HELPFUL HINTS
for using the IRE DIRECTORY

A few minutes' study of the basic layout of the IRE DIRECTORY will help you to find the information for which you are looking more quickly and more accurately. At first glance, the IRE DIRECTORY may seem to be confusing, but by using the various portions of the book as listed below, you will find your way around easily, and will discover that it is actually a very simple arrangement, and a much more logical one than a purely alphabetical terminology listing.

PINK SECTION at the front of the products and firms section contains a terminology index listing every product, major and minor, for which a list of manufacturers is given. Class numbers refer you to the class in which the listings for that product occur. Following this alphabetical index is a copy of the questionnaire which is sent to the firms who have furnished us with product information. A quick look through this questionnaire will help greatly in understanding the product arrangement. At the top of this first page of the pink section is a small index referring you to the opening page of the complete-data spread section, the alphabetical directory, and each of the three product directories.

THE COMPLETE DATA SPREAD SECTION contains product advertisements of great usefulness to the reader. Most of these advertisements are two pages or more, and all of them contain complete information on the products manufactured by the advertising firms—specifications, prices, illustrations, and suggested applications.

ALPHABETICAL DIRECTORY OF MANUFACTURERS contains a list of 5508 firms representing the majority of buying and selling power in the radio-electronic industry. Each firm listing contains the complete mailing address and telephone number for the firm. Following the state name in the firm address, a list of code numbers is given. These numbers refer to the 112 major products listed in the book (for quick reference to the meaning of the codes, use the questionnaire form in the pink section). Following the telephone number is the year in which the firm was founded, the total number of employees, the number of IRE members employed, and the net radio-electronic sales during the last fiscal year.

THE THREE DIRECTORIES OF PRODUCTS ARE:

1. Complete Equipment
2. Components
3. Materials and Services

This breakdown into three directories saves you from traveling through many products in which you are not interested at the moment, and helps you to turn immediately to the listings for the type of product you want, following a straight line to your destination. Use the Machol edge index at the top of the first page of the pink section to locate immediately the first page of the appropriate directory, then use the Machol edge index at the beginning of each directory to find the specific product you want. You don't even have to know the page number—the index will find it for you automatically!

112 MAJOR PRODUCTS are listed within these three Directories. Each product listing contains a number of sub-headings so that you may know specifically what each firm makes. To interpret the code numbers shown after each firm's listing, consult the first page of that product class, where the sub-headings are defined. You will note that advertisements are positioned throughout the book in the most appropriate listing section, so that the advertisement for a relay manufacturer will appear in the relay section, to help you with further information on his product. Every advertiser's listing shows you where his advertisement may be found, and you will derive more value from this book if you consult these advertisements for facts you cannot find in the listings.

COMPLETE ADDRESS LISTINGS are given only for advertisers in the product listings. If you wish to locate the address and telephone number for any other firm, it will be necessary to use the alphabetical directory.

THE DISTRIBUTION DIRECTORY is the last section in the book. This section contains a list of 2353 manufacturers representatives, distributors and jobbers, grouped geographically.

TRADE-NAME INDEX: A list of registered & "coined" trade-names submitted to IRE by manufacturers.

ADVERTISER'S INDEX appears just inside back cover.

While extraordinary care is taken in compiling information for the IRE DIRECTORY (and making it the standard, accurate reference volume for the industry) IRE cannot accept responsibility for inadvertent mistakes or omissions.

How to Use the Machol Edge Index

High speed reference is a major objective of the IRE DIRECTORY. To this end we have adopted the Machol Edge Index system, and these indexes:

Advertisers Index, pages 874-880.

Key to Products, Pink Section.

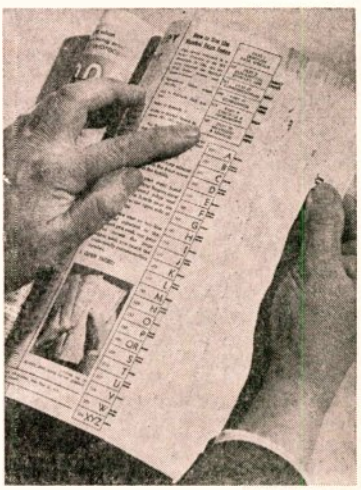
Index to Spreads, 1.

COMPLETE DATA SPREADS
ALPHABETICAL DIRECTORY
DIRECTORY I COMPLETE EQUIPMENT
DIRECTORY II COMPONENTS
DIRECTORY III MATERIALS & SERVICES
DISTRIBUTION

Detailed Machol edge indexes will be found on the first page of the alphabetical Directory and each of the three major product Directories. The Machol system will help you find both alphabetical and product sections swiftly.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the outside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!



LICENSE NO. 25H
MACHOL EDGE INDEX PATENT #2680630

1962 Edition prepared by The Advertising Department of the Institute of Radio Engineers, 72 W. 45th St., New York 36, N.Y.
William C. Copp, Mgr.; Lillian Petranek, Asst.; Carl Maier, Production; Hugh R. M. Keays, Research.

cable testers	§41
calculators, electronic	§8
calibrators, instrument	§40
calibrators, telemetering	§34
calibrators, television	§39
calibrators, time & voltage	§23
calorimeters, microwave	§37
cambric materials	§101 & §112
cambric tubing	§112
camera control equipment	§32
camera lenses, television	§32
camera recording equipment	§14
cameras, airborne	§14
cameras, bio-medical	§14
cameras, environmental	§14
cameras, instrumentation	§14
cameras, oscilloscope	§23
cameras, processing	§14
cameras, television	§32
cameras, X-Ray	§14
cans	§97
capacitance bridges	§6
capacitance decades	§12
capacitance standards	§31
capacitor sockets	§78
capacitor testers	§41
capacitors, fixed	§48
capacitors, variable	§49
capital investment services	§109
caps, tube & semiconductor	§105
carbon resistors	§74
card readers	§9
cardiac equipment	§5
carrier current equipment	§7
cases, instrument & meter	§90
cases, transit	§90
castings	§96
castings, unfinished waveguide	§66
cathode followers	§35
cathode-ray electron tubes	§86
cathode tubing	§105
cauterizing equipment	§5
cavities	§66
cells, fuel	§58
cells, load	§83
cells, standard	§31
central data systems, automatic	§8
centrifuges	§99
ceramic bobbins	§92
ceramic capacitors, fixed	§48
ceramic components	§92
ceramic cores	§55
ceramic custom fabrication	§92
ceramic electron tubes	§86
ceramic envelopes	§105

ceramic materials, insulation	§101
ceramic transducers	§83
ceramics	§92
cesium	§104
chambers, flight simulation	§2
chambers, ionization	§22
chambers, test & environmental	§36
changers, record	§68
changers, sample	§22
character generators	§9
chargers, battery	§99
charts, graphic-recorder	§28
chassis	§93
chassis, etched or screened prewired	§50
chassis, solder-dipped prewired	§50
checkout & ground-support equipment	§2
chemical analysis equipment	§40
chemical membranes	§46
chemical production controls	§4
chemicals—all types	§94
chemicals, fluorescent & luminescent	§94
chemicals, fungicidal	§94
chemicals, printed-circuit	§94
chemicals, production	§94
chemicals, semiconductor	§94
chokes—all types	§51
choppers	§53
chromatographs, radio	§22
circuit-breaker testers	§41
circuit-breakers	§80
circuit sockets	§78
circuit testers	§41
circuits—all types	§50
circuits, printed & packaged	§50
circulators	§66
citizen-band transceivers	§20
clad metals	§104
clamps	§97
clamps, tube & semiconductor	§105
clean-rooms	§90
cleaning compounds	§94
cleaning equipment, ultrasonic	§99
clips, cable	§97
clips, diode	§78
clips, miscellaneous	§97
clips, test	§62
clips, transistor	§78
clock motors	§67
clocks, computational	§10
closed-circuit cameras	§32
closed-circuit monitor equipment	§21
closed-circuit storage-reproducer units & telephone-line equipment	§26
closed-circuit studio equipment	§32
closed-circuit television equipment	§26, §32, §42
closed-circuit transmitters	§42
clutches, magnetic	§77

Product	Class No.
explosive switches	§80
extrusions, plastic	§107
eyelets	§97
—F—	
FM deviation meters	§38
fabrication, ceramic	§92
fabrication, semiconductor	§102
fabricators	§96
facsimile equipment	§15
facsimile equipment, mobile	§15
fan motors	§67
fans & blades	§47
fasteners	§97
feed-through capacitors	§48
feeds, antenna	§66
ferrimagnetic materials	§100
ferrite cores	§55
ferrite-rod antennas	§44
ferrite switches	§80
ferrites, ceramic	§92
ferroelectric materials	§101
ferromagnetic memories	§10
ferrous metals	§104
fiber-optic tubes	§86
fiber-optical equipment	§14
fiberglas materials	§101 & §112
fiberglas tubing	§112
field engineering	§96
field intensity meters, microwave	§37
field strength meters, AF	§35
field strength meters, RF	§38
fields, jack	§62
film circuits, thin	§50
film, plastic	§107
film projectors, television	§32
film resistors (precision)	§74
filter coils	§51
filter networks	§59
filters—all types	§59
filters, air	§90
filters, optical	§17
findings—all types	§97
fixed capacitors	§48
fixed resistors	§74
flame photometers	§40
flaw detectors	§40
flexible circuits	§50
flexible ducts, blower	§47
flexible-shaft couplings	§97
flight simulation	§2
flip-flops	§50
flow control equipment	§4
flowmeters, blood	§5
fluid-density meters	§40
fluid-flow control equipment	§4
fluids	§94
fluorescent chemicals	§94
fluorometers	§40
fluxes, solder	§110
flyback coils	§51
flyback transformers	§84
foam	§101
focusing coils	§51
foils	§104
footswitches	§80
forks, tuning	§31
forward-wave tubes	§86
Fourier computers	§8
fractional motors	§67
frequency converters	§53
frequency counters	§11
frequency-deviation meters, RF	§38
frequency dividers	§10
frequency indicators	§61
frequency meters, microwave	§37
frequency monitor equipment	§21
frequency shift converters & keyers	§33
frequency standards	§31
fuel cells	§58
function generators	§40
fungicidal chemicals	§94
fungus-proofing services	§109
furnaces—all types	§98
fuse holders	§60
fuses	§60
—G—	
GCA equipment	§2
gages, beta	§22
gages, ionization	§22
gages, pressure	§40
gages, strain	§40
gages, vacuum	§40
gallium	§102
gallium crystals	§56
gallium diodes	§76
gallium transistors	§76
galvanometers	§40
galvanometers, indicator	§61
galvanometers, recording (geophysical)	§16
gas analyzers	§40
gas tubes, rectifying	§87
gases	§94
gaskets	§97
gates	§50
gaussmeters	§40
gear testers	§41
gears & gear-trains	§77

lamps, neon	§63
language laboratories	§13
lapping compounds	§94
lead-handling machinery	§99
lead-handling tools	§111
lead wires	§91
leads, test	§62
leads, wire	§105
leak detectors	§40
leasing services	§109
lenses, infrared	§17
lenses, precision	§17
lenses, television camera	§32
lever switches	§80
light measuring meters	§40
light pumps	§14
light sockets	§78
light sources	§14
lighting equipment, television	§32
lighting equipment, tower	§44
lights, indicator	§63
lights, panel	§63
line tapping equipment	§4
linear amplifiers	§43
lines, microwave	§66
lint-free uniforms & gloves —pages 95, 147 &	220
liquid cooling devices	§54
liquid-level control equipment	§4
liquid-level indicators	§61
load cells	§83
loads	§66
logarithmic attenuators	§45
logic circuits	§50
logic switching assemblies	§80
loran	§18
loran, air	§2
loudspeakers—all types	§79
lubricants	§94
luminescent chemicals	§94
—M—	
machinery—all types	§99
machinery, coil-winding	§99
machinery controls	§4
machinery, electron-tube	§99
machinery, vacuum	§99
magnet coils	§51
magnet testers	§41
magnetic amplifiers	§43
magnetic-card computers	§8
magnetic clutches	§77
magnetic-core testers	§41
magnetic cores	§55
magnetic-film deposition services	§109
magnetic-recording equipment	§27
magnetic-recording storage devices	§10
magnetic-recording tape & wire	§70
magnetic shielding materials	§103
magnetic-tape testers	§41
magnets	§64
magnetizers	§99
magnetohydrodynamic generators	§58
magnetostrictive delay lines	§57
magnetostrictive transducers	§83
magnetrons	§86
marine alarm equipment	§4
marine antennas	§44
marine communications & navigation equipment	§18
marine radar equipment	§25
marker generators, microwave	§37
marker generators, RF	§38
marker generators, TV	§39
markers	§97
marking compounds	§94
marking machinery	§99
marking services	§109
masers	§43
masers, optical	§43
mass spectrometers	§40
materials, acoustic	§103
materials, ceramic	§92
materials, ferrimagnetic	§100

materials, packaging	§97
materials, plastic & synthetic §101, §107,	§112
materials, semiconductor	§102
materials, shielding	§103
materials, thermal shielding	§103
materials, thermoelectric	§104
materials, tubing	§112
measuring accessories (slotted lines)	§37
measuring equipment	§40
measuring equipment, elapsed time	§31
mechanical seals	§97
medical equipment	§5
megaphones	§30
megohmmeters	§40
memories—all types	§10
memory testers	§40
mercury batteries	§46
mercury switches	§80
mercury-vapor tubes	§87
mesh, wire	§91
metal bobbins	§97
metal detectors	§40
metal electron tubes, entertainment-type	§85
metal electron tubes, industrial-type	§86
metal oxides	§104
metal stamping & spinning	§96
metal tubing	§112
metallized coatings	§94
metals—all types	§104
metals, powdered	§104
meteorological equipment	§2
meteorological monitors	§21
meter cases	§90
meter panels	§90
meter shunts	§97
metering pumps	§99
meters, AF intermodulation	§35
meters, AF output power	§35
meters, AF phase	§35
meters, field-strength	§38
meters, grid-dip	§40
meters, impedance & admittance (RF)	§38
meters, indicating	§61
meters, interference & noise (RF)	§38
meters, light measuring	§40
meters, microwave frequency	§37
meters, noise & field intensity (microwave)	§37
meters, ohm & megohm	§40
meters, output power (RF)	§38
meters, pH	§40
meters, panel	§61
meters, phase (RF)	§38
meters, power (microwave)	§37
meters, Q	§38
meters, SWR	§37
meters, sound level	§35
meters, survey	§22
meters, watt-hour	§61
mica & glass-bonded mica	§101
micrommeters	§61
microdensitometers	§14
microfilm-readout tape readers	§9
micrometers	§40
micromodule lab-kits	§50
micromodules	§50
microphone connectors	§52
microphone stands	§65
microphones—all types	§65
microphones, geophysical	§16
microphotometers	§40
microscopes, electron	§14
microwave absorbers	§103
microwave amplifiers	§43
microwave antennas	§44
microwave attenuators	§45
microwave communications equipment	§19
microwave diodes	§76
microwave filters	§59
microwave impedance plotters	§2
microwave laboratory, mobile services	§109
microwave power supplies	§69
microwave test equipment	§37
microwave transformers	§84
microwave tubes	§86
microwave tuners	§88
milliammeters	§61
millimeter receivers	§19
millimeter signal generators	§37
millimeter tubes	§86
mirrors	§97
missile cooling devices	§54
missile equipment §1, §2, §54,	§58
missile navigation & test equipment	§2
missile panel trainers	§13
mixers, crystal	§66
mixers, microwave	§37
mobile antennas	§44
mobile communications equipment	§20
mobile facsimile equipment	§15
mobile huts & shelters	§90
mobile power supplies	§69
modulation monitor equipment	§21
modulators, microwave	§66
modulators, telemetering	§34
modules	§50
modules, high-density	§50
moisture-proofing coatings	§94
moisture-proofing services	§109
molders, plastic	§96
molding compounds	§94
molding machinery	§99
moldings, plastic	§106
molecular functional blocks	§50
molybdenum	§104
monitor equipment	§21
monoscopes	§86
motor brushes	§97
motor-generators	§67
motor-generators, servo	§77
motors—all types	§67
motors, servo	§67
mounts, crystal (microwave)	§66
mounts, lamp	§63
mounts, vibration & shock	§89
multi-testers	§41
multicoders, telemetering	§34
multiconductor cable	§91
multicouplers, telemetering	§34
multiplex equipment §26, §33, §42,	§88
multiplex receivers	§26
multiplex telegraph equipment	§33
multiplex transmitters	§42
multiplier-phototubes	§86
multipliers, computer	§10
multipliers, microwave	§66
multipliers, servo	§77
multivibrators, RF	§38
municipal photoelectric controls	§4
—N—	
nameplates	§97
navigation computers	§8
navigation equipment, aircraft—missile	§2
navigation equipment, marine	§18
neon lamps	§63
nephelometers	§40
networks, filter	§59
networks, pulse-forming	§48
networks, resistor	§74
neutralizing capacitors	§49
neutron generators	§22
noise analyzers, AF	§35
noise generators, AF	§35
noise generators, microwave	§37
noise generators, RF	§38
noise meters, microwave	§37
noise meters, RF	§38
noise-source tubes	§86
non-destructive test equipment	§40
non-destructive testers	§41
non-ferrous metals	§104
nuclear engineers	§95
nuclear equipment & instrumentation	§22
nuclear shielding materials	§103
nuclear simulation	§36
null-field dischargers	§2
null indicators	§40
numerical displays	§63
nuts	§97
—O—	
ohmmeters	§40
omni-range antennas	§44
optical-density standards	§40
optical equipment	§14
optical equipment, infrared	§17
optical filters	§17
optical inspection	§14
optical masers	§43

simulators, microwave	§37
single sideband communications equipment	§29
sinks, heat	§105
slicing machinery	§99
slides	§93
slip-ring assemblies	§52
slip-rings	§52
slotted lines & measuring accessories	§37
slow-scan television cameras	§32
smoke-nuisance control equipment	§4
sockets—all types	§78
sockets, electron tube	§78
solar batteries	§46
solar generators	§58
solar simulators	§36
solder core & fluxes	§110
solder, plain & precious-metal	§110
solder preforms	§110
solderers, ultrasonic	§111
soldering irons & guns	§111
soldering machinery	§99
solenoid coils	§51
solenoid switches	§80
solid-state circuits	§50
solid-state devices	§76
solid-state relays	§73
solid-state switches	§80
solvents, insulation	§94
solvents, production	§94
sonar equipment	§18
sonic guns	§36
sorting equipment, automatic	§4
sound-level meters	§35
sound systems	§30
sources, light	§14
sources, nuclear	§22
spacers	§105
speakers—all types	§79
special-purpose electron tubes	§86
spectrographs	§14 & §40
spectrometers	§40
spectrometers, mass	§40
spectrophosphorimeters	§14
spectrophotofluorometers	§14
spectrophotometers	§40
spectrum analyzers, AF	§35
spectrum analyzers, electro-optical	§14
spectrum analyzers, microwave	§37
spectrum analyzers, RF	§38
speech input equipment, television-studio	§32
spinning, metal	§96
spirometers	§5
splicing equipment, recording	§70
springs	§97
square-wave generators	§35
stacks, selenium	§71
stacks, silicon	§71
stamping, metal	§96
stampings, tube & semiconductor	§105
standard cells	§31
standard signals	§31
standards—all types	§31
standards, optical-density	§40
standby power	§69
stands, microphone	§65
static converters	§53
static converters, facsimile	§15
stepper switches	§80
stepping motors	§67
stepping relays	§73
stereo amplifiers	§43
stereo pickups	§68
stereo receivers	§26
stereo transmitters	§42
stereo tuners	§88
stethoscopes	§5
stimulators, bio-medical	§5
storage devices—disk, drum, tape	§10
storage devices, electrostatic	§10
storage devices, magnetic recording	§10
storage mechanisms, telemetering-data	§34
storage tubes	§86
strain gage amplifiers	§43
strain gages	§40
strain indicators	§61
strain reliefs	§97
strip-chart recorders	§28
strippers, wire	§111
strips, terminal	§81
stroboscopes	§40
stroboscopic tubes	§86
stud terminals	§81
studio equipment	§32
styli, cutting	§70
styli, playback	§68
subfractional motors	§67
submarine simulation	§18
subminiaturization services	§109
superconductive circuits	§50
superconductive cooling devices	§54
superconductive memories	§10
support equipment, aircraft—missile	§2
supports, antenna	§44
survey meters, nuclear	§22
sweep generators, AF	§35
sweep generators, microwave	§37
sweep generators, RF	§38
sweep generators, TV	§39
switch-seals	§97
switches—all types	§80
switches, microwave	§66
switching assemblies	§80
switching equipment, telegraph	§33
synchronizing generators, TV	§39
synchronous motors	§67
synchros	§67
synthetic materials	§101, §107, §112
synthetic moldings	§106

Alphabetical Index of Products

Product	Class No.
television test equipment	§39
television transmitters	§42
television tuners	§88
television, underwater	§18
tellurium & tellurides	§102
temperature control equipment, electronic	§4
temperature indicators	§61
tension devices	§111
terminal blocks & strips	§81
terminal equipment, complete	§7
terminals—all types	§81
terminations, microwave	§66
test benches	§90
test chambers	§36
test clips, jacks & leads	§62
test equipment, aircraft—missile	§2
test equipment, audio frequency	§35
test equipment, environmental	§36
test equipment, microwave	§37
test equipment, radar	§37
test equipment, radio frequency	§38
test equipment, telegraph	§35
test equipment, television	§39
test & measuring equipment	§40
test sockets	§78
testers—all types	§41
testers, gyro	§2
testing & certifying services	§109
theodolites, tracking	§14
thermal devices	§82
thermal protective equipment	§4
thermal shielding materials	§103
thermal switches	§80
thermal testers	§41
thermionic converters	§58
thermistors	§74
thermocouple reference	§82
thermocouple testers	§41
thermocouple wire	§91
thermocouples	§82
thermoelectric cooling devices	§54
thermoelectric generators	§58
thermoelectric heating equipment	§98
thermoelectric metals	§104
thermoelectric probes	§83
thermoelectric transducers	§83
thermometer resistance bridges	§6
thermometers, resistance	§82
thermopiles	§40 & §82
thermostats—all types	§82
thermowells	§82
thickness testers	§41
thin-film circuits	§50
thin-film memories	§10
thread-milling machines	§99
thyratrons	§86
time-delay generators, microwave	§37
time-delay relays	§73
time measuring equipment	§31
time standards	§31
time switches	§80
timers—all types	§61
timing control equipment	§4
timing devices, precision	10
toggle switches	80
tools—all types	§111
tools, alignment	§111
tools, brazing & welding	§111
tools, crimping & removal	§111
tools, hand	§111
toroidal coils	§51
toroidal cores	§55
toroidal transformers	§84
troque testers	§41
tower erection & maintenance services	§44
tower lighting equipment	§44
towers, amateur	§3
towers & supports	§44
tracking mounts	§2
tracking theodolites	§14
traffic-control equipment	§4
trainers, missile	§13
training aids	§13
training blocks, digital	§13
trajectory remote controls	§4
transceivers, aircraft	§1
transceivers, citizen-band	§20
transceivers, SSB	§29
transducer-calorimeters	§40
transducer probes	§83
transducer testers	§41
transducers—all types	§83
transformer testers	§41
transformers—all types	§84
transistor clips	§78
transistor materials	§102
transistor parts	§105
transistor testers	§41
transistor training-aids	§13
transistors—all types	§76
translations	§109
translators, photo to digital image	§9
translators, telemetering	§34
transmission lines	§66
transmitters, airborne	§1
transmitters, airport	§1
transmitters, amateur	§3
transmitters, broadcast	§42
transmitters, facsimile	§15
transmitters, microwave	§19
transmitters, mobile & emergency	§20
transmitters, point to point	§24
transmitters, SSB	§29
transmitters, telegraph & teleprinter	§33
transmitters, telemetering	§34
transmitting tubes	§86
transponders	§2
traveling-wave tubes	§86
trigger tubes	§86
trimmers—all types	§49
triode oscillators	§37
tripods, television-studio	§32
tube parts	§105
tube sockets	§78
tube testers	§41
tubes, entertainment-type	§85
tubes, industrial-type	§86
tubes, microwave	§86
tubes, power	§86
tubes, receiving	§85
tubes, rectifying	§87
tubes, special-purpose	§86
tubes, storage	§86
tubes, TV picture	§85
tubes, transmitting	§86
tubes, vacuum	§85 & §86
tubes, X-Ray	§86
tubing—all types	§112
tubing, cathode	§105
tubing, glass	§112
tubing, metal	§112
tubing, paper	§112
tubing, synthetic	§112
tuners—all types	§88
tungsten	§104
tuning forks	§31
tunnel-diode memories	§10
tunnel diodes	§76
turntables, television studio	§32
typers	§9

VAW meters	§35
VOR equipment	§2
VTVM's	§40
vacuum capacitors	§48
vacuum control equipment	§4
vacuum furnaces	§98
vacuum gages	§40
vacuum machinery & accessories	§99
vacuum-metallized coatings	§94
vacuum pumps	§99
vacuum switches	§80
vacuum tube machinery	§99
vacuum tube parts	§105
vacuum tube rectifiers	§87
vacuum tube sockets	§78
vacuum tube voltmeters	§40
vacuum tubes, entertainment-type	§85
vacuum tubes, industrial-type	§86
vacuum tubes, microwave	§86
vacuum tubes, power	§86
vacuum tubes, receiving	§85
vacuum tubes, special-purpose	§86
vacuum tubes, storage	§86
vacuum tubes, transmitting	§86
valves—all types	§99
varactor diodes	§76
variable capacitors	§49
variable resistors	§74
variable-speed control equipment	§4
varistors	§72
vectorscopes, color	§39
vibration analyzers & exciters	§36
vibration mounts & controls	§89
vibrator transformers	§84
vibrators	§53
video displays, aircraft	§2
video monitor equipment	§21
video recorders	§27
video-storage-tube type recorders	§27
video-sweep-integrators	§34
vidicons	§86
viscosity control equipment	§4
visual aids, educational	§13
volt-ammeters	§40
voltage converters	§53
voltage dividers	§40
voltage-dividing transformers	§84
voltage-regulating transformers	§84
voltage-regulating tubes	§86
voltage regulators	§72
voltage standards	§31
voltage testers	§41
voltmeters, AF	§35
voltmeters, digital	§40
voltmeters, indicator	§61
voltmeters, random-signal	§40
voltmeters, VTVM	§40
voltohmmeters	§40
volume-level indicators (DB & VU)	§61

—W—

Product	Class No.
wafer sorting equipment	§4
wafer testers	§41
wafers, epitaxial	§102
walkie-talkies	§20
washers	§97
water-sanitation control equipment	§4
water-treatment equipment	§99
wattmeters, absorption	§37
wattmeters & watt-hour meters, indicator	§61
waveform function generators	§40
waveguide accessories	§66
waveguide castings	§66
waveguide components	§66
waveguide windows	§66
waveguides	§66
wavemeters, microwave	§37
weighing equipment, electronic	§40
welding machinery	§99
welding services	§109
welding tools	§111
wide-range speakers	§79
wideband amplifiers	§43
wideband oscilloscopes	§23
windows, infrared	§17
windows, waveguide	§66
wire—all types	§91
wire braid & mesh	§91
wire, grid	§105
wire leads	§105
wire, magnetic-recording	§70
wire & wire-marking machinery	§99
wire strippers	§111
wires, lead	§91
wirewound resistors	§74
work benches	§90
wow & flutter analyzers	§35

—X—

Product	Class No.
X-Ray cameras	§14
X-Ray equipment, bio-medical	§5
X-Ray generators	§36
X-Ray radiography	§14
X-Ray spectrographs	§40
X-Ray tubes	§86
X-Y recorders	§28

—Y—

Product	Class No.
yokes, deflection	§51

—Z—

Product	Class No.
zener diodes	§76
zone-refining equipment	§98

World Radio History

1962 Directory Questionnaire

I. Complete Equipment—Communications, Computation, Control, Instrumentation, Test P. 227

1 Aircraft & Airport Communications Equipment 228

5. Airborne receivers
10. Airborne recorders
15. Airborne transmitters
20. Airport receivers
25. Airport transmitters
30. Beacons
35. Command receivers
40. Transceivers

2 Aircraft—Missile Navigation & Test Equipment 230

5. Altimeters
10. Autopilots
15. Checkout & ground support equip.
20. Direction finders
25. Displays, artificial & video
30. GCA equipment
35. Gyroscopes
40. Gyro testers
45. ILS equipment
50. Inertial guidance
55. Platforms
60. Simulation, flight
65. Transponders
70. VOR equipment

3 Amateur Equipment 235

5. Receiving
10. Transmitters

4 Automatic Control Equipment 236

2. Alarm & protective
4. Analog
6. Analog-Digital
8. Comparators, Go/no-go
10. Combustion & smoke-nuisance
12. Counting & sorting
14. Digital
16. Fluid flow
18. Infrared
20. Liquid level
22. Photoelectric
24. Positioning
26. Pressure
28. Production
30. Remote, electronic
32. Servo type
34. Temperature, electronic
36. Timing
38. Ultrasonic
40. Vacuum
42. Variable speed

5 Bio-Medical Equipment 245

5. Audiometers
10. Biological telemetry
15. Cardiac
20. Diathermy
25. Electrocardiographs
30. Electroencephalographs
35. Electromyographs
40. Oscilloscopes
45. Stimulators
50. Ultraviolet
55. X-Ray

6 Bridges 247

5. Capacitance
10. Impedance
15. Inductance
20. Resistance

7 Carrier Current Equipment 250

5. Complete terminal equipment
10. Repeat & relay equipment

8 Computers 251

5. Air navigation
10. Analog
15. Automatic central data systems
20. Calculators, electronic
25. Digital, general purpose
30. Digital, special purpose

9 Computer Accessories 254

5. Converters, analog to digital
10. Converters, card to tape
15. Converters, digital to analog
20. Converters, tape to card
25. Data reduction equipment
30. Display & readout devices
35. Perforators
40. Printers
45. Programming devices
50. Tape readers
55. Tape recording & playback equipment

10 Computer Subsystems 261

5. Clocks & timing devices
10. Encoders & decoders
15. Magnetic recording storage devices (disk, drum, tape)
20. Multipliers
25. Memories, ferromagnetic
30. Memories, superconductive
35. Memories, tunnel diode

11 Counters 267

5. Digital
10. Frequency
15. Mechanical
20. Preset
25. Radiation

12 Decades 270

5. Capacitance
10. Impedance
15. Inductance
20. Resistance

13 Educational Equipment 271

World Radio History

GET THIS NEW ELECTRONICS DICTIONARY FOR YOUR BOOKSHELF!

3,700 *terms officially defined, many illustrated, in IRE's authoritative reference work*

CHECK YOURSELF:

From Absolute Delay to Zoning (Stepping), there are over 3,700 electronics terms you need to be aware of . . . How many do you actually know? How many can you define? Some terms have more than one meaning; are you sure you have the right, the scientifically accurate, the IRE Standard definition?

There's no need to carry around 3,700 definitions in your head. Have them handy on your bookshelf, instead, in IRE's Dictionary of Electronics Terms and Symbols. Every term accurately defined; many illustrated by simple, grasp-at-a-glance diagrams.

Letter and graphical symbols also explained

PART I of the new Dictionary is compiled from 37 IRE Standards on electronics terms, organized and published by The Institute of Radio Engineers over an 18 year period. Each definition cites the Standard from which it was taken; where a term is used in more than one field, and has more than one meaning, each is listed under a separate entry.

PART II of this 225 page volume is a Dictionary of Symbols, made up of five IRE Standards: Letter Symbols for Electron Tubes; Letter Symbols for Semiconductor Devices; Graphical and Letter Symbols for Feedback Control Systems; Graphical Systems for Semiconductor Devices; and Graphical Symbols for Electrical Diagrams. A four-page index to graphical symbols is included.

THE INSTITUTE OF RADIO ENGINEERS
1 East 79th Street, New York 21, N. Y.

Please send me ..... copies of your complete new Dictionary of Electronics Terms and Symbols.

☐ I am an IRE member. Am enclosing $5.20 per copy.
☐ I'm not yet a member. Am enclosing $10.40 per copy.

IRE DIRECTORY

Complete Data Spreads

The full spirit of the IRE DIRECTORY is to give the reader-engineer facts in complete detail, and specific enough to be of useful service. Our advertisers have recognized this, and many have made their copy presentation full of useful specifications and illustrations.

Actually, a Directory publisher cannot hope to describe products adequately in standardized listings. Only the advertiser, using display space, and with his own intimate knowledge of his service or product, can do the job right.

The advertisers listed below have done their utmost to provide the reader with engineering data in full detail, through spreads and catalogs filed in this book for easy access and permanent reference. This can prove to be the most useful part of the 1962 IRE DIRECTORY to you.

Index to Complete Data Spreads

Bendix Corp., Eclipse-Pioneer Div.	46–47
Bendix Corp., Red Bank Div., Electron Tube Products	48–49
CTS Corporation	12
Cinch Mfg. Co.	64–65
DeMornay-Bonardi	68–69
Eitel-McCullough, Inc.	29–32
Erie Resistor Corp.	78–79
General Magnetics, Inc. (New Jersey)	42–43
Harrison Laboratories, Inc.	50–51
Hewlett-Packard Company	13–28
International Rectifier Corp.	74–75
JFD Electronics Corp.	56–57
Kay Electric Company	72–73
Keystone Carbon Company	41
Lambda Electronics Corp.	33–38
Lapp Insulator Co., Inc.	52–53
Marconi Instruments	66–67
National Semiconductor Corp.	39–40
Non-Linear Systems, Inc.	76–77
Northern Radio Co., Inc.	58–61
Ohio Semiconductors	45
Panoramic Electronics, Inc.	80
Radio Corp. of America, Semiconductor & Materials Div.	54–55
Sanborn Company	70–71
Solid State Electronics Co.	44
Superior Electric Company	2–11
Tung-Sol Electric, Inc.	62–63

Complete index of all advertisers appearing in the 1962 IRE DIRECTORY appears just inside the back cover.

POWERSTAT® *Variable Transformers*

POWERSTAT variable transformers feature excellent regulation, high efficiency, conservative ratings, zero waveform distortion and rugged construction.

POWERSTATS of the 21, 116-216, 117-217, 126-226, 136-236, LW136 and 1156C-1256C Series are also available with motor-drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel except on 4P, 4PS, 4D, 6P, 6PS, 6D and 6Y models which do not have the 5 second speed. 117-217, 126-226 and 136-236 Series units are also available with 2- or 3-wire cord-plug sets. 1156C-1256C Series types are available for requirements up to 217 KVA.

FOOTNOTES
*Rating is 2.0 amperes when mounted on a metal panel.
†Also available with open construction for back-of-panel mounting (suffix U when ordering). Prefix Q if square frame is desired instead of round frame on open construction (U type).

FOOTNOTES

§Requires also one paralleling choke type T5000.
**126-226 and 136-236 Series also available with open construction for back-of-panel mounting (suffix U when ordering).
††LW136 Series ratings are for use as low voltage isolated output transformer. Also permits connection for use as limited range transformer or as a line corrector. Full connections and ratings in Catalog F258C.
‡‡1156C and 1256C Series also available with maximum output voltage equal to line voltage (suffix L when ordering).

COMPLETE LITERATURE containing full product information, engineering data, outline drawings, connections, ratings, charts and illustrations on all standard and special use POWERSTATS is available on request. Specify whether 50/60 cycle, 400/800 cycle or complete file is desired.

FLEXIFORMER® *Packaged Transformer Primary*

"Do-it-yourself" THE TRANSFORMER

- A SOURCE OF A-C VOLTAGE
- A CURRENT TRANSFORMER
- 150 VA AND 1000 VA TYPES

TYPE TP150

A FLEXIFORMER Packaged Transformer Primary is a self-contained toroidal primary coil encased in durable high impact plastic. Colored SUPERIOR 5-WAY Binding Posts for connections are integrally mounted. When used as a source of a-c voltage, the center opening permits hand-threading the correct number of secondary winding turns to obtain the desired output voltage. When used as a current transformer, the FLEXIFORMER winding is shunted by an ammeter which indicates the current flow in a conductor hand-threaded through the center opening. Can be portable or fastened permanently

AS A SOURCE OF A-C VOLTAGE					AS A CURRENT TRANSFORMER					
NOMINAL PRIMARY VOLTS*	CYCLES	MAX. VA	VOLTS PER SECONDARY TURN	REG. AT MAX. OUTPUT	INPUT/ OUTPUT RATIO	MAX. PRIMARY AMPS.†	MAX. SECONDARY AMPS.†	ACCURACY AT 60 CYCLES	TYPE	SHIP. WT. LBS.

120	50/60	1000	0.75	10%	160/1	800	5.0	1%	TP1000	24

*Maximum 175 volts at 60 cycles, 145 volts at 50 cycles.
†Ratings for continuous duty. Double for intermittent duty but with reduced accuracy.

POWERSTAT®

Decade Line Corrector

Type DLC1005

INPUT: 120 v., 50/60 cycles, single phase
OUTPUT: 5.0 amperes maximum

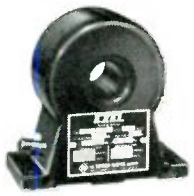
	OUTPUT RANGE		
	DIAL =1	DIAL =2	DIAL =3
LINE CORRECTOR*	90% 110%	99% 101%	99.9% 100.1%
VARIABLE LOW VOLTAGE SUPPLY*	10% 0 10%	1.0% 0 1.0%	0.1% 0 0.1%

*Percent of line voltage

Can be used as either a variable low voltage supply or as a line corrector. Essentially consists of three POWERSTAT variable transformers individually connected to three buck-boost fixed-ratio transformers. SUPERIOR 5-WAY binding posts with jumpers are provided and arranged so that outputs can be inserted in the line or removed as desired. The output voltage adjustments can be made in any combination or individually as desired.

EXEL

Loading Reactor



Type LR2

120 volts, 60 cycles
2.0 amperes at 120 volts
Inductive reactance 60 ohms
D-C resistance 4.0 ohms
Inductance 0.16 henrys

Designed to provide a convenient inductive load which can be made adjustable when used in conjunction with a POWERSTAT variable transformer. Used primarily for testing apparatus at various lagging power factors, i.e., to simulate an inductive load. Essentially consists of a gapped, strip-wound silicon steel toroid core, wire-wound and imbedded in epoxy compound. Entire assembly enclosed in a self-contained, durable, high grade phenolic case having two SUPERIOR 5-WAY binding posts for connections. At 60 cycles, the EXEL has essentially a linear current curve from 0 to nominal 2.0 amperes for continuous duty and up to 3.0 amperes for intermittent duty.

VARICELL®

adjustable
A-C/D-C Power Supply

Type V4050-3

A-C INPUT:
- 240 v., 50/60 cycles, 3-phase (Primary delta connected)
- 480 v., 50/60 cycles, 3-phase (Primary wye connected)

A-C OUTPUT:
- 0-25 v., 40 amps., 3-phase (Secondary delta connected)
- 0-50 v., 25 amps., 3-phase (Secondary wye connected)

D-C OUTPUT:
- 0-35 v., 50 amps. (Secondary delta connected)
- 0-60 v., 30 amps. (Secondary wye connected)

Provides a source of adjustable low a-c or d-c voltage from a-c power lines. Essentially consists of a 3-phase, low voltage POWERSTAT variable transformer combined with a static d-c power supply. Power supply uses highly efficient silicon rectifier cells connected for full-wave 3-phase operation. The a-c and d-c outputs cannot be simultaneously loaded or externally interconnected. The a-c output can be used either single or three-phase.

REQUEST BULLETINS AND DATA SHEETS giving complete information on STATROL magnetic amplifiers, FLEXIFORMER packaged transformer primaries, VARICELL adjustable A-C/D-C power supply, POWERSTAT decade line corrector and EXEL loading reactor.

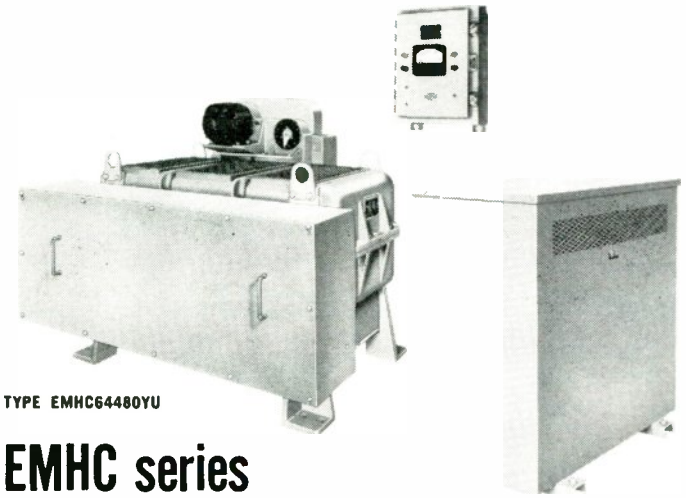
STABILINE® automatic VOLTAGE REGULATORS



TYPE EMHC64480YU

EMHC series

For heavy duty applications up to 480 KVA. Maintain a constant output voltage regardless of line or load changes. Feature zero waveform distortion, efficiency as high as 99%, rapid correction of output voltage variations, wide input range of 380-520 volts, insensitivity to magnitude and power factor of load, no effect on system power factor, full control circuit protection. Patented re-entry rings and helical coils on H-C Series POWERSTAT Variable Transformer component permit extremely fine, stepless voltage adjustment with very low voltage drop.

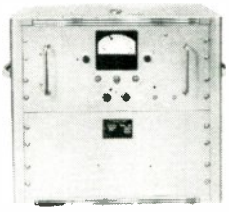
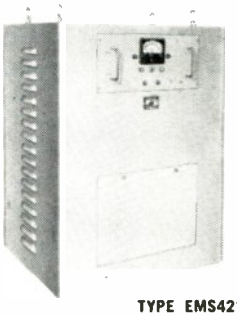
			600	480	.28	EMHC64480YU

EMT series

Electro Mechanical Transistorized types in ratings from 2 to 100 KVA. Control circuit is completely transistorized. Speed of response sufficiently fast for most applications.



TYPE EMT4115



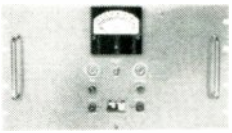
TYPE EMS42100

EMS series

Electro Mechanical Transistorized types for single or three phase duty with ratings from 25 to 275 KVA. Several types available with individual line control for greater application flexibility.

EMK series

Electro Mechanical high speed, high accuracy assemblies in ratings of 2.5/5.0 KVA. Accuracy ±1.0% of nominal output voltage.



TYPE EMK4105R

STABILINE® automatic VOLTAGE REGULATORS

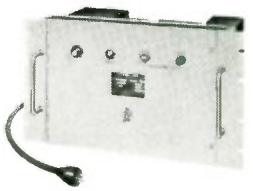
IE series

Instantaneous Electronic types have no moving parts. Hold output voltage to within ±0.1% for wide line variations, within ±0.15% for any load current change or power factor change from .5 lagging to unity.

TYPE IE5101

TM series

Tubeless Magnetic types have no tubes, transistors or moving parts. Response time for ordinary line and/or load changes is within ½ second; accuracy is within a 1.0 volt bandwidth. Waveform distortion is 4% or less.

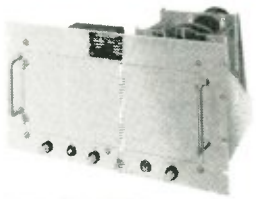


TYPE TM7101R

TYPE IET51002

IET series

Instantaneous Electronic Transistorized types in ratings from 0.25 to 1.0 KVA. Output voltage remains within a 0.5 volt bandwidth for any and all variations in line voltage, load current and load power factor.



TYPE EM4108MCR

MILITARIZED

1.0 KVA Instantaneous Electronic and 8.0 KVA Electro Mechanical types meet requirements of specification MIL-E-4158B. All fit standard 19" relay rack.

MR series

Provide the constant RMS voltage required to maintain proper tube filament temperature. Response time will not exceed 0.6 second under most adverse line or load changes.

