World Radio History

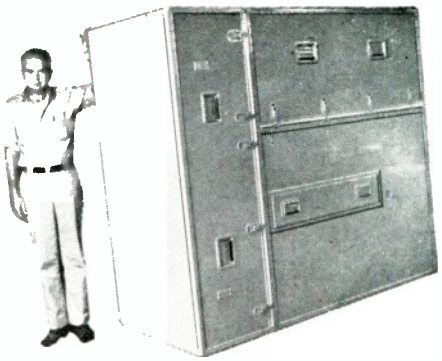
Skydyne, Inc

CASE HISTORY

The total background of Skydyne's 20 years of pioneering in the design and manufacture of transit and operational cases, consoles and benches is expressed in every unit produced — whether specially engineered, or part of a modified standard line.

SANDWICH MATERIAL FIELD AND MOBILE TRANSIT CASES

Skydyne's "Unistruc" construction of sandwich type transit cases produces completely bonded units of minimum weight and maximum strength. Individually engineered cases are particularly effective for use with ground support and other military equipment, and are designed to meet specifications MIL-T-945/A, MIL-T-4734, MIL-T-21200 and MIL-C-4150/E, as required. They assure greatest possible protection of sensitive equipment under widely varied circumstances and environment.



FEATURES

- Integrated structural frame
- Panels bonded to frame members
- No limitation on size or design
- Sandwich panel types to meet individual requirements
- Shock absorbed by entire case.

MOLDED FIBERGLASS HAND PORTABLE INSTRUMENT CASES

Skydyne molded fiberglass hand portable instrument cases are available in 16 standard sizes — each capable of modification to meet individual requirements. Interior packing or mounting devices are custom-designed for protective cushioning. Molded fiberglass cases were developed by Skydyne to house and protect all types of portable optical, electric and electronic instruments and equipment. Cases meet all applicable MIL-T-945A and MIL-T-108C specifications

FEATURES

- Standard sizes, which can be modified for specific uses
- Durable material — waterproof and oil and acid resistant
- High strength to weight ratio
- Corner impact resistance
- Molded in color — no surface finish required

Send us your specifications for estimate.

FORTY-NINE YEARS OF RADIO-ELECTRONIC HISTORY

are recorded in "Proceedings of the IRE." The photo above shows the issues from 1912 through 1947—fourteen years of rapid advances and earth-shaking accomplishments are not even included in this panorama of progress! Since publication of its first issue, "Proceedings of the IRE" has paced and pioneered in every field of radio from the first vacuum tube through today's giant computers and tiny transistors. The engineers who write, read and use this magazine have transformed the world in forty-nine short years! Is it any wonder that so many advertisers believe these engineers must learn about their products in the fact-packed advertising pages of "Proceedings of the IRE"?

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

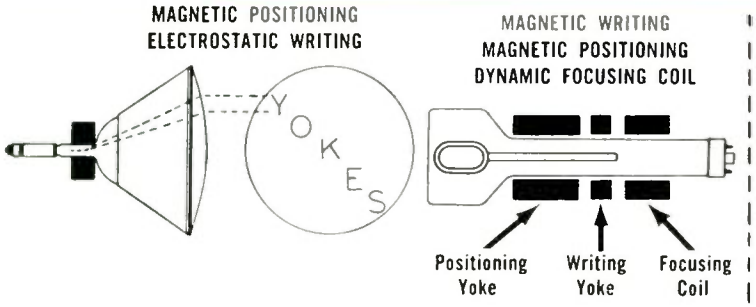
Specialists in precision displays

Celco YOKES

Celco YOKES FOR CHARACTER DISPLAYS & HIGH RESOLUTION APPLICATIONS



Deflection yokes for difficult character display and high resolution problems are another achievement in advanced design and engineering at Celco..

Celco Deflection Yokes permit rapid presentation of random character and alpha numeric displays. Low hysteresis, high accuracy and fast Recovery time with emphasis on spot approach to absolute zero, assures highest performance of magnetic deflection character displays.

Celco High Sensitivity Yokes minimize the deflecting currents required from the deflection drivers, resulting in high efficiency for your system.

For best utilization of the New High Resolution CRT's CELCO YOKES assure minimum defocusing at large deflections.

The construction of our yokes makes it possible to achieve **sensitivities, linearities, responses and distortion-free deflecting fields** not possible with the usual types of yoke.

