-9, No. 1, 2, 3; Vol. 1-10, No. 1.

Microwave Theory and Techniques

Annual fee: $3.

Microwave theory, microwave circuitry and techniques, microwave measurements and the generation and amplification of microwaves.

Mr. Tore N. Anderson, Chairman, EMT Corp., Syosett, Long Island, N.Y.

37 Transactions, MTT-4, No. 3; MTT-5, No. 3, 4; MTT-6, No. 1, 2, 3, 4; MTT-7, No. 2, 3, 4; MTT-8, No. 1, 2, 3, 4, 5, 6; MTT-9, No. 1, 2, 3, 4.

Military Electronics

Annual fee: $2.

The electronics sciences, systems, activities and services germane to the requirements of the military. Aids other Professional Groups in liaison with the military.

Mr. Willie L. Doxey, Chairman, EC Dept., USASRDL, Fort Monmouth, N.J.

13 Transactions, MIL-1, No. 1; MIL-2, No. 1; MIL-3, No. 2, 3, 4; MIL-4, No. 2-3, 4; MIL-5, No. 1, 2, 3.

Nuclear Science

Annual fee: $3.

Application of electronic techniques and devices to the nuclear field.

Mr. Louis Costrell, Chairman, N.B.S., Washington 25, D.C.

21 Transactions, NS-1, No. 1; NS-4, No. 2; NS-5, No. 1, 2, 3; NS-6, No. 1, 2, 3, 4; NS-7, No. 1, 2-3, 4; NS-8, No. 1, 2, 3.

Product Engineering & Production

Annual fee: $2.

New advances and materials applications for the improvement of production techniques, including automation techniques.

Mr. Alfred R. Gray, Chairman, Astronics of Florida, Inc., Orlando, Fla.

8 Transactions, No. 2 3, 4, 5, 6, PEP-5, No. 1, 2.

Radio Frequency Interference

Annual fee: $2.

Origin, effect, control and measurement of radio frequency interference.

Mr. Harold E. Dinger, Chairman, Naval Research Lab., Washington 25, D.C.

3 Transactions, RFI-1, No. 1, RFI-2, No. 1, RFI-3 No. 1.

Reliability and Quality Control

Annual fee: $3.

Techniques of determining and controlling the quality of electronic parts and equipment during their manufacture.

Mr. L. J. Paddison, Chairman, Sandia Corp., Sandia Base, Albuquerque, N.M.

21 Transactions, *3, 5, 10, 11, 12, 13, 14, 15, RQC-9, No. 1, 2, 3; RQC-10, No. 1, 2.

Space Electronics and Telemetry

Annual fee: $3.

The control of devices and the measurement and recording of data from a remote point by radio.

Mr. Kenneth V. Uglow, Chairman, Electro-Mechanical Research Inc., Sarasota, Fla.

19 Transactions, TRC-1, No. 2-3; TRC-2, No. 1; TRC-3, No. 2, 3; TRC-4, No. 1; SET-5, No. 1, 2, 3, 4; SET-6, No. 1, 2, 3-4; SET-7, No. 1, 2, 3.

Ultrasonics Engineering

Annual fee: $2.

Ultrasonic measurements and communications, including underwater sound, ultrasonic delay lines, and various chemical and industrial ultrasonic devices.

Dr. Vincent Salmon, Chairman, Stanford Research Inst., Menlo Park, Calif.

10 Transactions, PGUE, 5, 6, 7; UE-7, No. 1, 2; UE-8, No. 1.

Vehicular Communications

Annual fee: $3.

Communications problems in the field of land and mobile radio services, such as public safety, public utilities, railroads, commercial and transportation, etc.

Mr. Richard P. Gifford, Chairman, General Electric Co., Lynchburg, Va.

18 Transactions, 5, 8, 9, 10, 11, 12, 13; Vol. VC-9, No. 1, 2, 3; Vol.-10, No. 1, 2

World Radio History

MICROWAVE COMPONENTS

CRYSTAL VIDEO DETECTOR MOUNTS

C-Xn-Xb-X-Ku-K-Ka
frequency bands 3.95 to 40 Kmc
Min. Tangential sensitivity —50 dbm nominal in all bands with recommended crystals.