TYPE MR6F015

400 CYCLE

Instantaneous Electronic types in ratings of 1.0 and 5.0 KVA. Maximum waveform distortion is 3.5% under all input line and most load conditions. Other 400 cycle types listed under MR Series and Militarized types.

TYPE IEH5101R

SLO-SYN® *Synchronous Motors*

- **INSTANT STARTING, STOPPING, REVERSING**
- **72 RPM SHAFT SPEED WITHOUT GEARS**
- **CAN BE USED AS D-C STEPPING MOTORS**
- **START AT FULL RATED TORQUE**

A SLO-SYN Synchronous Motor is a permanent magnet type a-c motor having instant start, stop and reverse characteristics and a basic shaft speed of 72 RPM with 60 cycles applied. Adaptable for use as a d-c stepping motor or incremental positioning device that can be stepped 200 times per revolution of the motor shaft. Compact and economical, has almost negligible overshoot, no ratchets or detents. A single-pole, three-position switch can give complete forward, reverse and "off" control because the motor has three leads only. Starts or stops in less than 0.025 second or approximately 1.5 cycles. No need for mechanical or electrical braking; stops in less than 5° of motor shaft rotation. Starting and operating currents are nearly identical; no excessive inrush current when motor is turned on. All types have lubricated-for-life bearings.

50 OZ-IN

TYPES SS50 AND SS50M

Well-suited for limited space applications, actuating selector switches, tape handling, process timing. Militarized type SS50M meets or exceeds applicable military specifications. Planetary gear types available.

150 AND 250 OZ-IN

TYPES SS150, SS152, SS150M, SS250 AND SS252

Types SS150 and SS152 can be ordered with resistor and capacitor integrally mounted in an enclosure on the end of the motor (suffix RC when ordering). Militarized type SS150M meets or exceeds applicable military specifications. Planetary gear types available.

250 OZ-IN

TYPE X250

Explosion-proof. Underwriters' Laboratories Approved for Class 1, Group D service. Provides safe operation in areas where a small arc or spark could cause an explosion.

1000 OZ-IN

TYPE X1000

Explosion-proof. Built to conform with Class 1, Group D specifications. Ideally suited for "on-off" a-c servo duty and heavy duty applications.

†For 60 cycle operation only.

PLANETARY GEAR TYPES

Standard types having specially-designed planetary gear assemblies are available. The speed reduction assembly is completely enclosed in a dust proof housing mounted on the shaft end of the motor. The load is evenly distributed over three nylon gears thereby reducing the possibility of tooth damage. The self-lubricated nylon gears provide quiet operation and long life. The planetary gear shaft is ball bearing mounted. When ordering, the basic type number must be suffixed with the desired planetary gear assembly number. For example, type SS50-P1.

SLO-SYN® *Translator*

SLO-SYN Translator type ST-150 is a pulse-to-step converter designed for use with bifilar SLO-SYN Synchronous Motor types SS50-1009 and SS150-1010. It converts low-level signal pulses or square waves into the correct switching sequence needed to drive the SLO-SYN motor at 200 discrete steps per revolution. Internal power supply allows alternate operation from an external shorting switch if desired. Power input is 120 volts a-c, 0.5 ampere. SLO-SYN Translators are used in programmed positioning, remote positioning, indexing and indicating applications.

TYPE ST-150

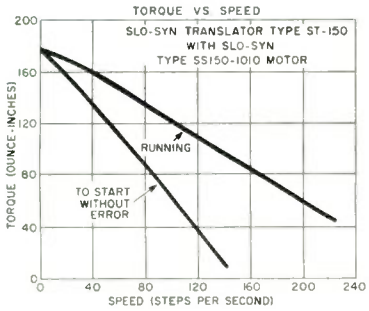

FIGURE 1

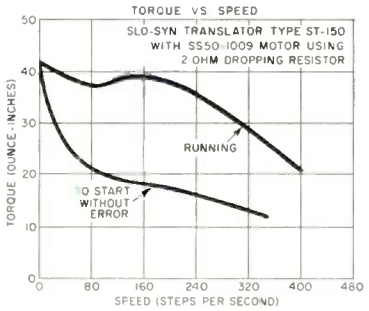

FIGURE 2

Figure 1 shows the torque vs. speed characteristics of a SLO-SYN Synchronous Motor type SS150-1010 operating with a SLO-SYN translator type ST-150. Figure 2 shows the characteristics when used with a type SS50-1009 motor (a 2 ohm ±5%, 25 watt minimum dropping resistor is required).

SS150 AND SS250 TYPES

Bifilar and Four-Lead

BIFILAR SLO-SYN Synchronous Motors are used for d-c stepping applications where the use of push-pull circuitry and a center-tapped power supply is not possible or where increased torque at high stepping speeds is required.

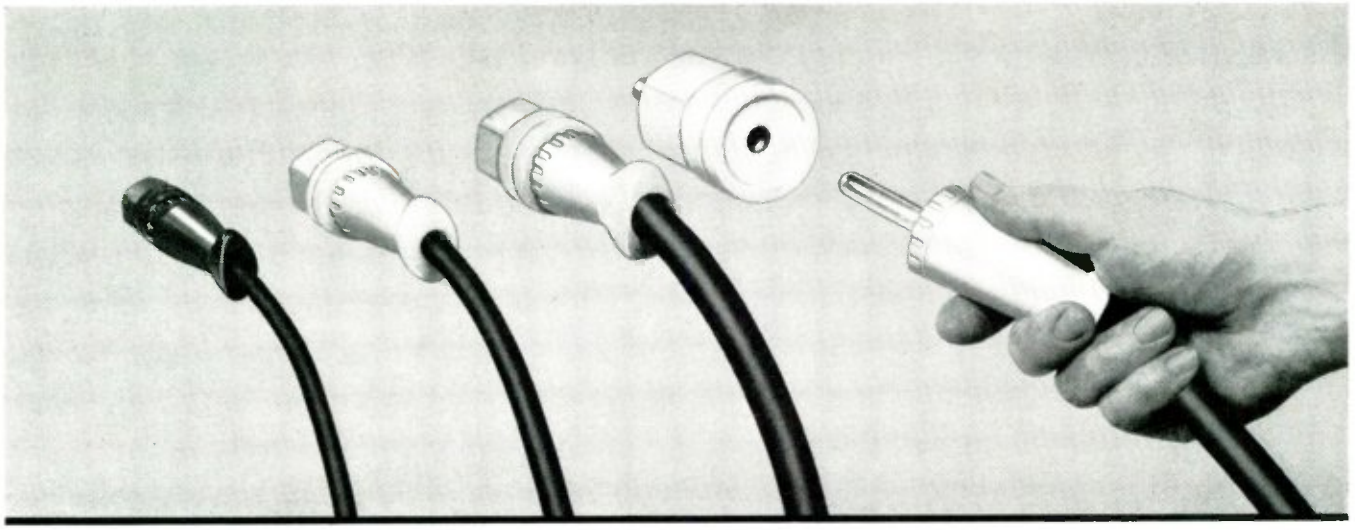
SUPERCON® *Electrical Connectors*



Current carrying parts gold-plated ● Simplified, quick assembly

Socket and pin types of single conductor plugs and receptacles are offered. Plugs have a functionally designed grip for handling ease and convenience. Wiring connection to the same plug can be either soldered or solderless. Two cable-fastening screws are provided which permit a range of cable sizes to be accommodated by the plug. All socket plug grips and 25 and 250 ampere pin plug grips are of a simple, two-piece threaded construction for quick assembly. The 50 and 100 ampere pin plugs are assembled by a single nut after cable connection. All plastic parts of a receptacle are molded of the same color nylon to permit more rapid and accurate circuit identification on both the front and back of the panel when installed. Six colors are available.

SUPERIOR 5-WAY® *Binding Posts*

● 5 WAYS TO CONNECT ● GOLD-PLATED BRASS PARTS ● RANGE OF COLORS

Fluted Nut With **LEXAN*** Polycarbonate Resin

These are the *original* SUPERIOR 5-WAY Binding Posts in a new functionally styled design. They combine the long life, stable electrical contact, corrosion resistant, fast soldering characteristics of gold-plated brass with those of Lexan polycarbonate resin: low loss and power factor, high voltage insulation, superior heat resistance, non-sink dimensional stability, non-corrosiveness. The selection of six attractive colors and five ways to connect – plus the solder tip – provides wider use flexibility. Rated for a current capacity of 30 amperes and a working voltage of 1000 volts. Can be mounted in a single keyed or nonkeyed ½" hole in panels from 1/16" to ¼" thick. Fluted types with nickel-plated brass parts are available on special order.

*Lexan is the General Electric Company trademark for its polycarbonate resin.

exact duplication
PRODUCES TOTAL RELIABILITY

Infinitesimal Mechanical Variation due to *Exclusive* Automation Processes

plus *Exclusive* Glass Alkyd Molded Permanence

plus *Exclusive* Full Silver Coverage on Contact Surface

equals **NEW CTS NON-DRIFT COMPACT SELECTOR SWITCHES**

Formerly manufactured by Trolex Corporation, now a part of CTS. 1¼" diameter 12-position indexed rotary switches are designed primarily for low power exacting military and commercial RF, VHF and UHF circuit applications. Series 212 surpasses MIL standards.

UNPRECEDENTED SWITCH UNIFORMITY FROM ENTIRELY NEW AUTOMATED MANUFACTURING CONCEPT

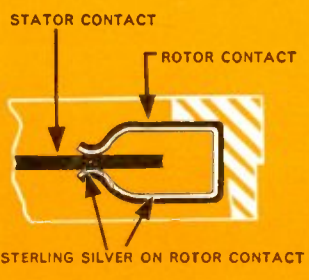
- Drift virtually eliminated by molding terminals into exact, immovable, permanent position in stator, entirely by machine . . . making all switches identical in each production run. Machine exactitude replaces human error and variations, eliminating the wider tolerances characteristic of hand assembly.
- Delicate switch parts are not exposed to breakage; many parts are not even handled.
- Superior insulation due to repetitive exactness in terminal spacing and molded glass alkyd material.
- Heat from soldering cannot loosen terminals.
- Natural design barrier prevents solder from flowing into circuit elements during soldering.

SAFER, QUICKER, EASIER HANDLING IN YOUR PRODUCTION LINE

Molded glass alkyd stator won't break or crush during ordinary handling or if accidentally dropped. Terminals cannot be dislodged or moved. Both stationary and movable contacts are enclosed for additional safety and handling convenience.

LONGER LIFE CONTACTS

- After 1,200,000 index operations, life tests reveal virtually no change in rotor contact resistance.
- 1000% *more* silver than used by most commercial switches has been *evenly* applied at actual point of contact by exclusive process. (See Sketch). Optional solid sterling silver contacts and stator available for additional contact performance.
- Rotor contacts are double-wiping and self-cleaning.
- Stator contacts are integral with terminals.



NOW! NEWLY TOOLED CLUSTER AND 3-FINGER CONTACTS

Offered for numerous additional circuits not previously available. Tremendous range of options meet most requirements without special tooling.

OTHER FEATURES

- Series 212 is available in numerous combinations with CTS variable resistors and power snap switches.
- Condensed assembly. Wafers can be stacked adjacent to each other. No spacers required.
- Non-toxic combustion fumes—an important advantage in submarine or similar closed space applications.
- Exclusive balanced detent mechanism has 2 dissimilar detent forms for definite feel and long pull in.
- New balanced lever arm and star wheel detent assembly free from end and side thrust for extremely long life and accurately controlled torque. Optional at extra cost.

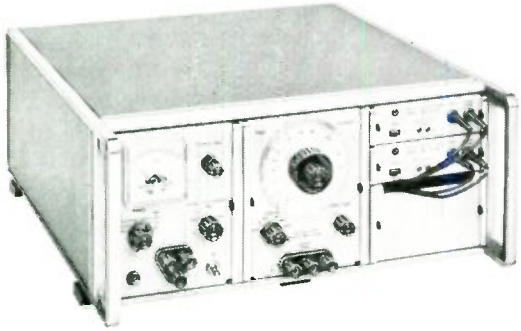
HEWLETT-PACKARD COMPANY
PALO ALTO, CALIFORNIA

New—and only from hp

Space-saving, ultra-convenient Universal Modular Instruments



Stack 'em up on your bench, rack 'em in a system, use singly, or rack mount with new pressure-actuated tilt slides.

Depending on the instruments' basic configuration, you can mount them in modules of one, two or three per rack width, or stack and nest them neatly on your bench.

Now the ultimate in physical convenience and versatility is mated with traditional hp accuracy, dependability and long service life.

Many new hp instruments in this catalog are offered in this remarkable packaging. Other instruments now in development will also use it.

Here's a real saving of bench or rack space, plus the pleasure of light weight and easy access.

Complete coverage — easy-to-use, versatile

185B with 187B

DC to 1,000 MC

- Measuring ease for nanosecond region
- Bright, clear 5" scope trace, even at low repetition rates
- Less than 0.4 nanosecond rise time

Here's fatigue-free viewing of repetitive short pulses requiring a bandwidth up to 1,000 MC. With the hp 185B Sampling Oscilloscope, the 3 db point is beyond 800 MC, rise time less than 0.4 nsec. hp 187B Dual Trace Amplifier permits comparison of two high-speed phenomena simultaneously for highly accurate time measurements. Vertical sensitivity 10 mv/cm to 200 mv/cm, vernier to 3 mv/cm. Dynamic range, 3 mv to 2 v peak. 100,000 ohm probes minimize circuit loading. Horizontal sweep 0.1 nsec/cm (with expander) to 10 μsec/cm. Delayed sync pulse available on front panel for triggering circuits under test. X-Y recorder output, time and amplitude calibrators, beam finder. hp 185B, $2,300.00; hp 187B, $1,000.00.

hp 185B Oscilloscope Accessories for Maximum Flexibility

hp 185A-76A

hp 187B-76E

hp 187A-76B

hp 187A-76D

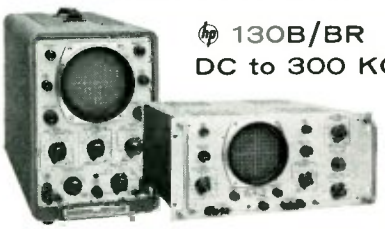
hp AC-16V

hp 185A-21F

hp 187A-76C

Overall versatility of the 185B Oscilloscope and 187B Dual Trace Amplifier is increased with a wide variety of accessories. In addition to the 185A-21A Sync Probe furnished with the scope, 4 divider probes are available: 185A-21C, D, E and F have division ratios (when terminated by 50 ohms) of 5, 10, 50 and 100 to 1 respectively, $40.00 each. Two hp 187A-76A BNC adapters are furnished with the 187B, permit connection to BNC fittings, $8.00 each additional adapter. hp 187A-76B Type N connector is a straight-through connection, $10.00. hp 187A-76C 10:1 Divider, permits viewing of signals as large as 20 v peak-to-peak, $40.00. hp 187A-76D Blocking Capacitor permits observation of signals ± 600 v from ground, $3.50. hp 187B-76E 50-ohm T connector permits scope probe to monitor signal on a 50-ohm transmission line, may be used to terminate the line in its characteristic impedance while observing the signal with the scope, $35.00. hp AC-16V Delay Line, $200.00, bandpass 1 GC, delay 120 ns, and hp 185A-76A Sync Take-off, $50.00, permits 185B scope to be synchronized from signal to be viewed. hp 908A 50-ohm Coaxial Termination, SWR 1.05 or less, dc to 4,000 MC. $35.00.

Or Meet Your Requirements With These Other



hp 130B/BR
DC to 300 KC

hp 130B/BR combine big scope performance with 1 mv sensitivity and the convenience of "universal" automatic trigger. Models 130B/BR have similar horizontal and vertical amplifiers with sensitivity 1 mv/cm to 125 v/cm. Input circuits balanced on 6 most sensitive ranges; sweeps 1 μsec/cm to 12.5 sec/cm, triggers from signal, line or external voltage. Includes x5 magnifier for all internal sweeps increasing fastest sweep time to 0.2 μsec/cm. hp 130B (cabinet) or 130BR (rack) $650.00.

hp 122A/AR
Dual Trace

Model 122A/AR is a dual trace, 200 KC oscilloscope providing two separate traces for simultaneous study; single trace when desired. Twin vertical amplifiers, alternate and chopped presentation, differential input, automatic syncing and x5 sweep expansion. 15 calibrated sweeps; vernier extends slow sweep to 0.5 sec/cm, expander extends fast sweep to 1 μsec/cm. Sensitivity 10 mv/cm to 100 v/cm. Horizontal amplifier sensitivity 0.1 v/cm to 100 v/cm. hp 122A (cabinet) or 122AR (rack mount), $675.00.

hp 120A/AR
DC to 200 KC

Ideal for industrial or production line work as well as daily lab jobs, Model 120A/AR has the hp universal trigger circuit, 15 calibrated sweeps in 1-2-5 sequence, sweep speeds 5 μsec/cm to 0.5 sec/cm, "times-5" sweep expansion on all ranges, high sensitivity calibrated vertical amplifier. Compact Model 120AR is only 7" high. Utmost dependability, rugged construction. hp 120A (cabinet) or 120AR (rack). $450.00.

"BIG SCREEN" oscilloscopes, DC to 1,000 MC

170A with 162A, 166A plug-ins

DC to 15 MC; DC to 30 MC

- Militarized for rugged dependability
- Dual plug-in versatility
- Conventional controls for ease of operation

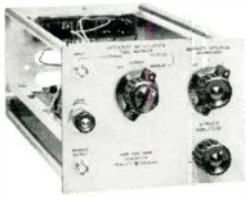
hp 160B, dc to 15 MC, and hp 170A, dc to 30 MC, are militarized oscilloscopes offering rugged dependability under a wide range of environmental conditions. Dual plug-in system increases their versatility, yet saves you from buying instrumentation you do not need. Conventional controls insure ease of operation. Premium components, careful design and construction guided by exacting MIL specifications assure long life. 24 calibrated sweep times, 0.1 μsec/cm to 5 sec/cm, ±3% accuracy. 7 step magnifier increases fastest sweep to 0.02 μsec/cm. Internal, line voltage or external trigger, horizontal sensitivity 0.1 v/cm to 10 v/cm; vernier to 25 v/cm. hp 160B, $1,850.00 (cabinet or rack mount); hp 170A, $2,150.00 (cabinet or rack mount). Vertical plug-in required.

Multi-Purpose Plug-in Versatility for Your 160B/170A Scopes

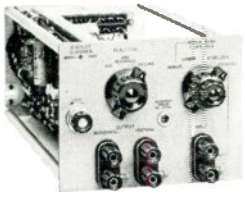
hp 162A Dual Trace Amplifier permits viewing two phenomena simultaneously. Sensitivity to 20 mv/cm. Offers differential input for common mode rejection. $350.00.

hp 162D High Gain Amplifier provides 5 mv/cm sensitivity with differential input for high common mode rejection. $225.00.

hp 162F Fast Rise Preamplifier offers 12 nsec rise time and dc to 30 MC bandpass (3 db points) with 170A, 23 nsec rise time and dc to 15 MC bandpass with 160B. Sensitivity, 50 mv/cm. $145.00.



hp 166B Time Mark Generator permits easy time measurements by providing intensity modulated time markers on 160B/170A scope trace. Range, 10 μsec, 1 μsec, and 0.1 μsec intervals, accuracy ± 0.5%. $130.00.



hp 166C Display Scanner provides output to duplicate on X-Y recorder any repetitive wave appearing on 160B/170A CRT trace. Resolution with permanent records higher than CRT or a photograph. $300.00.

hp 166D Sweep Delay Generator allows you to make detailed examinations of complex signals or pulse trains. Permits viewing expanded waveform segment while still retaining presentation of earlier portions of the waveform. Delay time 1 μsec to 10 sec; delaying sweep, 2 μsec/cm to 1 sec/cm in 1, 2, 5 and 10 sequence, 18 calibrated ranges. Delayed length, 0 to 10 cm. $325.00.

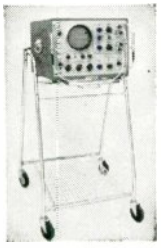
Bench-Proven hp Oscilloscopes, Accessories

hp 150A DC to 10 MC

The hp 150A Oscilloscope offers sweep rate 0.02 μsec/cm to 15 sec/cm, 24 sweeps 0.1 μsec/cm to 5 sec/cm, 3% accuracy. Sweep magnifier, vernier, internal, line voltage or external triggering, $1,300.00. Plug-in accessories, which vastly increase the versatility of this scope include; hp 151B High Gain Amplifier, 5 mv/cm, dc to 10 mc, $200.00; hp 152B Dual Trace Amplifier, dc to 10 mc, $250.00; hp 153A High Gain Differential Amplifier, 1 mv/cm, $150.00; hp 154A Voltage/Current Amplifier, 5 mv/cm, 1 ma/cm, $430.00. Plug-in required.

hp 196A Oscilloscope Camera

This, the most convenient recording camera available, views full 10 cm graticule width, provides object-to-image size ratio 1 to 0.9 (1:1 optional). One-hand mounting, multiple picture setting, *f*-stop and shutter easily accessible while camera is mounted. Permits viewing image with both eyes while photographing. Uses Polaroid® Land Camera back. Wollensak 3" *f*/1.9 lens. 7 shutter speeds 1/100 to 1 sec. 9 lbs. $440.00.



hp AC-115B Oscilloscope Testmobile for hp scopes. 4" rubber tired wheels, heavy chrome tube construction, tilts scope to 30° in 7½° increments, folds for storage, shipping. $85.00.

hp AC-21 series probes available for use with hp scopes include AC-21A, 10:1 division, $30.00; AC-21C, 50:1 division, $30.00; hp AC-21F Current Probe, 1 mv/ma, $100.00; hp AC-21J Low Frequency Probe, $9.00.

World Radio History

Oscillators – 0.008 to 10,000,000 cps

Hewlett-Packard now offers 13 high quality, fast and accurate oscillators, each an exceptional value and each engineered to do a specific job best. Each incorporates the famous resistance-capacity circuit pioneered by hp. This circuit makes possible instruments that are highly stable, wide range, compact and portable; instruments that are extremely simple to operate and require no tedious re-setting or adjustment during operation.

Instrument	Primary Uses	Frequency Range	Output	Price
-hp- 200AB	Audio tests	20 cps to 40 KC	1 watt/24.5 v	$165.00
-hp- 200CD	Subsonic through ultrasonic audio and ultrasonic tests	5 cps to 600 KC	160 mw or 10 v/600 ohms; 20 v open circuit	195.00

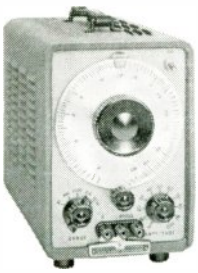
NEW! hp 204B Portable Oscillator

Use it on the bench — carry it *anywhere!* This new portable oscillator is fully transistorized, battery or optional AC operation. Internal heat is small; warmup drift is negligible. Output is fully floating, isolated from both power line ground and chassis. Balanced and unbalanced loads, and loads referenced either above or below ground, can be driven by this versatile oscillator. Low impedance circuits drive the 600 ohm output, effectively isolating the oscillator stage; 204B maintains excellent frequency stability even with rapidly changing loads. Output is flat within ± 3% at all settings of dial and range switch. Designed in the new hp instrument module packaging. AC operation optional at extra cost. hp 204B, with batteries, $275.00.

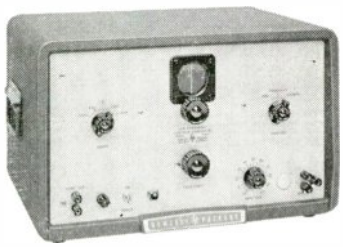
hp 200CD Audio Oscillator

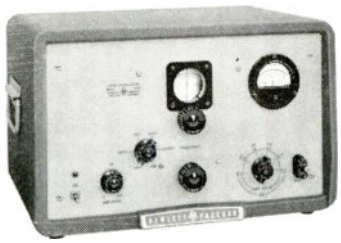


This wide range oscillator, 5 cps to 600 KC, spans the range from sub-sonic to radio frequencies, covered in five overlapping decade bands. Accurate frequency setting on the large easy-to-read dial is provided by 85 dial divisions. Distortion rating is less than 0.5% below 500 KC. Output waveform purity is independent of load. hp 200 CD, $195.00.

hp 200AB Audio Oscillator

Useful for audio tests, the versatile hp 200AB Oscillator covers its range, 20 cps to 40 KC, in four overlapping bands. Like the hp 200CD it has highest stability and accurate tuning circuits. Low impedance operating levels plus superior insulation guarantee long years of trouble-free dependability. Operation is simple; just three controls; no zero setting necessary. hp 200AB, $165.00.





hp 202A Function Generator

Multi-purpose source of transient-free test voltages from 0.008 cps to 1,200 cps. Continuously variable through 5 bands; offers exceptional stability (within 1%) and distortion less than 1% to 100 cps. Sine, square or triangular waves may be selected by a front panel switch; the 30 volt peak-to-peak output is constant for all wave forms and over full frequency range. hp 202A, $550.00△.

hp 650A Test Oscillator

Covering 10 cps to 10 MC, hp 650A is a highly stable, wide band instrument for audio, supersonic, video and rf measurements. Output is flat within 1 db full range; voltage range is 0.00003 to 3 v. In addition to 600 ohm impedance, voltage divider provides a 6 ohm impedance. Distortion less than 1% to 100 KC. $550.00△.

hp 201C Audio Oscillator

This high power oscillator offers an output of 3 watts or 42.5 v into 600 ohms over the frequency range 20 cps to 20 KC. Response is ± 1 db full range, attenuator adjusts output 0 to 40 db in 10 db steps, provides either low impedance or constant 600 ohm impedance. hp 201C, $250.00 (cabinet), hp 201CR, $255.00 (rack mount).

hp 202C Low Frequency Oscillator

Providing excellent waveform throughout its broad frequency range, 1 cps to 100 KC, the hp 202C is especially convenient for measurements in the subsonic, audio and ultrasonic regions. Distortion less than 0.5%, hum voltage less than 0.1%, short recovery time < 5 sec. at 1 cps. hp 202C, $300.00 (cabinet), hp 202CR, $305.00 (rack mount).

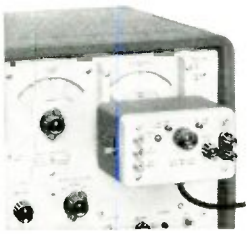
Distortion, Wave Form Analyzers – 20 cps to 50 KC

302A Wave Analyzer

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 302A	Wave form analysis	20 cps to 50 KC	Direct reading, no calibration needed	$1,800.00△
-hp- 330B	Measures total audio distortion	20 cps to 20 KC	Includes input amplifier, VTVM	450.00△
-hp- 330C	For AM, FM broadcast measurements	20 cps to 20 KC	Special VU meter to meet F.C.C. requirements	475.00△
-hp- 330D	For AM, FM broadcast measurements	20 cps to 20 KC	AM detector and VU meter to meet F.C.C. requirements	525.00△

△ Rack mounted instruments $15.00 less.

Completely transistorized, advanced instrument provides direct, accurate wave component measurement without calibration or stabilization. Relative or absolute measurements from 20 cps to 50 KC, hum free, needs no warmup, very sharp acceptance circuits plus AFC. May be battery operated (18 to 28 volts). $1,800.00△.

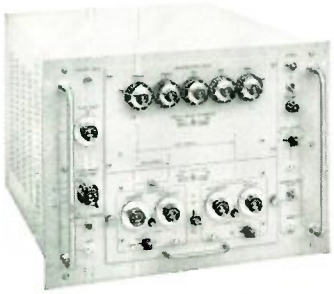


NEW! AC-97C Sweep Drive

AC-97C motor accessory converts 302A to a sweep oscillator-tuned voltmeter for automatic frequency response measurements. Mounts on 302A or adjustable bench stand. Sweeps all or any part of the 302A range automatically; has fast sweep for covering frequency spectrum rapidly, slow sweep for high resolution plot. AC-97C, $275.00.

Pulse, Square Wave and Digital Delay Generators

218AR Digital Delay Generator



218AR is ideally suited for pulse simulation and time measurement in radar, loran, pulse code systems, etc. Suitable for military use, it provides two precision time intervals or pulse delays, independently adjustable from 1 to 10,000 μsec in 1-μsec steps. Intervals may be initiated either internally, 10 cps to 10 KC, or externally, 0 cps to 10 KC. Accuracy is ± 0.1 μsec ± 0.001% of the selected value; total jitter does not exceed 0.02 μsec. Sync pulse, timing comb output provided. For maximum versatility and simplicity, output pulses are generated in the 219 series plug-in drawer units, shown below. 218AR, $2,000.00.

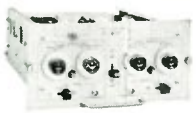
Plug-ins Increase Versatility of 218AR

219A Dual Trigger Unit. Supplies positive trigger pulses, 50 volts, 0.1 μsec rise time from 50-ohm source. Pulse A at T_0 or T_1 as selected by switch, Pulse B at T_2. $100.00.

219B Dual Pulse Unit. Produces two high-power positive or negative pulses, continuously adjustable from 0.2 to 5 μsec and from 0 to 50 volts. Leading edge can be set for start or end of selected time interval. $450.

219C Digital Pulse Duration Unit. Produces high-power output pulse with digitally controlled delay and duration. Pulse available in both polarities at once; continually adjustable from 0 to 15 volts from 90-ohm source, 0 to 90 volts from 500-ohm source. $350.00.

219A



219B

219C

211A Square Wave Generator

Here is a versatile, wide-range instrument especially designed for testing video and audio amplifiers, networks and oscilloscopes, for modulating signal generators and measuring time constants. Model 211A, 1 cps to 1 MC, offers simple control of electronic switches, is convenient for indicating phase shift, frequency response, transient effects or deflection polarity. Two separate outputs: 3.5 v peak into 75-ohm impedance circuit for TV measurement, and 27 v peak into 600-ohms for high level work; output amplitudes independently controlled. Operates free-running or externally synchronized with positive-going pulse or sine wave of 5 v minimum amplitude. 211A, $325.00 (cabinet); 211AR, $330.00 (rack mount).

212A Pulse Generator

Popular 212A provides continuously variable, high-power positive or negative "fast pulses" of superior wave form: 0.02 μsec rise time and decay, "flat" top and minimum overshoot. Pulse lengths continuously variable 0.07 to 10 μsec, has direct reading pulse length control, provides pulses of 50 watts peak power. Low impedance permits delivery of accurate pulses over a long distance. Repetition rate is variable, 50 to 5,000 pps, controlled internally or externally. Synchronizing pulse available before or after output pulse. Especially useful in radar, TV and nuclear work. 212A, $600.00 (cabinet); 212AR, $585.00 (rack mount).

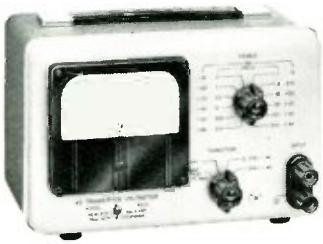
World Radio History

Complete Selection of Precision, Easy-to-Use

405BR/CR Automatic DC Digital Voltmeter

Automatic range and polarity selection give you literally "touch and read" measuring convenience. Covers 0.001 v to 1,000 v, accuracy ±0.2% of reading ±1 count. Unique stability virtually eliminates jitter in the last digit. Floating input, analog-to-digital conversion and, with the 405CR, digital recorder output. Front-panel switch to hold ranges. Just 7" high. 405BR, $850.00; 405CR, $925.00.

403A Transistorized AC Voltmeter



Battery-operated, portable, weighs less than 5 lbs., covers 1 cps to 1 MC, 100 μv to 300 v rms (max. full-scale sensitivity 1 mv). Also reads db direct, −72 to +52 db. Noise less than 3% of full scale (6% on lowest range). Accuracy ±3% to 500 KC, ±5% to 1 MC. Input impedance 2 megohms. 400 hours battery life, $275.00.

400D Vacuum Tube Voltmeter

Moderately priced precision vacuum tube voltmeter, offering high long-term stability. Covers 1 mv to 300 v full scale, 12 ranges, 10 cps to 4 MC. Accuracy ±2%, 20 cps-1 MC, input impedance 10 megohms, $250.00.

Instrument	Primary Uses	Frequency Range	Voltage or Current Range	Input Impedance	Price
-hp- 400D	Wide range ac measurements High sensitivity	10 cps to 4 MC	0.001 to 300 v 12 ranges	10 megohms 15 pf shunt	$250.00
-hp- 400H	High accuracy wide range ac measurements	10 cps to 4 MC	0.001 to 300 v 12 ranges	10 megohms 15 pf shunt	325.00
-hp- 400L	Log voltages, linear db measurements	10 cps to 4 MC	0.001 to 300 v 12 ranges	10 megohms 15 pf shunt	325.00
-hp- 403A	Battery-operated portable; fast, accurate, hum-free ac measurements	1 cps to 1 MC	0.001 to 300 v 12 ranges	2 megohms 40, 20 pf shunt	275.00
-hp- 405	Direct voltage measurement. Automatic range, polarity	dc	0.001 v to 1,000 v (accuracy ±0.2% of reading ±1 count)	11 megohms to dc	See left
-hp- 410B	Audio, rf, VHF measurements; dc voltages; resistances	dc; ac—20 cps to 700 MC	1.0 to 300 v 7 ranges	dc—122 megohms; ac—10 megohms/ 1.5 pf	245.00
-hp-411A	Millivolt, db readings to kilomegacycle range	500 KC to 1 GC	10 mv to 10 v, 7 ranges	——	450.00
-hp- 412A	Precision voltage, current, resistance measurements	dc	1 mv to 1,000 v 1 μa to 1 amp	10 to 200 megohms, depending on range	400.00
-hp- 413A	dc null meter, dc voltmeter, amplifier	dc	1 mv to 1,000 v 13 ranges	10 to 200 megohms, depending on range	350.00
-hp- 425A	Read μv, μμa; 100 db amplifier; medical, biological, physical, chemical	dc voltages as 100 db amplifier	10 μv to 1 v 11 ranges	1 megohm ± 3%	500.00
-hp- 428A	Clip-on milliammeter eliminates direct connection, circuit loading	dc	3 ma to 1 amp, 6 ranges	——	500.00
-hp- 428B	Similar to 428A, wider range, recorder output for dc to 300 cps	dc on meter, dc to 300 cps on recorder	1 ma to 10 amps, 9 ranges	——	550.00
-hp- 456A	Current measurements on meters, scopes	60 cps to 4 MC	1 ma to 1 amp rms	——	190.00
-hp- 457A	ac-to-dc converter	50 cps to 500 KC	0 to 300 v rms 4 decade ranges	1 megohm 30 pf shunt	On req.
-hp- 738AR	Voltmeter Calibrator	dc pos. or neg. 400 cps sine wave	300 μv to 300 v	Works into 3 to 10 megohms	875.00
-hp- 739AR	Frequency response test set	300 KC* to 10 MC *(5 cps with -hp- 200SR)	3 v output	——	525.00

456A AC Current Probe

Permits measurement of current on indicating meters such as 400 D/H/L or oscilloscopes. This current probe clamps *around* wire under test, needs no physical connection, does not load circuit. Range 1 ma to 1.5 amps peak, accuracy ±1% at 1 KC, response ±2%, 100 cps to 3 MC, ±5%, 60 cps to 4 MC, −3 db at greater than 20 MC, $190.

410B Vacuum Tube Voltmeter

This all-purpose voltmeter covers 1 to 300 v full scale, 20 cps to 700 MC, also serves as dc VTVM with 122 megohms input resistance, or ohmmeter covering 0.2 ohms to 500 megohms. Input capacity 1.5 pf, input impedance 10 megohms. $245.00 (cabinet), $265.00 (rack mount).

457A AC-to-DC Converter

Now you can make high accuracy ac measurements to 500 KC with a dc digital voltmeter. 457A also can be used with 405CR Digital Voltmeter and 560 series Digital Recorders to provide permanent records in printed digital form. Covers 0 to 300 v rms in 4 decade ranges, 50 cps to 500 KC. Accuracy ±0.3% to 50 KC, ±0.75% to 500 KC, ± 1 mv. Input impedance 1 megohm. Price on request.

INDIVIDUALLY CALIBRATED VOLTMETERS at no increase in cost!

Now individual calibration of meter scales used in standard hp instruments gives you commercial instrument accuracy approaching that of lab standards! No longer are preprinted approximate scales used. What the voltage actually is — you read! With a servo system, *each* calibration line on *each* instrument is located precisely and *then* printed.

This new standard of hp accuracy assures you that *each* voltmeter scale is calibrated to meet the exact characteristics of its *individual* meter movement. Scale tracking error is eliminated, and you get improved performance at the same moderate price. Further, this calibration and inspection procedure automatically rejects faulty meter movements. Tracking characteristics of each meter movement are determined over its entire range, and rigid tolerance control assures optimum performance.

These are the first commercial voltmeters in which the meter tracking error is eliminated. Individually calibrated voltmeters are described below. With the meter that meets your requirement you are assured of improved performance, with this source of error eliminated — plus all the other advantages you expect in hp instruments: dependability, ruggedness, convenience. They're yours at no increase in cost. Individually calibrated meters are included on all hp voltmeters on this page and on the hp 428B clip-on DC Milliameter.

hp 411A 1 GC Millivoltmeter

Here's unique versatility in an rf voltmeter offering millivolt sensitivity and two easy-reading linear voltage scales in 1-to-3 ratio. Range 10 mv to 10 v full scale rms. 500 KC to 1 GC, usable indications to 4 GC! Also, db scale from −42 to +33 db for gain measurements. Five hp probe tips increase versatility. Galvanometer recorder output. hp photoelectric chopper gives noise-free, drift-free low voltage readings. $450.00.

hp 413A DC Null Voltmeter

New hp 413A is a null meter, dc voltmeter, amplifier in one versatile instrument. As a voltmeter, measures 1 mv to 1,000 v end scale, 13 ranges, 2% accuracy and virtually drift-free operation. Input impedance 10 to 200 megohms, depending on range. Input isolation allows operation 500 v dc or 130 v ac from ground. As amplifier, gain 0.001 to 1,000 in 13 steps. Low noise, high ac rejection. $350.

hp 400H/L Vacuum Tube Voltmeters

You get 1% accuracy with hp 400H, 1 mv to 300 v full scale, 12 ranges, 10 cps to 4 MC. Big 5" mirror scale. hp 400L has true logarithmic voltage scale, 5" linear db scale, accuracy 2% constant percentage of reading. Input impedance, both models, 10 megohms. In the 400L range switching in 10 db levels plus the 12 db scale provides the wide overlap desirable in decibel level measurements. hp 400H, $325.00; hp 400L, $325.00.

hp 425A DC Microvolt-Ammeter

High sensitivity, high stability microvolt meter; end scale voltages of 10 μv to 1 v in 11 ranges. Also reads currents of 10 μμa to 3 ma in 18 steps, 1-3-10 sequence. Accuracy ±3% on all ranges. Drift is less than 4 μv per day referred to input terminals. Input impedance 1 megohm ±3% on all voltage ranges. Also usable as a 100 db amplifier, up to 1 v out from signals as small as 10 μv, ac rejection at least 3 db at 0.2 cps and 60 db at 60 cps and above. $500.00.

hp 412A Precision Volt - Ohm - Ammeter

A precision multi-purpose instrument, the hp Model 412A measures dc voltage 1 millivolt to 1,000 volts full scale, 13 ranges. Accuracy ±1% full scale, all ranges. Measures currents 1 microampere to 1 ampere with ±2% accuracy, full scale (13 ranges). As an ohmmeter, Model 412A measures 0.02 ohms to 5,000 megohms. Extremely low noise and drift. Instrument also provides recorder output. hp 412A, $400.00.

hp 428A/B Clip-On DC Milliammeters

Radical approach to current measurements means no breaking leads, no dc connections, no soldering. "Current transformer" probe clamps *around* wire, measures by sampling magnetic field around the wire. Measures dc current in the presence of strong ac. hp 428A covers 3 ma to 1 amp, 6 ranges; hp 428B covers 1 ma to 10 amps, 9 ranges, has recorder output to measure from dc to 300 cps. Accuracy ±3%. hp 428A, $500.00; hp 428B, $550.00.

World Radio History

New hp Solid State Electronic Counters, Accessories

Continuous, non-blinking display

Faster repetitive counts

Solid-state dependability

Wide temperature range

BCD Output

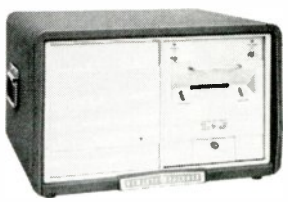
These four new hp counters are solid state instruments with maximum counting rates of 300 KC or 1.2 MC and a choice of Nixie or new staggered columnar readouts. Unique display storage gives continuous readout of most recent measurement, even while instrument is gated for new count. Counter "inactive" time independent of gate time for higher sampling rate. 0.1 v sensitivity. Measures frequency, period, multiple period average, ratio. Input impedance 1 megohm.

Counter	Max. Counting Rate	Registration	Frequency Measurement			Period Measurement				Ratio Measurement			Price
			Range	Accuracy	Reads In	Range	Accuracy	Reads In	Periods Averaged	Reads	Range	Accuracy	
5212A	300 KC	5 digits columnar	2 cps to 300 KC	± 1 count ± time base accuracy	KC with positioned decimal	2 cps to 10 KC in single period; up to 300 KC in multiple period average	± 10 μs ± time base accuracy ± trigger error ÷ periods averaged	Milliseconds with positioned decimal	1, 10, 10^2, 10^3, 10^4, 10^5	$(f_1 \div f_2) \times$ period multiplier	f_1: 100 cps to 300 KC (1 v rms into 1,000 ohms) f_2: Same as period	± 1 count of f_1 ± trigger error of f_2	$ 975.00
5512A	300 KC	5 digits Nixie											1,175.00
5232A	1.2 MC	6 digits columnar	2 cps to 1.2 MC			2 cps to 10 KC in single period; up to 1 MC in multiple period average	± 1 μs ± time base accuracy ± trigger error ÷ periods averaged	Milliseconds and microseconds with positioned decimal			f_1: 100 cps to 1.2 MC (1 v rms into 500 ohms) f_2: Same as period		1,300.00
5532A	1.2 MC	6 digits Nixie											1,550.00

hp 5275A Time Interval Counter

New! 10 nanosecond resolution in automatic measurements of information previously unavailable in digital form. hp 5275A is ideal for measuring very short time intervals between events represented by suitable electrical pulses. Range 10 nsec to 0.1 sec. Accuracy ± 10 nsec ± time base accuracy. External 1 MC time base required. Input impedance 50 ohms. Price on request.

hp 101A 1 MC Oscillator, designed specifically as a time base for hp 5275A Counters, offers low-cost versatility for many other applications. $5/10^9$ stability, output of 1 v min. into 50 ohm load. 100 KC output optional. hp 101A, $500.00.

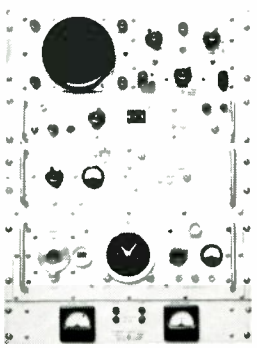


New hp 562A Digital Recorder

New, solid-state digital recorder has data storage for each print wheel. Prints up to 5 lines/sec with 2 millisecond data transfer. Plug-in logic cards available to provide choice of input codes. Can accept input from two unsynchronized sources. hp 562A, 11-digit printer with six BCD (1-2-2-4) logic cards (12th print wheel, additional logic cards, analog output optional). $1,600.00 to $2,100.00, depending on options.

New hp 580A Digital-Analog Converter provides outputs for strip chart or X-Y recorders, both potentiometer and galvanometer types. Automatic zero-shift for "on-scale" records at all times; extremely high resolution, accuracy. hp 580A. Price on request.

New hp Frequency/Time Standard Systems, Components



5 parts in 10^{10}/day long term stability! 1 part in 10^{10} typical short term stability!*
New standards of spectral purity, accuracy, reliability!