Celco FOR STANDARD, COMMERCIAL & MILITARY APPLICATIONS

Single units or production quantities immediately available in wide range of inductance - resistance - Recovery time - pin cushion corrected or optimum focus as required. Also available 2-⅛" and 2-½" neck CRT yokes.

TYPE BY
Transistorized encapsulated yokes for 70° 7/8" neck CRT and 1" neck image storage tubes.

TYPE AY
Push-pull or single ended yokes for 52°, 70° and 90° deflections for 1-7/16" neck CRT.

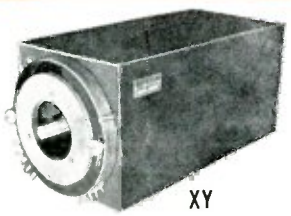
TYPE RY
Rotating deflection yokes for PPI displays. Gears, bearings, slip rings and contact assembly included.

TYPE DF
Dynamic Focusing Coil for 1 7/16" neck CRT's.

TYPE MY
Miniature light weight deflection yoke coils or assemblies for incorporation into customer housings.

Celco ENGINEERED YOKES FOR PRECISION DISPLAYS

WY
High speed writing yoke.



XY
Small Angle, High Linearity, High Resolution Yoke and Focusing Coil.

PI
Plug in type encapsulated deflection yoke for rapid insertion.

BR
2 axis 5 or 8 slip ring, geared, rotating yoke.

MS
Miniature deflection yoke for rotating or fixed coil radar system.

DRIVER-HARRIS Performance-Proven

ELECTRONIC ALLOYS

We produce a complete line of performance-proven alloys for the manufacture of:

*T.M. Registered U.S. Patent Office

ELECTRON TUBES:

499 Alloy clad on NIREX* for cathode sleeves. Also available over 77 other radio alloys for support wires, plates, grids, cathodes, and lead-throughs.

RESISTORS:

NICHROME* V, KARMA*, NICHROME*, CHROMAX*, ADVANCE*, MIDOHM*, 95 ALLOY, LOHM*, 30 ALLOY, MANGANIN, HYTEMCO*

Available in fine wire sizes down to .00045 and in over 200 insulation combinations derived from 11 basic coatings.

GLASS SEALING ALLOYS:

THERLO*, (Nickel-Cobalt-Iron) Highest purity and ductility, vacuum melted grade for glass sealing. Prolongs die life and reduces leakers to minimum.

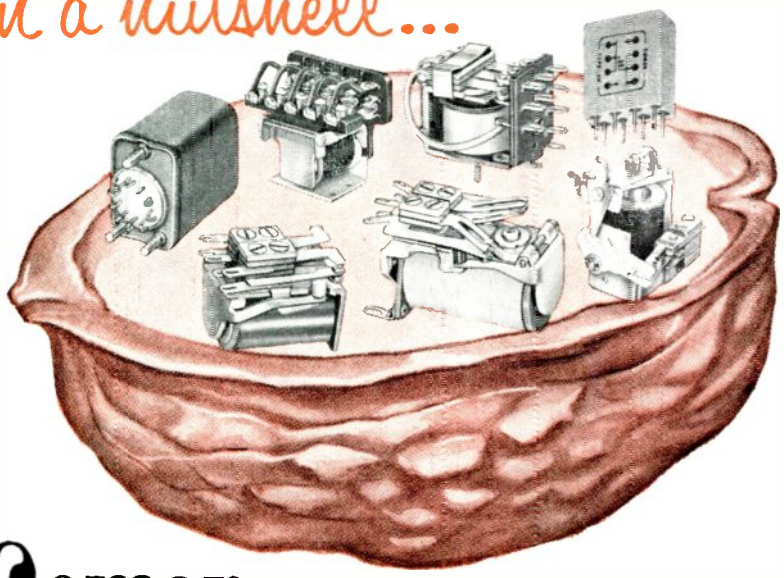
Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

World Radio History

in a nutshell...