WAVEGUIDE

50 Mc to 12000 Mc
Broad Band - Octave Band - Narrow Band Tangential Sensitivity to —65 dbm depending on RF bandwidth measured at 2 Mc video bandwidth.

COAXIAL

HORN ANTENNAS

Circular Polarization
X-Ku-K-Ka frequency bands in stock—
Lower frequency horns made to order. Made of cast aluminum with plastic dirt cover over radiating end.

Linear Polarization
1 Kmc to 12 Kmc
Optimum design-Coaxial feed.
Equal E & H-plane beam widths Low VSWR over entire octave or greater bandwidth.

BROADBAND COAXIAL & WAVEGUIDE CRYSTAL SWITCHES

Switching speeds faster than 10 millimicroseconds
Frequencies 10 MC to higher than 18 KMC. Extremely small switching power required as compared to conventional switching devices. (Higher freqs. under devel.)
Insertion losses are as low as tenths of a db with isolation 60 db or higher if required.

Low VSWR (When in closed position). Also available
VOLTAGE VARIABLE ATTENUATORS CRYSTAL POWER LIMITERS

WAVEGUIDE & COAXIAL FILTERS

High Pass—Low Pass—Band Pass

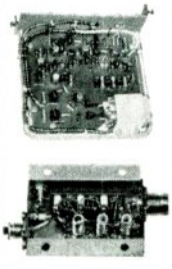
Waveguide band pass and high pass filters available from standard designs X, Ku, K and Ka bands—other waveguide and coaxial units available from existing or from special design.

BROAD BAND ANTENNAS

CONICAL HELIX • LOG PERIODIC

Frequency bands of 20:1 with one antenna.
Standard or custom band widths.
Circularly or linearly polarized.
Rigid or collapsible construction.

AEL CUSTOMIZED VIDEO & RF AMPLIFIERS



MINIATURIZED - TRANSISTORIZED
MILITARIZED

Unique transistorized Video Amplifiers feature *low noise, high gain,* and wide dynamic range.

UHF & VHF RF Preamplifiers feature *low noise* and broad bandwidth.

Send us your requirements and we will adapt one of our many existing designs or engineer a new one tailor made for your system.

For laboratory applications inquire about models 120A and 173 video amplifiers.

All built to meet military environmental requirements.

MANY OTHER MICROWAVE COMPONENTS AVAILABLE.
WRITE FOR COMPLETE CATALOGUE.

Specify GDI Telemetry

- TELEMETRY COMPONENTS
- MULTI-CHANNEL DATA ACQUISITION SYSTEMS
- DIGITAL DATA PROCESSING EQUIPMENT

GDI COMMUTATORS

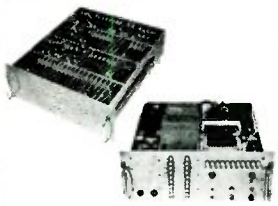
Electromechanical: Up to 5 Poles—90 Channels—20 RPS, for IRIG PAM/FM Telemetry. Electronic speed regulation available. Used on Polaris ICBM.
Solid State: Unlimited number of channels and poles. Channel sampling rate up to 75 kc. Used in Titan and Atlas Nose Cone Tests.

PAM, PDM & PCM MULTICODERS TO IRIG STANDARDS

High Level: PAM & PDM outputs for subcarrier modulation or direct recording. Qualified for Man-in-Space environments. **Low Level:** For GSE and static test work. Sampling rate; 900-2100 channels/sec on 28/43/58 or 88 channels. **High-Low Level** Hybrid models available.

SATELLITE & MISSILE FM/FM TELEMETRY COMPONENTS

FM Subcarrier Oscillator: Meet IRIG standards. Solid state, 28 VDC regulated or unregulated operation. **Carrier Oscillator:** 40% dev. for recording, sine or square wave output. **Voltage Regulators:** Feed 10 or more subcarrier oscillators. All above in 1⅝ cubic inch packages.



PCM DATA ACQUISITION SYSTEMS

Time division multiplexing with unlimited numbers of channels connected into 10 bit + sign words. Channel sampling rate up to 10 kc. Data words limited to overscale count of 1008. A to D encoder plus format logic produce digital computer formats. Std. 19 inch rack mount units. For industrial or military use.