Accuracy and extreme reliability are the outstanding features of these hp frequency/time standard systems, which include a frequency standard, frequency divider and clock and a standby power supply, in addition to a comparison device. A receiver and an oscilloscope are used to make time comparisons with hf signals broadcast from WWV and similar stations. A receiver and electronic counter are used for vlf comparisons. Suitable for shipboard, mobile and field as well as laboratory use, the transistorized systems are compact and rugged. They are suitable for satellite navigation systems, missile and satellite timing-tracking and single sideband communications.

*averaged over 1 sec intervals and under reasonably constant environmental conditions

New hp 103AR/104AR Quartz Oscillators

Long term stability, 5 parts in 10^{10}/day; typical short term stability, 1 part in 10^{10}/day averaged over 1 sec intervals. Provide 1 MC and 100 KC outputs. hp 104AR also provides 5 MC output of extreme spectral purity. hp 103AR, $2,500.00; hp 104AR, $3,250.00.

New hp 114BR Time Comparator

Used in conjunction with hp 113BR, allows time comparison to be made without changing clock setting, increases speed and flexibility. Time difference between standard time signal and 113BR tick can be resolved to ±10 μsec. hp 114BR $1,200.00.

hp 113BR Frequency Divider and Clock

Makes possible increased accuracy from frequency and time standard systems by generating precise, adjustable time signals with accuracy determined by driving oscillator. Permits accurate comparisons between local standards and hf or vlf broadcasts. hp 113BR, $2,750.00.

New hp 724BR, 725AR Standby Power Supplies

Automatically assume load and warn when ac power fails, assure continuous operation of frequency/time standard system. hp 724BR, including battery, $850; hp 725AR, including battery, price on request.

World Radio History

Dependable hp Vacuum Tube Counters, Accessories

hp 524C/D Electronic Counters

Bright, steady readout, crystal oscillator stability of 5 parts in 10^6 per week and plug-in versatility are yours with these popular hp counters. hp 524C offers Nixie readout. hp 524D columnar readout. Read frequency 10 cps to 10.1 MC over any of 5 selected intervals; period from 0 to 100 KC. 7 plug-in units increase frequency range to 510 MC, increase sensitivity to 10 mv, provide time interval and phase angle measurements and 10,000 period average measurements. See table, right. hp 524C, $2,400.00; hp 524D, $2,150.00.

hp 523C/D Electronic Counters

All-purpose counter measuring frequency 10 cps to 1.2 MC, time interval 1 μsec to 27.8 hours, period 0.00001 cps to 100 KC. Stability 2/1,000,000 per week. Results displayed in sec, msec, μsec or KC; automatic decimal. Usable with external 100 KC standard. hp 523C, Nixie readout, $1,575.00; hp 523D, columnar readout, $1,310.00.

hp 522B Electronic Counter

A low-cost precision instrument covering 10 cps to 120 KC. All-purpose counter easily used by unskilled personnel. Measures frequency, period and time interval, is direct reading in cps, KC, seconds or milliseconds. hp 522B, $915.00 (cabinet); hp 522BR, $900.00 (rack mount).

hp 521 Industrial Counters

hp 521 series Counters measure frequency, random events per unit of time; with transducers, they measure rps, speed, weight, pressure, etc. 521D (shown) 1 cps to 120 KC (4 places), input min. 0.2 v rms; input attenuator adjusts sensitivity 0.2 to 100 v rms; input impedance 1 megohm. Characteristics of other 521 models similar to 521D. See table at right for details, prices.

hp 560A/561B Digital Recorders. 570A/571B Digital Clocks

hp 560A provides permanent record of all types of test data, also gives unique analog output for graphic recording of very small data variations. 560A operates from single-line voltage-coded decimal, delivered with 6 plug-in comparators for 6-digit presentation, additional comparators (to eleven) may be plugged in at any time. hp 561B requires 10-line coded decimal entry operates from hp 405CR Digital Voltmeter, frequency counters or relays, stepping switches, beam switching tubes. Models 570A/571B digital clocks (570A shown installed) mount in 560A/561B respectively and add time-of-day information to other data recorded by 560A/561B. hp 560A (with 6 comparators), $1,325.00; hp 561B, $1,150.00; hp 570A (for 560A), $1,050.00; hp 571B (for 561B), $950.00. hp 565A Digital Printer (for custom systems), $640.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 100E Frequency Standard	Establish standard frequencies; calibrate, measure time	6 sine 10 cps to 1 MC; 4 pulse, 10 cps to 10 KC	Stability $5/10^{10}$ per week Timing comb.	$ 925.00■
-hp- 103AR Quartz Oscillator	Establish standard frequencies; calibrate, measure time	Sine 1 MC, 100 KC; separate 100 KC for driving -hp- 113BR	Stability $5/10^{10}$ per day, long term	2,500.00
-hp- 104AR Quartz Oscillator	Establish standard frequencies; calibrate, measure time	Sine 1 MC, 100 KC; separate 100 KC for driving -hp- 113BR; 5 MC of high spectral purity	Stability $5/10^{10}$ per day, long term; extreme spectral purity	3,250.00
-hp- 113BR Frequency Divider, Clock	Adjust freq. standards; comparisons	100 KC input	1 pps tick output for comparison with wwv, etc.	2,750.00
-hp- 500B Frequency Meter	Rapid frequency measurements	3 cps to 100 KC	9 ranges ±2% accuracy. Input 0.2 to 250 volts	300.00
-hp- 500C Tachometer Indicator	Rpm measurements	180 to 6,000,000 rpm	Similar to 500B but calibrated in rpm	300.00
-hp- 506A Optical Tachometer Pickup	Rps and rpm measurement	300 to 300,000 rpm	Phototube and light source; output 1 v rms	150.00
-hp- 508A-D Tachometer Generator	Shaft speed measurement	A, 15-40,000 rpm; B, 30-30,000; C, 40-25,000; D, 50-5,000	A, 60 cycles/rev.; B, 100/; C, 120/; D, 360/	125.00
-hp- 520A Nuclear Scaler	For counting high-rate pulses	Capacity 100 counts in 2 decades. 10,000,000 pps counting rate	100:1 divider for operation of low speed scalers	700.00△
-hp- 521A Industrial Electronic Counter	Measure frequency, speed	1 cps to 120 KC 220 KC optional, add $35.00	Direct reading, accurate within ±1 count ±0.1%, 4 place registration	475.00
-hp- 521C Industrial Electronic Counter	Measure frequency, speed	1 cps to 120 KC 220 KC optional, add $35.00	Direct reading, accuracy within ±1 count ±0.01%, 5 place registration	650.00
-hp- 521D Industrial Electronic Counter	Measure frequency, speed	1 cps to 120 KC 220 KC optional, add $35.00	Same as 521A except has Nixie readout	750.00
-hp- 521E	Measure frequency, speed	1 cps to 120 KC 220 KC optional, add $35.00	Same as 521C except has Nixie readout	950.00
-hp- 521G	Measure frequency, speed, elapsed time	1 cps to 1.2 MC	Direct reading, accuracy ±1 count ±0.1% 5 place registration	700.00
-hp- 522B Electronic Counter	Frequency, period, time interval measurements	10 cps to 120 KC 220 KC optional, add $35.00	Direct reading, stability 10 parts per million per week	915.00△
-hp- 523C	Frequency, period, time interval	10 cps to 1.2 MC	Direct reading, stability 2 parts per million per week. Nixie readout, 10-line code arrangement	1,575.00■
-hp- 523D Electronic Counter	Frequency, period, time interval	10 cps to 1.2 MC	Direct reading, stability 2 parts per million per week	1,310.00■
-hp- 524C Frequency Counter	Frequency, period, measurements	10 cps to 10.1 MC (Freq.) 0 cps to 100 KC (Period)	Direct reading, no interpolation; stability $5/10^6$ per wk. Nixie readout	2,400.00■
-hp- 524D Frequency Counter	Frequency, period, measurements	10 cps to 10.1 MC (Freq.) 0 cps to 100 KC (Period)	Direct reading, no interpolation; stability $5/10^6$ per wk.	2,150.00■
-hp- 525A Frequency Converter	Extends 524 range to 100 MC; increases basic sensitivity	10 cps to 100 MC	Accuracy same as basic counter; 0.1 v rms min. input	250.00
-hp- 525B Frequency Converter	Extends 524 range from 100 to 220 MC; high sensitivity	100 MC to 220 MC	Accuracy same as basic counter; 0.2 v rms min. input	300.00
-hp- 525C Frequency Converter	Extends 524 range to 510 MC; high sensitivity	50 KC to 510 MC	Accuracy same as basic counter; min. input: 20 mv rms, 50 KC to 10.1 MC; 100 mv rms, 100 to 510 MC	425.00
-hp- 526A Video Amplifier	Increases 524 sensitivity to 10 millivolts	10 cps to 10.1 MC	Accuracy same as basic counter; 10 mv rms min. input	200.00
-hp- 526B Time Interval Unit	Measures interval 1 μsec to 100 days	1 μsec to 10^7 sec	Resolution to 0.1 μsec	200.00
-hp- 526C Period Multiplier	Period measurement	Extends range of 524 to measure 10,000 periods	Greater accuracy in period measurement	225.00
-hp- 526D Phase Unit	Phase angle measurement	1 cps to 20 KC	Reads in time units, resolution to 0.1 μsec	750.00
-hp- 540B Transfer Oscillator	Microwave measurement with counter accuracy	to 18 GC	Ideal for use with -hp- counters, frequency converters, mixers	850.00△

△ Rack mounted instruments $15.00 less. ■ Rack mounted $25.00 less.

Regulated and Klystron Power Supplies

723A Power Supply

Ideal dc power supply, 0 to 40 v dc, 0 to 500 ma, for systems applications where remote voltage programming is desired. Load regulation, less than 20 mv change from 0 to 500 ma; less than 10 mv change for ± 10% line voltage change. Either positive or negative terminal may be grounded, or several units operated in cascade. Three modular units can be placed in one rack mount adapter. $225.00.

722AR/726AR Transistor Power Supplies

722AR is a dependable, transistorized, fully regulated dc power supply; continuously variable 0 to 60 v dc, 0 to 2 amps. Three-terminal output for either positive or negative grounding. Load regulation, less than 5 mv change for 0 to 2 amp change. Special safety circuit limits output current to pre-set value. Front-panel meters monitor output without external equipment. Slide switch at rear selects local or remote sensing. Low power consumption, easy-to-use controls. $525.00 (rack mount).

726AR DC Power Supply, Similar to 722AR, provides 0 to 45 v output, is programmable by external resistance connectors. $500.00 (rack mount).

Instrument	Primary Uses	Characteristics	Price
-hp- 711A Laboratory Power Supply	General purpose regulated dc supply for lab and field use	0 to 500 volts @ 100 ma	$250.00
-hp- 712B Power Supply	Same as 711A	0 to 500 volts @ 200 ma —300 v @ 50 ma, 0 to —150 v @ 5 ma	390.00△
-hp- 715A Klystron Power Supply	Regulated beam, reflector source for low power klystrons	—250 @ 30 ma to —400 volts @ 50 ma; 0 to —900 v @ 10 μa	325.00
-hp- 721A Transistor Power Supply	Powering transistors, similar applications	0 to 30 v, 150 ma	145.00
-hp- 722AR Transistorized Power Supply	Powering transistors, banks of tunnel diodes	0 to 60 v, 0 to 2 amps	525.00
-hp- 723A DC Power Supply	General purpose, medium power low voltage supply; can be programmed remotely	0 to 40 v, 500 ma	225.00
-hp- 726AR DC Power Supply	Highly accurate testing of systems or transistor circuits; remote sensing, programming	0 to 45 v, 0 to 2 amps	500.00

△ Rack mounted instruments $15.00 less.

721A Transistor Power Supply

Compact, versatile, completely transistorized. Regulated supply, 0 to 30 v, continuously variable. 150 ma maximum output. Load regulation, 0 to 150 ma, 0.3% or 30 mv, whichever is greater. Positive overload protection with front panel switch prevents damage to transistors, etc. $145.00.

General Purpose Traveling-Wave, Wide Band Amplifiers

Traveling-Wave Tube Amplifiers

offers Traveling-Wave Tube Amplifiers for all frequencies 1 to 12.4 GC. New 489A, 491C, 493A, 495A are high power, broad band, low noise amplifiers using PPM focusing. Provide at least 1 watt output for 1 mw input over their full frequency range. 490B, 492A and 494A are low level, high gain amplifiers for amplitude, pulse, phase or FM modulation. See table for prices.

466A AC Amplifier

General-purpose transistorized instrument amplifier offering standard gains of 20 and 40 db, ± 0.2 db at 1000 cps. Distortion less than 1%, 10 cps to 100 KC. Frequency response ± 0.5 db 10 cps to 1 MC, output 1.5 v rms across 1500 ohms, noise 75 μv rms, referred to input; input impedance 1 megohm with 20 pf shunt. Battery powered, 150 hours operation; or ac driven. Weight just 3 lbs. $150.00. Specify battery or ac operation.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 450A Amplifier, Stabilized	General purpose lab amplifier	10 cps to 1,000,000 cps	20 and 40 db gain, frequency response ±½ db	$ 160.00
-hp- 460AR Amplifier, Wide Band	Wide band, pulse amplification	20 KC to 120 MC	20 db gain, rise time 0.003 μsec	225.00
-hp- 460BR Amplifier, Fast Pulse	Pulse amplification high output	20 KC to 120 MC	15 db gain, 125 peak volts	275.00
-hp- 466A ac Amplifier	General purpose lab amplifier	10 cps to 1 MC	20, 40 db gain; freq. response ±0.5 db	150.00
-hp- 489A Traveling-Wave Tube Amplifier	High power "L" band amplification	1 to 2 GC	30 db gain; mμsec rise time; 1 watt output	1,970.00
-hp- 490B Traveling-Wave Tube Amplifier	Amplification throughout "S" band	2 to 4 GC	30 db gain; mμsec rise time; 10 mw output	1,400.00
-hp- 491A Traveling-Wave Tube Amplifier	High power "S" band amplification	2 to 4 GC	30 db gain; mμsec rise time; 1 watt output	1,400.00
-hp- 491C Traveling-Wave Tube Amplifier	High power "S" band amplification	2 to 4 GC	30 db gain; mμsec rise time; 1 watt output	1,970.00
-hp- 492A Traveling-Wave Tube Amplifier	Amplification through most of "G" and "J" bands	4 to 8 GC	30 db gain; mμsec rise time; 20 mw output	1,500.00
-hp- 493A Traveling-Wave Tube Amplifier	High power "G" and "J" band amplification	4 to 8 GC	30 db gain; mμsec rise time; 1 watt output	2,900.00
-hp- 494A Traveling-Wave Tube Amplifier	Amplification throughout "X" band	7 to 12.4 GC	30 db gain; mμsec rise time; 20 mw output	1,800.00
-hp- 495A Traveling-Wave Tube Amplifier	High power "X" band amplification	8.2 to 12.4 GC	30 db gain; mμsec rise time; 1 watt output	2,900.00

World Radio History

Microwave Impedance Measuring Equipment

415C Standing Wave Indicator

Designed to use with bolometers or crystals. Increased resolution gives full scale expansion for any 2.5 db increment; no "blind" spots. Single frequency operation, 1,000 cps ± 2% (others on special order); ±2% front-panel adjustment for ease in matching source modulator. Readings in SWR or db. Low noise level, 0.1 μv sensitivity (full scale). Optional battery pack. Price on request.

415B Standing Wave Indicator for all waveguide and coaxial slotted sections. Single frequency operation 1,000 cps ±2%. Readings in SWR or db. Low noise level, 0.1 μv (full scale) sensitivity, 60 db calib. attenuator. $200.00.

416A Ratio Meter

Automatically combines forward and reverse signals and displays their ratio directly, irrespective of common amplitude variations. Contains rf power monitor indicating proper power level. Rear terminal signal available to operate oscilloscope or recorder. Suitable for single and swept frequency operation. $550.00△.

803A VHF Bridge

Provides direct impedance measurements in vhf range, 2 to 2,000 ohms, −90° to +90° phase angle. Wide frequency range 52 to 500 MC; makes measurements down to 5 MC and up to 1,000 MC. Fast, simple to use. $900.00.

417A VHF Detector

Super-regenerative (AM) receiver covering all frequencies from 10 to 500 MC in 5 bands. Designed for use with 803A Bridge. 5 μv sensitivity full range. Single frequency control, reads direct in MC. $400.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 360A-D Low Pass Filters	Eliminates harmonic voltages from uhf systems	Cut-off frequencies A- 700 MC C-2,200 MC B-1,200 MC D-4,100 MC	50 db rejection at 1.25 cutoff freq.	See below
-hp- 415B Standing Wave Indicator	SWR indicator or null indicator	1,000 cps ±2%	0 to 70 db attn. Max. sensitivity 0.1 μv	$200.00
-hp- 415C Standing Wave Indicator	SWR indicator or null indicator	1,000 cps ±2%	Full scale expansion for any 2.5 db increment; Max. sensitivity 0.1 uv	On req.
-hp- 416A Ratio Meter	Reflection coefficient measurements	1,000 cps ±4%	Continuous swept frequency presentation; accuracy ±3%	550.00△
-hp- 417A VHF Detector	VHF bridge detector (for -hp- 803A)	10 to 500 MC	Approx. 5 μv sensitivity	400.00
-hp- 803A VHF Bridge	Measurement of vhf impedance, SWR	52 to 500 MC	2 to 2,000 ohms impedance −90° to +90° phase angle	900.00
-hp- 805C Coaxial Slotted Section	Measurement of SWR	500 to 4,000 MC	For Type N Connectors flexible cables	525.00
-hp- 805D Coaxial Slotted Section	Same as above	Same as above	For rigid 7/8" RG44/U line	600.00
-hp- 806B Coaxial Slotted Section	Same as above (mounts in 809B)	3,000 to 12,000 MC	For Type N Connectors flexible cables	200.00
-hp- 809B Universal Probe Carriage	G, C, J, H, X, M and P810 Waveguide Sections Supports 806B section also		Accepts 442B, 444A probes	175.00
-hp- 814B Universal Probe Carriage	Supports K and R 815B Waveguide Slotted Sections		Accepts Untuned Probe 446B	225.00
-hp-872A Coaxial Slide-Screw Tuner	Correcting discontinuities, flattening waveguide, coax systems	500 to 4,000 MC	Correctable SWR: 10; insertion loss: 1 db or less	525.00

△ Rack mounted instruments $15.00 less.

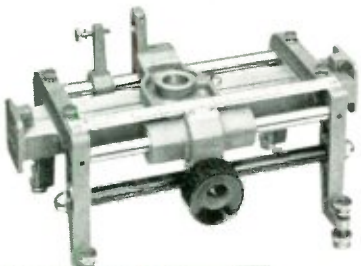
360 Low Pass Filters

Low pass filters speed microwave measurements by eliminating harmonics, permitting transmission at single, known frequency only. Particularly necessary in slotted line, filter characteristic, receiver response, similar measurements. Table above gives cut-off frequency; insertion loss not over 3 db; nominal impedance 50 ohms. 360A, B, $60.00. 360C, D, $50.00.

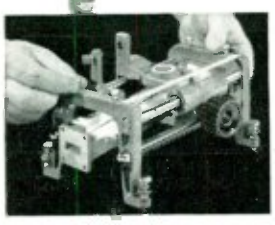
872A Coaxial Slide-Screw Tuner

Covers 500 to 4,000 MC range. Tuner consists of -developed slab line and precision probe carriage. Insertion quickly and easily varied with micrometer drive; line position may be read directly on a recessed scale. Probe travel at least ½ wavelength at 500 MC. Correctable SWR: 10. $525.00.

809B/814B Universal Probe Carriages



809B and 810B



Quick, easy waveguide interchange

814B, 815B, 446B

Models 809B and 814B are precision-built mechanical assemblies operating, respectively, with 810B and 815B series slotted sections. Combination of the 809B carriage and 810 slotted sections covers 2.6 to 18.0 GC. Combination of 814B carriage and 815B series sections covers 18.0 to 40.0 GC. For prices see table above.

On either carriage, waveguides can be interchanged in seconds for real savings on engineering time. Only one probe is required for each carriage to cover full frequency range. Manufacture is of highest quality to assure positive mechanical positioning of interchangeable waveguides and precise installation of mating probes (see table, "Waveguide Test Equipment"). 809B has a vernier scale reading to 0.1 mm and is equipped for dial gauge mounting. 814B has a dial read directly to 0.01 mm.

810B Slotted Sections. 810 B, for mounting in 809B carriage, is a flanged, waveguide section with accurately machined slot. Slot is tapered at ends to minimize reflection. Available in 7 waveguide bands, 3.95 through 18.0 GC.*

S810A. Complete slotted section assembly including probe carriage. In 2.6 to 3.95 GC (S-band) size only.*

815B Slotted Sections. For mounting in 814B carriage. Available K and R bands, 18.0 to 40.0 GC. These sections are accurately machined so that they are quickly and easily interchanged, and precisely positioned.*

*For prices, see Waveguide Test Equipment table.

World Radio History

Microwave Power Measuring Equipment

Now! End tedious zero setting with new 431A Power Meter

At last, continual zero setting for your power measurements is a thing of the past! This new power meter, which measures 10 μw to 10 mw full scale, lets you use one zero setting, good for hours, on all ranges—even on the 10 μw range! Drift is less than 2 μw/°C! The 431A gives you additional sensitivity of 10 db over previously available instruments. In addition to its 7-range μw-mw calibration, the 431A also reads in dbm, −30 to +10. Direct-reading accuracy is ±3% on all ranges. Operates with new temperature-compensated thermistor mounts, 478A, 486A (below). 431A, $345.00.

478A Thermistor Mount

New 478A Thermistor Mount for coaxial systems, 10 MC to 10 GC without tuning, is truly temperature - compensated, contains two thermistor pairs for use with dual bridge 431A Power Meter. SWR less than 1.5, high accuracy, drift-free operation. $145.00.

486A Thermistor Mount

New 486A truly temperature - compensated thermistor mount permits X-band power measurements, 8.2 to 12.4 GC without tuning; SWR less than 1.5. For use with 431A Power Meter. High accuracy, new convenience. $145.00.

434A Calorimetric Power Meter

Simply connect and read powers 10 mw to 10 watts, dc to 12.4 GC. No barretter, thermistor needed, no external terminations or plumbing. Measures CW or pulsed power. Two simple controls. DC input impedance 50 ohms ± 5 ohms at Type N input jack; input SWR less than 1.5 full range, less than 1.3 to 5 GC. Accuracy, without correction, within 5% full scale. Response time less than 5 sec. for full scale deflection. Direct reading in watts and dbw, compact, entirely self-contained. $1,600.00 (cabinet); $1,585.00 (rack mount).

430C Microwave Power Meter

No computations! Provides instantaneous, automatic power readings *direct* in dbm or mw at all frequencies for which there are suitable bolometer mounts. For CW measurements, uses either 1/100 amp. fuse or Sperry 821 barretter. Also measures CW or pulsed power with negative coefficient thermistor. Provides up to 16 ma bias current. Operates with mounts in adjacent table. Range 0.02 to 10 mw. $250.00.

477B Coaxial Thermistor Mount

For frequency range 10 MC to 10 GC. SWR less than 1.5. Thermistor element is 200 ohm negative. No tuning required; not susceptible to burnout. $75.00. (including thermistor).

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 393A Coaxial Attenuator	Accurate, variable attenuation to 120 db	500 to 1,000 MC	Direct-reading in high-power systems	$ 420.00
-hp- 394A Coaxial Attenuator	Accurate, variable attenuation to 120 db	1,000 to 2,000 MC	Direct-reading in high-power systems	420.00
-hp- 430C Microwave Power Meter	Measurement of rf power	Depends on Bolometer Mount -hp- mounts, 10 MC to 40 GC	0.02 to 10 mw ±5% accuracy	250.00
-hp- 431A Microwave Power Meter	Measurement of rf power	10 MC to 12.4 GC	Stable, temperature-compensated	345.00
-hp- 434A Calorimetric Power Meter	Measurement of rf power	dc to 12.4 GC	Direct reading, no barretters, thermistors or terminations; CW, pulsed	1,600.00△
-hp- 476A Universal Bolometer Mount	Measurement of rf power (with 430B/C)	10 to 1,000 MC	No tuning required SWR less than 1.25	85.00
-hp- 477B Coaxial Thermistor Mount	Measurement of rf power (with 430C)	10 MC to 10 GC	No tuning required SWR less than 1.5	75.00
-hp- 478A Thermistor Mount	Measurement of rf power (with 431A)	10 MC to 10 GC	Drift-free, SWR less than 1.5	145.00
-hp- 485 Waveguide Detector Mount	Measurement of rf power	2,600 to 12,400 MC	Full coverage of waveguide band	See Table Waveguide Equipment
-hp- 486A Thermistor Mount	Measurement of rf power (with 431A)	8.2 to 12.4 GC	Temperature compensated, SWR less than 1.5	145.00
-hp- 487B Waveguide Thermistor Mount	Measurement of rf power	3,950 to 40,000 MC	Full coverage, no tuning, 1.5 SWR except K/R487B 2.0	See Table Waveguide Equipment
-hp- 760D Dual Directional Coupler	Reflectometer and rf power measurements	250 MC to 1 GC	Directivity 35 db flat coupling	200.00
-hp- 761D Dual Directional Coupler	Reflectometer and rf power measurements	1 to 4 GC	Directivity 30 db flat coupling	185.00
-hp- 764D Dual Directional Coupler	Reflectometer and rf power measurements	216 to 450 MC	Coupling attenuation* 20 db, directivity 30 db	160.00
-hp- 765D Dual Directional Coupler	Reflectometer and rf power measurements	450 to 945 MC	Coupling attenuation* 20 db, directivity 30 db	160.00
-hp- 766D Dual Directional Coupler	Reflectometer and rf power measurements	940 to 1,975 MC	Coupling attenuation* 20 db, directivity 26 db	150.00
-hp- 767D Dual Directional Coupler	Reflectometer and rf power measurements	1,900 to 4,000 MC	Coupling attenuation* 20 db, directivity 26 db	150.00

*Power handling capacity all 764/767 series couplers 50 watts CW, 10 Kw peak.
△ Rack mounted instrument $15.00 less.

World Radio History

hp 382B/C Broadband Precision Waveguide Attenuators

X382B

S382B

Dielectric loading in new S382B/C, X382B/C produces long electrical length for high accuracy with short physical dimension, provides new convenience. Calibrated range, 0 to 60 db, 0 to 90° degree-of-rotation scale allows you to set incremental attenuation accurately. SWR less than 1.15 over entire range of attenuation and frequency. hp S382B, $600.00; hp S382C, $650.00; hp X382B, $295.00; hp X382C, $345.00.

hp 906A, 914A/B Moving Loads

Model 906A, 1 to 12.4 GC (SWR less than 1.05), a coaxial moving load which, with the popular hp 914A/B waveguide series, provides moving load coverage 1 to 40 GC. hp 906A, $250.00; hp 914A/B series, $50.00 to $250.

hp 382A Precision Attenuators

Popular hp 382A series precision attenuators are now available in "K" and "R" bands, 18.0 to 40.0 GC. "K," "R" band attenuators are of new, space-saving design (see photo). Direct reading, one-control tuning, high power handling capacity. Attenuation 0 to 50 db full range, independent of frequency. Phase shift constant with attenuation. For prices see table next page.

hp 764D-767D Dual Directional Couplers

High directivity dual coaxial couplers make reflectometer measurements practical in vhf and uhf coax systems. Flat response, high power capacity, low insertion loss. Four models, covering 216 to 4,000 MC collectively, 764D/765D, $160; 766D/767D, $150.

hp 760D/761D Dual Directional Couplers

Ideal for reflectometer systems, flat to ± 0.5 db over 4-to-1 frequency range. Directivity 35 db (760D) and 30 db (761D). hp 760D, 250 MC to 1 GC, $200.00; hp 761D, 1 to 4 GC, $185.00.

hp Noise Measuring Equipment

hp 342A Noise Figure Meter

hp 344AR Noise Figure Meter

This automatic, transistorized instrument *reliably and continuously measures noise figure on operating radars.* Its fast meter response lets you optimize noise figure during operation. Its high sensitivity (noise source can be decoupled 20 db from transmitter line) minimizes system degradation and effectively extends radar range. High sensitivity also permits measuring high noise figures (to 40 db) such as those found in TWT's. The instrument is militarized for dependability in all environments.

Model 344AR is used with a remote modulator and noise source so that high voltage slip-rings on antennas are unnecessary. 1 MC bandwidth, 25 or 30 MC input, designed for pulse rep rates of 90 to 500 pps but usable with most jitter repetition systems. Sampling techniques permit use with high repetition rate radars.

Required gain between 344AR and noise source is 35 db ± 5 db. Input impedance is 75 ohms, return loss 20 db, 20 to 40 MC. Accuracy (excluding excess noise accuracy) is ± 0.5 db, 0 to 5 db; ± 1 db, 5 to 10 db; ± 2 db, 10 to 15 db. Simple front panel calibration remote metering if desired. Optional alarms indicate noise figure above preset level, or failure in noise source current. hp 344AR, $1,600.00 *(Approximately. Depends on options and modifications.)*

hp 340B/342A Noise Figure Meters

General-purpose instruments making possible, in minutes, receiver and component alignment jobs that once took hours. Simplifies accurate alignment; encourages better maintenance; better performance.

hp **340B** automatically measures, continuously displays IF or rf amplifier noise figure at 30 or 60 MC; other freq. on order. $715.00 (cabinet); $700.00 (rack).

hp **342A**, similar, operates on 30, 60, 70, 105, 200 MC. 30 MC and 4 other frequencies between 38 and 200 MC on order. $815.00 (cabinet); $800.00 (rack). Also available with 21.4 mc I. F.

(NOTE: Models 340B, 342A and 344A not available in Western Europe.)

hp **343A VHF Noise Source**, temperature-limited diode broadband source, 10 to 600 MC, 5.2 db excess noise. $100.00.

hp **345B IF Noise Source**, 30 or 60 MC (others to order); 4 impedances, 5.2 db excess noise. $100.

hp **347A Waveguide Noise Source**, Argon gas discharge tubes in waveguide section 15.2 ± 0.5 db excess noise; for frequencies 2.6 to 18.0 GC, $200.00 to $300.00.

hp **349A UHF Noise Source**. 400 to 4,000 MC, wider range with correction; 15.2 ± 0.5 db excess noise, $325.00. hp H01 349A same as 349A except 18.2 ± 0.5 db excess noise. $325.00.

World Radio History

Microwave Test Equipment to 40 GC

Basic, low-cost elements offer utmost flexibility for assembly of exact instrumentation required. Each unit covers entire range of its waveguide size. Careful engineering, simple, sturdy mechanical design, highest quality manufacture insures accurate, multi-purpose operation.

Instrument	Coaxial Type N Conn. †For use with barretter or crystal. ‡For use with barretter only. *Complete assembly including carriage. §Mounts in 809B Carriage.
■Includes Thermistor, installed. **J530A, 5.85 to 8.2 GC, $120. J530B, 5.20 to 7.05 GC, $150. ° Includes barretter; checked for square law characteristics. ***N362A, "N" Band 15-21 GC $350.00
††Available with circular flanges equivalent to UG-425/u for K bands and UG-381/u for R bands. Specify by adding suffix "C" to model number: i.e., K487BC.

532/536A Frequency Meters

Comparable wide band, direct reading convenience are offered by 532 series, 3.95 to 40 GC, and the new 536A, 1 to 4 GC, Frequency Meters. The meters comprise high Q resonant cavity tuned by choke plunger; no sliding contacts. Resonance indicated by approx. 1 db dip in output. The 532 series meters are for waveguide application, the 536A for coaxial. 532 series, $175.00 to $325.00; 536A, $500.00.

281A Waveguide - Coax Adapters

For convenient transition between waveguide and coax systems. Each unit covers a full waveguide range with SWR less than 1.25. Type N coax fitting (female). AN-waveguide flange. For S, G, J, H and X bands, 2.6 to 12.4 GC. $25.00 to $50.00.

487B Thermistor Mounts

For fast, accurate waveguide power measurements. Each unit covers full range of its waveguide frequency. No tuning needed, SWR 1.5 max., except K and R bands, SWR 2.0 max. Max. power 10 mw. Rugged construction, high temperature coefficient thermistors virtually eliminate burnout. For S, G, J, H, X, M, P, K and R bands, 2.6 to 40.0 GC. $75.00 to $225.00.

870A Slide-Screw Tuners

For flattening waveguide systems, matching, etc. Probe position and penetration adjusts to setup reflection canceling existing reflection. Precision lead screw or micrometer varies probe insertion; vernier adjusts probe position. Corrects SWRs of 20 with accuracy of 1.02 SWR. For S, G, C, J, H, X, M, P, K, R, bands, 2.6 to 40.0 GC. $125.00 to $300.00.

420A/B Crystal Detectors

Employs a silicon crystal to detect rf signals in Type N coaxial lines. Covers frequencies 10 MC to 12.5 GC, sensitivity approx. 0.1 v/mw, frequency response ± 3 db full range. Uses modified 1N26 crystal, max. SWR 3. $50.00 each. Also available in matched pairs as 420B, $150.00 pair.

444A/446B Untuned Probes

444A is modified crystal (1N76 or 1N26) plus small antenna in convenient housing. Probe penetration easily variable; may be locked in position. No tuning needed; sensitivity superior to most elaborate single or double tuned probes. Range 3.0 to 18GC; fits ¾" bore. *New 446B*, for 814 Probe Carriage, similar but covers K and R bands, 18.0 to 40.0 GC. 444A, $40.00. 446B, $145.00.

World Radio History

hp Signal Generators and Doublers–50 KC to 40 GC

hp Frequency Doublers to 40 GC

Operating on harmonic generation principles, new hp 938A and 940A Frequency Doubler Sets provide output from 18 to 26.5 GC and 26.5 to 40.0 GC respectively. The Doublers can be driven by hp 626A or 628A Signal Generators, hp 686C and 687C Sweep Oscillators or by klystrons. The input signal may be CW, pulsed or swept; thus Doublers retain flexibility of driving instrument. Output approx. 0.5 to 1 mw with hp Signal Generators; input power 100 mw max. Output monitor accuracy ± 2 db. 100 db attenuator accurate within ± 2% of reading or 0.2 db. hp 938A, $1,500.00. hp 940A, $1,500.00.

hp 606A Standard Signal Generator

Ultra-modern; 50 KC to 65 MC. Output 3 v full range, continuous attenuation to 0.1 μv. MO-PA circuit with full feedback loop provides constant output full range. Low distortion, broad modulating capabilities. Typical hp speed, ease of operation; occupies ¼ bench space normally needed for generators of this frequency range. $1,350.00.

hp 608D VHF Signal Generator

10 to 420 MC. Highest stability. Low incidental FM or frequency drift. Calibrated output 0.1 μv to 0.5 v throughout range. Built-in crystal calibrator provides frequency check accurate within 0.01% each 1 and 5 MC. Master-oscillator, intermediate and output amplifier circuit design. Premium quality performance, direct calibration, ideal for aircraft communications equipment testing. $1,200.00.■

hp 608C VHF Signal Generator. High power (1 v max.) stable, accurate generator for lab or field use. 10 to 480 MC. Ideal for testing receivers, amplifiers, driving bridges, slotted lines, antennas. $1,100.00■

Instrument	Frequency Range	Characteristics	Price
-hp- 606A	50 KC to 65 MC	Output 0.1 μv to 3 v. Modulation bandwidth dc to 20 KC, low drift and noise, low incidental FM, low distortion.	$1,350.00△
-hp- 608C	10 to 480 MC	Output 0.1 μv to 1 v into 50 ohm load. AM, pulse, or CW modulation. Direct calibration	1,100.00■
-hp- 608D	10 to 420 MC	Output 0.1 μv to 0.5 v. Incidental FM less than 0.001%	1,200.00■
-hp- 612A	450 to 1,230 MC	Output 0.1 μv to 0.5 v into 50 ohm load. AM, pulse, CW or square wave modulation. Direct calibration	1,300.00■
-hp- 614A	800 to 2,100 MC	Output 0.1 μv to at least 0.163 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration	1,950.00■
-hp- 616B	1,800 to 4,200 MC	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration	1,950.00■
-hp- 618B	3,800 to 7,600 MC	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW FM or square wave modulation. Direct calibration	2,250.00■
-hp- 620A	7,000 to 11,000 MC	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, FM or square wave modulation. Direct calibration	2,250.00■
-hp- 626A	10 to 15.5 GC	Output +10 dbm to —90 dbm. Pulse, FM, or square wave modulation. Direct calibration	3,400.00■
-hp- 628A	15 to 21 GC	Output +10 dbm to —90 dbm. Pulse, FM, or square wave modulation. Direct calibration	3,400.00■

△ Rack mounted instruments $15.00 less. ■ Rack mounted instrument $20.00 more.

hp 626A/628A SHF Signal Generators

Instruments bringing high power, wide range, convenience and accuracy 10 to 21 GC range. Frequencies, output voltage directly set and read. Output 10 to 20 db better than previous spot-frequency sets; SWR better than 1.2 at 0 dbm and lower. Internal pulse, FM or square wave modulation; also external pulsing or FM'ing. hp 626A, 10 to 15.5 GC, $3,400.00.■ hp 628A, 15 to 21 GC, $3,400.00.■

hp 355A/B Precision Attenuators

Useful as components or lab instruments, hp 355A/B together provide 0-132 db attenuation in 1 db steps, dc to 500 MC. hp 355A or 355B, $125.00.

hp 350A/B Attenuators, 110 db attenuation in 1 db steps, 5 watts power capacity, high accuracy; dc to 100 KC. hp 350A (500 ohm) or 350B (600 ohm), $110.00 (cabinet); hp 350AR or 350BR, $115.00 (rack mount).

hp Swept Frequency Oscillators

hp 686C Electronic Sweep Oscillator

Covers all or part of X-band with flexible, *quiet* electronic sweep. Simple to operate, direct reading, adjustable sweep width and rate, 10 mw output minimum, frequency sweep linear with time. Has slow sweep for recorders; fast for oscilloscope; single sweep manually started or externally triggered, external FM, AM modulation. $2,900.00△.

Instrument	Frequency Range	Characteristics	Price
-hp- 682C	1.0 to 2.0 GC	Electronically swept; variable sweep rate, width. Output 10 mw, SWR 3.1 or less Pulse, square wave, FM, AM modulation All models offer leveled output	$3,090.00△
-hp- 683C	2.0 to 4.0 GC		3,000.00△
-hp- 684C	4.0 to 8.1 GC		2,900.00△
-hp- 686C	8.2 to 12.4 GC		2,900.00△
H01 686C	7.0 to 11.0 GC		3,000.00△
-hp- 687C	12.4 to 18.0 GC		3,400.00△

△ Rack mounted instruments $15.00 less.

Data subject to change without notice. Prices f.o.b. factory.

EIMAC POWER AMPLIFIER KLYSTRONS

and Key Accessories

At Eimac you'll find the most advanced amplifier klystrons anywhere. For Eimac is the only manufacturer designing klystrons three ways to best meet specific performance requirements: internal cavity, external cavity and combination cavity. That's why these tubes are now in widespread use in high power applications the world over. And watch for klystrons to come—the result of Eimac's unmatched tube-making skills and complete developmental facilities.

EIMAC POWER GRID

At Eimac you'll find the most *complete* line of power grid tubes available today: triodes, tetrodes, pulse modulators, diodes, zero-bias tubes, ceramic tubes, glass tubes. And there are more to come! Continuing Eimac projects are ever increasing the scope of power grid tube capabilities.

LAMBDA

REGULATED POWER SUPPLIES

Guaranteed Five Full Years

Every Power Supply sold by Lambda since 1953 has been covered by the most complete Power Supply guarantee offered by any manufacturer. Experience has shown that Lambda Power Supplies give constant trouble-free performance year after year. This guarantee assures you that the Power Supply you buy today, built to Lambda's high standards, will perform satisfactorily under heavy-duty service.

Market Surveys Rank Lambda First

For the sixth consecutive year a survey conducted by a leading electronic publication proves that engineers prefer Lambda Power Supplies by a vast majority over other manufacturers' equipment. Lambda's 41.8 per cent preference is more than 2½ times higher than the second place manufacturer.

LAMBDA'S NEW PLANT, Huntington, L. I., N. Y., has been specifically designed for the efficient and economical manufacture of Power Supplies. Lambda's 76,000 sq. ft. plant contains expanded engineering, manufacturing, quality control, and other staffs plus new, modern equipment and facilities to assure you the best quality Power Supply equipment available.

New

LAMBDA Transistorized REGULATED POWER SUPPLIES

0 - 34 VDC 5, 10 and 20 Amp
20 - 105 VDC 2, 4 and 8 Amp
75 - 330 VDC 0.8, 1.5 and 3 Amp

CONVECTION COOLED
No Blowers or Filters
Maintenance Free

Highly efficient, radiator type heat sinks eliminate internal blowers, maintenance problems, risk of failure, moving parts, noise and magnetic fields. Units are rated for continuous duty at 50°C ambient.

EASY SERVICE ACCESS

Dual-deck, swing-out back construction provides simple and fast service access without the need to remove unit from rack. All major component terminals are accessible from rear.

REMOTE SENSING

Provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

NO VOLTAGE SPIKES OR OVERSHOOT

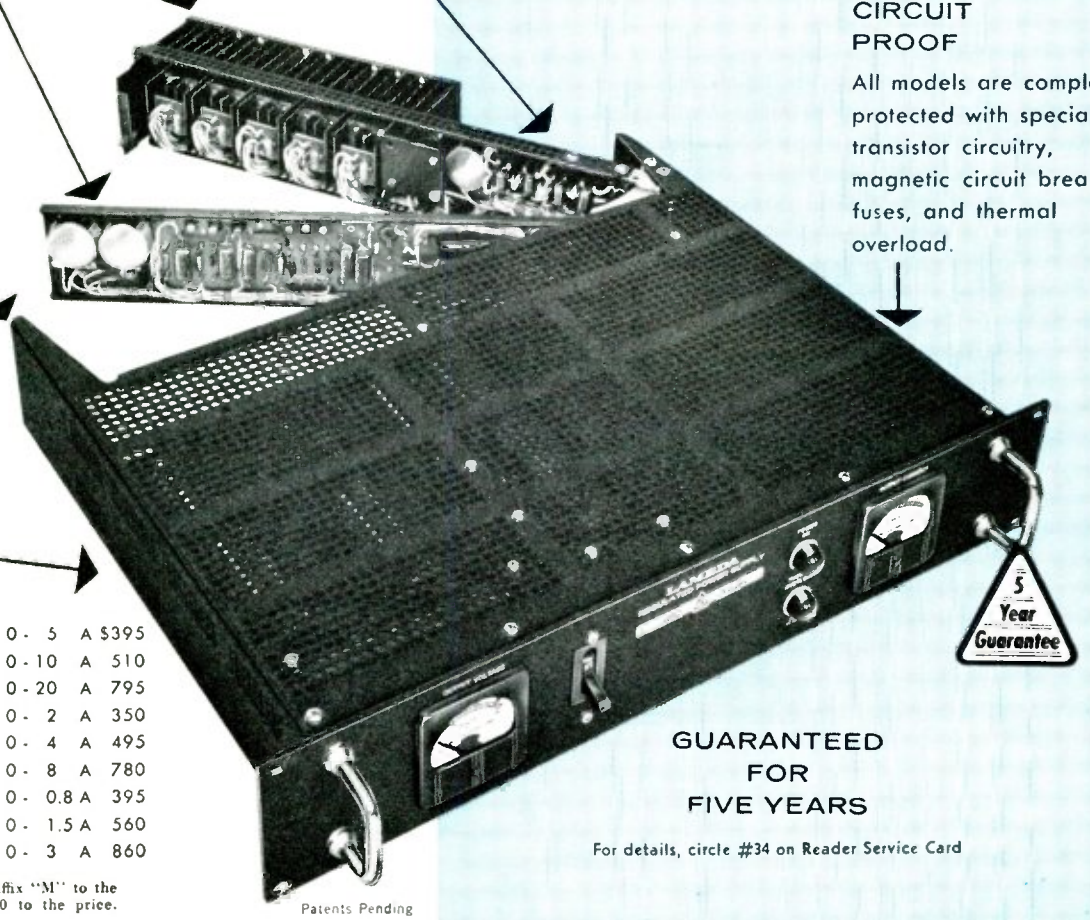
Lambda's design prevents output voltage overshoot on "turn on, turn off," or power failure.