Comar is your best source for Relays

- **Relays**—General Purpose, A.C. & D.C.
- **Relays**—Telephone Type
- **Relays**—Printed Circuit
- **Relays**—Plug-In
- **Relays**—Miniature, Sub-Miniature
- **Relays**—Open or Hermetically Sealed
- **Stepping Switches**—A.C. operation to 230 volts
- **Switch Assemblies**—Standard or Special
- **Solenoids**—Laminated or Solid Frame
- **Coils**—Standard or Special

A full staff of trained relay engineers . . . huge, modern facilities geared to meet today's cost-reducing production requirements and faster delivery schedules, are available to you at Comar. Efficient quality control system together with visual and mechanical inspection insures absolute uniformity and better relay performance. Whatever your relay problems may be, Comar engineers are at your service. Send details and we will submit our recommendations quickly . . . without obligation. Ask for new Comar catalog illustrating many standard basic designs. Write today!

WBD Custom Alloys

–from one of the nation's *largest vacuum-melting installations*

Precision Resistance, Electronic and Mechanical Alloys in—

- WIRE
- ROD
- RIBBON
- STRIP
- FOIL

Resistance Alloys:
ALCHROME®
TOPHET® A, C, D, 30
EVANOHM®
Nos. 30, 60, 90, 180 ALLOYS
BALCO®
BALLAST® NICKEL
CUPRON®
MANGANIN

Ceramic Sealing Alloy:
CERAMISEAL®

Glass Sealing Alloys:
RODAR®
NIRON® 52
NIROMET® 46

Filament and Grid Alloys:
COBANIC®
MAGNOCARB®
MANGRID®
PERMOCARB®
PERMAGRID®
MODIFIED HILO®
CUPROCHROME®

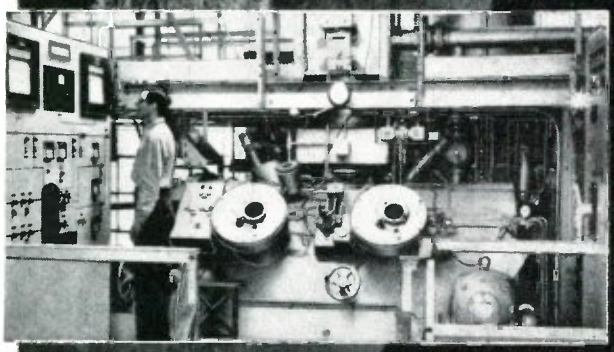
Vacuum Tube Materials:
CARBONIZED NICKEL
CARBONIZED NICKEL-CLAD STEEL
ALUMINUM-CLAD STEEL
CATHODE ALLOYS

Thermocouple Alloys:
TOPHEL®-NIAL® (Type K)

Corrosion Resisting and Mechanical Alloys:
BERALOY®
NILSTAIN®
MONEL*
INCONEL*

WRITE FOR BROCHURES

*T. M. International Nickel Co.



WBD vacuum-melted metals are providing the answer to increasing demands for entirely new alloys. New applications in missiles, rocketry, nucleonics and aircraft call for the creation of new alloys... new metals, new highs in degree of purity, alloys subjected to the selective removal of certain materials.

WBD research and production facilities are available to help industry work out special problems requiring these custom alloys. This integrated service provides complete development and manufacturing departments and features one of the nation's largest vacuum-melting installations. Over 40 years of experience in melting and manufacturing precision alloys is at your service. Consult our Sales Engineering Department for information on custom alloy service.

WILBUR B. DRIVER CO.

Main Office: NEWARK, NEW JERSEY—Tel. HUmboldt 2-5550

Manufacturing Plants:

For Capacitors with GREATER RELIABILITY . . .

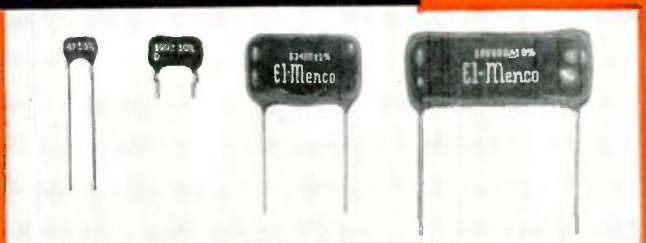
Choose **El-Menco**

The Capacitors You Find Wherever There's Electronics!

EL-MENCO DUR-MICA CAPACITORS

Only 1 Failure Per 43,000,000 Unit-Hours!