QPT SERIES TELEMETRY TEST EQUIPMENT

For individual channel evaluation and check-out of all standard IRIG PAM/PDM formats. Wide variety of sampling rates and numbers of channels. Front panel switches permit manual channel selection. Output includes selected channels plus frame and individual channel synchronization pulses.

TYPE DAT TAPE TO TAPE TRANSLATOR

Flexible—Bidirectional! Paper to magnetic tape conversion. Handles differing input-output media and codes. **Eliminates intermediate buffer storage.** Translates any 5, 6, 7 or 8 level shifted or non-shifted codes, and a special Friden type 8 level shifted code. Reads or writes low or high density IBM-compatible tape. Reads any length record at 600 characters per second. Punches 60 characters per second.

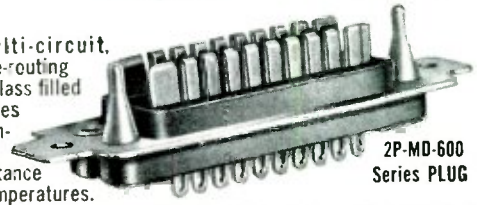
CONNECTORS

For RACK and PANEL Applications

"Reli-Acon" Paired Connectors

2P-SD-600 Series RECEPTACLE



2P-MD-600 Series PLUG

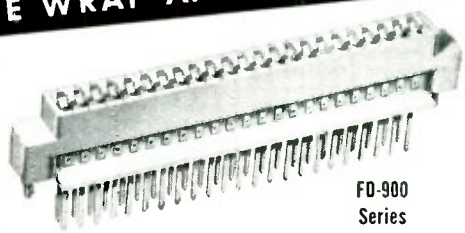
Ideal for multi-circuit, switching or re-routing applications. Glass filled "DIALL" provides excellent dimensional stability and high resistance at elevated temperatures.

Female contacts designed to provide low millivolt drop after repeated insertions and assure positive contact under extreme vibration. Contacts are of spring tempered phosphor bronze, gold-plated which will not tarnish or corrode and provide good solderability for an indefinite period.

Mounting plates are cadmium plated steel to meet the most extreme environmental conditions. Optional floating mounting grommets allow for misalignment during mating. Polarizing pins provide positive mating.

For WIRE WRAP APPLICATIONS

"Reli-Acon" Card Receptacle



FD-900 Series

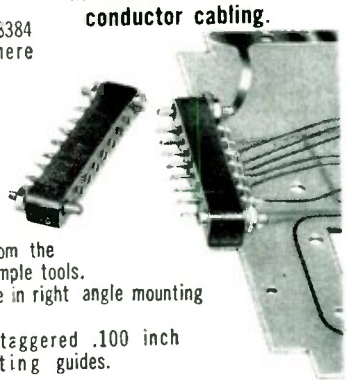
These printed circuit card receptacles meet most rigid requirements of military applications. Can be used with single or double-sided printed circuit boards. Contact terminals of the preferred wire wrap type spaced on .200 grid centers provide rapid, dependable mechanical connections through use of individual wrapping gun or programmed automatic wiring.

TWO PART PRINTED CIRCUIT CONNECTOR

Series MD-1100 and SD-1100.

Designed for aircraft, radar, and missile applications. Especially suitable for use with printed circuit boards or, Plyo-Duct, Methode's flat multi-conductor cabling.

Exceed requirements of MIL-C-8384 and NAS 713, 714, 715 where applicable.



Methode Multiple Contact Connectors are designed to alleviate difficulties which are usually common with this type of connector, using closed entry sockets which may be inserted into and removed from the connector after wiring with simple tools. The male connector is available in right angle mounting or upright style. Available with contacts on staggered .100 inch centers with polarized mating guides.

Illustrated literature and technical data are available upon request. We invite your inquiry.

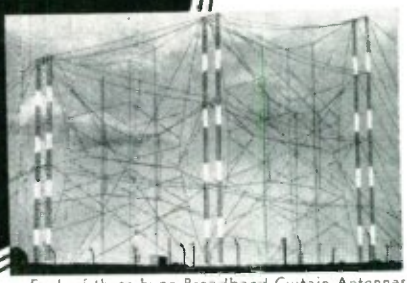
DEVELOPMENT
MANUFACTURE
INSTALLATION

TOWERS and ANTENNA SYSTEMS



Each of these huge Broadband Curtain Antennas covers a bandwidth of ± 15% of center frequency with a VSWR of less than 1.5.