MIL QUALITY

Hermetically-sealed magnetic shielded transformer designed to MIL-T-27A quality and performance. Special, high-purity foil, hermetically-sealed long life electrolytic capacitors.

SHORT CIRCUIT PROOF

All models are completely protected with special transistor circuitry, magnetic circuit breakers, fuses, and thermal overload.



LA 50 - 03A	0 - 34 VDC	0 - 5	A	$395

World Radio History

SPECIAL FEATURES

- Convection cooling — no internal blowers
- Ambient 50°C
- Specially designed, high efficiency radiator heat sinks
- Protected by magnetic circuit breakers
- Short-circuit-proof
- Excess ambient thermal protection
- Special transistor circuitry provides independent protection against transistor complement overload
- Remotely programmable by simple use of external resistor over the DC vernier range
- Remote sensing
- No voltage spikes or overshoot on "turn on, turn off," or power failure
- Excellent regulation . . . low output impedance . . . low ripple
- Fast transient response
- Hermetically-sealed transformer—designed to MIL-T-27A
- Special, high-purity foil, hermetically sealed long-life electrolytic capacitors
- All transistor — no tubes
- Constant current operation (consult factory)

COMPLETE SPECIFICATIONS OF LAMBDA LA SERIES

DC OUTPUT (regulated for line and load)

Model	Voltage Range [1]	Current Range [2]	Price [3]
LA 50-03A	0- 34 VDC	0- 5 AMP	$395
LA100-03A	0- 34 VDC	0-10 AMP	510
LA200-03A	0- 34 VDC	0-20 AMP	795
LA 20-05B	20-105 VDC	0- 2 AMP	350
LA 40-05B	20-105 VDC	0- 4 AMP	495
LA 80-05B	20-105 VDC	0- 8 AMP	780
LA 8-08B	75-330 VDC	0- 0.8 AMP	395
LA 15-08B	75-330 VDC	0- 1.5 AMP	560
LA 30-08B	75-330 VDC	0- 3 AMP	860

[1] *The DC output voltage for each model is completely covered by four selector switches plus vernier control. The DC output voltage is the summation of the minimum voltage plus the voltage steps and the continuously variable DC vernier.*

[2] *Current rating applies over entire voltage range.*

[3] *Prices are for unmetered models. For metered models add the suffix "M" and add $30.00 to the price.*

CONTINUOUSLY VARIABLE VERNIER OR PROGRAMMABLE VOLTAGE BANDS:

28-32	90-100	285-315
30-34	95-105	300-330

Regulation (line) . . . . . Less than 0.05 per cent or 8 millivolts (whichever is greater). For input variations from 105-140 VAC.[4]

Regulation (load) . . . . . Less than 0.10 per cent or 15 millivolts (whichever is greater). For load variations from 0 to full load.

Transient Response . . . . . Output voltage is constant within regulation specifications for step function:

(line) . . . . . line voltage change from 105-140 VAC or 140-105 VAC.[4]

(load) . . . . . load change from 0 to full load or full load to 0 within 50 microseconds after application.

Ripple and Noise . . . . . Less than 1 millivolt rms with either terminal grounded.

Polarity . . . . . Either positive or negative terminal may be grounded.

Temperature Coefficient . Less than 0.025 %/°C

Internal Impedance . . . . .

LA 50-03A less than .008 ohms
LA100-03A less than .004 ohms
LA200-03A less than .002 ohms
LA 20-05B less than .06 ohms
LA 40-05B less than .03 ohms
LA 80-05B less than .015 ohms
LA 8-08B less than .5 ohms
LA 15-08B less than .25 ohms
LA 30-08B less than .15 ohms

AC INPUT . . . . . 105-140[4] VAC, 60 ± 0.3 cycle[5]

LA 50-03A . . . . . 360 watts[6]
LA100-03A . . . . . 680 watts[6]
LA200-03A . . . . . 1225 watts[6]
LA 20-05B . . . . . 390 watts[6]
LA 40-05B . . . . . 710 watts[6]
LA 80-05B . . . . . 1350 watts[6]
LA 8-08B . . . . . 415 watts[6]
LA 15-08B . . . . . 760 watts[6]
LA 30-08B . . . . . 1450 watts[6]

[4] *Except for Models LA50-03A, LA100-03A, and LA200-03A which have AC input voltage of 100-130 VAC. 105-140 VAC available upon request at moderate surcharge.*

[5] *This frequency band amply covers standard commercial power line tolerances in the United States and Canada. For operation over wider frequency band, consult factory.*

[6] *With output loaded to full rating and maximum input voltage.*

AMBIENT TEMPERATURE AND DUTY CYCLE . . . . . Continuous duty at full load up to 50°C (122°F) ambient.

OVERLOAD PROTECTION:

Electrical . . . . . Magnetic circuit breaker front panel mounted. Special transistor circuitry provides independent protection against transistor complement overload. Fuses provide internal failure protection. Unit cannot be injured by short circuit or overload.

Thermal . . . . . Thermostat, manual reset, rear of chassis. Thermal overload indicator light front panel.

INPUT AND OUTPUT CONNECTIONS: . . . . . Heavy duty barrier terminal block, rear of chassis. 8 foot, 3 wire detachable line cord.

METERS . . . . . Voltmeter and ammeter on metered models.

CONTROLS:

DC Output Controls . . . . . Voltage selector switches and adjustable vernier-control rear of chassis.

Power . . . . . Magnetic circuit breaker, front panel.

Remote Programming . . . Provision for remote programming over DC vernier bands.

Remote Sensing . . . . . Provision is made for remote sensing to eliminate effect of power output lead resistance on DC regulation.

Constant Current . . . . . Consult factory.

PHYSICAL DATA:

Mounting . . . . . Standard 19" Rack Mounting.

Size

LA 50-03A, LA20-05B, LA 8-08B 3½" H x 19" W x 14⅜" D
LA100-03A, LA40-05B, LA15-08B 7" H x 19" W x 14⅜" D
LA200-03A, LA80-05B, LA30-08B 10½" H x 19" W x 16½" D

Weight

LA 50-03A, LA20-05B, LA 8-08B 55 lb Net 85 lb Ship. Wt.
LA100-03A, LA40-05B, LA15-08B 100 lb Net 130 lb Ship. Wt.
LA200-03A, LA80-05B, LA30-08B 140 lb Net 170 lb Ship. Wt.

Panel Finish . . . . . Black ripple enamel (standard). Special finishes available to customers' specifications at moderate surcharge. Quotation upon request.

Internal Impedance .. Less than 10 ohms.
Ripple and Noise
Models 28, 28M .. Less than 10 MV rms.
Models 29, 29M .. Less than 5 MV rms.
Polarity ..... Ground either terminal.
AC Input ..... 105-125 VAC, 50-400 CPS.
Ambient Temperature Continuous duty, full load to 50°C.
Overload Protection.. AC fuse.
Size ..... 5¼" H x 19" W x 8" D.

PORTABLE AND BENCH MODELS

Condensed Data

MODEL 71

Patents Pending

PORTABLE MODEL 71

0-500 VDC 0-200 MA

0-50, 0-200 VDC bias **Price.....$310.00**

DC OUTPUT No. 1 (regulated for line and load)

VDC Range...0-500 **MA Range**...0-200

(continuously variable) (over entire VDC range)

Line Regulation .. 0.15% or 0.3V.
Load Regulation.. 0.15% or 0.3V.
Internal Impedance Less than 4 ohms.
Ripple and Noise . Less than 5 MV rms.
Polarity ..... Ground either terminal.

DC OUTPUT No. 2 (regulated for line only)

VDC Range	Internal Impedance	MA Range
0- 50 (no load)	5,500 ohms	Bias, High Imped.
0-200 (no load)	25,000 ohms	

Line Regulation... Better than 0.1%.
Ripple and Noise . Less than 5 MV rms.
Polarity ..... Pos. terminal connected internally to neg. terminal of DC output No. 1.
AC Input ..... 105-125 VAC, 50-60 CPS.
Ambient Temperature Continuous duty, full load to 40°C.
Size..... 13" H x 8¾" W x 14½" D.

MODEL 50

Patents Pending

BENCH MODEL 50

0-500 VDC 0-500 MA

0-50, 0-200 VDC bias **Price.....$440.00**

Size..... 12½" H x 22" W x 15" D.

For ratings, see data listed under Model 50R.

MODEL 25

Patents Pending

PORTABLE MODELS 25, 26

100-200, 200-325 VDC 0-100 MA

Model	VDC Range	MA Range	Price
25	200-325	0-100	$69.50
26	100-200	0-100	79.50

Line Regulation ..... Better than 1%.
Load Regulation .... Better than 1%.
Internal Impedance .. Less than 10 ohms.
Ripple and Noise.... Less than 10 MV rms for Model 25.
Less than 5 MV rms for Model 26.
Polarity ..... Ground either terminal.
AC Input..... 105-125 VAC, 50-400 CPS.
Ambient Temperature Continuous duty, full load to 40°C.
Overload Protection . AC and DC fuses.
Size ..... 8" H x 14" W x 6" D.

S-12	12½ x 22 x 15	110	158
S-13	13 x 8¾ x 14½	49	85

GENERAL SPECIFICATIONS

TESTING Every Lambda power supply is electrically tested to meet every electrical catalog specification. There is a large safety margin between published maximum specifications and factory test limits. This tolerance is incorporated in the specifications to allow for normal industrial component deviations. Tube replacements may be made with any equivalent tubes meeting E.I.A. specifications.

INPUT 105-125 VAC, 50-400 CPS, single phase. Exceptions: Models 50, 50R and 71—105-125 VAC, 50-60 CPS, LA Series—105-140 VAC on 20-105 VDC and 75-330 VDC Models; and 100-130 VAC on 0-34 VDC Models; 60 ± 0.3 cycle. For operation over wider frequency band, consult factory.

DC OUTPUT *Voltage Range:* Continuously variable over ranges specified, except where otherwise noted.

Current Range: The current ranges given apply to the entire DC output voltage range, and over entire AC input voltage range, no "de-rating" is necessary.

Polarity: Either positive or negative terminal may be grounded.

AC OUTPUT The AC output is unregulated, isolated and ungrounded. It has a value of slightly higher than 6.3 V (when fully loaded) at an input of 115 VAC. This value allows for voltage drop in connecting leads. Dual outputs may be connected in series or parallel.

DUTY CYCLE Continuous duty at full load.

METERS Where meters are indicated, a separate voltmeter and milliammeter are provided.

OVERLOAD PROTECTION Ample protection is provided against external overload and internal failure conditions by means of fuses.

Circuit breakers of the magnetic, "trip-free" type are employed in Models 50, 50R, 71, LT and LA series, as protection against external overloads. And in the LT and LA series, the transistor complement is independently protected by special transistor circuitry.

STYLE Rack Models are designed for mounting on standard 19" relay racks.

Bench Models are provided with compact, specially-designed, ventilated cabinets equipped with carrying handles. The power supply units may be removed from their cabinets for mounting in standard relay racks (except Models 25, 26 and 71).

RATINGS AND COMPONENTS All components used are of the highest quality and are operated well within manufacturers' ratings. Hermetically sealed, oil-filled capacitors are used exclusively, except in LT series and LA series, where special high purity foil, long-life electrolytics are used. Hermetically sealed transformers designed to MIL-T-27A are used in the LA series, LT series and Com-Pak series. Ample safety factors are provided in the design to insure the long life, and the dependable, trouble-free operation so desirable in industrial and laboratory applications.

All specifications and prices subject to change without notice.

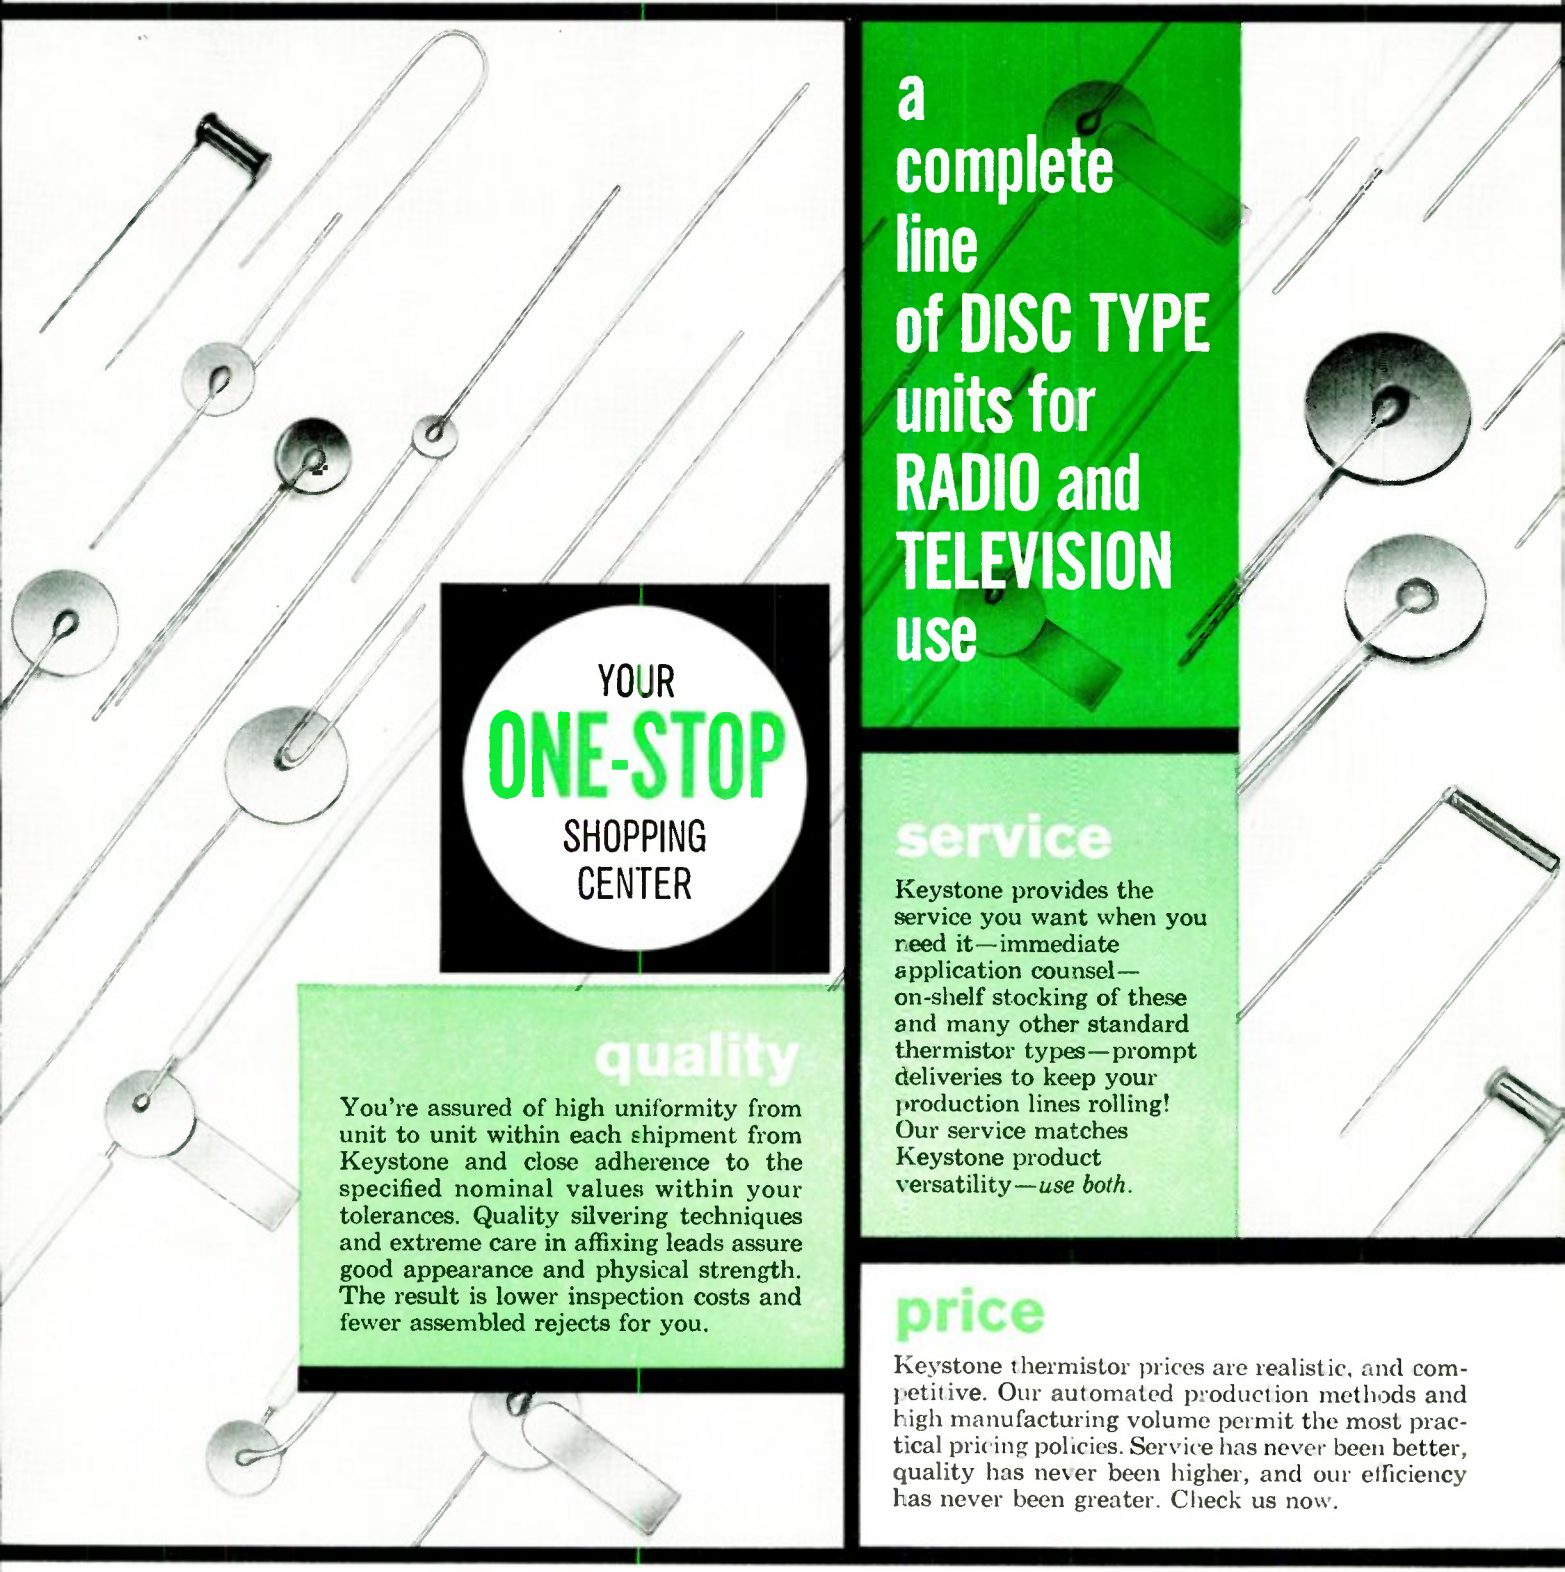
FROM THE **KEYSTONE** **THERMISTOR** DIVISION



a complete line of DISC TYPE units for RADIO and TELEVISION use

YOUR **ONE-STOP** SHOPPING CENTER

quality

You're assured of high uniformity from unit to unit within each shipment from Keystone and close adherence to the specified nominal values within your tolerances. Quality silvering techniques and extreme care in affixing leads assure good appearance and physical strength. The result is lower inspection costs and fewer assembled rejects for you.

service

Keystone provides the service you want when you need it—immediate application counsel—on-shelf stocking of these and many other standard thermistor types—prompt deliveries to keep your production lines rolling! Our service matches Keystone product versatility—*use both.*

price

Keystone thermistor prices are realistic, and competitive. Our automated production methods and high manufacturing volume permit the most practical pricing policies. Service has never been better, quality has never been higher, and our efficiency has never been greater. Check us now.

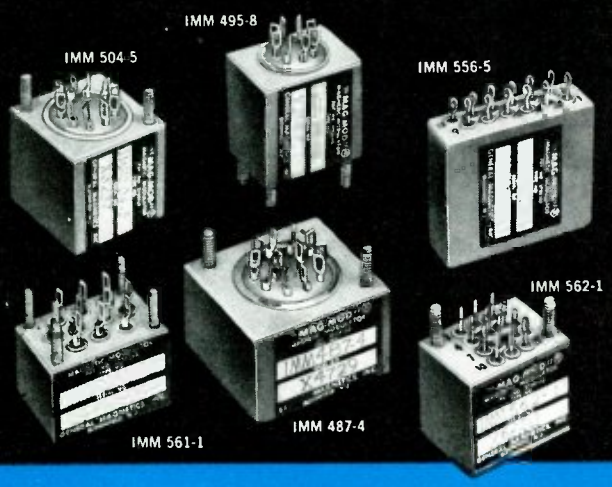
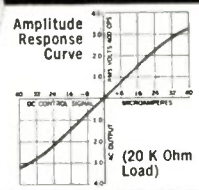
THERE IS NO SUBSTITUTE

Specify "MAG MOD"® miniaturized

For the ultimate in—

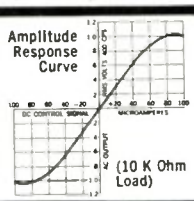
RELIABILITY
REPEATABILITY
SUPERIOR
PERFORMANCE





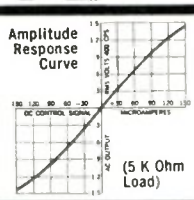
Input Magnetic Modulator
Type No. IMM 487-4

Subminiature "MAG MOD"® featuring high input signal sensitivity and high AC output impedance. Male or female mounting.



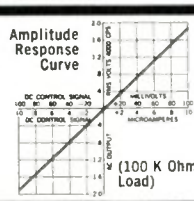
Input Magnetic Modulator
Type No. IMM 495-8

Subminiature "MAG MOD"® featuring wide band width, multiple signal input circuits, extreme zero stability from −65°C to +135°C, low null amplitude or noise level. Mounting available male or female.



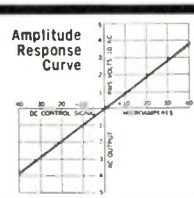
Input Magnetic Modulator
Type No. IMM 504-5

Subminiature "MAG MOD"® featuring low input and output impedance, resistance vs. temperature compensated input, extreme zero stability, repeatability and insignificant hysteresis. Supplied with male or female mounting.



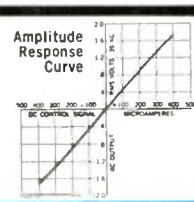
Input Magnetic Modulator
Type No. IMM 562-1

Subminiature "MAG MOD"® featuring 4 KC carrier operation, wide frequency band width, high output impedance and voltage range. Mounting male or female.



Input Magnetic Modulator
Type No. IMM 561-1

Subminiature "MAG MOD"® featuring low carrier energy level operation, very wide frequency band width, wide output operating range, minimum size and weight. Mounting male or female. May be mounted directly on printed circuit boards.



Input Magnetic Modulator
Type No. IMM 556-5

Subminiature "MAG MOD"® featuring high frequency carrier operation (35 KC), flat construction for printed circuit mounting, low output impedance and clean output fundamental frequency wave form. Mounting supplied male or female.

Designed for Subminiature Circuit Assemblies and Printed Circuit Card Configurations

New miniature designs of these reliable "MAG MODS"® make them ideal for incorporation into transistorized printed circuit assemblies. There is no sacrifice of dynamic response. They offer the engineer/designer the solution to problems involved in a wide range of data systems where analog circuit operations are encountered. To insure complete flexibility, the mechanical mounting on any "MAG MOD" may be modified to conform to your particular packaging requirements.

- **1% repeatability throughout entire service life**
- **Negligible hysteresis**
- **Faster response time**
- **Extreme stability over a wide temperature range**
- **Infinite service life**
- **Extremely lightweight — compact design**

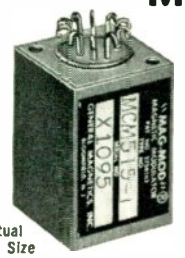
Magnetic Multiplying Modulator Model MCM 515-1



Actual Size

The MAGNETIC MULTIPLIER is a miniaturized magnetic modulator specifically designed to deliver an analog output voltage which is the continuous product of two variable input voltages. One of these is an excitation voltage which varies over a pre-determined range; in this case, 0 to 1 VRMS 400 cycles per second. The other signal is a DC current which varies between 0 and ±400 μa. The output voltage is 400 cycles AC, and is always in phase or 180° out of phase with the variable excitation or fixed reference, i.e., in phase when the variable amplitude DC signal is positive, and 180° out of phase when the DC signal is negative. The general schematic is illustrated in Fig. 1. The relationship between variable alternating supply signal voltage E_S, variable direct current control signal E_C, and the alternating load voltage E_L having a sinusoidal wave shape is denoted by the equation—

$E_L = \text{Constant} \times E_S \times E_C$.

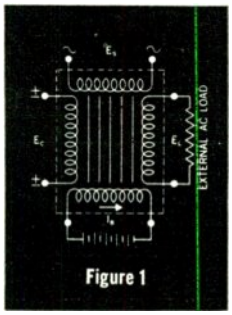


Figure 1

This expression, which defines the fundamental principle of the four quadrant MAGNETIC MULTIPLYING MODULATOR, can be clearly illustrated by linear transfer response curve families as shown at right, in Figure 2-A and Figure 2-B.

Illustrating:

(1) **Load voltage E_L as a function of alternating supply signal voltage E_S with control DC signal voltage E_C as a parameter.**

(2) **Load voltage E_L as a function of control DC signal voltage E_C with alternating supply voltage, E_S as a parameter.**

With linearity response curves held to within approximately 1 to 2% of theoretical straight lines, the product accuracy of the fundamental equation will be within 2 to 5% of the theoretical product.

SPECIFICATIONS MODEL MCM 515-1	
Variable Excitation Carrier Voltage and Frequency	Variable AC Signal 0 to 1 V RMS 400 cps
Control Signal Winding DC Resistance	DC Signal Winding Resistance 2650 ohms
Input Control Signal Range	Variable DC Signal 0 to ±400 μa
Amplitude Modulated AC Output Range	0 to 0.9 V RMS @ 400 cps Phase Reversing
Null Amplitude (Noise Level) mv RMS at Max. AC Excitation	5 mv RMS
Output Impedance	Approx. 3500 ohms
External Load (Suggested)	Approx. 25 K ohms
Null Drift (In terms of Input Signal) −65°C to +135°C	±2 μa over Temperature Range
Hysteresis (% of Input Control Signal)	0.5% Maximum
% Harmonic Distortion in Output AC Modulated Envelope	Less than 5%
Overall Dimensions (In Inches)	27/32 x 27/32 x 1 3/16
Type of Mounting	4-40 Insert or Stud
Weight	Approx. 1 Ounce

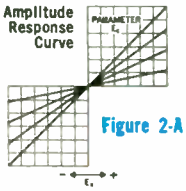

Figure 2-A

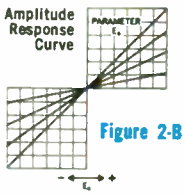

Figure 2-B

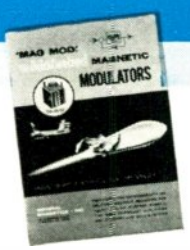
Typical "Mag Mod" Circuit Applications—

Include algebraic addition, subtraction, multiplying, raising to a power, controlling amplifier gain, mechanical chopper replacement in DC to fundamental frequency conversion, filtering and low signal level amplification.

Consult General Magnetics for magnetic amplifier components of proven reliability. These dependable instruments are widely employed in automatic flight systems, fire control, analog computers, guided missiles, nuclear equipment, antennas, gun turrets, commercial power amplifiers and complete control systems. Miniature, subminiature, standard and customized types available.



Call or write for new Brochure 102 on "MAG MOD" Miniaturized Magnetic Modulators and Magnetic Multiplying Modulators. Please address inquiries on company letterhead.

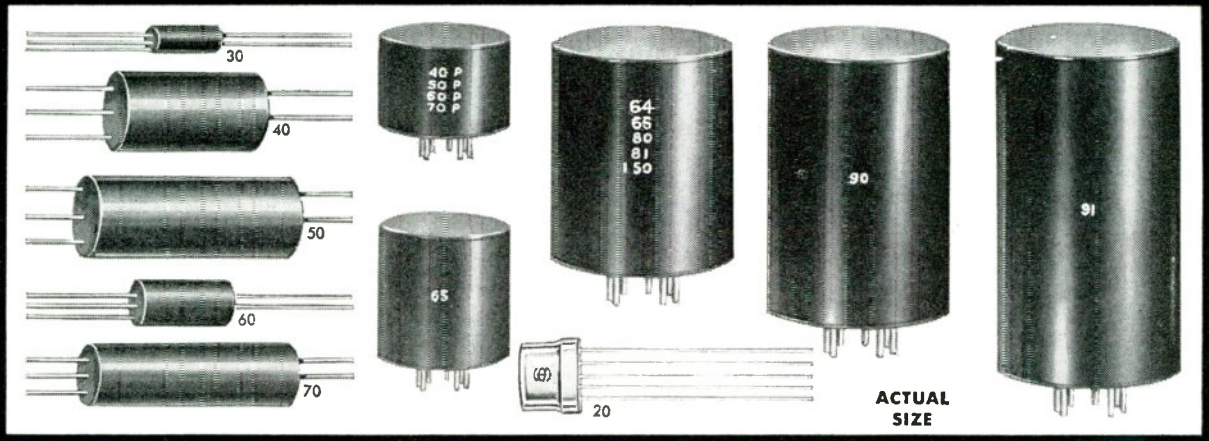
World Radio History

THE MOST COMPREHENSIVE LINE OF SOLID STATE ELECTRONIC CHOPPERS



microminiature | lightweight | low power | high speed | rugged | indefinitely long life
non-mechanical | inertialess | low level | high efficiency | linear | temperature stable

The transistor chopper (or modulator) is a solidly encapsulated unit designed to alternately connect and disconnect a load from a signal source. It may also be used as a demodulator to convert an a.c. signal to d.c. It is capable of linearly switching or chopping voltages over a wide dynamic range which extends down to a fraction of a millivolt and up to 150 volts or more. Unlike mechanical choppers which can only be designated to operate over a narrow and comparatively low frequency range due to mechanical limitations, this transistorized chopper is an inertialess device that can be driven from d.c. to hundreds of kilocycles.

The switching circuitry used operates the transistors in a manner which provides stability and freedom from drift over a wide temperature range. Only carefully selected and matched transistors are utilized.

The Models 20, 30, 40, 40P, 50, 50P, 60, 60P, 70 and 70P are direct-coupled so as to provide the circuit designer with the most basic chopper from which to synthesize solutions to special circuit problems. The Models 64, 65, 66 and 150 are transformer-coupled for isolation purposes. The Model 65 is for low-level voltages and the Model 150 for high-level signals. The Models 64 and 66 are for operation from 400 cps and 600 cps sine wave drive at 115 volts a.c. The Models 80, 81, 90 and 91 VIBRACHOPPERS are unique in the chopper field in that they require DC rather than AC drive.

These units are practically immune to the effects of shock and vibration making them ideal for military, space vehicle and portable applications; or where power conservation, miniaturization and elimination of maintenance are a necessity. The transistor chopper has an inherently long life and is not subject to contact bounce, wear, pitting or burning.

OHIO SEMICONDUCTORS

Hall Effect and Thermoelectric

MINIATURIZED SUB-SYSTEMS

Halltron MC Series

MAGNETIC CIRCUITS

These circuits combine the Halltron (Hall Effect device) with an effective magnetic circuit resulting in a useful electronic multiplier. (MC-1 series for normal circuits. MC-11 and MC-21 series for premium applications.)

Halltron

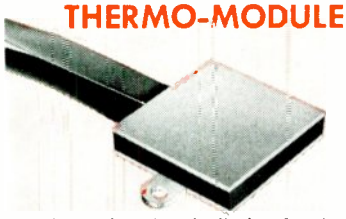
Model PC-500

POWER COMPUTER

A ruggedized device that provides an instantaneous D.C. output proportional to power. The output is sufficient to drive many standard recording instruments.

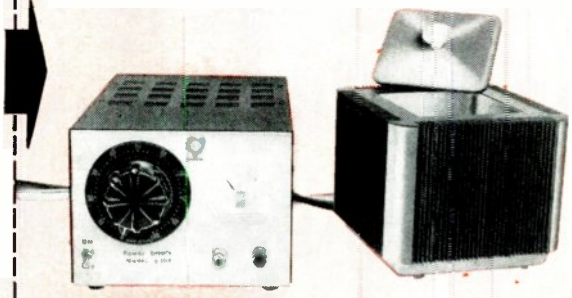
Model TA-20M

THERMO-MODULE



Made with electrically insulated top and bottom plates, ready for mounting in special cooling and heat pumping applications.

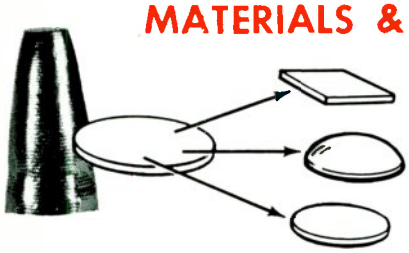
COMPLETE THERMOELECTRIC SYSTEMS

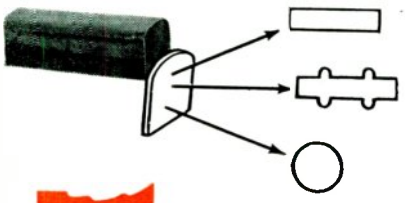


Shown is a typical application of Ohio Semiconductors' Thermoelectric capability. Components, modules, power supplies, and complete cooler systems are developed to meet customers' requirements.

COMPOUND SEMICONDUCTORS

MATERIALS & ALLOYS



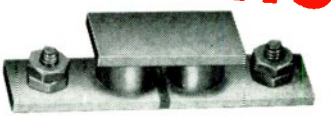


Special configurations, IR windows and lenses, crystals and ingots:

- Indium Antimonide (Poly-and single-crystal)
- Indium Arsenide
- Bismuth Telluride
- Gallium Arsenide
- Lead Telluride

Hall Effect & Thermoelectric MINIATURIZED COMPONENTS

MODEL TA-12 "Thermo-Cell" THERMOELECTRIC JUNCTION—used for spot cooling and reversible heat pumping.



HALLTRONS for application in customers' magnetic fields (Models HS-51 and HR-31).

Model HP-310 HALLTRON

A miniature Hall Effect device used as a probe to meet small space needs.

Model MS-41

MAGNETORESISTOR — Exhibits large electrical resistance changes as a function of applied magnetic field density.

DIVISION OF TECUMSEH PRODUCTS CO.

OHIO SEMICONDUCTORS

1205 Chesapeake Avenue • Columbus 12, Ohio • HU 6-9561

Pioneer in the design, development and production of compound semiconductors, and components and sub-systems, for electronic, thermoelectric and infrared applications.

BENDIX INSTRUMENTATION, CONTROL SYSTEMS, AND SUPPORT EQUIPMENT

for commercial and military aircraft, missiles, and space vehicles

INSTRUMENTATION SYSTEMS

Air Data Computer • Attitude Gyro
Continental Compass • Dead Reckoning Computer
Directional Gyro • Fuel Management
Gyro Flux Gate* Compass
Integrated Cockpit Display
Navigational Computer • Off-Course Computer
Polar Path* Compass • Propulsion Monitoring
Radio Magnetic Indicators • Servo Monitoring
Specialized Navigation Devices
Stable Platforms • Wind Memory Computers

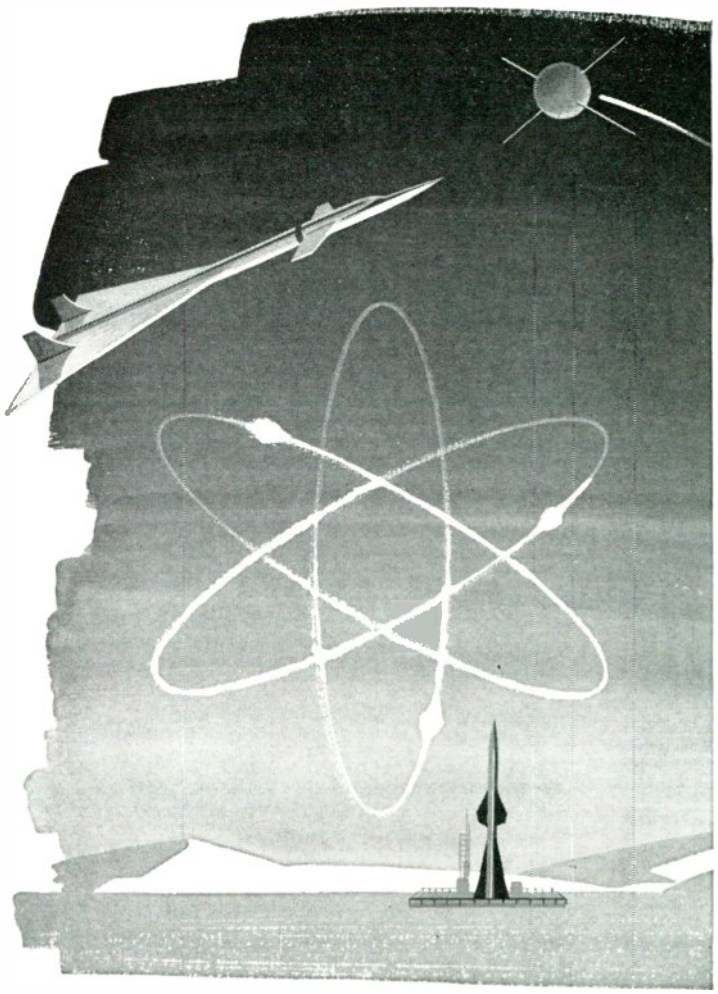
FLIGHT CONTROL SYSTEMS

Automatic Cruise Controls
Automatic Landing Approach Controls
Automatic Pilots (including Solid State models)
Central Digital Computers • Flight Directors
Hot Gas Flight Control and Stability Systems
Inertial Guidance Systems
Missile Control Systems
Pattern Programmers • Penetration Computers
Pilotless Aircraft Guidance Systems
Satellite and Space Vehicle Control Systems
Self-Adaptive Controls
Stability Augmentation Devices
Surface Power Controls
Throttle Servo Controls • Thrust Controls

BENDIX SUPPORT EQUIPMENT

Adapters for Automatic Testers
Hydraulic, Pneumatic, and Electrical Power Units
Manual and Automatic Test Equipment
Training Devices and Simulators

*TRADEMARK, THE BENDIX CORPORATION



Eclipse-Pioneer Division, The Bendix Corporation, is the nation's foremost developer and manufacturer of these systems. As aviation, missile, and spacecraft needs grow constantly more complex and critical, it will pay you more than ever to take advantage of our broad experience and unmatched research and production facilities.

Let "By Bendix" be your guide to "Buy Bendix"

District Offices: Burbank and San Francisco, Calif.; Seattle, Wash., Dayton, Ohio, and Washington, D. C. Export Sales and Service: Bendix International Division, 205 E. 42nd St., New York 17, N. Y.

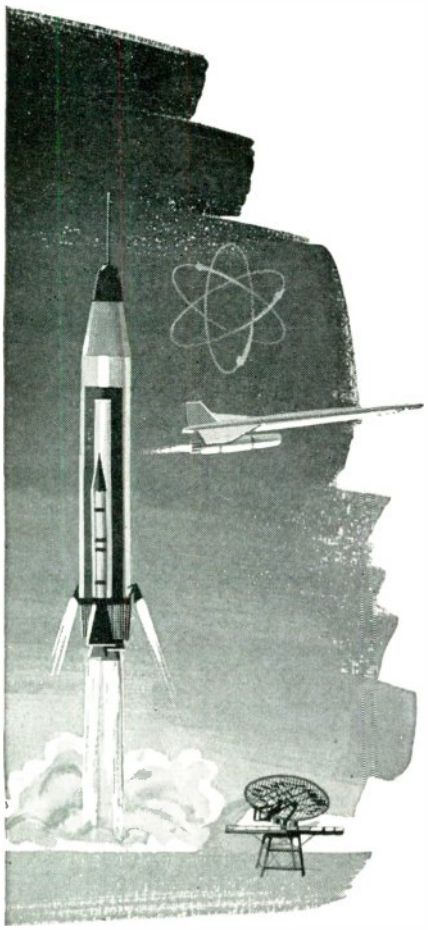
BENDIX PRECISION COMPONENTS

Premium quality units for servo mechanism and computing equipment —available quickly and in wide selection



Let "By Bendix" be your guide to "Buy Bendix"

BENDIX 400-cycle Synchros

(Frame sizes: 5, 8, 10, 11, 15, 22)

Control Transformers—high impedance, low impedance and special purpose

Differentials—synchronous and servoed systems

Receivers—standard and special purpose

Resolvers—high impedance, low impedance, high accuracy, feedback, and compensated

Transmitters—1-, 4-, and 20-power

BENDIX Gyros

Rate Gyro Transmitters

Directional Gyro Transmitters

Free Gyros

Roll Gyro Transmitters

Stable Platforms

Vertical Gyro Transmitters

BENDIX Motors, Tachometers and Motor Tachometers

(Corrosion-resistant; high temperature; Frame sizes: 5, 8, 10, 11, 15, 18, 23, 28)

Gear Head Motors

Integral Gear Heads

Low-Inertia Servo Motors

Motor Tachometers

Precisior Induction Tachometer Generators

Rate Generators

BENDIX Packaged Components

Custom packaging of such typical devices as . . .

Azimuth Counters

Cam Compensators

Clutched Autosyn* Synchros

Coded Commutators (shaft position-to-digital converter)

Coordinate Converters

Dual-Speed Synchros

External Slip-Ring Autosyn Synchros

Follow-Up Mechanisms

Miniature Differential Gear Assemblies

Servo Assemblies

Servo Torque Units

Solenoid Toggle Switches (corrosion-resistant)

BENDIX Radar Devices

Airborne Antenna Drive Units

Airborne Weather Radar Antennae

Ground Antenna Pedestals and Control Systems

*TRADEMARK, THE BENDIX CORPORATION

As the world's largest producer, we are a source for practically any type of precision component that you could want. Wide selection, fast delivery, low cost, and premium quality are yours when you do business with us.

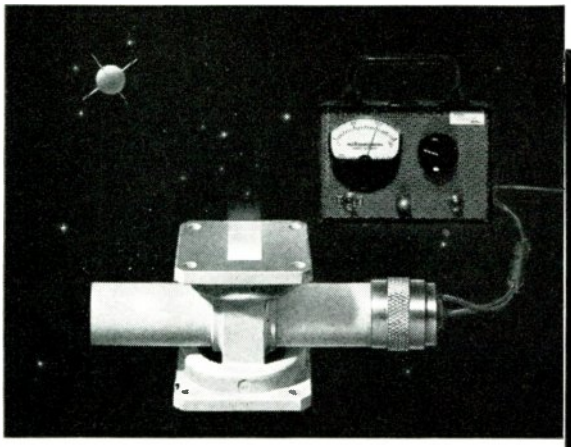
Bendix Craftsmanship at work for you

BENDIX ELECTRON TUBE PRODUCTS MEET CRITICAL DESIGN NEEDS

Bendix electron tube products listed on these two pages are a partial representation of the many special-purpose tubes we make. Others include gas noise source and spark gap types—also a HY-G-500® line of metal ceramic receiving tubes. If the tube you need doesn't exist, our extensive design experience and production facilities can provide it.



GAS NOISE SOURCE TUBES

25 AMPS — 0.5% REGULATION

520A $575.00

Continuously variable output voltage - - no range switching. Continuously variable current limit. Auto-Series and Auto-Parallel operation†, Remote Programming, Remote Sensing. High efficiency circuit features unusual immunity to line transients.