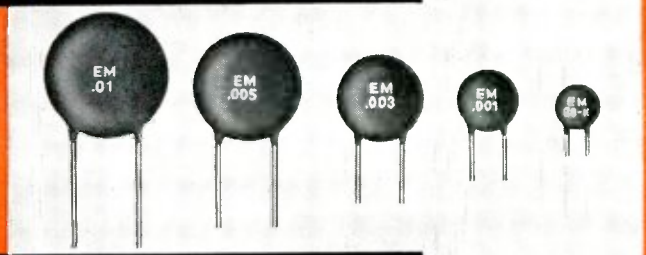
- It has been computed that "debugged" DM30, 10,000 MMF units, when subjected to 257,000 hours of life at 85°C with 100% of the rated DC voltage applied, will yield only 1 FAILURE PER 43,000,000 UNIT-HOURS!
- DM10, DM15, DM16, DM19, DM20 . . . perfect for miniaturization and for new designs using printed wiring circuits. Also available in DM30, DM42 and DM43.
- New "hairpin" parallel leads insure easy application.
- Exceed all electrical requirements of military specification MIL-C-5A.



EL-MENCO CERAMIC DISC CAPACITORS

Toughest Ever!

- Available in 500 working volts DC and 1,000 working volts DC ratings.
- Low-loss phenolic coating that is wax impregnated.
- Flat design assures reduced self-inductance . . . particularly adaptable to very high frequency applications.
- Insulation resistance far exceeds the 10,000 megohms minimum requirement.
- Exceed all electrical requirements of E.I.A. specifications RS-198.

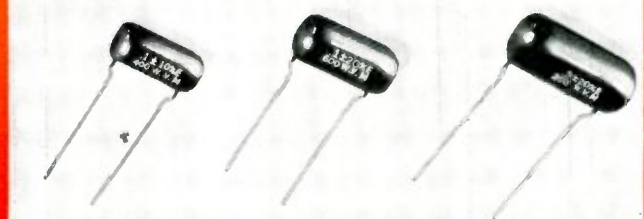


EL-MENCO *MYLAR-PAPER DIPPED CAPACITORS

Only 1 Failure in 14,336,000 Unit-Hours!

- Life tests at 105°C with rated voltage applied have yielded only 1 FAILURE PER 1,433,600 UNIT-HOURS for 1 MFD. Since the number of unit-hours of these capacitors is inversely proportional to the capacitance, 0.1 MFD Mylar-Paper Dipped capacitors will yield only 1 FAILURE PER 14,336,000 UNIT-HOURS!
- Working volts DC: 200, 400, 600, 1000 and 1600
- Durez phenolic resin impregnated.
- Tolerances: ±10% and ±20% (closer tolerances available).
- Dielectric strength: 2 or 2½ times rated voltage, depending upon working voltage.
- Exceed all electrical requirements of E.I.A. specification RS-164 and military specifications MIL-C-91A and MIL-C-25A.

*Registered Trademark of DuPont Co.



EL-MENCO MOLDED MICA CAPACITORS

Superior Performance!

- Unmatched for excellent stability, dielectric strength, high insulation resistance, extremely high "Q" and correspondingly low power factor.
- Units can be subjected to a short "debugging" life test at elevated voltage and temperature for removal of early life failures and for improved reliability.

FROM ELECTRONIC MEASUREMENTS

0–1500 V DC POWER SUPPLIES

Model 238A
With Rear Terminals

CONSTANT-VOLTAGE

In addition to covering a complete voltage range—0 to 1500 V—this programmable, regulated power supply can deliver rated current of 100 ma at any output voltage . . . even at less than a volt.

But an even more useful feature is its continuously variable current-limiting control. Here's a feature that's finding more application with every passing day.

When it comes to regulation, the Model 238A is truly flexible. Standard regulation is 0.1% line or load. However, 0.01% regulation is available by means of an optional plug-in chopper unit.

The chart below lists just a few of the many Electronic Measurements off-the-shelf, constant-voltage power supplies. For complete information request Catalog BR1961.

MODEL	RANGE VOLTS DC	CURRENT
238A	0-1500 V DC	0-100 MA
239A	0-600 V DC	0-1 AMP
235A	0-600 V DC	0-500 MA
234A	0-300 V DC	0-500 MA
230A	0-200 V DC	0-1 AMP
228A	0-150 V DC	0-1 AMP
229A	0-150 V DC	0-300 MA
218A	0-100 V DC	0-3 AMP
221A	0-100 V DC	0-500 MA
225A	0-75 V DC	0-2 AMP
215A	0-50 V DC	0-3 AMP

Model C638A
With Rear Terminals

CONSTANT-CURRENT

Here's the newest in Electronic Measurements' line of Constant Current Power Supplies . . . a full 1500 V compliance at constant current outputs from less than a ma to 100 ma. Like all Electronic Measurements Power Supplies, the Model C638A has a lot of built-in extras too. For example, there's a modulation input . . . there are also provisions for remote programming . . . and an adjustable voltage compliance control that in effect provides for voltage-limiting.