ANTENNA SYSTEMS

Transmitting and receiving antennas for VLF, LF, MF, HF, VHF and UHF services.

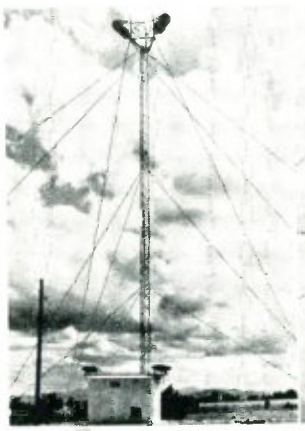
VLF and LF: FLAT-TOP, BEVERAGE, LONG WIRE, CONVENTIONAL VERTICAL RADIATOR, BROADBAND VERTICAL RADIATOR, T-ANTENNAS, L-ANTENNAS.

MF: VERTICAL RADIATORS.

HF: DIPOLE, FOLDED DIPOLE, DOUBLETS, DOUBLE DOUBLETS, RHOMBIC, TRYLON LAPORT RHOMBIC, CORNER REFLECTOR, SLEEVE, LOG PERIODIC, BROADSIDE, VEE, SLOPING VEE, VERTICAL RADIATORS.

VHF: DIPOLE, DIPOLE ARRAYS, BROADSIDE, CORNER REFLECTOR, BEDSPRING, LOG PERIODIC, CIRCULARLY POLARIZED, RHOMBIC, TRYLON-LAPORT RHOMBIC.

UHF: CIRCULARLY POLARIZED, DIPOLE, LOG PERIODIC.



One of 43 relay stations in a 1100 mile microwave link. The 100 ft. Trylon 2400 H Tower supports two reflectors. Parabolic antennas are on the equipment building.

Trylon Broadband Vertical Radiators offer extremely constant input impedance without requiring matching equipment, have power handling capacity to 150 Kw or more and excellent radiation performance. For 2-6 mc., 4.5—13.5 or similar ranges.

TOWERS and MASTS

Structural and tubular steel, stainless steel, and aluminum, guy and self-supporting towers.

TYPES: VERTICAL RADIATORS, FM AND TV ANTENNA SUPPORTS, AIRWAY BEACON, LORAN, MICROWAVE, SURVEY WORK TRIANGULATION, POWER TRANSMISSION, WIND INSTRUMENT SUPPORT, METEOROLOGICAL, etc.

ACCESSORIES

TRANSMISSION LINES, TRANSMISSION LINE SUPPORTS, ANTENNA SWITCHES, ICE INDICATORS, ANTENNA SUPPORT BRACKETS, DISSIPATION RESISTORS, WIRE AND CABLE PRODUCTS, STRAIN INSULATORS, DISSIPATION LINES, ANTENNA COUPLERS, BALUNS AND TRANSFORMERS, DUMMY LOADS.

SPECIAL SERVICES

Model antenna investigations, high voltage insulator tests and associated tower tests • ANTENNA AND TOWER RESEARCH AND DEVELOPMENT.

Write, wire or phone for further information.