520A: 0-36 volts @ 0-25 amps

Load Regulation: } Line Regulation: }	Combined, less than 0.5%
Ripple and Noise	Less than 1%
Size	7"H x 16-1/2"D x 19"W
Weight	85 pounds

25 AMPS — 0.03% REGULATION

814A $775.00

Continuously variable. Constant Voltage and Constant Current operation--no range switching. Auto-Series and Auto-Parallel operation†, Chopper Stabilization optional‡, Remote Programming, Remote Sensing. Continuously variable current limit in Constant Voltage operation; continuously variable voltage limit in Constant Current operation.

814A: 0-36 volts @ 0-25 amps

	Constant Voltage Operation	Constant Current Operation
Load Regulation	0.03% or 10 mv	0.3% or 75 ma
Line Regulation	0.03% or 10 mv	0.3% or 75 ma
Ripple and Noise	1 millivolt	25 milliamps
Size	7"H x 20"D x 19"W	
Weight	100 pounds	

60 VOLT, 7.5 AMP SUPPLY

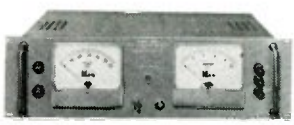
810B $795.00

Continuously variable. Constant Voltage and Constant Current operation--no range switching. Auto-Series and Auto-Parallel operation†, Chopper Stabilization optional‡, Remote Programming, Remote Sensing. Continuously variable current limit in Constant Voltage operation; continuously variable voltage limit in Constant Current operation.

810B: 0-60 volts @ 0-7.5 amps

Load Regulation	0.02% or 10 mv
Line Regulation	0.01% or 5 mv
Ripple and Noise	Less than 1 mv
Size	5¼" H x 16¾" D x 19" W
Weight	60 pounds

"FIXED" VOLTAGE — 10 AMP OUTPUT



812C $550.00

Output voltage span covered in eight ranges; range easily changed to meet new requirements. Remote Sensing, Front and rear output terminals.

812C: 0-32 volts @ 0-10 amps

Load Regulation	0.05% or 16 millivolts
Line Regulation	0.03% or 9.6 millivolts
Ripple and Noise	1 millivolt
Size	5-1/4"H x 16"D x 19"W
Weight	52 pounds

†AUTO-SERIES & AUTO-PARALLEL OPERATION

Automatic series and automatic parallel operation of many H-Lab supplies, is possible. All necessary wiring changes and interconnections are accomplished via rear terminal strip connections. These multiple groupings feature:

1. One-Knob Master Control
2. Automatic Voltage Equalizing
3. Automatic Current Equalizing
4. Full Range Control From Any Selected Module

For details, circle #50 on Reader Service Card

Weight	35 pounds	50 pounds	50 pounds

TWIN RACK MOUNTING SUPPLY

Two independent supplies--can be connected in series for 0-72 volts @ 0-1.5 amps. Continuously variable output voltage--no range switching. Remote Sensing, Front and rear output terminals, Convection cooling--no moving parts.

802B $580.00

802B:	Twin 0-36 volts @ 0-1.5 amps
Load Regulation	0.01% or 3.6 millivolts
Line Regulation	0.01% or 3.6 millivolts
Ripple and Noise	200 microvolts
Size	3-1/2"H x 15"D x 19"W
Weight	28 pounds

PROGRAMMABLE RACK SUPPLY

Continuously variable output--no range switching. Remote Programming, Remote Sensing. Front and rear output terminals. Convection cooling--no moving parts.

806AM $350.00

806AM:	0-20 volts @ 0-2 amps
Load Regulation	3 millivolts
Line Regulation	3 millivolts
Ripple and Noise	200 microvolts
Size	3-1/2"H x 15"D x 19"W
Weight	20 pounds

CHASSIS-MOUNTING PLUG-IN POWER MODULES

All input, output, and control connections made via octal plug. Continuously variable output voltage--no range switching. Remote Programming, Remote Sensing, Convection cooling--no moving parts. Rack Mounting Panels available.

	850 $197.00 0-15 volts, 0-1.0 amp	860 $197.00 0-36 volts, 0-0.5 amp
Load Regulation	3 millivolts	3 millivolts
Line Regulation	3 millivolts	3 millivolts
Ripple and Noise	500 microvolts	500 microvolts
Size	6-1/2"Lx3-7/16"Wx6"H	6-1/2"Lx3-7/16"Wx6"H
Weight	6 pounds	6 pounds

STRAIN GAGE POWER SUPPLY

Continuously variable output voltage--no range switching. Chopper Stabilization optional‡, Plug-in Connectors Optional, Remote Sensing. Mount nine abreast on 5-1/4" rack panel. Insulation resistance greater than 10,000 megohms. Low capacity from AC line to output terminals insured by multiple-shielded transformer.

801C $110.00

801C:	0-25 volts @ 0-0.2 amps
Load Regulation	2 millivolts
Line Regulation	2 millivolts
Ripple and Noise	100 microvolts
Size	5"H x 14-7/8"D x 1-5/8"W
Weight	4 pounds

‡OPTIONAL CHOPPER STABILIZATION

For applications requiring tighter regulation specs and greater long-term stability, a chopper-stabilized amplifier can be added to many H-Lab power supplies. This amplifier is completely transistorized and utilizes H-Lab's own semiconductor chopper, thus eliminating the periodic replacement cost and inconvenience which normally accompany the use of mechanical choppers.

For details, circle #51 on Reader Service Card

Write for new catalog describing the complete H-Lab line.

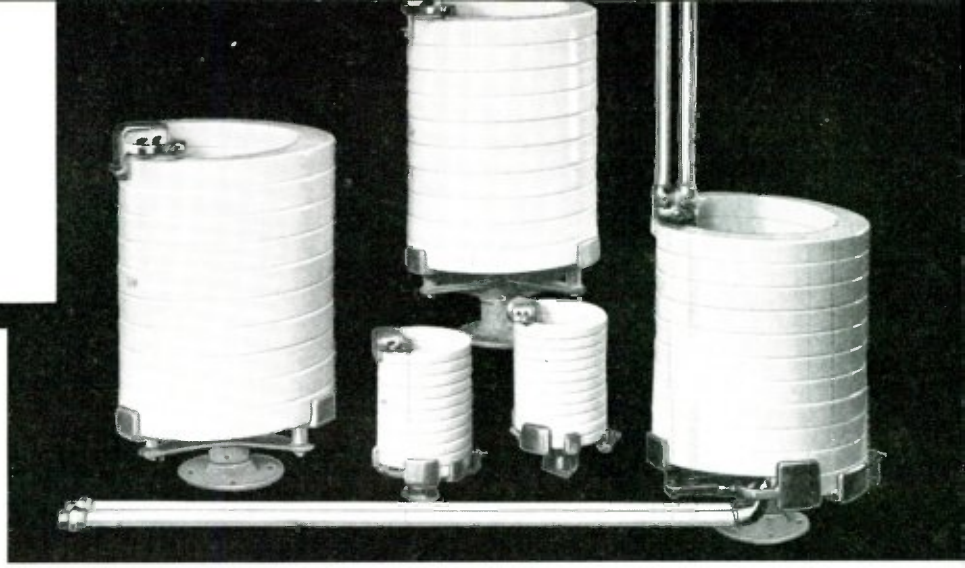
World Radio History

Lapp



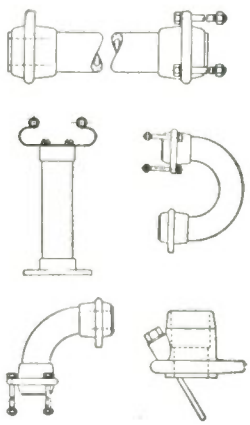
TUBE SUPPORTS
for air-cooled tubes

No longer is it necessary for equipment manufacturers to design supports for forced-air-cooled tubes. After producing many such special designs, Lapp has engineered and built a complete series of insulating supports for air-cooled tubes. Use of these supports facilitates design of transmitter and other high-power circuits. Simple, compact, efficient and attractive in appearance, in porcelain or steatite, they make for economical production, easy interchangeability, and availability of replacement units. Write for Bulletin 301, with complete description and specification data.

For details, circle #52 on Reader Service Card

INSULATION FOR WATER-COOLED SYSTEMS

For carrying cooling water which must undergo a change in potential, use of Lapp porcelain eliminates troubles arising from water contamination and conductivity, sludging and electrolytic attack of fittings. Permanent cleanness and high resistance of cooling water is assured—for positive cooling and long tube life.

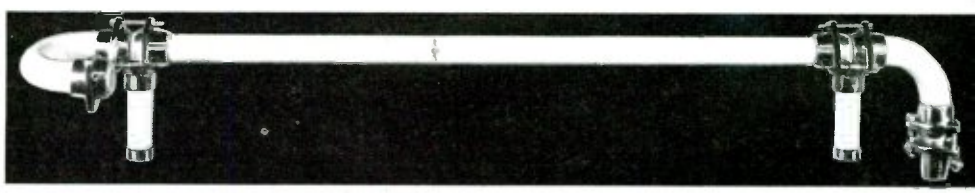


LAPP PORCELAIN WATER COILS

Twin-hole and single-hole models in sizes to provide flow of cooling water from 2 to 90 gallons per minute. Cast aluminum mounting bases, lead pipe or flexible metal hose for attachment.

LAPP PORCELAIN PIPE

Inside diameters ¾" to 3", in straight, 90° and 180° elbows, fittings. Swivel-type connections. Standoff insulators attach directly to fitting bolts. *Write for Bulletin 301 with specifications for Lapp Porcelain Water Coils and Porcelain Pipe.*



LAPP GAS-FILLED CONDENSERS

Capacitance for high-voltage, high-current duty

The record of more than 18 years' service, in thousands of installations, proves the reliability of the Lapp Gas-Filled Condenser. For duty at high voltages and high currents, this unit offers the advantages of extreme compactness . . . low loss . . . high safety factor . . . constant capacitance under temperature variation . . . grounded tuning shaft . . . and rugged sturdiness. Units available in four tank diameters, 7" to 18" . . . in fixed or variable capacitance . . . capacitances to 30,000 mmf; current ratings to 390 amps at 1 mc; voltages to 85 Kv peak. Write for Bulletin 302.

World Radio History

ENTRANCE INSULATORS

To eliminate losses which occur in ordinary types of bushings at radio frequency, Lapp units use air as major insulation, porcelain path being lengthened by its "bowl" shape. In wide variety of types for most electrical and mechanical requirements.

STAND-OFF INSULATORS

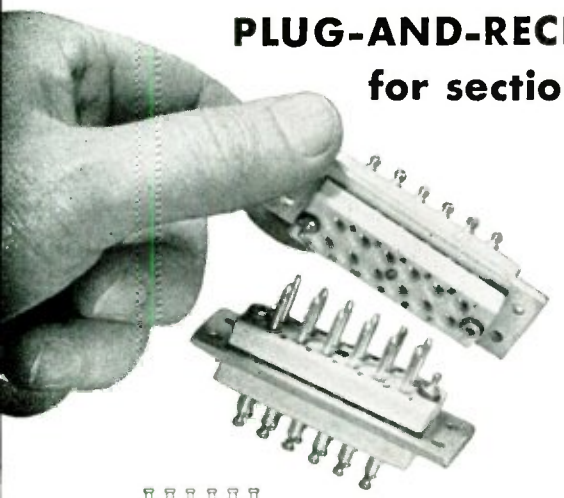
Dependable mechanical and electrical performance—and trim good looks. Hundreds of standard and special types available.

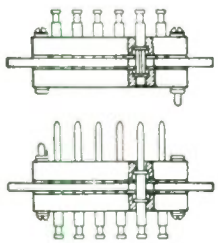
Write for Bulletin 301, listing entrance and stand-off insulators.

ANTENNA STRAIN INSULATORS

The largest of the porcelain rod insulators shown develops 12,000 lb. strength. Available, as specified, with rain shield and/or corona rings. Smaller units, in porcelain or steatite, for all strain or spreader use. Engineering and production facilities also available for special performance units See catalog 301.

PLUG-AND-RECEPTACLE UNITS for sectionalizing circuits

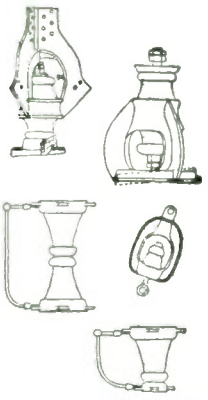




For panel-rack or other sectionalized circuits, Lapp offers a variety of plug-and-receptacle units. Any number of contacts can be provided (in multiples of twelve). Male and female contacts are full floating, for easy alignment and positive contact. Contacts silver plated, terminals tinned for soldering. Insulation is steatite, the low-loss ceramic . . . non-carbonizing even under leakage flashover resulting from contamination, moisture or humidity. Write for complete electrical and mechanical specifications and recommendations.

For details, circle #53 on Reader Service Card

ANTENNA TOWER INSULATORS



Most of the world's radio towers are supported by Lapp insulators, including the tallest guyed mast ever built. Through the Lapp "compression cone," immense loads can be carried by electrical porcelain. Write for data on Lapp footing insulators for self-supporting radiators, mast-base insulators, or guy insulators.

SPECIAL ASSEMBLIES

Lapp business is electrical porcelain, its application, design, manufacture, and assembly. Our skill is in our knowledge of the capabilities, and limitations, of ceramic insulation . . . in engineering ingenuity to meet specified requirements . . . and in efficient production. If you have need for insulating parts and associated subassemblies, we may be able to show you how they can be made most economically, to perform most efficiently.

* Panel Mount

Why do engineers specify JFD trimmer capacitors and tuners?

Ultra linear tuning, high stability, extreme compactness and invulnerability to shock and vibration are some of the characteristics on which they know they can rely.

Precision machined bushings and full threaded anti-backlash adjust mechanism insure perfect coaxial alignment of piston with cylinder. The JFD patented trouble-free design *eliminates* complex direct traverse mechanisms with their additional encumbering parts, greater weight and increased physical size. Result: *no* tuning reversals, absolute *repeatability*, complete *reliability*, lighter weight with JFD trimmers.

Write today for the JFD 1961 component catalog —the most comprehensive ever published, or see your nearest JFD industrial distributor.

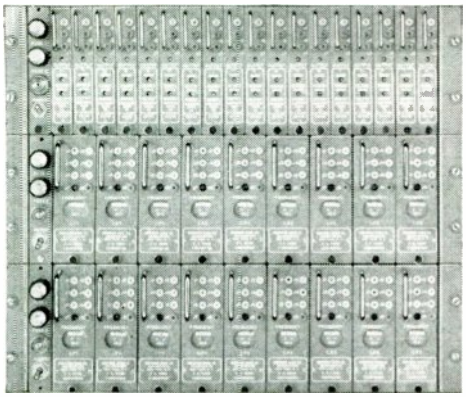
FIXED METALIZED INDUCTORS FOR PANEL MOUNT OR PRINTED CIRCUIT MOUNT

23 values available off the shelf from 0.05 μh to 2.0 μh-Q factor up to 180.
High stability over wide operating temperature. Write for our catalog.

** Standard panel mount * Miniature panel mount † Length Applicable for Panel Mount Types Only.

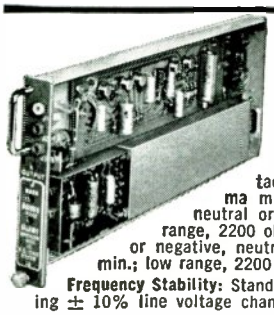
World Radio History

Northern Radio TRANSISTORIZED Voice Frequency Carrier Telegraph Systems



18 CHANNELS IN ONLY 15¾" PANEL SPACE

Top shelf shows 18 FS Tone Keyers, Type 211, Model 1; Next 2 shelves contain 9 each FS Tone Converters, Type 212, Model 2.



FREQUENCY SHIFT TONE KEYER

Type 211, Model 1

Keying inputs, levels and impedances: 1: Contact keying (internal battery to "dry" contacts) 1 ma min.; 2. DC current pulses, positive or negative, neutral or polar; high range, 220 ohms, 30 ma. min; low range, 2200 ohms, 0.5 ma. min.; 3. DC voltage pulses, positive or negative, neutral or polar; high range, 100,000 ohms, 10 volts min.; low range, 2200 ohms, 1 volt min.

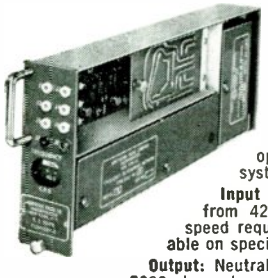
Frequency Stability: Standard Networks ± 2 cps total for all causes including ± 10% line voltage change and ± 25°C. from 25°C. temperature change.

Output Frequencies: All standard VF carrier channels from 425 to 3315 cps. Bandwidth dependent on keying speed requirements. Other frequencies and bandwidths available on special order.

Output Level and Impedance: 5 dbm maximum, into 600 ohms, unbalanced. May be paralleled with any number of other Keyers operating on different frequencies in the same audio system.

Power Requirements: 14 V DC, 15 MA. Two transistorized power supplies and one automatic change-over relay are mounted on the rear of each mounting shelf.

Dimension: ⅞" wide x 5¼" high x 10½" deep.



FREQUENCY SHIFT TONE CONVERTER

Type 212, Model 2

Input Level and Impedance: —48 dbm to +8 dbm into 600 ohms, unbalanced. May be paralleled with any number of other converters operating on different frequencies in the same audio system.

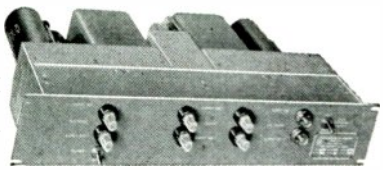
Input Frequencies: All standard telegraph VF channels from 425 to 3315 cps. Bandwidth dependent on keying speed requirements. Other frequencies and bandwidths available on special order.

Output: Neutral DC voltage pulses of 5 volts maximum across a 2000 ohm external load. Polar pulses ± 10 volts across a 2000 ohm external load. Output drives appropriate voltage-to-current converters, such as Northern Radio Type NRC 691 Transistor Relay which provides "Dry Contact" Keying to external battery supply.

Power Requirements: 14 V DC at 30 MA. Two transistorized power supplies and one automatic change-over relay are mounted on the rear of each mounting shelf.

Dimensions: 1⅞" x 5¼" x 11¾" deep. For rack mounting a number of these units, a shelf assembly is available accommodating nine (9) units in a panel height of 5¼".

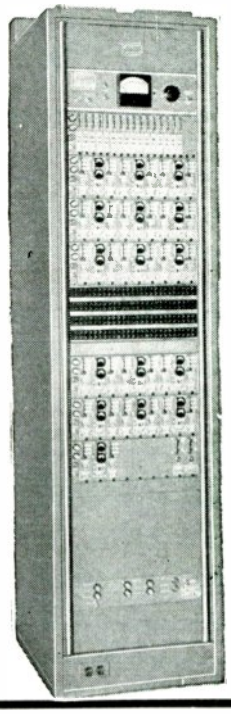
LINE BATTERY P.S. PANEL



The Northern Radio Line Battery Power Supply Panel, Type 227 Model 1, is used as a source of DC power for teleprinter, telegraph and similar circuits. It is equipped with two (2) Type 228 Model 1 Power Supplies, to provide DC requirements for a group of eighteen (18) or less teleprinter channels. The two Power Supplies are normally mounted on the Line Battery Power Supply Panel, Type 227 Model 1, with one Supply operating and the second "standing-by." An automatic transfer circuit is provided on the panel to place the "stand-by" unit in operation should the first supply fail. The Line Battery Power Supply Panel, Type 227 Model 1, is 3½" high x 19" long. The AC input and DC output circuits are isolated from each other and also from chassis so that either side of the circuit may be grounded, or left ungrounded as may be determined.

Technical Data:
AC Input: 115/230 volt. 50/60 cycles AC ± 10%. Output Voltage: 120 volts DC nominal. Maximum Output Current: 1.2 amperes. Maximum Output Ripple Voltage: 2%.

MILITARY EQUIPMENT AN/FGC-1 16-CHANNEL DIVERSITY SYSTEM



- Diversity switching sensitivity from —60 dbm to 0 dbm

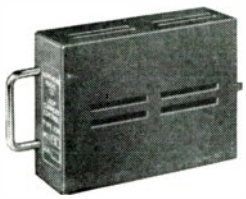
The Northern Radio Voice Frequency Telegraph Terminal, Type 235 Model 1, is a multi-channel frequency shift communications terminal used for transmission and reception of telegraph, teleprinter or telemetering signals over channels subject to fading or attenuation changes, such as long distance point-to-point radio circuits. It provides the necessary equipment for transmission of 16 intelligence channels over one (1) voice frequency circuit, and diversity reception of 16 similar channels, received through two (2) voice frequency circuits. The two (2) voice frequency receiving circuits are normally obtained from radio receivers arranged for space diversity reception. Means are provided to allow reception on a frequency diversity basis rather than space diversity. A combination of space and frequency diversity may be utilized for maximum reliability, when conditions are such as to require same. All the necessary equipment may be mounted in approximately ⅔ of one standard 7-foot telegraph rack.

PRINTER RELAY

Type 237, Model 1

The Northern Radio Printer Relay, Type 237 Model 1, is used as a coupling device between a DC teleprinter signal loop and the printer selector magnet. It replaces electro-mechanical signal relays and their associated local DC power supplies normally used with printers, providing the advantages of relays and improving printer performance but eliminating the maintenance problems which electro-mechanical relays introduce.

This device effectively isolates the reactance of the printer selector magnet, presenting a resistive termination to the signal loop. Several printers equipped with this device can, therefore, be connected in series with the same signal loop without harmful interaction between them. The Printer Relay may be used with either polar or neutral keyed signals. When neutral signals are supplied, the device automatically selects the proper operating level for the loop current supply, and can therefore tolerate large changes in absolute values of loop current without introducing appreciable distortion into the printer selector magnet. It normally mounts within the housing of the teleprinter.



LOOP CURRENT CONTROL

Type 238 Models 1 and 2

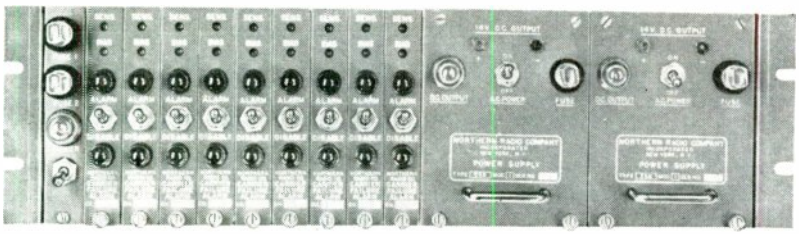
The Northern Radio Loop Current Control, Type 238 Model 1, is used as a current "normalizer" in DC teleprinter signal loops, to automatically maintain loop current at the optimum value despite changes in loop resistance or loop supply voltage.

The Loop Current Control, Type 238 Model 1, is designed for use in loops requiring a nominal 60 milliamperes operating current, while the Model 2 is designed for a nominal 20 milliampere circuit. Both models incorporate a calibration control to allow reasonable variations from these design values.

Input Impedance: Variable. Automatically changes as necessary to maintain "constant current" in the circuit to which connected. Maximum and minimum limit of operation are specified by allowable voltage drops across the terminals of the device.
Voltage Limits: Maximum—80 volts; Minimum—5 volts.
Operating Currents: Model 1: 60 milliamperes (adjustable 55-75 milliamperes). Model 2: 20 milliamperes (adjustable 10-30 milliamperes).

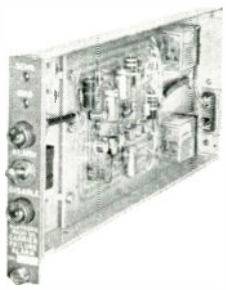
World Radio History

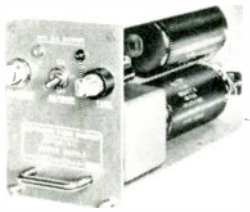
NEW CARRIER FAILURE ALARM Type 256 Model 1



This alarm instantly detects and tells you about any signal failure, no matter where it occurs. Installed in a communications system, it detects any loss of signal and immediately lights a lamp on its front panel and actuates the "remote" alarm circuits controlled by contacts of the alarm relay. Gradual signal or power deterioration may also be detected before it gets too serious—by pre-setting the threshold control to the desired level.

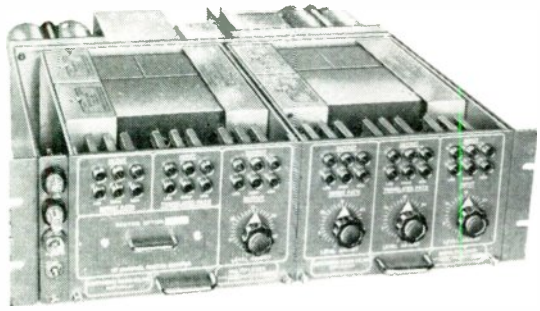
Use of transistors makes the unit more compact, reliable, and efficient than has ever before been possible. It is contained in a 7/8" x 5¼" x 11¾" housing. Internal heat is negligible, and any number of units may be mounted close together without danger of overheating. This is particularly valuable as a separate unit is used for each channel being monitored.





POWER SUPPLY TYPE 258 Model 1

A solid-state-regulated rectifier contained in a 3-31/32" x 5¼" x 11¾" housing, used as a source of operating power for transistorized equipment such as the Carrier Failure Alarm Type 256 Model 1. DC output is 14 V ± 1½ V (regulated), 32 V ± 4 V (unregulated). Maximum output is 420 ma DC (regulated), 500 ma DC (unregulated).



Used with twin-channel, single-sideband radio circuits operating in the hf range, these units derive two vf circuits from each channel by means of frequency division multiplexing. Four such vf circuits are derived from the twin-channel radio, and these are used to transmit carrier telegraph signals or to provide telephone or facsimile service.

MULTIPLEXER Type 248 Model 1

Two Multiplexers, Type 248 Model 1, are required for full utilization of the capacity of a radio transmitter. One is used to transmit telegraph, telephone, or facsimile signals from two vf circuits to the radio channel designated as sideband A. The second Multiplexer performs the same function for sideband B. In this way, four vf circuits are applied to the twin-channel radio transmitter.

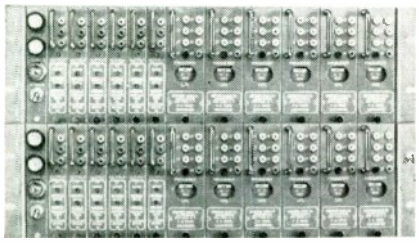
DEMULTIPLEXER Type 249 Model 1

Two Demultiplexers, Type 249 Model 1, are required for full utilization of the capacity of a radio receiver. One is used to receive telegraph, telephone, or facsimile signals for two vf circuits from the radio channel designated as sideband A. The second Demultiplexer performs the same function for sideband B. In this way, four vf circuits are derived from the twin-channel radio receiver.

Northern Radio's exclusive
BUILDING BLOCK CONCEPT . . .

. . . permits the addition of as many new channels as may be necessary . . .

. . . as the need arises.



NEW SPEECH PLUS TELEGRAPH SHELF Type 267 Model 1

This shelf is used as a mounting for the necessary tone keyers, converters, carrier failure alarms, filter assemblies, etc., required to provide one channel of two-way voice communication plus one or more channels of telegraph communication over a normal four-wire voice circuit. It includes terminal blocks for making all necessary external tone and DC connections to the keyers and converters and the connection to the local "speech" circuits as well as the telephone "line" connections. It also includes a power control panel section containing a power switch, pilot light and line fuse for the power supply, and a power cord for connecting to the AC line.

The shelf mounts in a standard relay rack, occupying 5¼" height and approximately 21" overall depth when Type 223 Model 1 power supplies are mounted on the rear. It is equipped with appropriate guides to accept up to three each Frequency Shift Tone Keyers Type 211 Model 1, Frequency Shift Tone Converters Type 212 Model 2, and Carrier Failure Alarms Type 256 Model 1, as well as two Filter Assemblies Type 266 Model 1. Sockets at the rear of the shelf mate automatically with matching plugs on the rear of the "plug-in" units. Individual units may be locked into place in the shelf by means of locking thumbscrews or fasteners provided on the units.

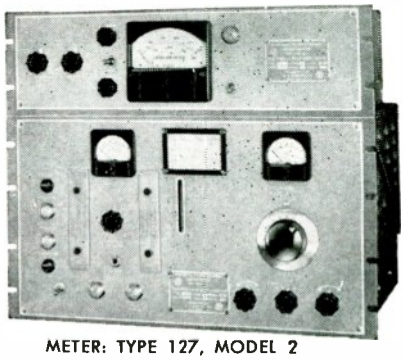
Northern Radio FREQUENCY SHIFT TERMINAL EQUIPMENT

FREQUENCY and SHIFT MONITOR SYSTEM

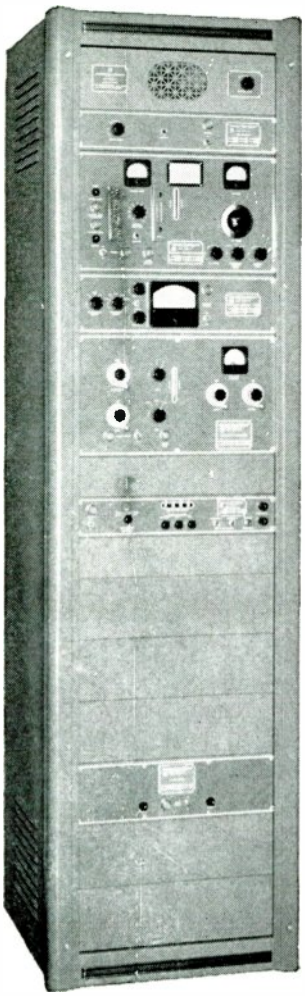
This system consists of a Type 106 Frequency and Shift Monitor and a Type 127 Frequency Meter. It is designed as a secondary standard to monitor the frequency and amount of shift of transmitter carrier output. It is particularly intended to measure the frequency shift of a mark and space (FS) signal either when setting up for traffic or under normal keying conditions.

The Monitor's stability is better than 2 cycles per megacycle over an ambient temperature range of 0-50° C—using crystals having a temperature coefficient of only 3 parts/million/degrees C. Range is 2.5-30 mc with 10 crystal-controlled frequencies (separate panel trimmers for each); use of external oscillator also provided for. Frequency Shift range is 10-10,000 cps. Less than 100 millivolts RF input needed for 2 volts audio output.

The Frequency Meter is specially designed with selectable normal and fast-acting damping factors, permitting frequency measurements of signals while keying. Its accuracy is 2% of full scale for the ranges 0-200, 500, 2000, 5000, 20,000 cps.



METER: TYPE 127, MODEL 2
MONITOR: TYPE 106, MODEL 4



TYPICAL TRANSMITTER TERMINAL for TWINPLEX OPERATION

TYPE 105, MODEL 6

FREQUENCY SHIFT KEYER

Supersedes and replaces its leader predecessor, Type 105, Model 4.

- Highest stability achieved by any FS Keyer.
- Increased frequency range 1.0 to 7.0 mc.
- Pre-selection of proper FS for any particular transmitter frequency multiplication.
- Permits use with external oscillator without need of adapters.
- Improved accessibility for even easier maintenance.
- Direct-reading frequency calibration of shift from 0 to 1000 cps.
- FS dial adjusts "Mark" and "Space" frequencies equally above and below the carrier position.
- Direct-reading frequency calibration of mixer and output tuning dials from 1.0 to 7.0 mc.
- Direct reading calibration of output frequency vernier ± 600 cps.
- Pulse-shaping circuit permits operation within assigned band-width with no adjacent channel radiation.
- Linear carrier shift up to 1400 cps for Fax operations.

TWINPLEX COMBINER TYPE 177 MODEL 1

For twinplex operation, the transmitting terminal includes a Twinplex Combiner Type 177 Model 1.

The Twinplex communication system makes possible a 2-channel radio circuit whereby 2 non-synchronous or synchronous telegraph transmissions modulate a single radio carrier wave causing the carrier to assume one of four specific frequencies with 400 cps separations.

The Combiner converts the four possible conditions of two telegraph signals (M1-M2, M1-S2, S1-M2, S1-S2) respectively into one of four voltages related in a 0-1-2-3 manner. The Combiner output voltage modulates the Frequency Shift Keyer.

The two telegraph channels provide the same operational flexibility as that of two separate single channel FS systems. One can, for example, simultaneously use channel #1 on 60 wpm teletype and channel #2 on high-speed Morse or Time-Division Multiplex.

TECHNICAL DATA:

Keying Inputs: 1. Contacts; 2. DC current pulses, positive, negative, or polar; 3. DC voltage pulses, positive, negative, or polar.
Input Level: 1. DC Voltages: ± 10 volts minimum; 2. DC Current: ma. minimum.
Keying Speed: 240 Words per minute maximum.
Output Impedance: 10,000 ohms.
Keying Input Impedance: 1. DC Voltage: 100,000 ohms. 2. DC Current: 220 ohms.
Output Level: Neutral: 0 to 25 volts; Polar: +6 to −6 volts.
Output Voltage Conditions: Four output voltages are to be proportioned as follows assuming linear F.S. Keyer characteristic.
Input: M_1 M_2, M_1 S_2, S_1 M_2, S_1 S_2: Output 0, 1, 2, 3.
Individual level adjustments provided.
Power Requirements: 100/220 volts, 50/60 cycles. Approximately 50 watts. Connections at rear of chassis.
Dimensions: 3½" High x 19" Wide x 10" Deep.

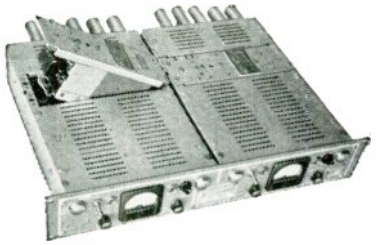
World Radio History

MULTI-CHANNEL FREQUENCY SHIFT TONE TELEGRAPH SYSTEMS

These Multi-Channel Telegraph Systems are audio carrier systems capable of multiplexing such circuits as telephone lines, VHF, UHF, or radio frequency links—or practically any type circuit from which a two-wire audio circuit can be derived. Designed to meet any speed requirements, these systems are fully electronic, without relays or moving parts to wear. They can be used for high-speed printer, Morse or time division Multiplex circuits, as well as such application as Telemetering, Control Circuits and Servo-Mechanisms. Instantaneous and complete sending and channel control permits any binary code groups, either "Clear Text" or "Cryptographic," to be channelized without need for additional phasing or synchronizing equipment, while paralleling of channels will allow for transmission of other type codes, such as 3 element cable code. The completely independent operation of each channel, including its own power supply, localizes faults to one channel only, leaving other channels unaffected. Individual channel separation filters are used at both transmitting and receiving ends. This arrangement allows for sending telegraph or control signals over a circuit carrying, simultaneously, other forms of intelligence: or for two-way communications on the same line. The audio frequency shift principle of transmission provides for high fidelity of signal reproduction over a wide range of signal levels as well as under severe noise or interference conditions. Circuit requirements of any speed, shift and center frequency can readily be met. The systems illustrated are for use on printer circuits up to 100 WPM channel capacity. The system arrangement is very flexible, permitting grouping of the basic units into various arrangements of Multiplex Systems. These systems can be made to accommodate a large variety of channel numbers and speeds to meet any individual requirements. The flexibility is further improved by the fact that the racks, power control units, and terminal connection panels are the same for both transmitting and receiving terminals.

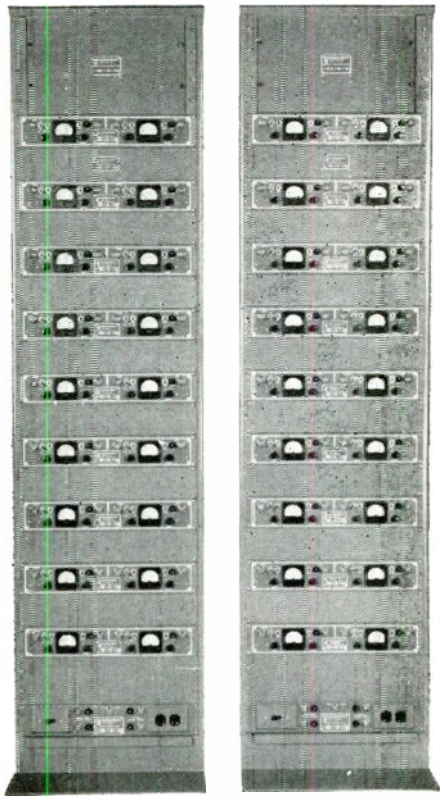


DUAL FS TONE KEYER; TYPE 153 MODEL 3:

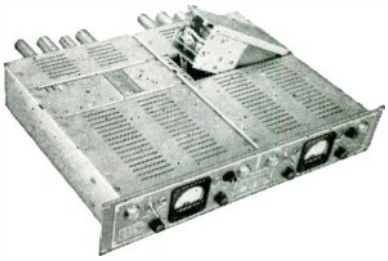
Keying Input. . . . Relay contacts, ± DC current or voltage pulses, neutral or polar.

Input Level. . . . DC voltage: ± 10 volts min. DC current: 45 ma min., ± or polar. Relay: contact rating 5 ma min.

Keying Input Z . . . DC voltage: 100K ohms. DC current: 220 ohms.



TRANSMITTER RECEIVER



DUAL FS TONE CONVERTER: TYPE 152 MODEL 3:

Input Z: 600 ohms, unbalanced.

Input Level: —40 dbm to 0 dbm.

Input Frequencies: 18 channels, 425-3315 cps, 170 cycle spacing.

Keying Speed: 45 dot cycles.

DUPLEX TELEGRAPH SYSTEM FOR MULTI-CHANNEL TONE EQUIPMENT

SEVEN NEW FEATURES in this system—simple 4-position switch selects from 12 possible duplex combinations; duplex operation between stations connected via carrier telegraph channels; *all-electronic*, without relays or moving parts; polar or neutral for either half duplex or full duplex; break-in now also possible for all *half*-duplex circuits; provided with positive feature to prevent space signal lock-out; includes individual line battery for each channel.

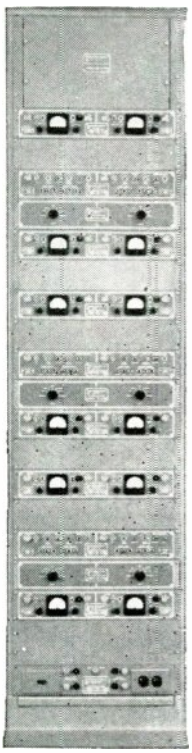
The Northern Radio Duplex Telegraph System consists of one each Dual Frequency Shift Tone Keyer, Type 153 Model 3; Dual Duplex Selector Panel, Type 200 Model 1; Dual Loop switch Panel, Type 200A Model 1; and Dual Frequency Shift Tone Converter, Type 152 Model 3.

DUAL DUPLEX SELECTOR PANEL Type 200 Model 1

The Dual Selector Panel provides 12 loop options, patching facilities for monitoring purposes and channel routing, including the possibility of patching-in another tele-printer loop circuit (T-junction). Any of the 12 loop options are available and may be selected for the Dual Loop Switch Panel by simple strapping arrangements. It has an individual line battery for each channel for greatest circuit flexibility. Battery and line fuses are also provided for maximum protection.

DUAL LOOP SWITCH PANEL Type 200A Model 1

The Dual Loop Switch Panel rapidly selects half-duplex and/or full duplex mode of operation for any of the 4 standard loop options by front panel switching available from the 12 loop options in the Dual Duplex Selector Panel.



REGENERATIVE REPEATER

TYPE 207

MODEL 1

This new Regenerative Repeater—the most advanced in the industry—is designed for use in telecommunication circuits to re-shape and re-time distorted signals for local use or retransmission. Special provision has also been made for its use on half-duplex where it will not only regenerate the ordinary teleprinter signals but also faithfully reproduce such special signals "break" signals and "mark restoration" information. *Outstanding features include:* . . . maximum acceptable signal distortion; new circuitry accepts up to 47% mark or space distortion; "floating" input & output circuits; completely electronic output, no relays; greater timing circuit stability; time base derived from highly stabilized L-C oscillator; adaptable to any speed; low-pass filter & frequency-determining elements are plug-in units; completely self-contained; includes power supply & line battery.

TECHNICAL DATA:

Input Keying Signal Requirements: (1) Neutral keying, positive or negative sense, (a) on-off 60 ma pulses, (b) on-off voltage pulses 10-100V into 100K ohms, (2) Polar keying, (3) Dry contact keying.

Frequency Stability of Time Base Generator: Less than 1 point range loss for ± 10% line voltage variation or ± 20° C ambient change from 25° C.

Sampling Time: Approximately 50 microseconds.

Output: Electronic tube outputs: (a) neutral 65 ma. max. into 2K ohms, (b) polar 33 ma (max.) into 2K ohms.

Power Requirement: 125 watts approx. 110/220V, 50/60 cps.

Mounting: Standard 19" rack mounting, 5¼" panel.

TUNG-SOL

INDUSTRIAL AND SPECIAL PURPOSE TUBES

DESIGNED to meet the exacting requirements of modern industrial and military applications, Tung-Sol industrial and special purpose electron tubes are the standard of reliability.

TELEPHONE TUBES
Used in hand sets, central office, and carrier equipment.

VHF TRIODES
Used in military VHF radio and test equipment.

PENTODES
Used in military and other communications equipment.

VOLTAGE REFERENCE TUBES
Used in radio equipment and other electronic gear with regulated power supplies, especially in high-accuracy units.

TRANSMITTING TUBES
Used primarily in mobile transmitters through the UHF range.

THYRATRONS
Used in power supplies, radio transmitters, motor controllers and spot welders.

VACUUM PULSE TUBES
Used in radar equipment and high power pulse generators.

TWIN TRIODES
Used widely in equipment handling frequencies from the audio level through the frequency band.

POWER TRIODES
Used in series regulated power supplies and wherever high perveance, high current tubes are needed.

RECTIFIERS
Used throughout industrial electronic equipment and broadcasting operations—AM, FM and TV.

CLIPPER TUBES
Used in radar to protect modulator components and to regulate output pulse. Both gas and vacuum tube versions available.

POWER PENTODES
Used in public address systems, hi-fi amplifiers, radio transmitters and receivers.

VOLTAGE REGULATORS
Used in radio and other electronic equipment with regulated power supplies.

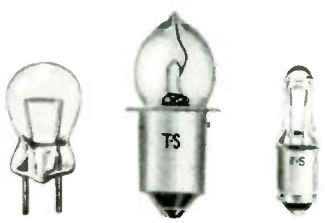
HYDROGEN THYRATRONS
Used in radar modulators and missile tracking beacons. Miniatures in airborne units.

INDICATOR THYRATRONS
Used in relay service wherever a small, lightweight, self-indicating tube is needed.

ENTERTAINMENT TUBES

TUNG-SOL ENTERTAINMENT TUBES provide the most sought-after characteristics in ideal combination, whether cathode ray, series-string, hybrid auto radio, TV, radio, stereo or hi-fi. Tung-Sol packs the popular types of audio tubes in factory-matched pairs. Dynamically-balanced 6550's, 5881's, 6V6GTA's, 6BQ5's bring you the finest in full-fidelity reproduction.

LAMPS



TUNG-SOL SUPPLIES numerous types of miniature lamps for illuminated dials and panels of all types. Advanced design and reliable performance have been the key to Tung-Sol leadership in lamps.

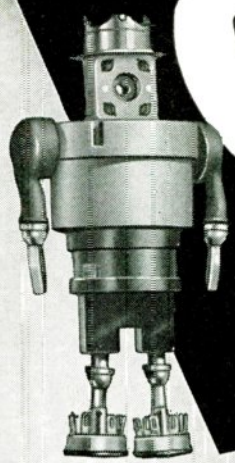
Cinch ELECTRONIC COMPONENTS

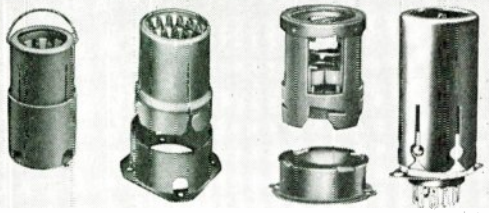


In the more than a quarter of a century of experience in the manufacture of electronic components, sockets, shields, connectors, terminal strips and miscellaneous electronic hardware, Cinch parts by specification and application have earned recognition as "Standard in the industry."