Specifications include a high output impedance of 10^4 megohms at 0.5 μa to 0.5 megohm at 100 ma. Above 2.2 μa, regulation is better than 0.15%, line or load. Ripple is less than 0.01% + 1 μa.

The following listing shows some of the constant current models available. For complete information, request Specification Sheet 3072B.

MODEL	RANGE MIN.	RANGE MAX.	VOLTAGE COMPLIANCE (MINIMUM)
C614A	10 μa	1 AMP	100 V
C613A	10 μa	1 AMP	50 V
C621A	5 μa	500 MA	100 V
C620A	5 μa	500 MA	50 V
C633A	2.2 μa	300 MA	300 V
C629A	2.2 μa	300 MA	50 V
C632A	2.2 μa	220 MA	300 V
C624A	2.2 μa	220 MA	100 V
C638A	1 μa	100 MA	1500 V
C631A	1 μa	100 MA	300 V
C612A	1 μa	100 MA	100 V

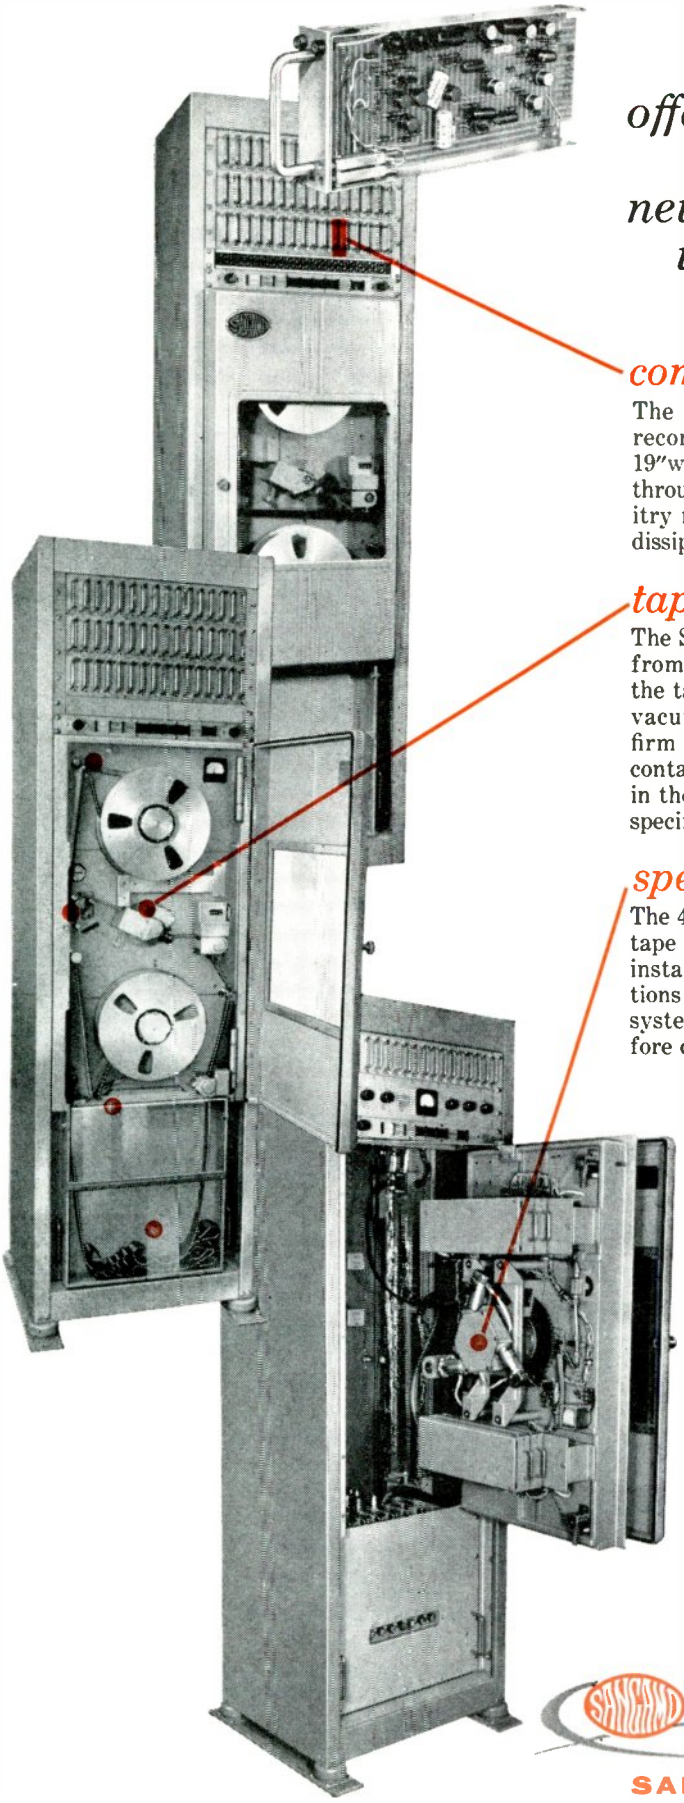
SANGAMO 460-SERIES MAGNETIC TAPE INSTRUMENTATION



offers a new concept in . . .

compactness

The 460-Series tape transport and a complete 14 track recorder/reproducer are contained in a single standard 19″w. x 71″h. cabinet. This unusual compactness is achieved through transistorized electronic circuitry. Solid state circuitry means greater reliability, reduced weight, lower heat dissipation, and lower power consumption.

tape handling

The Sangamo recorder/reproducer can be changed instantly from reel to loop operation (250 feet) without re-handling the tape or making any changes in the transport. Exclusive vacuum tensioning and tape guiding provides gentle, but firm and precise control of tape position and head-to-tape contact. This design, in addition to a long tape path, results in the extremely low interchannel time displacement error specified.

speed control

The 460-Series has exclusive wide-range, fast-response, Hare tape synchronized servo speed control. This control reduces instantaneous and long-term record-playback speed deviations to a level several times lower than other speed control systems. You get magnetic tape system accuracies heretofore considered unattainable.

SANGAMO 460-SERIES
PERFORMANCE and CHARACTERISTICS

Start Time: 1.0 second to synchronism @ 60 ips with servo speed control and 1″ wide tape.

Stop Time: 1.0 second from 60 ips.