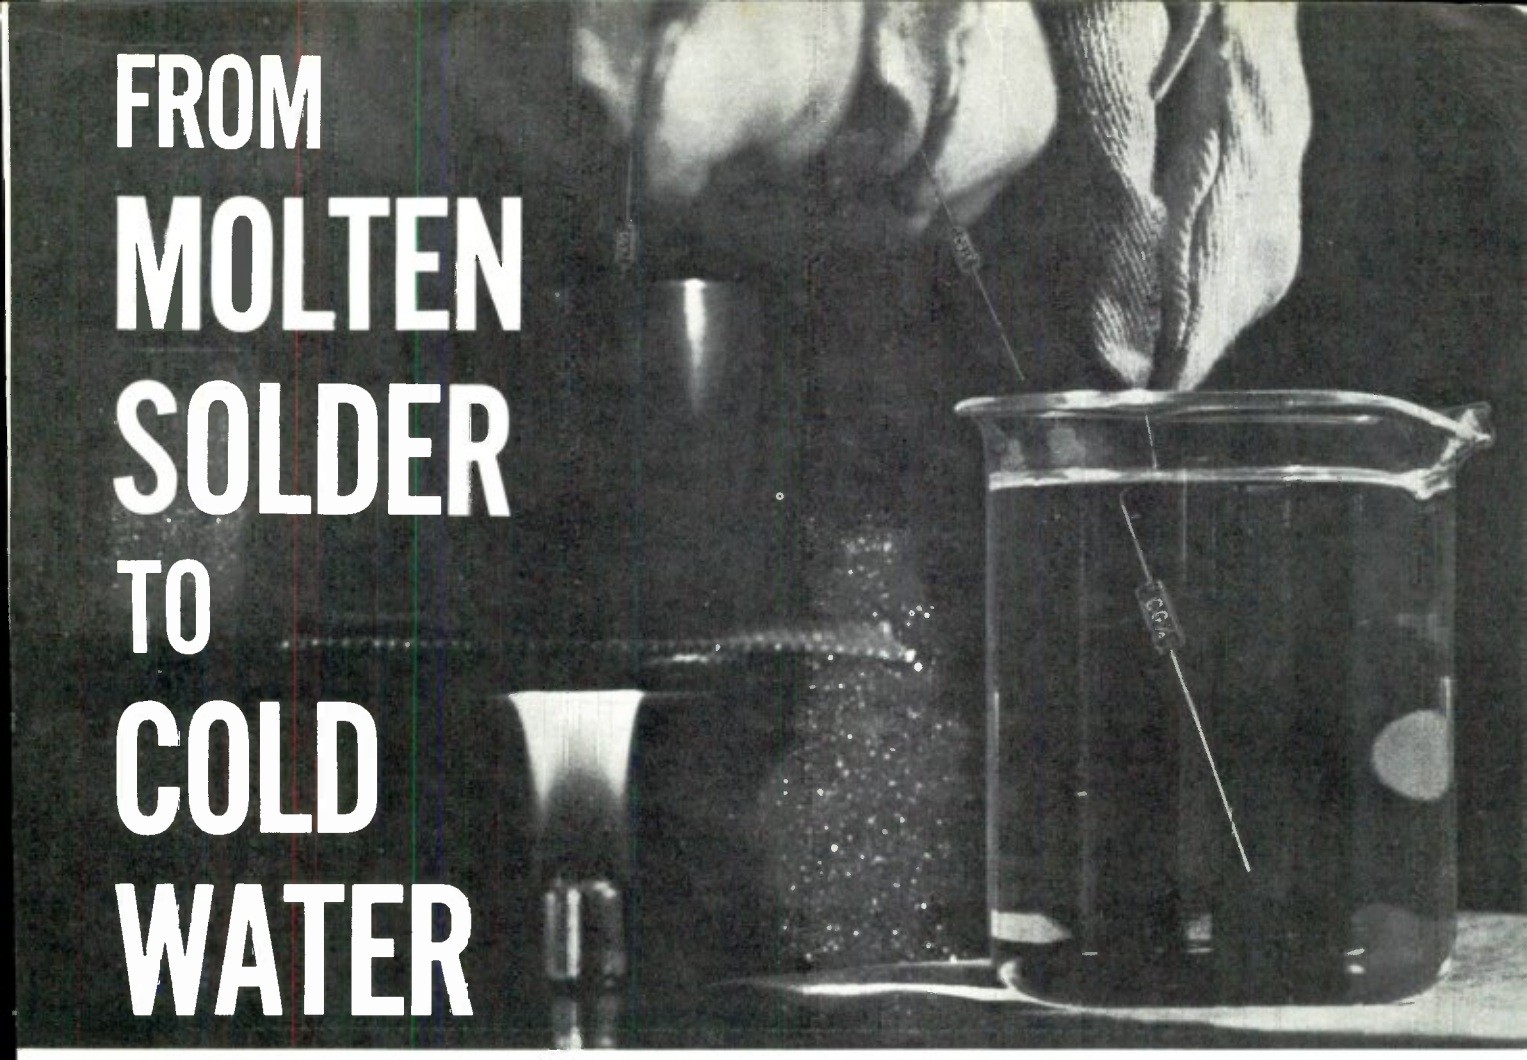
FROM MOLTEN SOLDER TO COLD WATER

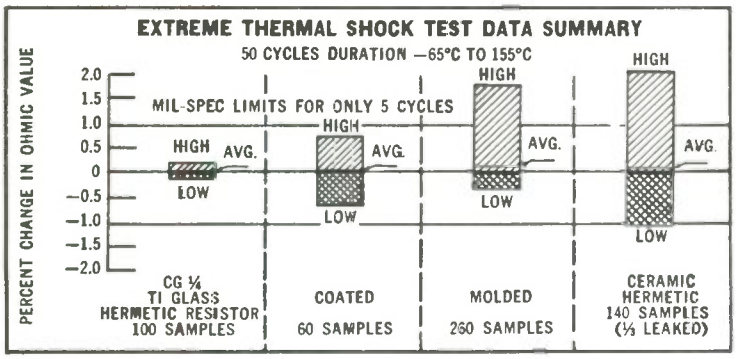


Positive Proof: TI HARD GLASS ENCAPSULATED RESISTORS Give You Unexcelled Resistance to Thermal Shock

Make this dramatic test yourself and discover why Texas Instruments *hard glass* encapsulated carbon film resistors outperform those of any other construction. First torture the resistor by immersing it in molten solder at 350°C — then quickly dip it in water. Now, test the device for electrical stability and mechanical intactness and you'll find as we have that these precision hermetic resistors are completely unaffected by violent thermal shock. Such performance is possible ONLY because TI type CG ⅛ and CG ¼ resistors are protected by a *hard* glass encapsulant and entirely *solderless* construction. These same features virtually eliminate possible damage to the resistors during installation in your assemblies.

The extreme thermal shock test is only one of many tests that have proven over the past two years that TI type CG ⅛ and CG ¼ resistors are virtually indestructible. Over eleven million unit hours of test data have been compiled on moisture resistance, thermal shock, extended overload, and load life to *prove* that TI hard glass encapsulated resistors give you reliable performance under *all* environments and operating conditions. When you specify TI CG ⅛ and CG ¼ hermetic resistors, you can be assured of getting the most rugged, reliable, precision resistors available . . . at prices you would pay for *ordinary* resistors!

Take advantage of the *proven* reliability of TI hard glass resistors . . . order them *today* through your nearby TI Sales Office or authorized TI Distributor.



SPECIFICATIONS — CG ¼ ACTUAL SIZE

TI type number	wattage rating	MIL designation	standard resistance ranges	maximum recommended voltage
—	watts	—	—	volts
CG¼	¼	RN60B	24.9Ω to 1 megΩ	350
CG⅛	⅛	None	10Ω to 100k	250

Call or write today for complete specifications on TI's CG ¼ and CG⅛ resistors, or any of TI's complete line of semiconductors and components:
silicon and germanium transistors, diodes and rectifiers, precision resistors, sensistor® silicon resistors, tan-TI-cap® tantalum capacitors.