1. Cinch components for printed circuitry, 24 pages, Catalog PC-61.

2. Cinch Sub-miniature Sockets, 12 pages, Catalog SM-61.

HEAT DISSIPATING TUBE SHIELDS



OCTAL and POWER SHIELDS — T5 and T6 — TR5 and TR6

The 7 and 9 pin Miniature Series, T, TR, and NW Series are variously covered by Military Specifications:
MIL-S-9372B (USAF)
MIL-STD-242B (Ships)
MIL-S-19786A (Navy) SCL-6307/2 (Signal Corps)

In the Octal and Power Series, the shields are covered by Redstone Arsenal and Signal Corps approval. Where shields are required blackened, Henderlube is supplied as the Standard finish.

Manufactured under license agreement with International Electronic Research Corporation

TRANSISTOR SOCKETS

17431 — 22455 — 22384 — 20248 — 14273

The CINCH sub-miniature and miniature sockets insure positive electrical contact, hold transistors and tubes securely in place, permit easy maintenance and replacement, provide maximum insulation resistance and minimum high frequency loss.

UNIVERSAL TRANSISTOR SOCKETS

STANDOFF TYPE

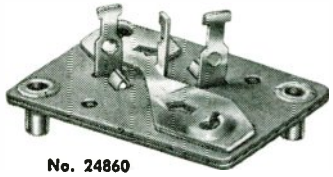
No. 24872

Standoff type Universal Transistor Socket for use with ten transistor bases and five base types. Casting is mica-filled phenolic (MFE). Contacts are beryllium copper, gold plated. Contacts may be used with either one or two sided 1/16" p.w. boards.

No. 24872 for use with transistors designed to the triangular base layout .2" x .1" (JETEC-30) contact centers, as well as the three contact in-line (.048 x .192 contact centers). Available in G. P. Black and low loss Mica-filled Phenolic.

POWER TRANSISTOR SOCKETS

There are three laminated and one molded No. 24246 type sockets; No. 22831 is elongated in shape, No. 24324 is rectangular in shape. Top and bottom plates are of natural XP Bakelite, vacuum wax impregnated. Formed thread for 6 — 20 screw, .104/.110 dia. hole in C R steel plate. Provides easy attachment to a heat sink. No. 24860 is identical with 24324 except it is equipped with integral eyelets for easy assembly to chassis. All contacts are of brass, cadmium plated.



No. 24860
WITH INTEGRAL EYELETS

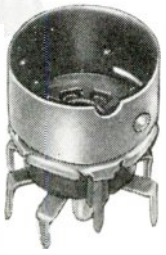
PRINTED CIRCUIT SOCKETS



No. 22920

No. 22022

No. 24257

These sockets for the three types of receiving tubes. Miniature, Flat Press and Button.

The contacts are so spaced that they can be mounted in an incremental drill pattern. This fact together with the exact precision and uniformity of Cinch sockets make them ideal for automatic assembly.

No. 22920 — 7 contact miniature molded vertically mounted socket with JAN type shield base. Mica insulation. Silver plated phosphor bronze contacts drop through .062" dia. clearance holes arranged on a .1" X and Y axis.

No. 22022—8 contact button base subminiature molded vertically mounted socket for conventional wiring. Assembled with special shield base to accept a subminiature shield with the "J" lock. Mica insulation. Silver plated beryllium copper contacts.

No. 24257 — 7 contact flat press subminiature molded right angle socket. Mica insulation. Silver plated beryllium copper contacts drop through .046" dia. clearance holes arranged on a .1" X and Y axis.

SOCKET FOR NUVISTOR TUBE

Low insertion force and contact protection . . . require minimum space . . . fulfilling every requirement for miniaturized equipment.
No. 133 65 10 001

The socket provides two slots of different widths mating with two corresponding legs depending from the metal envelope of the tube to index the tube and socket contacts. As a result the tube can be inserted by feel only and it is impossible to insert the tube incorrectly or damage the contacts. The socket saddle provides spring elements that engage with the depending legs of the tube envelope thus grounding the envelope to the panel.

ALL MOLDED OCTAL SOCKET

This new all molded Octal socket offers a complete one piece construction. The saddle and body are a single casting.

The standard socket is molded of general purpose Bakelite. Contacts are of brass, cadmium plated. Mica insulation with brass or phosphor bronze contacts can be made available. Two contact layouts can be supplied.

JONES PLUGS AND SOCKETS

P-312-CCT

S-312-AB

"300" SERIES Plugs and Sockets are designed for light duty service. Two to thirty-three contacts. Plugs and sockets polarized. Phosphor bronze "knife switch" socket contacts engage both sides of heavy brass plug contacts for positive connections. Molded bakelite insulation. Also can be supplied with contact tails that will take standard solderless terminals. UL approved.

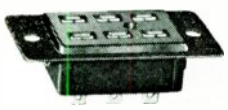
P-506-CE PLUG WITH CAP

S-506-DB SOCKET WITH DEEP BRACKETS

500 SERIES for heavy duty work, severest electrical services. For 5,000 Volts 25 Amperes per Contact alterable by circuit characteristics. Socket contacts phosphor bronze knife-switch type, cadmium plated. Plug contacts hard brass cadmium plated 2, 4, 6, 8, 10, and 12 contacts. Plugs and sockets polarized. Long leakage path from terminal, and terminal to ground. Caps and brackets, steel parkerized (**rust-proofed**). Plug and socket blocks interchangeable in caps and brackets. Terminal connections most accessible. Cap insulated with canvase bakelite.

P-2406-CCT

S-2406-SB



2400 SERIES plugs and sockets . . . improved socket contacts. For highest electrical and mechanical efficiency. 4 individual flexing surfaces. Positive contact over practically their entire length. Cadmium plated plug and socket. Contacts mounted in recessed pockets, greatly increasing leakage distance, increasing voltage rating.

MINIATURE BLUE RIBBON CONNECTORS

The smooth, easy insertion and extraction action, the self-wiping, self cleaning features and the double-sided, flexing action of both mating contact members make Micro-Ribbons the first miniature connectors to provide reduction in size with added reliability.

Bodies are molded of an improved diallyl phthalate with extremely high impact strength and excellent dielectric features. Contacts are gold-plated over silver. Shells are cadmium-plated brass with clear chromate treatment. Receptacle shells have floating bushings allowing a float of .020 in each direction.

The compact housings are equipped with sturdy spring type latches on the receptacles which are guided and held by cut-outs in the plug flanges. The shells are cadmium plated brass with clear chromate treatment. Receptacle shells have floating bushings allowing a float of .020 in each direction.

CONTACTS: 14, 24, 36 and 50.

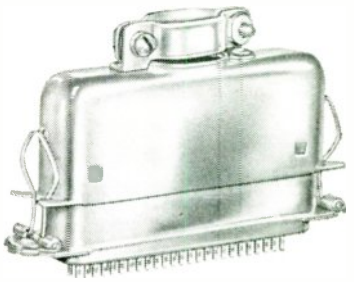
RACK AND PANEL TYPES

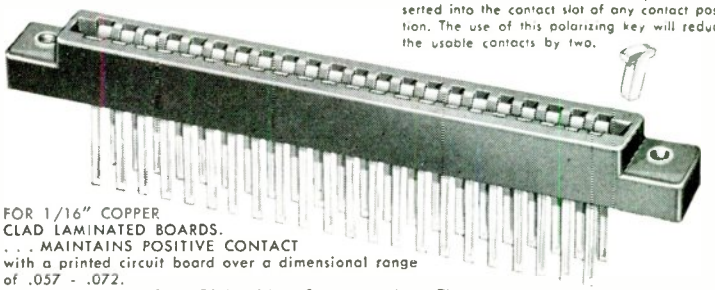


CABLE TO CHASSIS TYPE

Manufactured by agreement with Amphenol-Borg Electronics Corporation

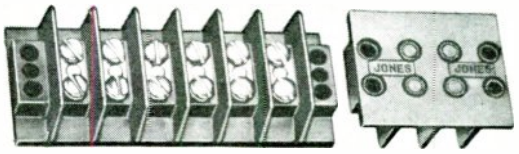
WRAPOST TERMINATION PRINTED CIRCUIT CONNECTOR

A No. 20H29401-4 plastic polarizing key is furnished with each connector. This key can be inserted into the contact slot of any contact position. The use of this polarizing key will reduce the usable contacts by two.



FOR 1/16" COPPER CLAD LAMINATED BOARDS.
. . . MAINTAINS POSITIVE CONTACT with a printed circuit board over a dimensional range of .057 - .072.
Insulation is glass filled Diall with a flame retardent. The 44 contacts are phosphor bronze with a silver plate of .0002 and .00003 min. gold plate finish. The inventory problem is simplified by providing a single connector that can be polarized in any position.

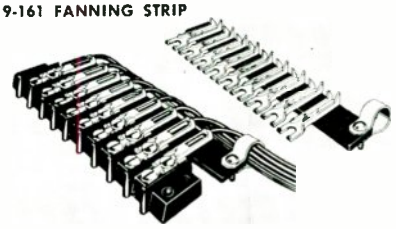
JONES BARRIER TERMINAL STRIP



500 SERIES . . . wider and higher barriers for increased creepage distances. Closed bottoms for complete insulation. Material between barriers at the base adds to the strength and maintains same creepage distance between contact to contact and contact to ground. Can be imprinted here. No insulating or marker strip required.

JONES FANNING STRIP

9-161 FANNING STRIP



9-141 BARRIER STRIP

Big help in terminal wiring. Connections are made through Fanning Strip, on bench or anywhere apart from barrier strip, and quickly slipped into assembly. Simplifies and facilitates soldering. Insures positive, correct connections. Saves time. Ideal for harness or cable assembly. Strong construction; brass terminals, cadmium plated. Heavy Bakelite mounting.

MARCONI INSTRUMENTS

995A/5 FM SIGNAL GENERATOR

The latest in our 995 series, this generator has calibrated △ frequency controls and extra-high stability for precision measurements on narrow-band receivers. Model 995A/2M is for wider-band broadcast equipment.

1066A FM SIGNAL GENERATOR

Premium grade FM generator with coverage 10-470Mc. Used in Mobile Radio, Telemetering, Navigational Systems, FM Radio, Television and as a general laboratory tool. Has electronic, calibrated △ F control permitting measured carrier shifts of as little as 1kc at 470Mc. Over 600 Model 1066 are now in use throughout the U.S.A.

1064/2 FM SIGNAL GENERATOR

For use in design, production and maintenance of FM mobile radio—this new portable FM generator has a separate oscillator for each band thus eliminating instability due to band switching. This and other special design features give it frequency stability even higher than Model 1066A. Includes IF crystal oscillator for any 5 spots between 290kc and 16Mc. (crystals not supplied). 1000 c.p.s. mod. oscillator can be used as audio test tone.

791D FM DEVIATION METER

Like all Marconi Deviation Meters, 791D has a counter-type discriminator which has less than 0.2% distortion and is inherently more stable than tuned discriminators. This, and built-in Xtal standardization, provide 3% measurement accuracy. These meters make excellent transmitter monitors as the demodulated output can be analyzed for distortion, hum, noise and other spurious signals.

SIGNAL GENERATORS, FM, AM, SWEEP

MODEL	FREQUENCY	FEATURES
144H AM SIG. GEN.	10kc-72Mc	0.2μV to 2V ±0.5db, 50Ω. Xtal check, 400kc & 2Mc. Stability 0.002%/10 min. Internal AM to 80%, at 400cps and 1kc. Also external AM.
867 AM SIG. GEN.	15kc-30Mc	0.4μV to 4V, with ALC. 1Mc Xtal check. Scale length 15 ft. Internal AM to 100% with low distortion. FM on AM less than 200cps at 30% mod.
867/2 AM SIG. GEN.	15kc-37Mc	As Model 867; carrier can be Xtal locked at 1Mc. points.
888/3 Portable SIG. GEN.	70kc-70Mc	0.1μV to 0.5V, 52Ω. AC or battery operated, includes audio power meter and 1kc tone source. Crystal standardized. Provides completely hum-free CW.
1099 VIDEO SWEEP GEN.	100kc-20Mc	3V max, level stabilized, 75Ω. Measurement accuracy 0.01db. Includes 1Mc & 5Mc crystal markers and input and output probes. Accessory: 100db step attenuator Model 1073.
1064/2 MOBILE RADIO FM SIG. GEN.	290kc-16Mc 30-50Mc 118-185Mc 450-470Mc	.025 to 10,000μV (100,000μV uncalibrated). Extremely stable; quick warm up. Direct reading FM to 15kc deviation and Incremental Carrier Shifts to ±25kc on all bands. Portable.
995A/2M FM/AM SIG. GEN.	1.5-220Mc	0.1μV to 100mV. Calibrated △ F. Step attenuator. Crystal standardized; extremely stable. Deviation 0-600kc on top bands. Has simultaneous FM and AM.
995A/5 FM/AM SIG. GEN.	1.5-220Mc	As 995A/2M with narrow deviation 0-5 & 0-15kc; stability .002%/10 min; Calibrated △ F. Spurious FM is less than 25cps. Special model for Mobile Radio.
1066A FM SIG. GEN. 1066A/1 rack mounted	10-470Mc	0.1 to 100,000μV, 52Ω. FM at 1kc and 5kc internal, deviation to ±100kc, △ F to ±100kc, both meter monitored. (Deviation ±300kc, to order). Stability .0025%/10 min. Use Model 1102 Amplitude Modulator for FM-free AM.
801D/1 AM SIG. GEN.	10-470Mc	0.1μV to 1V, 50Ω. VSWR less than 1.2 Frequency cal. 0.2%; Xtal check. AM 0-90%, external pulse mod. 50cps-50kc. Contactless range turrets and ALC.
913/3 FM/AM SIG. GEN.	22-176Mc	0.1μV to 100mV, 52 & 75Ω. Deviation 0-100kc. AM 30%. Has Xtal check. CW carrier can be Xtal locked. Portable, inexpensive.
1066B/2 FM SIG. GEN.	400-550Mc	0.1μV to 100mV, 50Ω. VSWR less than 1.2 Calibration accuracy 0.01% at 1Mc and 10Mc Xtal points. Internal FM at 1 and 10kc. External FM 100cps-100kc. Deviation to 300kc. Residual FM less than 100cps. Will test Range Command Receivers.
1060 SIG. GEN.	450-1250Mc	0.15μV to 450mV, 52Ω (−130 to 0dbm) but max. output nearly 3V above 1000Mc. Calibrated △ freq. control.
1058 SIG. GEN.	1700-4000Mc	0.1μV to 450mV, 52Ω (−135 to 0dbm). Modulation: 1kc square wave, pulse or FM 50cps to 20kc.

FM DEVIATION METERS

934/3 FM DEV. METER	2.5-500Mc	Deviation ranges 5, 25, 75, 125kc. Accuracy 3%. Xtal standardized. Mod. frequencies 50cps to 35kc. Rack mounting, ruggedized.
791D FM DEV. METER	4-1024Mc	Deviation ranges 5, 25, 75 and 125kc full scale. Accuracy 3%. Crystal standardized. LO can be Xtal controlled for measuring deviations down to 10cps.
928 FM DEV. METER	20-500Mc	Wide range; mod. freq. up to 120kc. Dev. ranges 0-100, 0-200, 0-400kc. Accuracy 3%. Ruggedized. Crystal standardized.
928/2 TELEMETERING DEV. METER	215-265Mc	Telemetering version of 928. Dev. ranges 15, 50, 150kc or to order. Crystal standardized.

FACTORY SERVICE:
Englewood, N. J. and Beverly Hills, Calif.

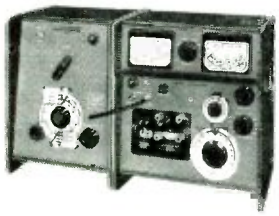
World Radio History

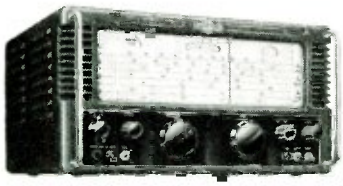
868B UNIVERSAL BRIDGE

This latest version of our 868 series has R range to 100MΩ and increased discrimination; an AGC circuit replaces the sensitivity control. The unique direct-reading facility which reduces operator error, is retained. Inexpensive and accurate, Model 868B finds a valued place in laboratory, plant or shop.



1245 Q METER

Q Meter 1245 has the widest frequency range ever, 1kc to 300Mc, and can replace 2 older instruments. New design of injection impedances gives increased accuracy and reduces need for corrections. A demonstration convinces most engineers that this is the finest Q Meter yet available.



770U EDDYSTONE RECEIVER

Four Eddystone receivers cover the range 500kc to 1000Mc; they are used throughout the U.S. for telemetry and mobile radio monitoring, for experimental communications studies and general laboratory measurements. They are ruggedly built and ultra-reliable.

3352 CINTEL DOUBLE PULSE GENERATOR

3352 is becoming increasingly popular because of its reliability, full calibration, short rise-time and double pulse facility. It is supplied with rugged force-ventilated cabinet but can also be rack-mounted.

BRIDGES, L C & R

MODEL	FREQUENCY	FEATURES
868B UNIVERSAL	1kc, 10kc	1μμF to 100μF, 1μH to 100H, 0.1Ω to 100MΩ. Accuracy 1%. Has built-in oscillator and tuned detector with AGC. DIRECT READING; simplest possible operation.
1313 UNIVERSAL	1kc, 10kc	0.1μμF to 110μF, 0.1μH to 110H, 0.01Ω to 110MΩ. Accuracy ¼%. Features as 868B plus greater range and accuracy. Adapter TM6113 for biasing inductors to 200mA.
1342 LOW CAPACITY	1kc	0.002 to 1,111μμF. Accuracy 0.2%. Shunt R: 1 to 1,000MΩ. Uses 3 terminal transformer bridge circuit, eliminating stray capacity effects.
CINTEL 1854 MUTUAL & SELF L	1592cps (10,000 r/sec)	0.001μH to 30mH, 0.01 to 3,000Ω in 12 ranges. Accuracy 1%. The only bridge which reads Mutual and Self Inductance directly. Transistorized.
CINTEL 1864 C & R	1592cps (10,000 r/sec)	0.002μμF to 100μF, 1Ω to 10,000MΩ in 18 ranges. Accuracy 1%. Uses 3 terminal transformer bridge for "in circuit" measurements. Transistorized.
CINTEL INCREMENTAL L & ELECTROLYTIC C	50cps-15kc	Due mid-1961, this transistorized bridge has variable frequency, wide range; polarizes and measures L and C.

SYSTEMS TEST GEAR, MULTI-CHANNEL, SSB.

1249A NOISE LOADING TEST SET	12-4028kc i.e. up to 960 channels	Precisely measures intermodulation and noise on multi-channel telephony systems to −70db. Includes noise generator, filters and receiver. Meets CCIR recommendations.
1259 DERIVATIVE TEST SET	65-75Mc swept ±20Mc (or to order)	For checking FM modulator/demodulator linearity. Displays 1st derivative (slope) of volts / △ F curve. CRT display. Discrimination 0.1db.
1094 SSB SPECTRUM ANALYZER	100cps-30Mc	60db dynamic range. Accuracy 2db. 3db selectivity at 6, 30 or 150cps. Spectrum width variable 100-30,000cps. If supplied without LF Adapter TM5606, range is 3-30Mc.

Q METER AND ACCESSORIES

1245 Q METER	1kc-300Mc	Q Ranges 5-1000, △ Q 25-0-25. Accuracy 5% to 100Mc, 20% to 300Mc. Calibrated capacitor range 7.5 to 500μμF. △ C ranges ±1 and ±5μμF. Extremely stable and easy to operate. Uses separate oscillators—see below.
1246 OSCILLATOR	40kc-50Mc	4V output, 50Ω. For driving Model 1245 Q Meter and general lab use.
1247 OSCILLATOR	20-300Mc	4V output, 50Ω. For driving Model 1245 Q Meter and general lab use.
TM4520, TM4947 INDUCTORS	50kc-230Mc	Set of 18 and set of 3 Inductors, 0.05μH to 25mH, for Q Meter tests.
TJ155B/1; TJ230 LOSS TEST JIGS	1kc-50Mc	Attachments to Q Meter for determining dielectric constant and loss factor; also very low impedances.

RECEIVERS FM/AM

EDDYSTONE 880	500kc-30.5Mc	An ultra-stable double conversion superheterodyne for AM, CW and SSB reception. Long term drift is less than 50cps; re-setting accuracy within 1kc; noise factor 5db; image rejection greater than −70db.
EDDYSTONE 770R	19-165Mc FM/AM/CW	Continuous coverage in 6 bands. Conservative design for long, stable life. Ideal for monitoring communications and for laboratory measurements.
EDDYSTONE 770U	150-500Mc FM/AM	Double conversion superheterodyne with excellent image rejection and high stability. Features include "S" Meter, IF gain control and squelch.
EDDYSTONE 770S	500-1000Mc	Continuous coverage in one band. Has AF, IF and VF outputs. Available mid-1961.

DOUBLE PULSE GENERATOR

CINTEL 3352	1cps-1.1Mc 2Mc ext. triggered	10mμsec rise time. 50V max. Calibrated variable width, delay, amplitude and polarity. No overshoot or tilt. Other outputs include a pre-pulse, sawtooth and cable-formed pulse.

150 SERIES

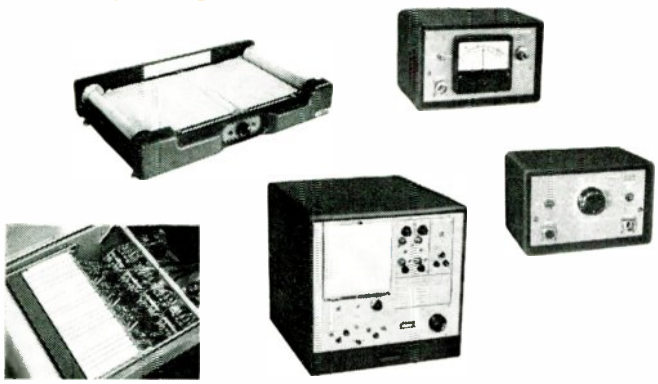
PROVEN RELIABILITY OF TUBE-TYPE ELECTRONICS, CHOICE OF 11 PLUG-IN PREAMPLIFIERS FOR 1- TO 8-CHANNEL SYSTEMS

Widest choice in types of packaging and available preamplifiers of any Sanborn direct writing oscillographic recording system. Frequency response DC to 2 db down at 100 cps; basic sensitivity 10 uv/div to 0.1 volt/div. depending on preamp used; over-all linearity better than 1%, current-feedback amplifiers, horizontal plane recorder with 9 chart speeds, automatic stylus heat control. Preamplifiers include AC-DC, Carrier, Phase-Sensitive Demodulator, DC Coupling, Logarithmic, Low Level, Stabilized DC, AC Wattmeter, RMS Volt/Ammeter, 400 cycle Frequency Deviation and Frequency Meter types. Shown are vertical cabinet 2-, 4- and 6-channel "150's"; amplifier and recorder units can also be packaged in portable cases. Mobile 6- and 8-channel 46½" high console systems with dual-channel DC amplifiers also available for analog computer readout and similar applications.

RECORD IT RIGHT WITH SANBORN®

a proven SANBORN system

RELATED INSTRUMENTS and ACCESSORIES



Shown here are a few of the many kinds of allied instruments made by Sanborn. Typical are a high speed, 100 cps optical X-Y Recorder . . . precision made variable speed Chart Viewer for convenient study and editing of records . . . 4- to 32-channel "on-off" Event Recorders . . . Monitor Meter for indicating stylus position, system adjustment, visual monitoring, etc. . . . Servo Monitor Phase Shifter for use with Sanborn Phase-Sensitive Demodulator Preamplifiers . . . numerous linear motion and pressure transducers.

For application engineering assistance or complete product information and specifications, call the Sanborn industrial Sales-Engineering representative in or near your city. Offices throughout the U. S., in Canada and foreign countries.

650 SERIES

DC TO 3 KC OVER FULL SCALE . . . DC TO 5 KC OVER 4" AMPLITUDES . . . UP TO 24 CHANNELS WITH DIRECT READOUT

This modern optical oscillograph combines high frequency capabilities with immediate availability of recordings, using a single set of galvanometers for the entire DC-5KC range. Charts are 8" wide, daylight loading and require no chemical development. Recorder has 9 speeds from ¼"/sec. to 100"/sec.; automatic trace identification and timing lines; amplitude lines 0.1" apart can be blanked from part or all of chart; galvanometer block for 8, 16 or 24 channels, equipped with optical inserts as required. Single-chassis, 7" high amplifier module has 8 separate channels, each complete from input to galvanometer output. Inputs are floating and guarded, 100,000 ohm impedance on all ranges. Performance specifications include 8" deflection for 20 mv input; common mode rejection 140 db min. at DC, tolerance to ±500 volts; linearity 1½% of full scale; gain stability better than 1% to 58°C. and for line voltage variation from 103 to 127 volts.

350 SERIES

MAXIMUM 6- AND 8-CHANNEL PERFORMANCE, RELIABILITY AND APPLICATION VERSATILITY . . . HIGHLY DEVELOPED, SPECIALIZED PLUG-IN PREAMPLIFIERS

Flush front, 17½" high "350" style recorder unit with transistorized power amplifiers and power supply — plus extremely versatile, modern plug-in preamplifiers mounted in 21" of panel space for eight channels, comprise the main "350" system units. System response is DC to 150 cps within 3 db at 10 div peak-to-peak; input single-ended, floating and guarded, or push-pull, depending on preamp used. Preamplifiers, which can also be used alone with individual power supplies in portable cases to drive scopes, meters, optical galvanometers, etc., include Carrier, DC Coupling, Phase-Sensitive Demodulator, Differential DC, Low Level, Logarithmic, Frequency Deviation and RMS Volt/Ammeter types. Recorder-Power Amplifier features, in addition to those previously mentioned, include electrical limiting ahead of Power Amplifiers to prevent saturation or cut-off so that damping is never lost; current feedback circuits to prevent thermal drift; numerous solid state and MIL-spec components in power supply; galvanometer damping by velocity feedback signal; rugged, improved stylus construction for longer life; 50-division, 4 cm or 5 cm wide recording channels in 6-channel system, 4 cm channels in 8-channel system. Recorder-Power Amplifier assembly may also be used alone as a 0.1 volt/div sensitivity system.

950 SERIES

RELIABLE, ECONOMICAL 6- AND 8-CHANNEL SYSTEMS FOR HIGH, MEDIUM OR LOW GAIN IDENTICAL CHANNEL DC APPLICATIONS

Specially designed for applications where many similar low level DC signals must be accurately recorded and separate interchangeable preamplifiers are not required. High and medium gain amplifiers have six or eight identical transistorized channels with floating and guarded inputs; low gain amplifier is a general purpose type with high resistance balanced to ground inputs. Each amplifier with its power supply is mounted on a single chassis, with each channel complete from signal input terminals to galvanometer output terminals. For maximum sensitivity (10 uv/div) amplification, frequency response is DC to 100 cps within 3 db; for medium gain (0.5 mv/div) and low gain (10 mv/div) systems, response is extended to 150 cps within 3 db, 10 div peak-to-peak. System has all "350" flush front recorder features, including 9 pushbutton chart speeds; inkless rectangular coordinate recordings; rugged, enclosed galvanometers with velocity feedback damping; provision for remote control of chart drive, chart speeds, timer and marker.

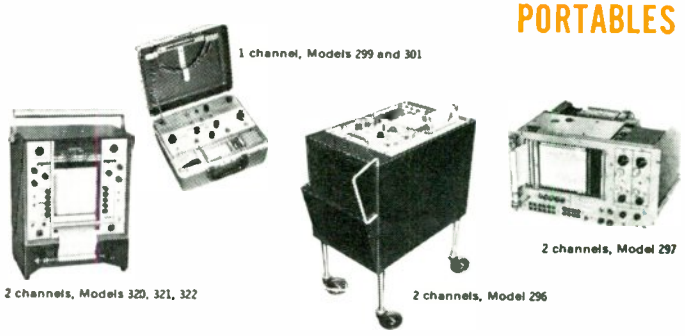
to match your specific application

850 SERIES

MINIMUM PANEL SPACE, MAXIMUM ECONOMY IN 6- AND 8- CHANNEL SYSTEMS WITH INTERCHANGEABLE PREAMPLIFIERS

This series has all the advantages of the 6- or 8-channel flush front recording assembly unit used in "350" systems, but uses miniaturized 2" x 7" plug-in preamplifiers of more economical design. Types include Carrier, Phase-Sensitive Demodulator, DC Coupling and Low Level preamplifiers; Master Oscillator Power Amplifier available for use with Carrier and Low Level preamps. System response to 150 cps within 3 db; input circuits single-ended, push-pull, or floating and guarded, depending on preamp used. System shown is 63⅝" tall, with 8-preamplifier module in 7" of panel space, recorder in 17½" of panel space.

PORTABLES



SINGLE- AND 2-CHANNEL PORTABLES WITH YOUR CHOICE OF AMPLIFIERS AND PACKAGING

For greatest portability in a single-channel system, briefcase size, 20 lb. Models 299 and 301 offer 2 chart speeds, response to 100 cps within 3 db, inkless rectangular coordinate recording. Model 299, for general purpose DC inputs, has 10 mv/div sensitivity, calibrated zero suppression; Model 301, for use with AC strain gages and inductive transducers, has 10 uv rms/div sensitivity. Portable 2-channel systems with built-in amplifiers include the Model 320 for general purpose DC recording with max. sensitivity of 0.5 mv/mm; Model 321 Carrier for AC transducer output recording at 10 uv rms/mm max. sensitivity; Model 322 DC Coupling with 10 sensitivities from 10 mv/div to 10 v/div. Two-channel systems with interchangeable preamplifiers include the Model 297 which accepts any two "850" preamps, and the Model 296 which uses the versatile "350" style preamps. Both the 296 and 297 may be packaged in either a mobile cart or portable case, or standard 19" rack mounted.

KAY Sweeping Oscillators . . . Frequency Markers

AUDIO-VIDEO

- ALL-ELECTRONIC • STABLE
- BALANCED OUTPUT
- NO PHASING ADJUSTMENTS
- ZERO REFERENCE LINE
- "CRYSTAL" FREQUENCY MARKERS

20 cps to 200 kc . . . *Sona-Sweep* MODEL M

For Audio Bandpass, High-Q Filters

- Repetition Rate 0.2 to 25 cps, Logarithmic and Linear
- Built-in Low Frequency Detector • Pulse Markers

Price $895.00, f.o.b. factory. ($985.00 F.A.S., N. Y.)

50 kc to 8 mc . . . *Marka-Sweep* MODEL VIDEO TTV

For TV Frequencies

- 5 Crystal CW & Marker Frequencies • Metered Output
- Calibrated Variable CW and Marker

Price $795.00, f.o.b. factory. ($875.00 F.A.S., N. Y.)

50 kc to 20 mc . . . *Marka-Sweep* MODEL VIDEO

For Fixed Band Video

• 3 Switched Sweep Widths • Fixed Pulse Markers • Provision for Variable Pulse Marker

Price $575.00, f.o.b. factory. ($633.00 F.A.S., N. Y.)

50 kc to 50 mc . . . *Marka-Sweep* MODEL VIDEO 50

For Varied Applications

• Variable Center • Wide 50 mc Sweep with Good Low Frequency Output • Pulse Markers

Price $845.00, f.o.b. factory. ($930.00 F.A.S., N. Y.)

AUDIO-VHF

200 cps to 220 mc . . .

Ligna-Sweep SKV

For Audio, Video, VHF Bandpass, High-Q Filters

- Repetition Rate 0.2 to 30 cps • Video Sweep 1 kc to 10 mc
- 200 cps to 30 mc Widths • Pulse Markers • Logarithmic Sweep

Price $1,295.00, f.o.b. factory. ($1,425.00 F.A.S., N. Y.)

VIDEO-VHF

100 kc to 150 mc . . . *Ligna-Sweep* MODEL CP

For Communications, Video Bandpass

- Variable Center Frequency • Pulse Markers

Price $795.00, f.o.b. factory. ($875.00 F.A.S., N. Y.)

1 mc to 260 mc . . . *Rada-Sweep Sr.*

For Production Alignment

- 6 Fixed Bands • Pulse Markers

Price $725.00, f.o.b. factory. ($798.00 F.A.S., N. Y.)

1 mc to 350 mc . . . *Rada-Sweep* 300

For Production Alignment

- 12 Fixed Bands • Pulse Markers

Price $925.00, f.o.b. factory. ($1,018.00 F.A.S., N. Y.)

VHF

2 mc to 470 mc

THE *Vari-Sweeps*

- Fundamental Frequency
- No Spurious Beats, Built-In Attenuators
- Direct Reading Frequency Dials 1.0 V into 70 ohms AGC'd

2 mc to 220 mc . . . *Vari-Sweep* 860-A

- Metered Output • 30 mc Sweeps

Price $795.00, f.o.b. factory. ($875.00 F.A.S., N. Y.)

4 mc to 120 mc . . . *Vari-Sweep* IF

- Built-In Variable Marker • Fixed Pulse Markers

Price $950.00, f.o.b. factory. ($1,045.00 F.A.S., N. Y.)

10 mc to 145 mc . . . *Vari-Sweep* RADAR

- Same as IF at Different Frequency

Price $950.00, f.o.b. factory. ($1,045.00 F.A.S., N. Y.)

15 mc to 470 mc . . . *Vari-Sweep* 400

- Same as 860-A at Different Frequency

KAY Precision Random Noise Generators

Mega-Node 3000

1 kc to 1000 mc . . . *Therma-Node*

The **Therma-Node** is a basic noise source which provides extremely high accuracy by utilizing a basic noise generation technique — thermal noise from a heated resistive element.

- **Noise figure to 10 db**
- **Output impedance, 50 ohms unbalanced**
- **Accuracy ±0.1 db**
- **Operates from line or 24 V dc . . .**

2 — 1000 mc, Price **$550.00,** f.o.b. factory. ($605.00 F.A.S., N. Y.)

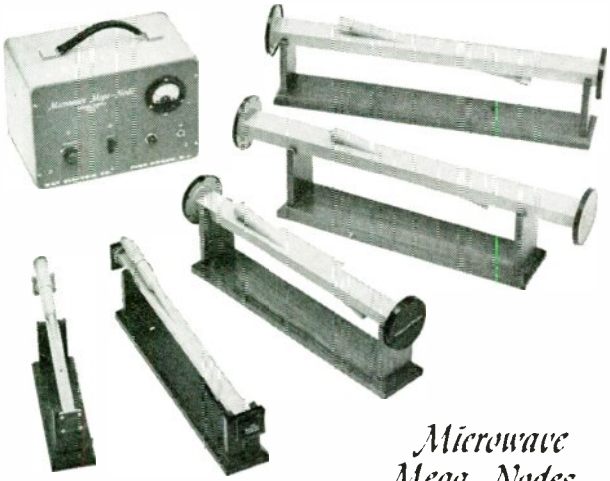
1 kc — 300 mc, add **$135.00** ($149.00 F.A.S., N. Y.)

1 mc to 3000 mc . . . *Mega-Node* 3000

The **Mega-Node 3000** is a calibrated random noise source providing output over a wide frequency and power range. It employs a coaxial-type noise diode with a tungsten filament as a temperature-limited noise generator.

- **Noise figure, 0-20 db**
- **Output impedance, 50 ohms unbalanced**
- **Accuracy ±.25 db below 250 mc, ±1.0 db below 2000 mc, ±1.5 db at 3000 mc**

Price **$790.00,** f.o.b. factory. ($869.00 F.A.S., N. Y.)



Microwave Mega-Nodes

3 mc to 500 mc . . . *Mega-Node* 403-A

The **Mega-Node 403-A** is a calibrated random noise source providing precise operation over a more limited frequency range at proportionately lower cost.

- **Noise figure, 0-19 db**
- **Output impedance, 50 ohms unbalanced**
- **Accuracy ±0.5 db**

Price **$375.00,** f.o.b. factory. ($413.00 F.A.S., N. Y.)

1120 mc to 26,500 mc . . . *Microwave Mega-Nodes*

The **Microwave Mega-Nodes** are precision machined and plated waveguide fixtures, utilizing argon, fluorescent, or neon gas discharge tubes. Single power supply operates all units. (Power Supply Price, $125.00.) ($138.00 F.A.S., N. Y.)

- **Noise output of 15.8 ±.025 db for fluorescent tubes, 15.45 ±0.2 db for argon, 18.0 ±0.2 db for neon. Supplied with power cables and fittings**

Price **$175.00** up. ($193.00 F.A.S., N. Y.)

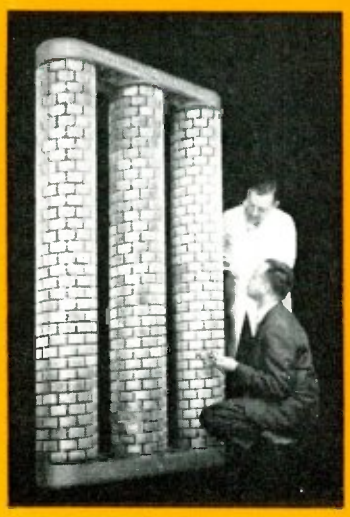
DIODES AND RECTIFIER CELLS

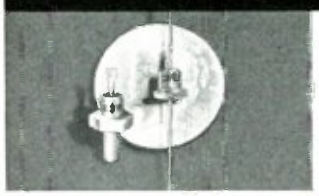
from 50 ma to 250 amps
at 25 to 1000 volts per junction
with stacks to 100,000 amps
and 320,000 volts

All designed and manufactured to meet the most rigid military requirements!



SPECIAL ASSEMBLIES can be made to your specifications . . . from microwatts to megawatts!

MIL TYPES

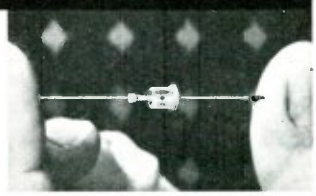


SILICON GENERAL PURPOSE RECTIFIER CELLS
Ratings: to 1 amp—60 to 800 PRV. JAN 1N538, JAN 1N540 JAN 1N547 axial lead, top-hat types . . . JAN 1N253 through JAN 1N256 stud mounted types . . . hermetically sealed . . . low reverse leakage.
Bulletins SR-236 and SR-237

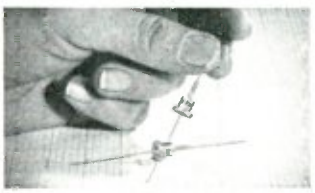
SILICON ZENER DIODES
Ratings: 6.2 to 27v, 10w—18 to 27v, 1w, 10w—types: USA 1N1804 6.2v, USA 1N1807 8.2v, USA 1N1353 12v, USA 1N1358 20v, USA 1N1361 27v . . . 1w types: USA 1N1777 18v, USA 1N1781 27v . . . Reference element, USN 1N430A 8.4v.
Bulletins SR-259 and SR-255

SILICON GENERAL PURPOSE DIODES

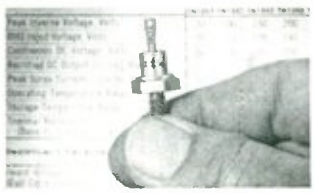
SUBMINIATURE GLASS DIODES
Ratings: 30 to 200 ma—25 to 380 PRV. Diffused junction . . . general purpose and high conductance types . . . excellent forward and reverse characteristics . . . nominal frequency range: 0 to 100 KC . . . 1N456 and 1N482 series.
Bulletin SR-220



MINIATURE TOP-HAT SERIES
Ratings: to 500 ma—50 to 500 PRV. Hermetically sealed . . . all welded construction . . . low reverse leakage currents . . . high temperature operation to 165°C . . . excellent forward and reverse characteristics . . . 1N1701 series.
Bulletin SR-203



STANDARD TOP-HAT SERIES
Ratings: to 1.8 amp—50 to 600 PRV. Hermetically sealed . . . high rectification efficiency . . . low reverse leakage currents (0.3 ma @ 125°C) . . . welded construction . . . 1N440, 1N1487, 1N1692, and 1N536 series.
Bulletin SR-217



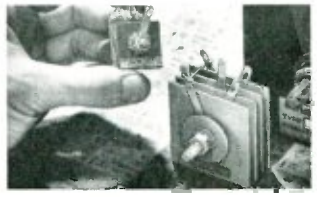
STUD MOUNTED SERIES
Ratings: to 1 amp—50 to 600 PRV. Hermetically sealed . . . all welded construction . . . high rectification efficiency . . . operation over −65°C to +170°C temperature range . . . low reverse leakage currents . . . 1N607 series.
Bulletins SR-135C

ENTERTAINMENT TYPE RECTIFIERS

MINIATURE SILICON RECTIFIER CELLS
Ratings: to 750 ma—200 to 600 PRV. High power capability (to 750 ma) . . . peak surge current capacity (to 50 amps) . . . ideal for TV diode replacements . . . 5A series.
Bulletin SR-212

PLUG-IN SILICON RECTIFIER CELLS
Ratings: to 500 ma—200 to 600 PRV. Diffused junction . . . high power capability (to 750 ma) . . . kits containing standard clipholders and hardware also available . . . 5M series.
Bulletin SR-216

"LEMON-DROP" SILICON RECTIFIER CELLS
Ratings: to 500 ma—400 to 600 PRV. Specially recommended for dependable, miniaturized, low rectifier cost applications . . . ideal for TV, radio, phono, tape recorder circuits . . . 5E series.
Bulletin SR-208



SELENIUM RECTIFIER STACKS
Ratings: 75 to 650 ma—130 max. RMS. High efficiency /low cost replacement type rectifiers . . . high density construction for long life and . . . maximum reliability . . . T065/075 series.

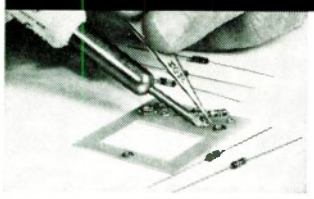
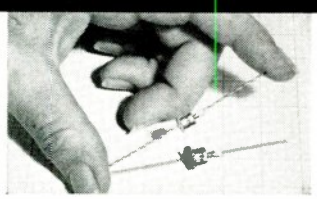
SILICON ZENER DIODES AND REFERENCE ELEMENTS



SUBMINIATURE 250 AND 400 MW SERIES

Ratings: 3.3 to 30 volts. Glass fusion sealed... diffused junction... low dynamic impedance to 5Ω @ 20 ma... excellent voltage regulation over −55°C to +150°C range... IN702 and IN746 series.

Bulletins SR-261 and SR-263



TOP-HAT 750 MW AND 1W SERIES

Ratings: 3.9 to 30 volts. Hermetically sealed... welded construction... low dynamic impedance to 1.1Ω @ 25 ma... excellent regulation and stability over −55°C to +150°C range... IN1507 and IN1518 series.

Bulletin SR-260

STUD-MOUNTED 3.5 AND 10W SERIES

Ratings: 3.9 to 30 volts. Hermetically sealed... welded construction... low dynamic impedance to 0.2Ω @ 300 ma... excellent voltage regulation and stability over −55°C to +150°C range... IN1588 and IN1599 series.

Bulletin SR-260

VOLTAGE REFERENCE PACKS

Ratings: 8.4 and 16.8 vdc. High stability operation ... reference voltages within ±0.01%... temperature coefficient ±0.001%/°C... operate from 28 vdc or 115 vac, 60 or 400 cycle inputs... IR 4RV8 and 4RV16 series.

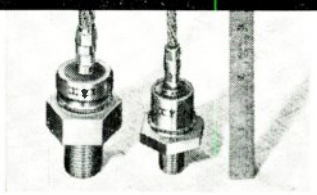
Bulletin SR-401

POWER RECTIFIER CELLS AND STACKS

SILICON POWER RECTIFIER CELLS

Ratings: to 45 amps—50 to 600 PRV. Hermetically sealed all welded construction... designed for operation at junction temperatures to 190°C... operating frequencies to 1,000 cps... IN1199, IN1341, IN2128A series.

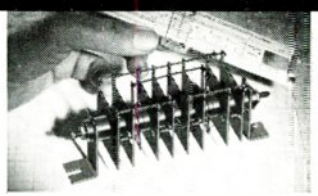
Bulletins SR-311 and SR-304



SILICON HIGH POWER RECTIFIER CELLS

Ratings: to 250 amps—50 to 600 PRV. Rugged all welded construction... hermetically sealed... designed for operation at junction temperatures to 190°C... operating frequencies to 1,000 cps... IN3085 and IN2054 series.

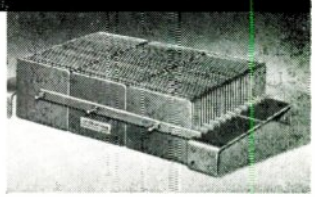
Bulletins SR-300 and SR-305



SILICON RECTIFIER STACKS

Ratings: to 750 amps—31 to 1500 vdc output. High forward conductance and low reverse leakage... rectification efficiencies to 99% at power frequencies... operation over −65°C to +170°C range... IN2638 and IR66-4626 series.

Bulletins SR-330 and SR-335

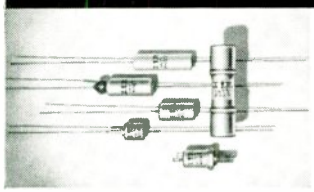


SELENIUM POWER RECTIFIER STACKS

Ratings: to 2360 amps—6 to 30,000 volts. Standard, double, and triple density types... all standard single phase and triple phase circuit configurations... high rectification efficiency over −65°C to +100°C range.

Bulletin SR-170

HIGH VOLTAGE RECTIFIERS



SILICON CARTRIDGE RECTIFIERS

Ratings: to 440 ma—600 to 16,000 PRV. High rectification efficiency... low reverse leakage current at rated PRV... −55°C to +150°C operating range... IN596, IN1130, IN1133, IN1406, IN1745 and IN2373 series.

Bulletins SR-138, SR-226, SR-157, SR-225 and SR-227

SELENIUM CARTRIDGE RECTIFIERS

Ratings: to 200 ma—20 to 14,400 PRV. High efficiency rectification over −65°C to +100°C temperature range... available in half-wave, full-wave center tap, voltage doubler, and single-phase bridge configurations.

Bulletin H2S-1

SPECIAL SEMICONDUCTOR DEVICES

SILICON CONTROLLED RECTIFIERS

Ratings: 1, 5, 10, & 16 amps—20 to 400 PRV. Extremely efficient high-current switching... hermetically sealed... ideal static switch turn-on times to 2 μsec (typ)... IR X1RC2, X5RC2, X10RC2, and X16RC2 series.

Bulletins SR-353, SR-355, SR-350 and SR-351

SOLAR CELLS AND PHOTOCELLS

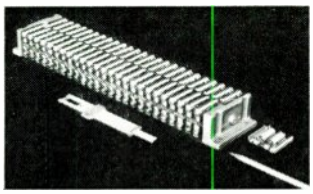
Wide range of silicon and selenium types. Silicon solar cells with conversion efficiencies to 13%... silicon readout photocells with response times to 5 μsec ... selenium photocells in wide variety of sizes and shapes.

Bulletins SR-280 (Silicon) and PC-649 (Selenium)

SILICON RECTIFIER TUBE EQUIVALENTS

Ratings: to 1250 ma—1500 to 10,000 PRV. Solid-state rectifiers replace vacuum tube types... reduce space... eliminate filament supply and warmup time... long life... high reliability operation... IN570 and IN2630 series.

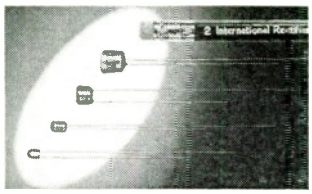
Bulletin SR-209



SILICON SUPER-POWER RECTIFIERS

Ratings: to 50 amps—to 100 KV. Maximum power capacities exceed 1,000 kw... up to 1,000 watts per cubic inch... high overload capacity... reliability of column exceeds that of its individual components... IR IHV series.

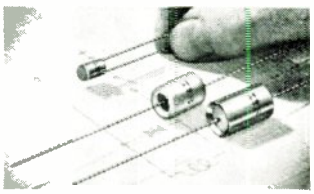
Bulletin SR-370



SUBMINIATURE SELENIUM DIODES

Ratings: to 28 ma—48 to 384 PRV. High efficiency/low cost diodes provide stable operation over −50°C to +100°C range... reverse resistance to 30 megohms at 30 volts... withstand 1 second surges to 550 ma... IN1625 series.

Bulletin SR-163A



SELENIUM CONTACT PROTECTORS

Ratings: 26 to 156 vac—.2 to 1.2 amp coil current 15 to 133 vdc—.25 to 3 amps coil current. Low cost contact protectors... eliminate arcing and pitting of relay and switch contacts... IR S1V series.

Most complete line of digital measuring

PREMIUM DIGITAL VOLTMETERS

V44 All-Electronic Voltmeter Purpose: measuring and data logging for high-speed applications requiring maximum reliability and dependable ±0.01% accuracy . . . 200 readings per sec. of DC voltages from ±0.001 to ±999.9 . . . output for data logging . . . 10 megs input impedance on all ranges without internal or external preamplifiers . . . no decade or amplifier potentiometers to trim; "NO POTS AT ALL" stability is designed in, not trimmed in. **Price: $6,150**

M25 5-Digit Multi-Purpose Instrument Purpose: applications requiring full 5-digit accuracy with relatively high speed, outstanding reliability, and versatility; missile systems checkout, inertial guidance research, unattended data logging, advanced R & D . . . fastest, most reliable, most versatile 5-digit DVM . . . in 1.1 sec. measures DC voltage from ±0.0001 to ±999.99, DC voltage ratio from ±.00001 to ±99.999, and resistance from 0.1 ohm to 1 megohm . . . accuracy ±0.01% of reading ±1 digit . . . 10 to 1000 megs input impedance . . . with accessories, measures AC voltage, AC voltage ratio or low-level DC . . . fully automatic . . . remotely programmable . . . output for data logging . . . transistorized circuitry, mercury-wetted contact relays. **Price: $6,150**

M24 Multi-Purpose Instrument Purpose: for 4-digit applications requiring M25 features . . . 1/3 sec. balancing time is three times faster than M25 . . . measures DC voltage from ±.0001 to ±999.9 and DC voltage ratio to ±.9999 with ±0.01% accuracy, resistance from 0.1 ohm to 1 megohm with ±0.05% accuracy . . . with accessories, measures AC voltage, AC voltage ratio, or low-level DC . . . transistorized circuitry, mercury-wetted contact relays. **Price: $5,650**

V24 Voltmeter-Ratiometer Purpose: uses requiring M24 features without the need to measure resistance. **Price: $4,950**

R24 Ratiometer Purpose: especially useful in analog computers and potentiometer pickoff data systems . . . measures only DC ratio with ranges of ±.9999/9.999 . . . same features as M24 and V24. **Price: $4,650 (not stocked)**

V35A Voltmeter-Ratiometer Purpose: uses requiring maximum accuracy and high reliability such as inertial guidance research, missile checkout, calibrating high accuracy measuring systems . . . this medium-priced transistorized DVM is the fastest 5-digit stepping switch type voltmeter . . . "Factual Fifth Figure", full 5-digit resolution of 0.001% . . . measures DC voltage from ±0.0001 to ±999.99, DC voltage ratio from ±00.001% to ±99.999% . . . with accessories, measures AC voltage, AC voltage ratio, low-level DC . . . features "No-Needless-Nines" logic and plug-in oil-bath stepping switches for exceptionally long life and maximum reliability . . . no manual lubrication needed . . . completely automatic . . . output and built-in control for data logging. **Price: $3,950**

V34A Voltmeter-Ratiometer Purpose: designed for 4-digit uses requiring V35A reliability, speed and versatility. **Price: $3,350**

LOW-COST

481A Digital Voltmeter Purpose: this 4-digit instrument is an outstanding value for applications requiring ±0.01% accuracy and completely automatic operation at low-cost . . . does not contain printout connections . . . features plug-in decade resistors and stepping switches for troubleshooting and switch lubrication and replacement in several minutes . . . measures DC from ±0.001 to ±999.9, AC and low-level DC with plug-in accessories . . . basic design proved by six years field use. **Price: $1,425**

484 Digital Voltmeter with Printout Purpose: low-cost measuring and data logging with ±0.01% accuracy . . . printer connection and automatic print control are built-in . . . features plug-in stepping switches . . . same basic features as 481A above. **Price: $1,650**

784 Digital Ohmmeter with Printout Purpose: precise measuring and logging of resistance at low cost . . . features plug-in stepping switches and built-in printer connection and automatic control . . . stepping switches and decade resistors mounted on plug-in boards . . . same basic features as 484 above. **Price: $1,650 (not stock)**

481 Digital Voltmeter Purpose: applications requiring ±0.01% accuracy without need for printout or plug-in stepping switches . . . same basic specifications as 481A. **Price: $1,275 (not stock)**

INDUSTRIAL SERIES DVMS

781 Digital Ohmmeter Purpose: fast easy resistance measurements not requiring printout, such as receiving inspection, production, quality control, laboratory testing . . . this 4-digit ohmmeter equals performance of units costing twice as much . . . measures 0.1 ohm to 10 megs . . . accuracy of ±0.05% ±1 digit (±0.1% of reading above 5 megs) . . . 20 times faster than using Wheatstone bridge . . . completely automatic . . . construction similar to 481. **Price: $1,425**

V64A Digital Voltmeter Purpose: full 4-digit resolution at lowest cost . . . similar to 481A but has manual range polarity selection . . . accuracy is ±0.01% of full scale . . . measures DC voltage from ±0.001 to ±999.9, AC and low-level DC with accessories. **Price: $1,125**

V60 Digital Millivoltmeter Purpose: making highly-precise low-level measurements without a preamplifier for such applications as calibrating millivolt devices, strain gage and thermocouple measurements, process monitoring, semiconductor research and testing . . . features ±0.01% precision (ability to repeat readings within close limits), unattainable from pointer meters and strip chart recorders . . . accuracy is ±0.1% of reading or ±10 microvolts . . . range is ±00.01 to ±99.99 mv . . . extremely high AC and DC common mode rejection . . . scale factor control to permit display in units of pressure, weight, length, strain, etc. **Price: $1,625**

ASSOCIATED INSTRUMENTS AND ACCESSORIES

AC/DC Converters Purpose: provide advantages of digital measurements for AC voltage and AC voltage ratio . . . combine appropriate converter with any NLS DVM for precise, rapid AC measurements over a wide frequency range with high input impedance . . . accuracy: ±0.1% . . . ranges: 9.999/99.99/999.9 volts AC . . . speed: 3 sec. avg. . . . frequency range: 30 cps to 10 kc.

Model 125E ($1,200) automatic ranging for use with NLS premium DVM's . . . Model 125C ($1,200) same as 125E with manual ranging . . . Model 125B ($1,200) same as 125C for use with Industrial DVM's and RS2 . . . Model RR-1 ($1,200) AC voltage ratio measurements with 125C and M24 or V24 . . . Model RR-2 (not stock) AC voltage ratio with any DVM that measures DC ratio; 125B, C or E also required.

RS2 Data Logger Purpose: highly precise scanning, measuring and recording at low cost . . . scans up to 20 double-pole input channels, measures DC from ±0.001 to ±999.9 with ±0.01% accuracy, and records channel number and 4-digit reading with polarity and decimal point . . . delivered in cabinet ready for use. **Price: $3,600**

CS2 Calibration Console Purpose: highly accurate calibration of AC and DC digital voltmeters, ratiometers and ohmmeters . . . extremely fast, simple "push-button" operation. **Price: upon request (not stock)**

Voltage Comparators

Model 50 Voltage Comparator — a transistorized instrument with manual limit setting from ±0.001 to ±999.9 volts . . . signals tolerance by colored bulbs and contacts within 90 ms . . . ±0.02% accuracy . . . 10 megs input impedance. **Price $1,775**

Model 51 Voltage Comparison Amplifier — applications where limits are already in voltage form . . . wide range, high sensitivity, high input impedance, transistorized. **Price: $ 950**

Model 54 Digital Comparator — plugs into NLS DVMs with printer output connector for go/no-go indication of input limits . . . limits set by BCD voltages or contact closures or, optionally, by knobs on the 54 . . . signals "too high", "too low", or "OK" to recorders or control devices. **Price: upon request (not stock)**

DVM Accessories Purpose: to form any of hundreds of measuring and data logging systems by easy, plug-in combination with NLS DVM's . . . accessories include AC/DC converters, remote readouts, preamplifiers for low-level DC, transistorized input scanners, data printers, serial converters, Flexowriter systems, electric typewriter systems, tape punches, digital comparators.

Prices and specifications are subject to change without notice. Shipment is within 3 days after receipt of order at Del Mar — 30 days max. if stock becomes depleted. Non-stock models require 90 days max.

World Radio History

New miniature ceramic trimmer—the smallest ceramic disc trimmer on the market • Style 538—3/8" diameter

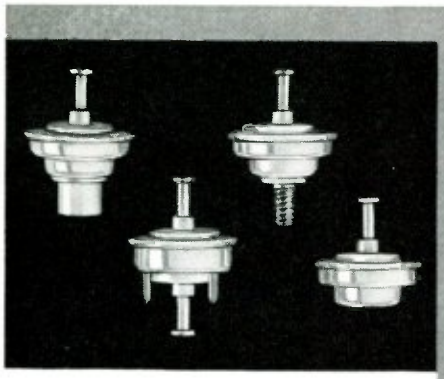
Ideal for missile and other high temperature applications, this ⅜-inch diameter trimmer operates through a temperature range of −55°C to +125°C.

ERIE's new Style 538 is designed for printed circuitry as well as conventional circuitry.

CAPACITANCE: NPO; 2pf-8pf and 5.5pf-18pf
N300; 2.5pf-11pf and 7pf-25pf
N500; 3pf-10pf and 8pf-25pf
N650; 3pf-10pf and 9pf-35pf

WORKING VOLTAGE: 200 VDCW

ALSO AVAILABLE: ceramic trimmers with capacities ranging from 1.5 to 50 pf; custom designed assemblies containing up to 25 or more trimmers (for printed or conventional circuitry); and self-locking ERIE tubular trimmers in ceramic and high temperature polystyrene dielectrics.



New Erie Gold Seal Button® mica capacitors the world's finest UHF capacitor

At 200°C, this exciting new capacitor far exceeds requirements of MIL-C-10950. Finest in design and quality to assure maximum freedom from internal contamination. Welded full-hermetic seal plus gold-plating assure maximum conductivity and resistance to leakage even under the most severe environmental operating conditions. Operates perfectly at temperatures from −55°C to +200°C at 500 VDCW. Capacities: 15pf to 2500pf.

Also standard ERIE BUTTON MICA CAPACITORS in capacities from 5pf to 8200pf. Wide range of stand-off and feed-through types, mountings, and styles. Exceed MIL-C-10950 specs.

NEW additions to the line of ERIE ELECTRONIC COMPONENTS

New miniature radial-lead tubular Ceramicons®

Two recent additions to the wide variety of ERIE's radial-lead capacitors are Style 374 and 375.

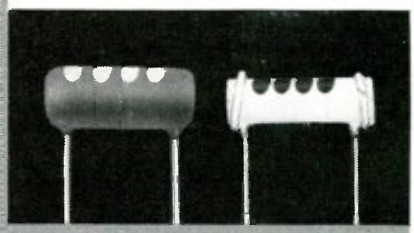
Style 374 is an enamel coated capacitor only .320" long and .125" diameter.

Style 375 is a dipped phenolic coated capacitor only .330" long and .140" diameter.

Both styles are available in the full range of Temperature-Compensating and Hi-K dielectrics.

Capacitance: 2pf—5600pf

Working Voltage: 200 VDCW



New Erie Solid Electrolyte Tantacons

Tantacons are hermetically sealed, polar, tantalum capacitors combining high capacitance per unit volume and low, linear temperature characteristics over a wide operating temperature range. Solid electrolyte eliminates leakage problems, and quality Erie construction assures long shelf and operating life.

Available in metal MIL cases sizes A and B, insulated and non-insulated, with capacitance range from 1.0 mf to 56 mf. Capacitance tolerances are ±5% (on request), ±10% and ±20%. Supplied in voltage ratings of 6, 10, 15, 20, and 35 VDCW. Operating temperature range is −80°C to +85°C at full rated voltage.

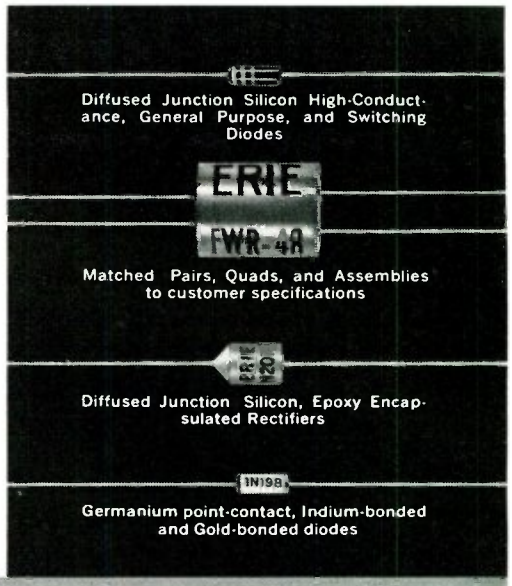
Erie Semiconductor Devices

NEW! The high-conductance, fast-switching, low-cost ED 1873 and ED 1904 germanium diodes are for both military and industrial computer and control applications. These units join the select group of Erie Specialized Application Diodes that have been custom designed to precise customer requirements and later have found industry-wide acceptance. This group includes the ED 1806, 1825, 2015, 2016, 2017, 2018 and many others. Information regarding the special application types is available by return mail.

COMING SOON—A 1500 volt, 1 amp, glass package silicon rectifier.

MIL DIODES — JAN 1N126A, 1N127A, 1N128A, 1N198, 1N270, 1N276, 1N277 and 1N281 are available to MIL-E-1D. Also available are types 1N198B, 1N933 and R-275.

Electron Research, Inc., Division of Erie Resistor Corp., manufactures over 600 individual types of germanium and silicon diodes and rectifiers. Also available is a standard line of silicon diode packaged assemblies with ratings of .3 to 4.0 amperes at working voltages between 200 and 1500 volts. Further special assemblies of germanium and/or silicon diodes and rectifiers are available packaged as matched pairs, quads, half and full wave rectifiers, doublers, etc., designed to specific customer requirements.



NEW Erie Wee-Cons

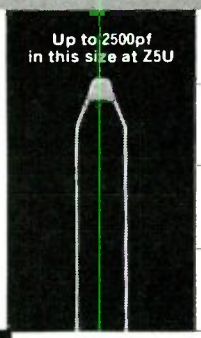
. . . Sub-miniature plate capacitors.

Sub-miniature size and rectangular shape allows a higher component density on printed circuit boards.

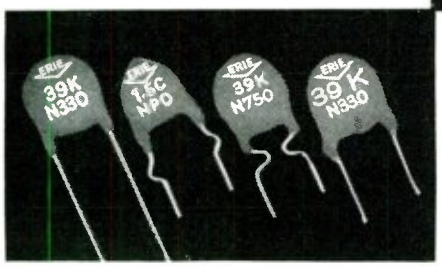
Dipped Phenolic Coated
TC and Hi-K Dielectrics

WORKING VOLTAGE: 200 VDCW

CAPACITANCE: 6pf to .05 mf



Style	4805	4815	4825	4835	4845	4855
Max. Size	.150 x .150	.200 x .200	.300 x .300	.400 x .400	.500 x .500	.600 x .500
Thickness	.100"	.100"	.100"	.100"	.150"	.150"
Capacitance	6pf to 3300pf	11pf to 6200pf	25pf to 13,500pf	48pf to 25,000pf	76pf to 40,000pf	90pf to 49,600pf



Erie Capacitors

STANDARD DISC CERAMICONS®— Your choice of wire leads, Wil-lok or plug-in terminals, or kink leads. Operating temperature range available: —55°C to +125°C. MIL-C-20, MIL-C-11015 qualification approvals. Conform to EIA RS-198, RS-165, SMC-1 and ERIE high-reliability spec. 900 where specified.

CAP.: .5pf through 0.1mf

TOL.: ± .25pf to GMV

TC DIELECTRIC: P120 through N5600

HI-K DIELECTRIC: X5F, Z5D, W5F through X5V

NEW Super NPO Discs . . .

- **Twice the capacitance for given diameter**
- **± 20 PPM temperature coefficient tolerance**
- **Higher life-test voltage endurance at 85 C or 125 C**

Designed around a revolutionary new dielectric developed by Erie, SUPER NPO Ceramicons provide electronic performance superior to dipped silvered mica capacitors, yet are generally lower in price . . . and may be only half the size.

CAPACITY: 1.4 pf through 270 pf.

CAPACITY TOLERANCE: 10pf and below ±0.1pf, ±0.25pf, ±0.5pf, ±1.0pf, and ±2.0pf. Above 10pf ±5%, ±10%, and ±20%.

Q FACTOR: 1000 Min., 30pf and above. Below 30pf, Q decreases in a straight line function from 1000 at 30pf to 400 at 1pf.

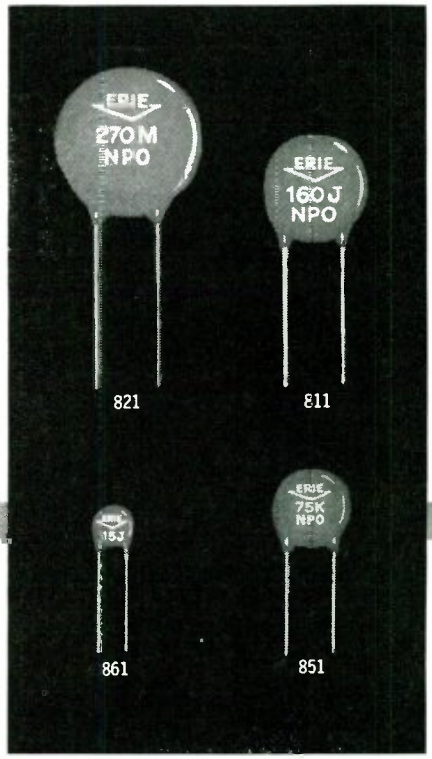
INSULATION RESISTANCE: 10,000 Megohms Min.

WORKING VOLTAGE: 500 VDC through 6000 VDC.

FLASH TEST: 1500 VDC for 500 VDC rated capacitors. 2X VDC rating for 1000 VDC or higher rated capacitors.

LEADS: Heavy solder coated meeting the requirements of EIA RS178.

INSULATION: Phenolic, vacuum wax impregnated.



ERIE ELECTRONICS DIVISION
ERIE RESISTOR CORPORATION
644 West 12th Street · Erie 6, Pennsylvania

Sales Offices in principal cities of USA, Canada, Europe

Erie Capacitors and Diodes are also available in quantities under 1,000 pieces from leading electronic distributors.

PANORAMIC

"the pioneer is the leader"

dependable CERTIFIED SPECIFICATIONS for accurate data

SUMMARY OF SPECIFICATIONS

SPECTRUM ANALYZERS

½ cps to 44 kmc

LP-1a

BROADBAND SPECTRUM ANALYZERS 0.5 cps to 25 mc. Easy-to-operate direct reading analyzers display plot of signal amplitude vs. frequency on 5" CRT or chart. Features include: "quick look" wideband scans plus highly selective narrow scans. Center frequency, sweep width, and selectivity (resolution) are adjustable. Calibrated linear and 40-db log scales

All these broadband spectrum analyzers are available with accessories and in systems which materially improve specifications and application versatility.

* This specification improved or adjustable with optional accessories.

Frequency Range	Model No.	Sweep Width	Resolution (I-F Bandwidth)	Sensitivity Range (Full Scale Linear)	Sweep Rate	Harmonic Products (Dynamic Range)
0.5 cps to 2500 cps	LF-2b (incl. chart recorder. 3" CRT optional)	Preset 2-500 cps on 2 ranges	0.1-20 cps	10 mv to 100 v	30 sec-16 min/scan	—40 db
20 cps* to 22.5 kc.	LP-1a (5" CRT)	40 cps–20 kc log scan. Linear* 200, 1000,5000 cps	Automatic optimum. Best resolution 25 cps*	500 μv to 500 v	*1 cps	—60 db
200 cps to 300 kc	SB-7bZ (5" CRT)	0-200 kc	100 cps–2 kc	250 μv to 25 v	*6.7 cps.	—50 db
100 cps to 600 kc	SB-15a (5" CRT)	1 kc–200 kc	100 cps–4 kc + automatic optimum	200 μv to 200 v	*1-60 cps	—60 db
1 kc to 15 mc	SPA-3 (5" CRT)	0-3 mc	200 cps–30 kc	20 μv to 2 v	1-60 cps	—46 db
1 kc to 25 mc	SPA-3/25 (5" CRT)	0-3 mc	200 cps–30 kc	20 μv to 2 v	1-60 cps	—46 db

SPA-4a

MICROWAVE SPECTRUM ANALYZERS 10 mc to 44 kmc. Feature unsurpassed usable sensitivity and freedom from spurious effects for pulsed AM, FM and CW signals. Direct reading frequency dial ± 1%. They have adjustable dispersion, I-F bandwidth and adjustable sweep rate; 1-60 cps, free running or synchronized; 3 calibrated amplitude scales, linear, 40 db log, and power; calibrated frequency markers. Model SPA-1 has 2 interchangeable tuning heads; SPA-4a covers band to 44 kmc with 1 head.

Frequency Range	Model No.	Sweep Width (Dispersion)	Resolution (I-F Bandwidth)	Sensitivity (Signal = 2x Noise)	Other Features
10 mc to 44,000 mc 1 Tuning Head	SPA-4a (5" CRT)	2 swept oscillators 0 to 70 mc 0 to 5 mc	1 kc to 80 kc	L band — 100 to —110 dbm.; S band — 90 to —100 dbm.; X band — 90 to —100 dbm.; K band — 70 to — 90 dbm.	All mixers built in • Dynamic range to —60 db. • Low residual FM • Synchroscope Output • Marker Modulation
50 mc to 4000 mc; (10 mc to 4000 mc. optional)	SPA-1 (5" CRT)	0 to 10 mc	9 kc to 80 kc	(With opt. internal preamp.) RF-2 head, 50-250 mc —100 dbm RF-3 head, 220-4000 mc 500 mc — 100 dbm 1500 mc — 94 dbm 3000 mc — 76 dbm	Extremely low cost • Exceptionally stable • Available in 4 styles • Highly sensitive I-F preamp, optional.

FREQUENCY RESPONSE PLOTTERS

½ cps to 15 mc

G-3a

COMPANION SWEEP GENERATORS FOR BROADBAND SPECTRUM ANALYZERS: Response to fundamental frequency only; discriminate against noise and hum; virtually unlimited dynamic range; single line plots. Accessories available for comparison testing, triangular scanning, and manual tuning.

Frequency Range	Sweeper Model No.	Used With Analyzer Model	Output Voltage (& Impedance)	Output Attenuator	Overall Flatness
0.5 cps to 2500 cps	G-5	LF-2a	0-5V (3000Ω)	0-60 db	±0.5 db (1-2500Ω)
20 cps to 22,500 cps	G-2a	LP-1a	50 mv-5v (1000,600, 3KΩ)	0-100 db	±1 db
200 cps to 300 kc	G-3a	SB-7bZ	250 μv to 2.5 v (600Ω)	0-80 db	±0.5 db (1-300 kc)
100 cps to 600 kc	G-15a	SB-15a	250 μv to 2.5 v (600Ω)	0-80 db	±1 db (0.2-600 kc)
1 kc to 15 mc	G-6	SPA-3 SPA-3/25	200 μv to 0.2 v (72Ω)	0-60 db	±2 db (1 kc-13.5 mc)

SWEEP GENERATOR 20 cps-200 kc used with ext. scope (CRT scale furnished). Model SG1. Pre-set broadband, log and adjustable linear scans. Built-in markers. SG-1R same as SG-1, plus synch pulse for testing tape recorder frequency response.

Frequency Range	Model	Scan Modes	Output Voltage (& Impedance)	Flatness	Sweep Rate
20 cps-200 kc	SG-1 SG-1R	40 cps to 20 kc log scan 400 cps to 200 kc log scan 0—200 kc lin. sweep widths	0-1 volt (600Ω)	±½ db	1 cps. Adjustable with TW-1a

COMMUNICATIONS SYSTEMS ANALYZERS

SSB, AM, FM

PANADAPTORS. For use with communications receiver with I-F = Panadaptor center frequency. Panadaptor response shaped to match receiver. Specify receiver model no. and I-F.

For Receivers With Intermediate Frequency of	Model Series	SUMMARY OF SERIES CAPABILITY: Sweep Width	Resolution	Sensitivity (At I-F)	Sweep Rate	Amplitude Scales	CRT Size
450 kc-30 mc	SA-8b (4 types)	0-100 kc to 0-10 mc	50 cps to 80 kc	150-2000 mv full scale	1-60 cps	Linear, 40 db log Power	5" (camera mount style optional)
450 kc-30 mc	SA-3 (10 types)	0-50 kc to 0-6 mc	2 kc to 50 kc	10 μv-10 mv ¼" deflection	30 cps	linear (nominal)	3 inch

PANALYZORS scan through an adjustable sweep width about their center frequencies. An external VFO* is used for conversion of signals in Panalyzor input mixer. Mixer range up to 1000 mc.

*eg. Model RF-7a Panoramic VFO, 2-40 mc.

Model Series (Input Center Frequency)	SUMMARY OF SERIES CAPABILITY: Sweep Width	Resolution	Signal Sensitivity (VFO 0.1 volt rms)	Sweep Rate	Amplitude Scales
(†) SB-12a, 500 kc (or 455 kc)	0 to 100 kc + preset modes	10 cps-2.5 kc (see also SSB-3a)	2 mv full scale log	0.1-30 cps	linear 40 db log
SB-8b 3 types (500 kc-30 mc)	0 to 200 kc to 0 to 10 mc	50 cps-80 kc	10-100 mv full scale log	1-60 cps	linear 40 db log power
SB-3 5 types (500 kc-30 mc)	0 to 50 kc to 0 to 6 mc	2 kc-40 kc	1-10 mv, ¼" deflection	30 cps	linear (nominal)

(†) SB-12a also part of SSB-3a, (below)

SSB-3a

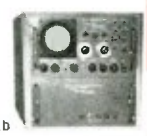
SINGLE SIDEBAND SPECTRUM ANALYZER—Model SSB-3a is a complete, compact unit for communications systems analysis. Advantages are 60 db dynamic range, selectivity for hum sideband analysis to —60 db, and simple operation with preset modes and self-checking facilities.

SSB-3A INCLUDES THESE COMPONENT INSTRUMENTS.

SSB-3a Frequency Range	Panalyzor Model SB-12a(s)	Model RF-7a Tuning Head	2 tone AF Gen. Model TTG-2	Resolution (I-F Bandwidth)	Sensitivity
2 mc to 40 mc (100 cps to 40 mc with Model REC-1 optional)	see SB-12a specs. above	2-40 mc Fast search + precise vernier tuning 1% accuracy	100 cps-10 kc (±2%) 0-4 volts rms metered outputs	(Same as SB-12a Minimum—60 db bandwidths = 90 cps)	2 mv full scale log, Virtually uniform from 100 cps-40 mc. 0-65 db input attenuator

TELEMETRY TEST INSTRUMENTS

(for IRIG FM/FM Systems)



TMI-1b

Model No.	Name	Features	Uses
TMI-1b	Telemetering Indicator	Analyzes 350 cps-85 kc band. • Both Log & Linear Scans • Automatic optimum resolution • Internal markers	Subcarrier spectrum analysis • pre-emphasis • distortion measurements • spillover • noise
TMC-1	3 Point Calibration and Subcarrier Deviation Indicator	Xtal controlled = 0.02%; + 7.5%, 0, —7.5%; also A to E • Special deviations available • Provides markers for uni-channel scans for TMI-1b analyzer	Discriminator calibration ±0.02% With TMI-1b, monitors individual channels or VCO deviation linearity
TMC-411E	Simultaneous 11 Pt. Calibrator (also 3 pt.)	Accuracy ± 0.002% • A11 ± 7½% channels + A to E • 18 channel outputs simultaneously or individually • auto./manual sequencing • special provisions available • all electronic, 7" high • distortion —40 db	Complete discriminator checkout in seconds! Multiple frequency reference source for data reduction and system calibration. With TMI-1b for VCO checks.

HELPFUL HINTS
for using the IRE DIRECTORY

A few minutes' study of the basic layout of the IRE DIRECTORY will help you to find the information for which you are looking more quickly and more accurately. At first glance, the IRE DIRECTORY may seem to be confusing, but by using the various portions of the book as listed below, you will find your way around easily, and will discover that it is actually a very simple arrangement, and a much more logical one than a purely alphabetical terminology listing.

PINK SECTION at the front of the products and firms section contains a terminology index listing every product, major and minor, for which a list of manufacturers is given. Page numbers refer you to the page on which the listings for that product begin. Following this alphabetical index is a copy of the questionnaire which is sent to the firms who have furnished us with product information. A quick look through this questionnaire will help greatly in understanding the product arrangement. At the top of the first page of the pink section is a small index referring you to the opening page of the complete-data spread section, the alphabetical directory, and each of the three product directories.

THE COMPLETE DATA SPREAD SECTION contains product advertisements of great usefulness to the reader. Most of these advertisements are two pages or more, and all of them contain complete information on the products manufactured by the advertising firms—specifications, prices, illustrations, and suggested applications.

ALPHABETICAL DIRECTORY OF MANUFACTURERS contains a list of firms representing the majority of buying and selling power in the radio-electronic industry. Each firm listing contains the complete mailing address and telephone number for the firm. Following the state name in the firm address, a list of code numbers is given. These numbers refer to the 112 major products listed in the book (for quick reference to the meaning of the codes, use the questionnaire form in the pink section). Following the telephone number is the year in which the firm was founded, the total number of employees, the number of IRE members employed, and the net radio-electronic sales during the last fiscal year.

THE THREE DIRECTORIES OF PRODUCTS ARE:

1. Complete Equipment
2. Components
3. Materials and Services

This breakdown into three directories saves you from traveling through many products in which you are not interested at the moment, and helps you to turn immediately to the listings for the type of product you want, following a straight line to your destination. Use the Machol edge index at the top of the first page of the pink section to locate immediately the first page of the appropriate directory, then use the Machol edge index at the beginning of each directory to find the specific product you want. You don't even have to know the page number—the index will find it for you automatically!

112 MAJOR PRODUCTS are listed within these three Directories. Each product listing contains a number of sub-headings so that you may know specifically what each firm makes. To interpret the code numbers shown after each firm's listing, consult the first page of that product class, where the sub-headings are defined. You will note that advertisements are positioned throughout the book in the most appropriate listing section, so that the advertisement for a relay manufacturer will appear in the relay section, to help you with further information on his product. Every advertiser's listing shows you where his advertisement may be found, and you will derive more value from this book if you consult these advertisements for facts you cannot find in the listings.

COMPLETE ADDRESS LISTINGS are given only for advertisers in the product listings. If you wish to locate the address and telephone number for any other firm, it will be necessary to use the alphabetical directory.

THE DISTRIBUTION SECTION is the last class in the book. This section contains a list of manufacturers representatives, distributors and jobbers, grouped geographically.

MANUFACTURERS' CROSS-REFERENCE INDEX: This index will serve two purposes: 1) Indicate corporate affiliations between firms, between a parent company and its divisions, and old firm names which have been changed; 2) Tell you where to look for firms or divisions whose name you remember but whose listing in the Alphabetical Manufacturers' Index may be under a different name.

TRADE-NAME INDEX: A list of registered & "coined" trade-names submitted to IRE by manufacturers. For registered names of firms or divisions, see Manufacturers' Cross-Reference Index.

ADVERTISER'S INDEX appears just inside back cover.

How to Use the Machol Edge Index

High speed reference is a major objective of the IRE DIRECTORY. To this end we have adopted the Machol Edge Index system, and these indexes:

Advertisers Index, last pages in book, facing third cover.

Key to Products, Pink Section.

Index to Spreads, 1.

COMPLETE DATA SPREADS
ALPHABETICAL DIRECTORY
DIRECTORY I COMPLETE EQUIPMENT
DIRECTORY II COMPONENTS
DIRECTORY III MATERIALS & SERVICES
DISTRIBUTION

Detailed Machol edge indexes will be found on the first page of the alphabetical Directory and each of the three major product Directories. The Machol system will help you find both alphabetical and product sections swiftly.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the outside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

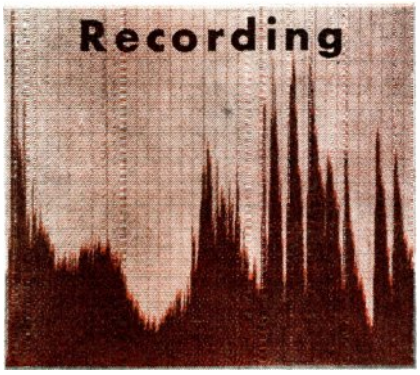
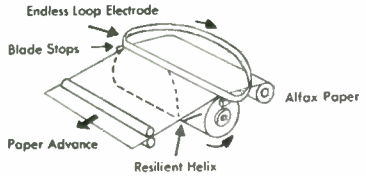
World Radio History

Instant Graphic



For the first time . . . ultra high speed and precision accuracy in binary graphic display ! 660 inches/second recorded at 40 lines/inch. Sweep information is amplitude measured at .010″ against a grid generated at recorder.



Exclusive Alden graphic recording techniques make it simple to synchronize a recording helix with any of a variety of sweep, time-base, sampling, or other sensing applications which involve processing information on a sequential basis.

SAMPLE APPLICATIONS

RADAR — Direct graphic recording from radar or tapes at radar rate or sampling of radar return for range information, azimuth, target identification.

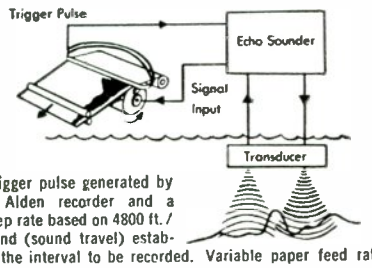
FREQUENCY ANALYSIS — Radio astronomy output records sweep of receiver with dynamic tone shade response identifying frequencies of interest.

INFRA-RED — Integration by Alfax Paper suppresses random noise functions integrates repeat signals.

ULTRASONICS — Specific flaw detection on 1 to 1 basis with wide printout available to 4′ width.

SONAR — Echo-ranging, echo-sounding, ASW active & passive systems, etc.

SPECIFIC SONAR APPLICATION



A trigger pulse generated by the Alden recorder and a sweep rate based on 4800 ft./second (sound travel) establish the interval to be recorded. Variable paper feed rate provides integration of signal return.

PRECISION GRAPHIC RECORDER... an exemple of complete system development. The Alden 419PGR operates at 12 discrete speeds, presents 20 fm to 3000 fm full scale for flexible programming of underwater sound recording.

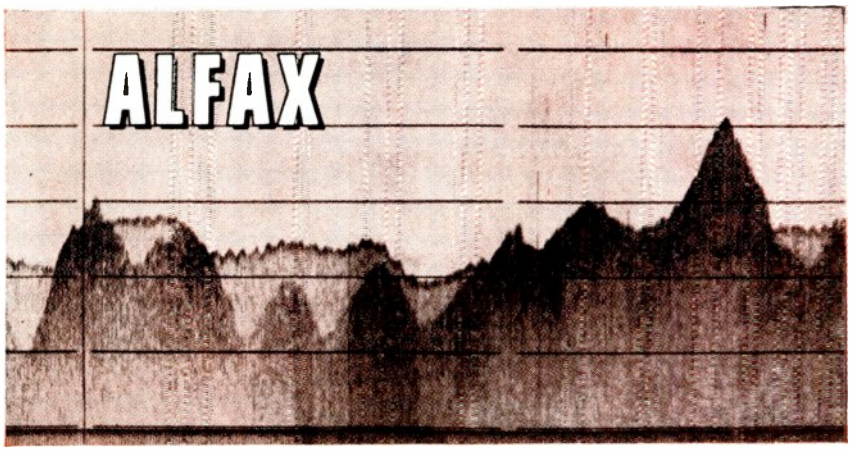
Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

World Radio History

There's nothing as simple or satisfactory as recording with



Recording of Halifax Bay in Nova Scotia illustrates the discrete recording at a 50 fathom interval. Note that the tone shading derived from Alfax Paper in this instant graphic recording captures more information.

No matter what you need to record — Alfax electrosensitive paper can help you do it better, easier, faster.

Progressive innovators have proven this — obtaining *vital information never before recorded* in:

- Satellite Tracking
- Brain Wave Study
- Sonar
- Seismic Profiling
- Computer Readout
- Ultrasonic Flaw Detection
- Long Range Radar
- Frequency Analysis

with unexpected breakthroughs in many other areas.

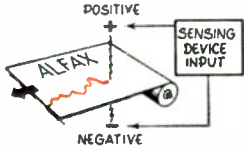
Why? Because of

ALFAX EXCLUSIVES

- broad, dynamic response capable of 22 distinct tone shades
- remarkable expansion at low level signal, where slight variation may provide critical information
- records in the sepia area of the color spectrum where the eye best interprets shade differentials in diminishing or poor light of laboratories, temporary field locations, briefing centers, planes or ships.
- writing speed capabilities from inches per hour up to 1400 inches/second (a speed range from 1 to 84000)
- captures 1 micro second pulse or less
- dynamic range as great as 30 db
- integration capability to provide for signal capture in signal to noise ratio conditions worse than 1 to 4
- resolution capabilities of one millisecond equal to one inch of sweep
- accuracy capabilities of a few thousandths of an inch by generation of simultaneous grids with signal to permit accurate location of recorded transients
- sensitivity to match the most advanced sensing devices

Alfax . . .

- requires no further processing (thus no delay of information accumulation — no delay of decisions)
- recordings are permanent — can be stored indefinitely under all temperature extremes — even frozen, thawed and then recorded
- eliminates objectionable side effects — (proved completely non-toxic, non-irritant, odor-free)
- provides direct copies by Ozalid or Bruning processes
- may be written on or erased without damage to recording



Alfax provides a simple, uncomplicated recording technique — having a broader application range than any other graphic recording media.