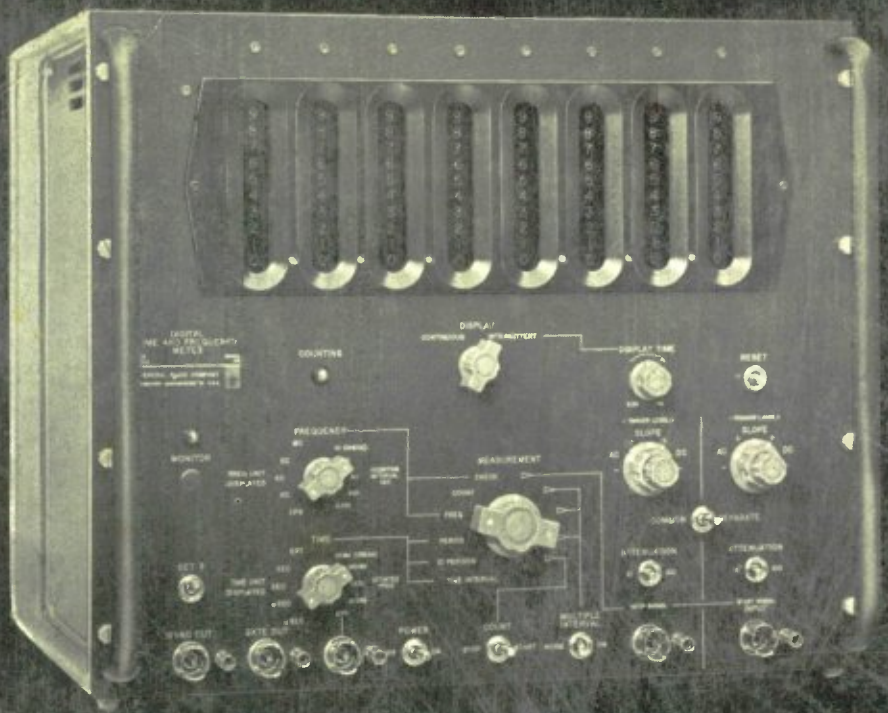
World Radio History



the Counter with a Memory

Continuous Readout to 10 Megacycles

The "memory" in this Counter constitutes an important new operating aid. Four of the instrument's eight decades are used for storage and continuous display, while the remaining four decades count continuously. At the end of each counting interval, the total accumulated by the counting decades is transferred automatically and quickly (only 100 μsec) to the storage and display decades. Continuous counting offers many advantages – information is sampled more often; frequency adjustments become easy; analog recording is greatly simplified; and operator eye fatigue induced by the dancing lights of intermittent displays is eliminated.

The Type 1130-A Digital Time and Frequency Meter is not just another counter. It embodies a number of new engineering contributions that are of fundamental importance.

This instrument is designed like a digital computer — to achieve a uniform level of high reliability throughout. "Down time", the bugaboo that robs the user of his full investment, is at a minimum.

Unsurpassed reliability is achieved by:

1. New decade codes and high-speed counting circuits, *unlike those in other counters*, that make this instrument inherently reliable.
2. Circuits designed to operate properly under the worst combination of *cumulative* tolerances imposed by tubes, component values, and voltage levels. Counter *performs properly even with tubes approaching the half-dead state.*
3. Use of proven "hard-bottoming" multivibrator dividers that make for exceptional stability — eliminate need for periodic adjustments of time-base circuits.
4. Elimination of critical voltages. Neither plate nor filament supplies are, or need be, regulated.

RANGES:
Frequency: dc to 10 Mc
Period: 10 μsec to 10^7 sec
Time Interval: 1 μsec to 10^7 sec
Also measures 10 periods, frequency ratios, phase shifts, pulse characteristics, and counts random events.

SENSITIVITY:
0.25v rms

DISPLAY
4 digits continuous; 8 digits for sequential counting and display, with display-time variable from 0.1 to 10 sec.

ACCURACY:
±1 count ± time-base oscillator stability

AVAILABLE WITH SEVERAL PLUG-IN TIME-BASE OSCILLATORS

Buy the Time-Base Stability You Need

	Complete Instrument Type - Price	Short-Term Stability Better Than	Long-Term Stability Better Than
Completely Self-Contained	1130-A4, $2,950.	1 part in 10^9 per min.	5 parts in 10^9 per week
	1130-A3, $2,670.	1 part in 10^8 per min.	2 parts in 10^7 per week
For Use from External Standards	1130-A2, $2,750.	———— Same as 1130-A3 ———— Also operates from external 100-kc, 1-Mc, and 5-Mc inputs.	
	1130-A1, $2,585.	Requires 5-Mc driving signal; G-R 1113-A 5-Mc Standard Frequency Oscillator provides stability of 1 part in 10^{10} per min, 2 parts in 10^9 per week.	

For Digital Recording

1132-A Data Printer . . . $1450.
Records 8 digits from counter plus 4 digits from clock or other source, at speeds to 3 prints per sec . . . no modification of counter is required

For Graphic Recording

1134-A Digital-to-Analog Converter . . . $595
Makes possible low-cost, ALL-ELECTRONIC graphic strip-chart recording (no data printer needed) . . . high accuracy of 0.1%

For Measurements to 500 Mc

Frequency conversion units are under development