By merely passing a low current through Alfax everything from the faintest trace signal of micro-second duration to slow but saturated signal can be seen *instantly, simultaneously.*

Alfax electrosensitive paper is available without restrictions to you as an instrument manufacturer, electronic systems company, scientist or experimenter. *Write for complete information to . . .*

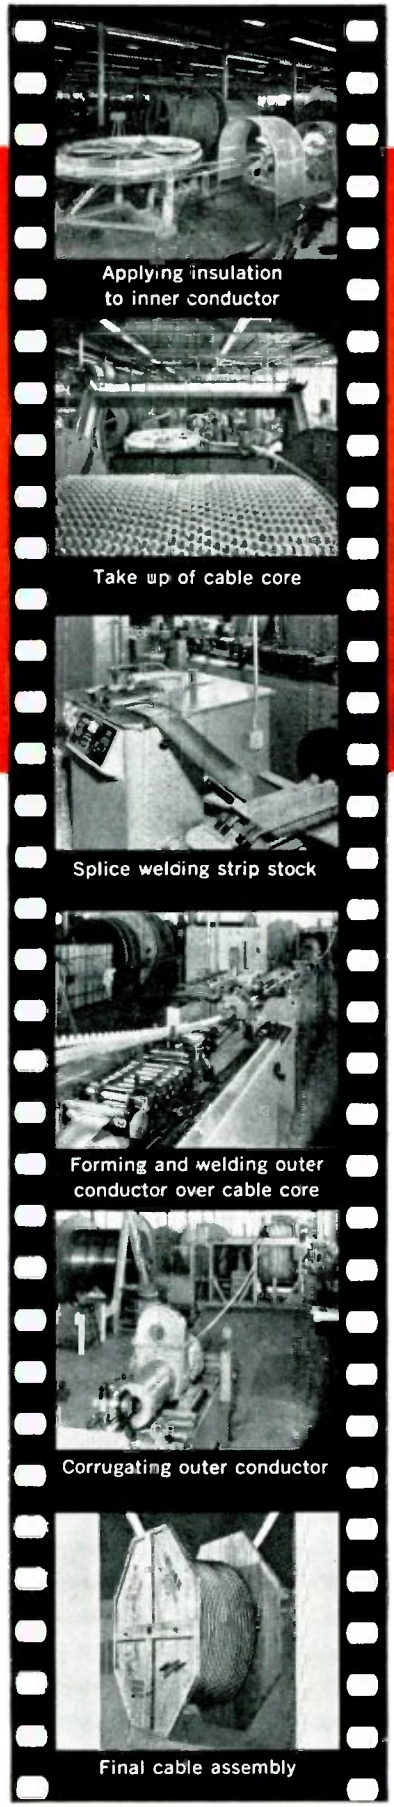
ANDREW

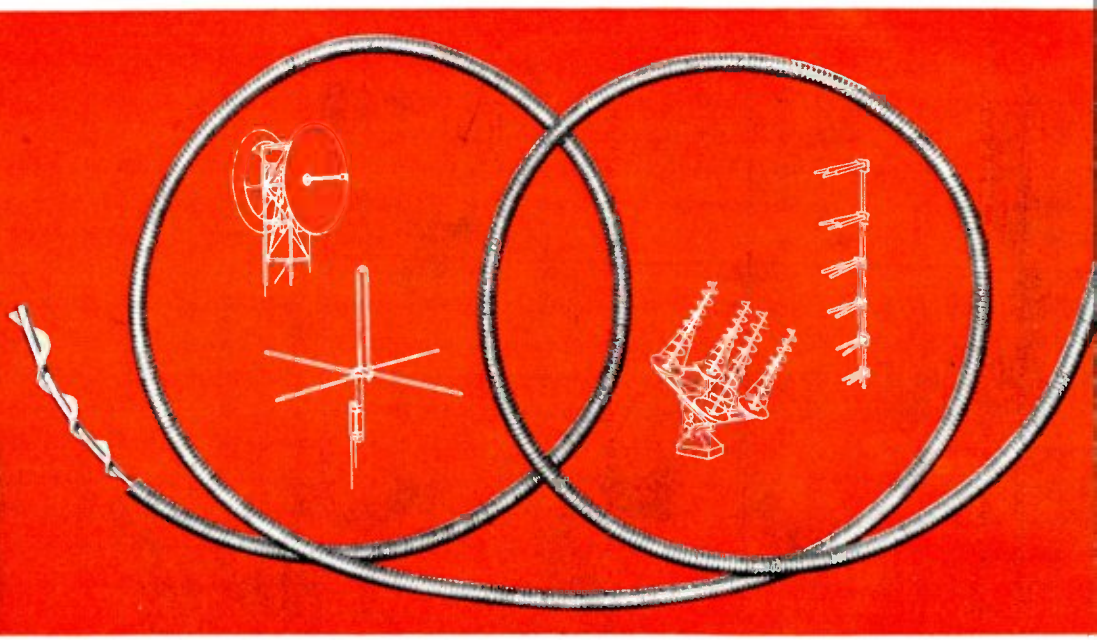
HELIAX

THE FLEXIBLE AIR DIELECTRIC CABLE

meets every communication requirement

Production scenes





Easiest to install...longest to endure

Produced in the new ANDREW plant facilities, HELIAX is the flexible, low loss, low VSWR coaxial cable for use in all applications from VLF through microwave.

The production cycle in which the copper sheet stock is formed around the cable core, welded and corrugated on a continuous basis is depicted in the film strip. Rolled sheet stock provides considerably closer tolerance tubing than is possible by extrusion or other methods.

HELIAX is the *only flexible* air dielectric cable. This flexibility is imparted by the unique, continuous helical corrugated construction. Bending torque required is about one-half that required for straight wall aluminum or copper tubing of the same size.

HELIAX has the greatest resistance to crushing or kinking. Again this is due to its unique construction. Resistance to physical damage from crushing or kinking forces is about twice that of conventional aluminum or copper cables of comparable size.

HELIAX is the only U. S. produced air dielectric coaxial cable capable of being manufactured in continuous lengths. Critical applications need no longer depend on splicing 1,000 feet or shorter lengths to make up a long cable run.

STANDARD SIZES AND TYPE NUMBERS		
SIZE	IMPEDANCE	TYPE NO.
3/8	50	H3-50
7/8	50	H5-50
7/8	75	H5-75
7/8	100	HT5-100
1 5/8	50	H7-50
1 5/8	75	H7-75
1 5/8	100	H7-100
3 1/8	50	H2-50
3 1/8	75	H2-75

ANDREW is your only fully integrated source for complete antenna systems.

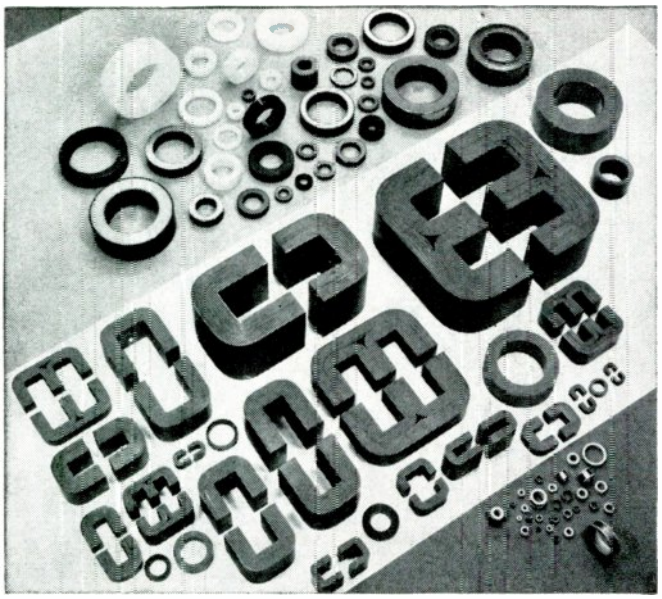
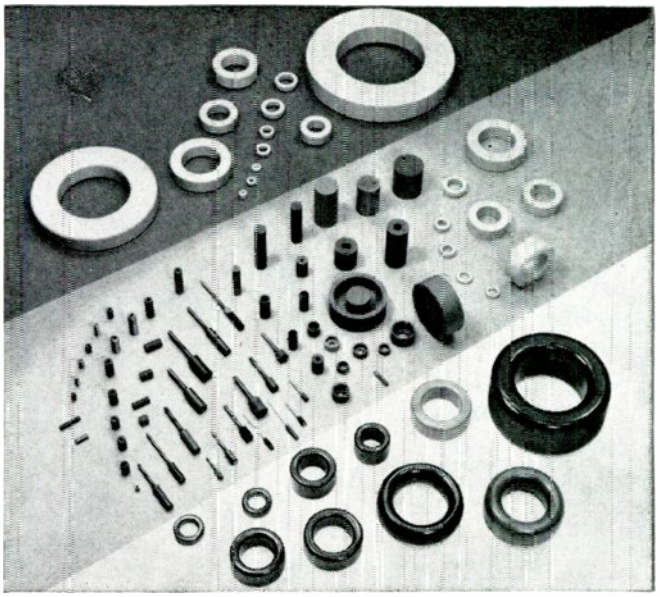
Specify "ARNOLD" for your MAGNETIC CORE requirements



Top to bottom: Tape wound cores, Silectron C, E and O cores, and bobbin cores.



Top to bottom: Mo-Permalloy powder cores, iron powder cores, and Sendust cores.

SILECTRON C-CORES, E-CORES and TOROIDS Arnold C and E cores are made from precision-rolled Silectron strip in 1, 2, 4 and 12 mil thicknesses.

They are supplied in a wide variety of shapes, and in sizes from a fraction of an ounce to several hundred pounds. In addition to standard transformer applications, they may also be supplied for special applications such as saturable reactors, instrument transformers and pulse transformers.

Over 1,000 stock cores are listed in the Arnold Silectron catalog. A wide selection of preferred sizes are carried in stock for immediate shipment. For complete data on C and E cores and Silectron toroids, *write for Bulletin SC-107A.*

TAPE WOUND CORES of High Permeability Materials Arnold tape wound cores are available made of Deltamax, 4-79 Mo-Permalloy, Supermalloy, Mumetal, 4750 Electrical Metal, Silectron, or the new rectangular-loop material, Supermendur. All except Supermendur cores are available in standard tape thicknesses of 1, 2 and 4 mils; also in special tape thicknesses of ½ mil, 12 mil or other, as required or feasible. Supermendur is presently available in 4 mil cores.

Toroidal cores are made in 30 standard sizes with protective nylon or aluminum cases. Special sizes of toroidal cores are produced to individual requirements. *Write for Bulletin TC-101A. (TC-113A for Supermendur Cores.)*

BOBBIN CORES Arnold bobbin cores are available in a wide range of sizes, tape thicknesses, widths and number of wraps to suit the ultimate use of the core in electronic computer assemblies. Magnetic materials usually employed are Deltamax and Square Permalloy in standard thicknesses of 1, ½, ¼ and ⅛ mil. Bobbins are supplied in ceramic or stainless steel. *Write for Bulletin TC-108A.*

MO-PERMALLOY POWDER CORES Available in a wide range of sizes, from .260" OD to 5.218" OD. They are given various types of enamel and varnish finishes, some of which permit winding with heavy Formex insulated wire without supplementary insulation over the core.

These powder cores are supplied in four standard permeabilities: 125, 60, 26 and 14 Mu. They provide constant permeability over a wide range of flux density, and in many cases may be furnished stabilized to provide essentially constant permeability over a specific temperature range. Large warehouse stocks of preferred sizes are carried for immediate shipment. *Write for Bulletin PC-104C.*

IRON POWDER CORES A wide selection of cores is available, from simple cylinders to special cores of complicated design. The line includes all standard types of threaded cores, cup, sleeve, slug and cylindrical insert cores: for use in antenna and RF coils, oscillator coils, IF coils, perm tuning, FM coils, television coils, noise filter coils, induction heating and bombarder coils, and other low frequency applications. Preferred sizes are carried in warehouse stock for quick shipment. A standard series of iron powder toroids is also manufactured, conforming to the standard sizes proposed by the Metal Powder Industries. *Write for Bulletin PC-109.*

SENDUST POWDER CORES Available in a wide selection of sizes, ranging from .800" OD to 3.346" OD, and in permeabilities of 10, 13, 25, 30, 50 and 80, although not all sizes are available in all permeabilities. They possess magnetic properties generally superior to iron powder cores, but inferior to Mo-Permalloy powder cores in the audio and carrier frequency range. *Write for Bulletin SDC-110.*

PERMANENT MAGNET MATERIALS

ALNICO—Arnold produces permanent magnets in all types of Alnico, from castings up to 80 lbs. or more, down to sintered parts weighing less than a gram; also magnet assemblies to meet your designs. Many sizes and types of Alnico magnets carried in stock for immediate delivery.

ARNOX—Arnox III is a molded-type magnet having high coercive force and moderately low energy product. Available to close tolerances in size. Arnox V is a ceramic permanent magnet material, highly oriented, having many times the energy product of Arnox III, also higher resistance to demagnetization than Arnox III possesses.

VICALLOY—A carbon free vanadium-cobalt-iron permanent magnet alloy, adaptable to varied uses because available in hot and cold rolled forms, castings and forgings and readily machinable.

TYPICAL BENDIX® SPECIAL-PURPOSE CABLES THAT SOLVE CRITICAL ENVIRONMENTAL PROBLEMS

1 Heavy Duty—Ground Support Cable
2 Benseal® Missile Control Cable
3 Fabric Braided—Aircraft and Missile Control Cable
4 Metal Braid—Aircraft Nacelle Cable
5 High Temperature—Radiation Resistant Cable
6 High Temperature—Lightweight—Missile Cable
7 "Wet Wing" Aircraft Fuel Cell Cable
8 Rewirable—Jet Engine Control Cable
9 High Temperature—1500°F.—Thermocouple Cable

Bendix cables—products of over a quarter-century of design and manufacturing experience—are proving their complete reliability in a countless variety of applications involving critical environmental conditions.

Angelica Uniforms and Victor Gloves Help Prevent Clean-Room Contamination

Victor Monofilament Nylon Gloves

Angelica has been appointed the only distributor of Victor Gloves, the finest protective gloves made. Victor's non-contaminating gloves of monofilament nylon with plastic coated palms, have maximum touch sensitivity for precision operations. Victor Gloves Inc. collaborated with Bell Laboratories, Inc., in developing these gloves and Bell is currently using them in the assembly of select devices sensitive to physical and chemical contamination.

Other models include ambidextrous gloves and gloves for LOX parts.

Static-Free Dacura* Uniforms

Angelica's coveralls and frocks, of comfortable moisture absorbent Dacura (Dacron** polyester and rayon), are non-linting, acid resistant and static-free. The tight weave of continuous filament yarns resists passage of contamination from the skin or undergarments.

There is a complete "engineer designed" line of Dacura, Dacron, or nylon uniforms and accessories by Angelica and Victor Gloves Inc.

Mail this coupon to the nearest Angelica office below.

World Radio History

For Integrated Communications Systems

BUDELMAN

Microwave and Carrier Offers Greatest Value!

This fact will find agreement in many places — the telephone and telegraph industries, railroads, pipelines, power companies, broadcasting networks, the armed forces, and state and local government agencies.

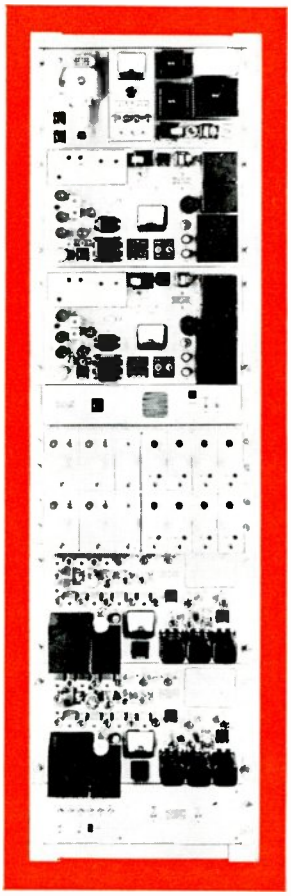
With more than a decade of solid product engineering behind us, we produce hundreds of specialized components which can be integrated into any given low or medium density communications system — at a **very competitive cost!** Even if your problem is new or highly specialized, you'll have good reason to contact Budelman . . . where custom systems engineering is always in high gear.

Get more for your communications dollar. **Call Budelman today!**

For your other requirements,
USE THIS HANDY CHECK LIST

- **PHASE-MODULATED TRANSMITTERS**
- **RECEIVERS** — Hi stability Superhet
- **POWER AMPLIFIERS**
- **CONTROL PANELS** (Transmitter, Power or 2-Wire type)
- **AUTOMATIC TRANSFER PANELS** (Transmitter or Receiver)
- **SPEAKER/SERVICE CHANNEL PANELS**
- **RF DUPLEXERS**
- **TRUNK CARRIER** (Narrow band FM or double side-band AM)
- **POST PAYSTATION CARRIER**
- **CARRIER CHANNEL REPEATERS**
- **PROTECTOR PANELS**
- **FREQUENCY DEVIATION METERS/ TEST OSCILLATORS**

FREE Engineering Reference SPEC-FILES describing Budelman products available on request. Write us or contact your local distributor today. We welcome your inquiry.

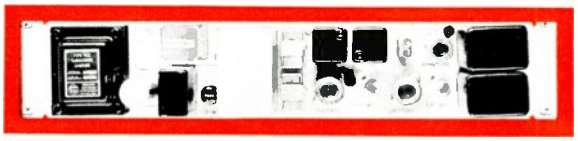


BUDELMAN 2KMC MICROWAVE LINKS (left)

For short-haul gap fillers or multi-hop repeater trunk circuits. Type 14CW-2KMC Radio Terminals are ideally suited for economical, trouble-free, point-to-point low and medium density multiplex communications. Down-to-earth engineering . . . straightforward design—no Klystrons or other critical components or circuits. The combination of these microwave terminals and Budelman **compatible** multiplex equipment **proves in** where other makes cannot.

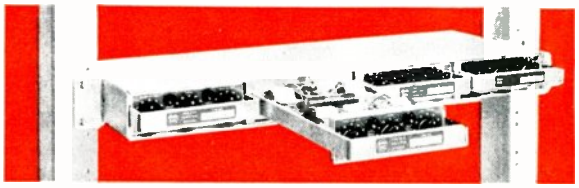
BUDELMAN 960 MC RADIO LINKS

Type 14BN/BW Terminals — your best buy for "thin-route" multiplex radio systems and spur circuits . . . for remote VHF Base Station Control, telegraph, telemetering and/or supervisory control signals. Companion Type 14AN/AW-450 MC Terminals also provide multi-channel speech circuits where wire lines are non-existent, or where installation cost and maintenance is prohibitive.



PRIVATE LINE CARRIER (above)

New Budelman PLC-DR — 4 stackable channels (12-96 KC) each providing private line service OR 2-party service with **selective ringing** . . . converts from Private Line to 2-Party by simply plugging a tiny transistorized module into a carrier terminal. **Lowest cost carrier!**



VOICE FREQUENCY REPEATER (above)

Type 251A — Lowest-cost, high-gain all transistor repeater . . . improves transmission on existing sub-standard subscriber and trunk circuits . . . installs **without complex test equipment.**

MULTI-PARTY SUBSCRIBER CARRIER

Type 16C — 10 stackable channels (10-200 KC), each providing a complete new line for fully-selective 5-frequency ringing — each serving up to 10 additional subscribers — for a total of 100 new subscribers over an existing physical circuit.

World Radio History

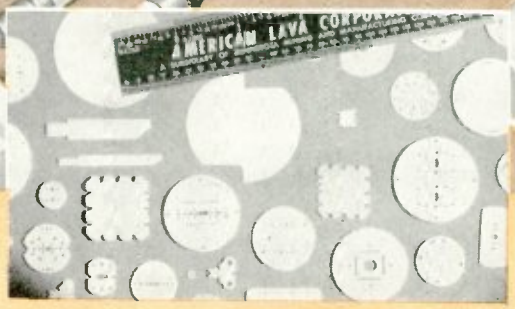
RELIABILITY

IS AN OUTSTANDING CHARACTERISTIC OF

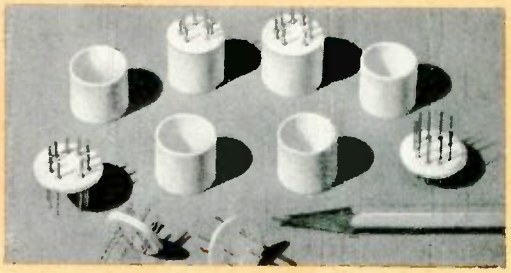
AlSiMag® CERAMICS

AlSiMag Ceramics offer exceptional resistance to heat and erosion. They have marked electrical and physical stability at elevated temperatures and in varying environments. Chemically inert. Good strength. Can be accurately fabricated in micro-miniatures.

AlSiMag Ceramics include many special purpose ceramics, some especially adapted to hermetic sealing. Widest choice of materials, more than half a century of specialized experience. Send blue print and operating conditions.



AlSiMag pioneered micro-miniature ceramics . . . some as thin as 0.005". Relatively high strength, superior performance at high temperatures, high frequencies. Excellent record for withstanding fatigue, heat, shock, vibration.



The AlSiMag Ceramics in these multiple pin headers may be safely used up to 2800°F. The metal components are the limiting factors.

These tantalum pins with nickel braze alloy operate around 1000° F. All materials are rugged. Strong hermetic seal. Low vapor pressure. High temperature bake-out is practical.

For details, circle #89 on Reader Service Card

A Subsidiary of Minnesota Mining and Manufacturing Company

AMERICAN LAVA CORPORATION

CHATTANOOGA 5, TENN.
60TH YEAR OF CERAMIC LEADERSHIP

For service, contact American Lava representatives in Offices of Minnesota Mining & Manufacturing Co. in these cities (see your local telephone directory): Boston: Newton Center, Mass. • Chicago: Bedford Park, Ill. • Cleveland, O. • Dallas, Texas • Los Angeles, Cal. New York: Ridgefield, N. J. • Philadelphia, Pa. • St. Louis, Mo. • St. Paul, Minn. • So. San Francisco, Cal. • Seattle, Wash. All other export: Minnesota Mining & Manufacturing Co., International Division, 99 Park Ave., New York, N. Y.

Battelle Keeps Advancing

. . . Creating more and greater opportunities for research-minded engineers and scientists

YOU can achieve greater professional recognition and go further with an organization whose horizons are expanding. Battelle continually has broadened its perspective throughout 33 years of research for industry and government.

This third-of-a-century career spans the "research era" to date—gives Battelle the roots, the depth of experience, to accomplish sound technical growth in the future.

• • • •

Because it attracts an almost infinite variety of problems, Battelle has acquired facilities and skilled technological support that will make your efforts most effective. And this variety means you can work in the areas of your greatest interest.

There are particular opportunities for electronics and physics research in:

★

Reliability Engineering: **Component, Circuit, System Evaluation; Quality Control; Field Use; Specifications; Environmental Experiments; Nuclear Radiation Effects.**

Systems Engineering: **System Design and Analysis; Data Processing; Human Engineering; Automation; Analog and Digital Computation.**

Electrical Engineering: **Circuit Design and Analysis; Instrumentation; Control; Communications; Microwaves; Material Application.**

Solid State Devices: **P-N Junction and Galvanomagnetic Semiconductor Devices; Electron and Nuclear Resonance; Thin Films; Optical and Infrared Properties of Semiconductors; Electron-Tube Cathodes; Gas Discharges; Dielectrics.**

Applied Physics: **Electrostatics; Graphic Arts; Ultrasonics; Optics; Photography.**

★

Battelle offers you a satisfying blend of industrial practicality and the university's academic atmosphere—including study at adjacent OSU. It offers the stability of a very large organization with unusual individual opportunity; competitive salaries and a complete benefits program. . . . Let us send full details and answer your specific questions. Write to L. G. Hill

World Radio History

Only a Bird in a Gilded Cage

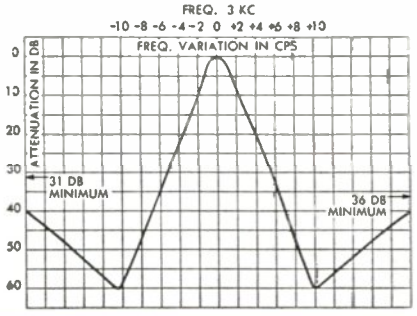
As succeeding generations of missiles penetrate the curtain of space that separates Earth from other planets, the importance of electronic guidance, control and airborne telemetry systems becomes obvious. For, without new engineering design techniques to provide reliable communication and control, the most advanced missile is but a bird in a gilded and very expensive cage.

As typical examples of what can be accomplished to insure maximum performance in missile telemetering, communication, data processing and other applications, Burnell & Co. has developed two new filters—a miniature 3 kc crystal filter and, employing modern synthesis techniques, a miniature 500 kc LC toroidal filter possessing low transient distortion characteristics.

COPYRIGHT BURNELL & CO., INC. 1961

TECHNICAL DATA
3 kc Crystal Filter

Attenuation—3 db B/W—2 cps
Shape Factor—30/3—5:1
Impedance—500K in and out
Temp. Coeff.—.021 cps °C
Size—3½ x 2 5/16 x 1 7/16
Insertion Loss—3½ db
Also available in any impedance from 500 ohms to 500K

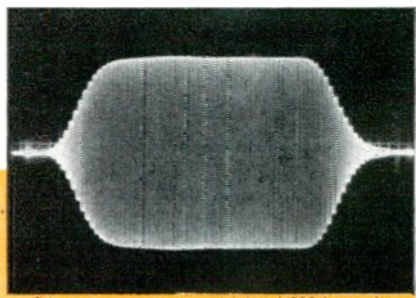


TECHNICAL DATA
500 kc LC Toroidal Filter

Attenuation—B/W 40 kc at 3 db
—200 kc at 50 db
Impedance—50 ohms in and out
Insertion Loss—4.5 db
Over and undershoot—
(for a step modulated
500 kc carrier)—less than 1%
Size—⅞ x 3 x 1½

Other Burnell filters are available in frequencies up to 30 mcs over a wide range of impedances.

Write for new catalog.



Filter response to step modulated 500 kc carrier

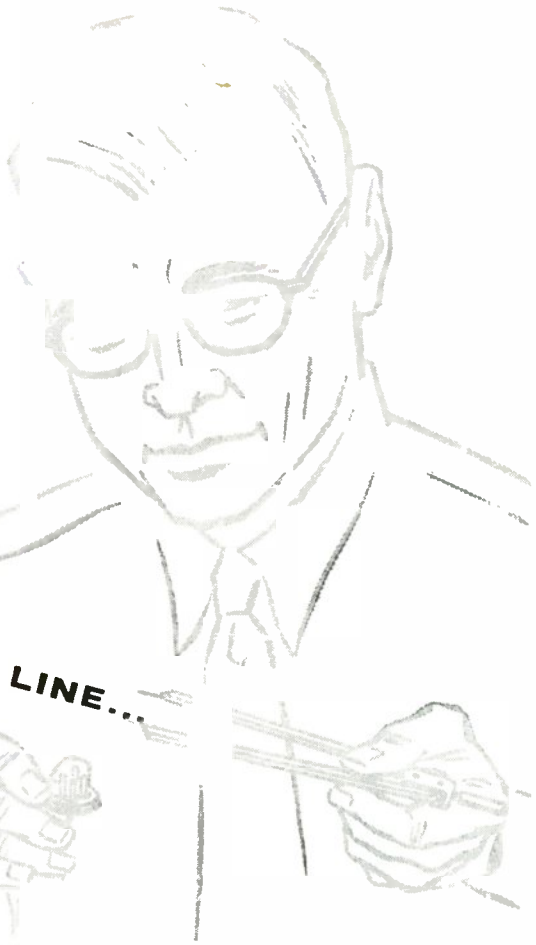
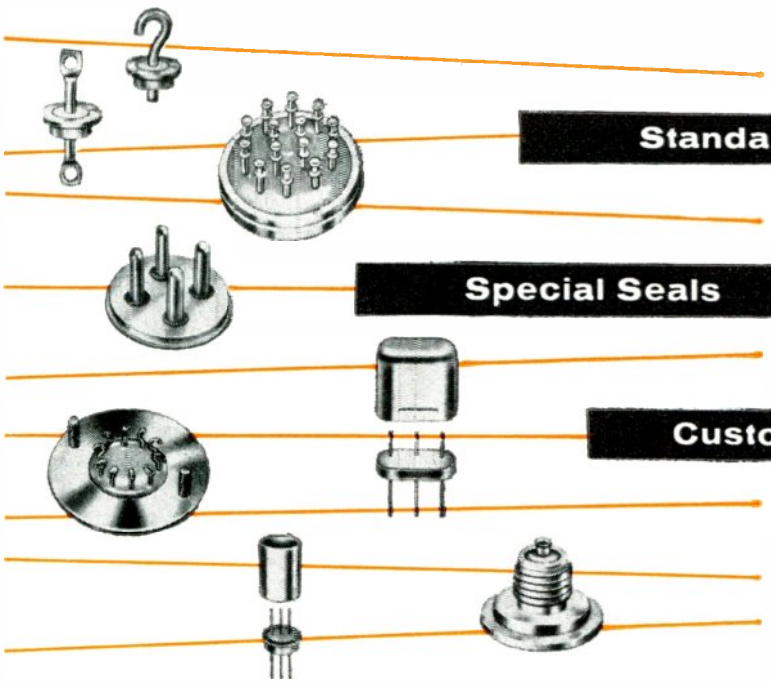
Glass-to-Metal SEALS

THE DESIGNER'S LINE...

VERSATILE
RELIABLE
ECONOMICAL



Including semi-conductor seals, individual terminals and multiple headers are available in hundreds of standardized types that reflect the economies of mass production methods. Offer a time and money-saving solution to all but the most unusual sealing problems.



Standard Seals

Special Seals

Custom Sealing Service

E-I engineers will design "specials" or produce seals to your exact specifications. Custom threaded types, color coding or unusual terminal arrangements can be supplied quickly in reasonable quantities.

Complete facilities available for sealing assemblies of your own manufacture. Please supply sample or drawings for estimates on your sealing requirements, or ask to have a field engineer make recommendations on specific seal applications. Literature on request.

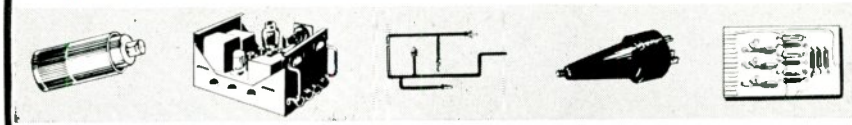
CENTROID *offering the industry today:*



design and development in simulation with application to engineering models, prototypes and complete systems.
Electronic, Electro-mechanical and Optical Skills.
Special capabilities in oceanography.

CENTROID Engineering and Manufacturing Co., Inc.
126 Jackson St., Cambridge 40, Massachusetts

For details, circle #93 on Reader Service Card

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

C-A-C®

Reliability in Components

a Toroids, Subminiatures—1% Coils

Types: QLS Uncased; MPF Molded Plastic; HSD Printed Circuit and HSA Crystal Can, hermetic sealed cases.
Inductances: .05 to 300 MH.
Frequencies: Sub audio to 5 MC.
Non Stabilized Cores 050, 051, 054.
Designs: Stock and custom for specific applications.

b Toroids, Standard—1% Coils

Types: QL Uncased, MP Molded Plastic, HS Hermetic Sealed.
Inductances: 2 MH to 60 HY.
Frequencies: Sub audio to 100 KC.
Non Stabilized Cores 206, 848, 930, 395, 254, 715.
Stabilized Cores 951, 403, 671, 269, 082.
Designs: Stock and custom for specific applications.

c Transformers—Reactors—Laminated and Toroidal

Types: Power; Low and High Voltage; Hi Temperature, Class U; Exclusive Process; Audio; Pulse, Low Level; Foil Wound.
Designs: MIL-T-27A; high quality commercial.

d Filters—Band Pass; Band Stop; Telemetering; Telegraph; Aircraft Navigation; Lumped Constant Delay Lines; Miniaturized

L-C filters utilizing high Q toroidal inductors. CAC's years of experience in the design and manufacture of tight tolerance networks results in superior performance and reliability. CAC engineers welcome your inquiries.

e Magnetic Amplifiers—Saturable Reactors

CAC specializes in development of magnetic amplifiers for specific applications . . . high and low level . . . for servo-motors, computers. We can supply design and precision production of the magnetic component only or with the associated circuitry.

f Plastic Packaged Inductors

As a pioneer in the plastic packaging of inductors, CAC has developed practical techniques assuring high performance in the smallest physical size. For printed wiring and chassis-mounted applications. Consult CAC's Process and Material Engineering Department on packaging problems.

World Radio History

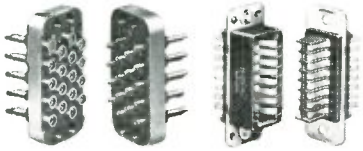
MICROMINIATURE

The industry's first family of micro-miniature interconnecting devices. Modular and flat form constructions. Contact centers on .050" and .075".

MIL-C-26500 (USAF)

Connectors to this "Spec. of the future" are being supplied now by AMPHENOL. Resistant to environments of moisture, heat (1000 hrs. @ 200°C), shock.

CONNECTORS



RACK & PANEL

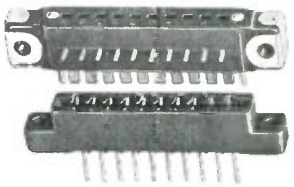
Blue Ribbon, Micro Ribbons, miniature and standard Pin & Socket connectors with Poke Home contacts: complete lines of reliable R & P types.

MIL-C-26518 (USAF)

Rack & Panel connectors with performance equivalent to MIL-C-26500.

MIL-C-5015D

All popular MS constructions, sizes and insert arrangements. Stub E and Stub R give outstanding "E" and "R" performances, save weight, space.



PRIN-CIR

Standard receptacles, plugs and plug/adapters, 6 to 22 contacts. Application engineering for special requirements.

CABLE ASSEMBLIES

AMPHENOL has the engineering skill and production facilities to fabricate the most complex assemblies, harnesses and equipment sub-assemblies.

TASK FORCE SERVICE

Three regional design/manufacturing divisions provide industry with a new kind of fast response service. When in a hurry, call AMPHENOL!

World Radio History

WHY FLY KITES?

As visionary as Ben Franklin are today's electronics engineers, sending up their thought-kites in intellectual thunderstorms. But only to a few is it given that they illumine the world with the lightning of their discoveries.

Yet the kite-flying must continue, and with each outstanding achievement in electronics, the Institute of Radio Engineers is quick to recognize its author. In 1961 the *Founders' Award*—reserved for rare occasions — has been bestowed on Ralph Bown for "outstanding contributions to the radio-engineering profession" and for having greatly increased the impact of electronics on public welfare.

In honoring Mr. Bown the IRE honors, too, its entire membership, that so often gives proof of its calibre and dedication. IRE's members are carrying on vital research throughout the world; each month their findings are published in *Proceedings*, so that they become a part of our national pool of knowledge. When you advertise in *Proceedings* your firm can proudly share in this worthy enterprise.

Proceedings of the IRE

REMEMBERS THE MAN IRE

gives to the nation man's finest research in electronics

NEW TR GLASS WITH A

GRIP LIKE A VISE

now available on many FUSITE TERMINALS

Never before has a glass been developed that is so compatible for use with 52% nickel alloy leads.

The result is a compression between the glass and pins so tight that twisting and bending of the pins to the breaking point will not cause rupture or leakage. (Determined by Veeco Leak Detector with sensitivity at 10^{-10} std. cc/sec.) Thermal shock is excellent with this new TR-Glass. Salt spray resistance exceeds 100 hours.

Every performance feature is well in excess of Mil Specs. The use of TR-Glass may be considered for all types of Fusite solid glass headers as well as many other style terminals.

Samples on request. Write Fusite, Department 11-1

INSULATE ELECTRICALLY · GLASS TO METAL · FUSITE TERMINALS · PROTECT PRODUCT PERFORMANCE · SEAL HERMETICALLY

World Radio History

The U. S. Army's NIKE-ZEUS is the only anti-missile missile system under advanced development. It is designed to meet the threat of enemy Inter Continental Ballistic Missiles. Developing a gigantic 450,000 lbs. of thrust at launch, the NIKE-ZEUS missile rises almost instantly to intercept enemy ICBMs traveling faster than 20 times the speed of sound.

HEART AND BRAINS OF THE NIKE-ZEUS DEFENSE SYSTEM CONCEPT

Extremely powerful long-range acquisition radar is designed to pick up the enemy ICBMs far from the defended area. Target track radars use the information provided by the long-range acquisition radar to "lock-on" to an incoming missile, relaying precise target information to electronic computers. These computers determine the most favorable point of intercept, automatically firing a NIKE-ZEUS missile at the correct time, guiding it to the intercept point.

CONTINENTAL ELECTRONICS TRANSMITTERS

Working under sub-contract to Bell Telephone Laboratories and Western Electric Company, Continental Electronics is designing, manufacturing and installing the powerful acquisition radar transmitters used in the Research and Development model of the NIKE-ZEUS Defense Complex scheduled for full scale testing on Kwajalein Atoll in the Pacific.

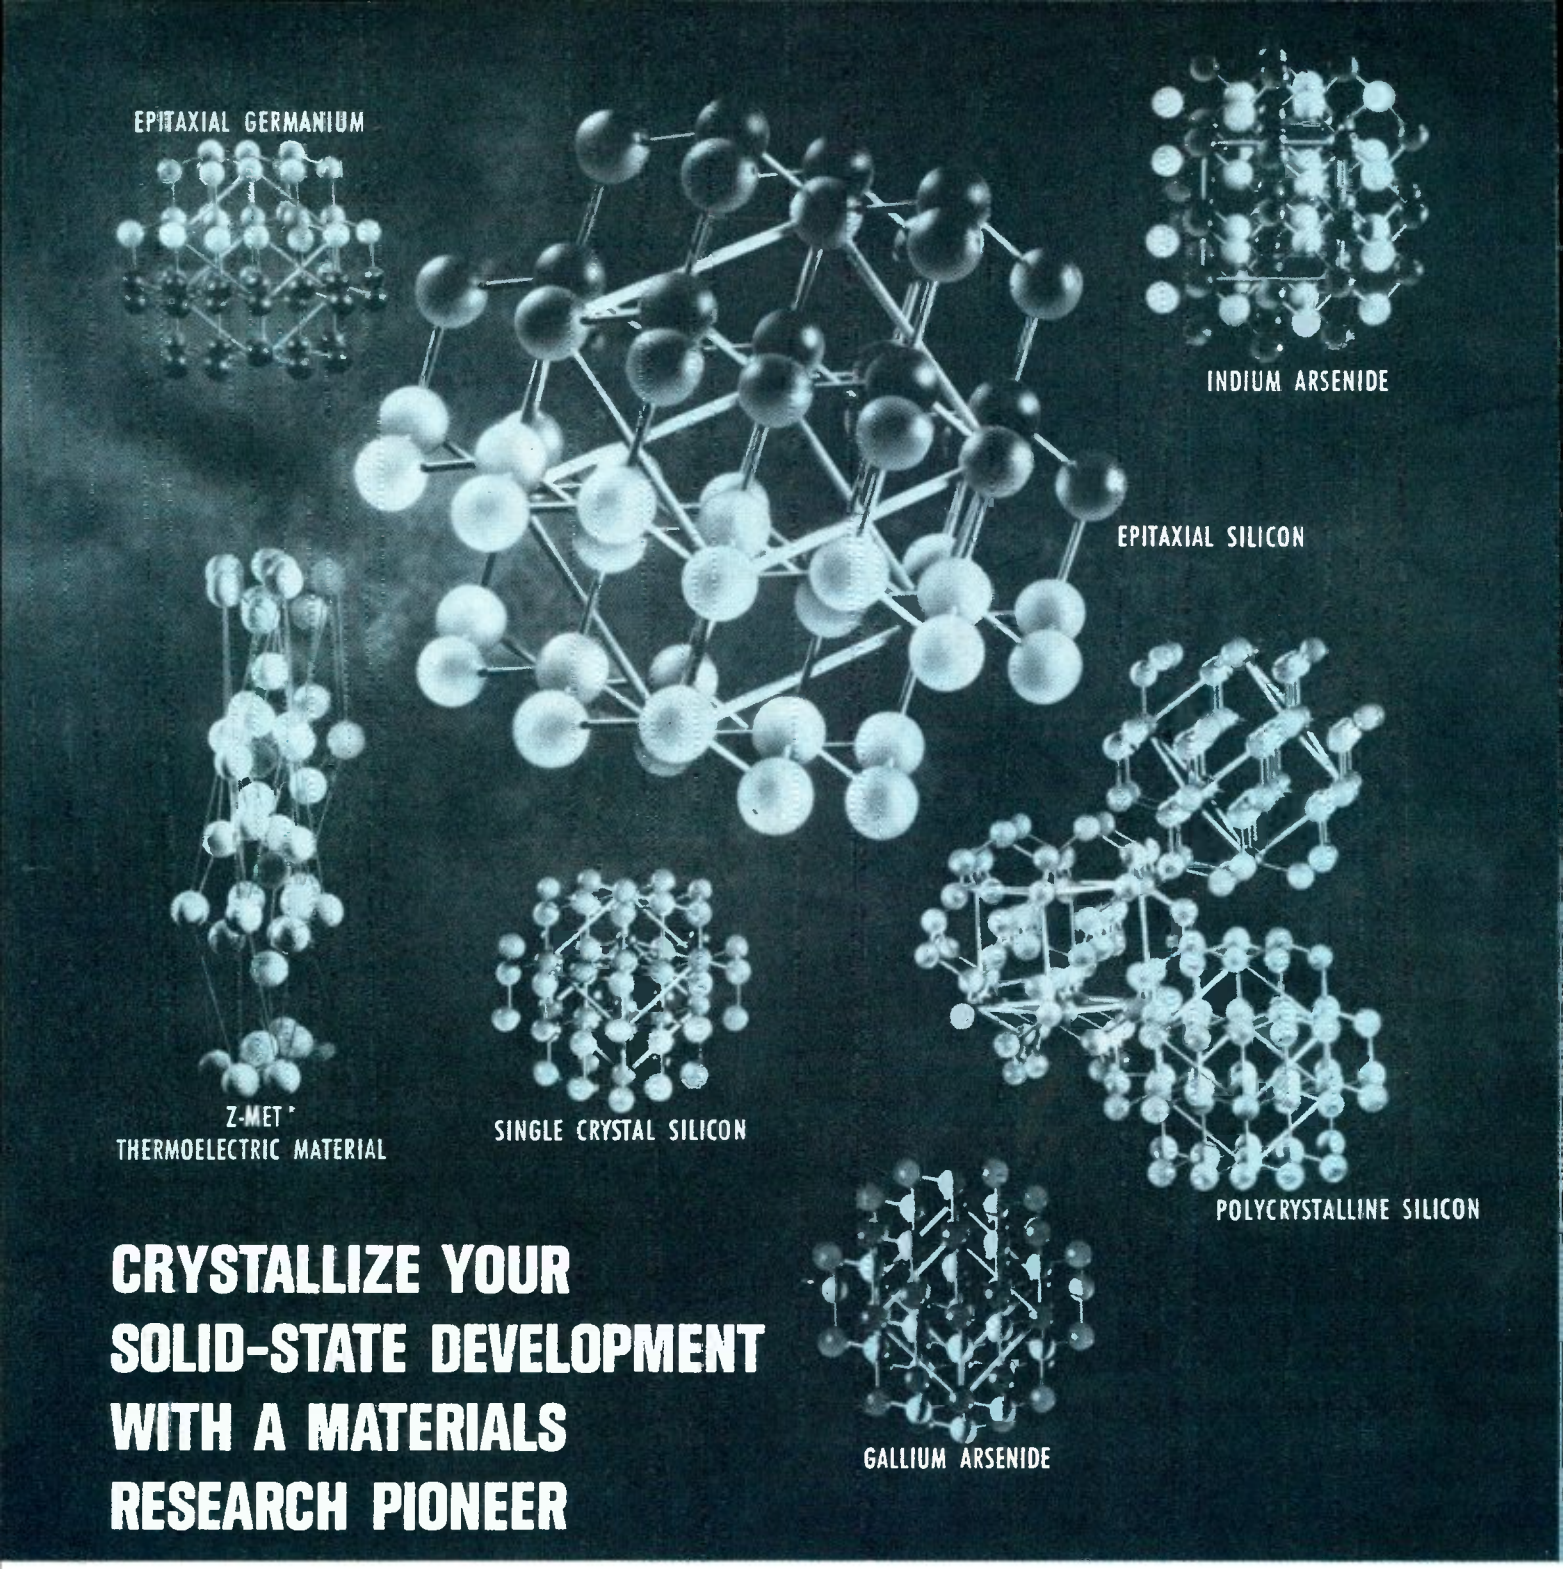
Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

World Radio History



CRYSTALLIZE YOUR SOLID-STATE DEVELOPMENT WITH A MATERIALS RESEARCH PIONEER

Your profits in the next decade will be greatly benefited by the right choice of supplier of solid-state materials.

The key question is what criteria to use in making the choice. The simplest, most reliable criterion has to be PAST PERFORMANCE.

Judged on this basis the Electronic Chemicals Division of Merck & Co., Inc. deserves your attention. In just four short years, it has achieved these exclusive major breakthroughs:

1958 Float zone, vacuum refined, doped single crystal silicon • 1959 Z-Met* Thermoelectric materials 1960 Epitaxial silicon N+ N wafers and III-V Compounds • 1961 Epitaxial germanium P+ P wafers

When you hitch your product development to Merck materials research you are enlisting a proved producer. If you want to be the first to exploit new solid-state materials breakthroughs, join the ranks of Merck customers today. Write, wire or phone your needs, problems, hopes.