Instantaneous Time Displacement Error: Less than 25.0 microseconds (including flutter) @ 60 ips.

Long Term Time Displacement Error: ±0.01% standard. Higher accuracies available.

Interchannel Time Displacement Error: ±2.0 microseconds @ 60 ips between outside tracks on 1″ tape.

Servo Speed Control Range: ±10% nominal tape speed.

Servo Speed Control Response: ±15% speed change per second.

Tape Widths: Standard sizes from ¼ to 2″.

Reel Sizes: 14″ or smaller.

Mounting: 1 standard 19″ equipment rack for a complete 14 track record/reproduce system with power supplies and servo speed control.

Power Requirements: 117 volts, 60 cps ±10% single phase. All D C drives. 7.0 amperes load for 14 track system.

Weight: Approximately 600 pounds for 14 track system.

STEVENS *Certified* THERMOSTATS

Up where the "wild blue yonder" becomes inky black, you can't afford to gamble on precise, reliable temperature control. And that's the natural domain of Stevens Thermostats. They are compact and lightweight... withstand high G's... are utterly reliable even under wide temperature swings. For Stevens Thermostats are a product of creative engineering... coupled with the most stringent environmental testing and quality control programs in the industry. If space is your dimension, take the measure of Stevens Thermostats *first.*

World Radio History

GET THIS NEW ELECTRONICS DICTIONARY FOR YOUR BOOKSHELF!

3,700 *terms officially defined, many illustrated, in IRE's authoritative reference work*

Letter and graphical symbols also explained

CHECK YOURSELF:

From Absolute Delay to Zoning (Stepping), there are over 3,700 electronics terms you need to be aware of . . . How many do you actually know? How many can you define? Some terms have more than one meaning; are you sure you have the right, the scientifically accurate, the IRE Standard definition?

There's no need to carry around 3,700 definitions in your head. Have them handy on your bookshelf, instead, in IRE's Dictionary of Electronics Terms and Symbols. Every term accurately defined; many illustrated by simple, grasp-at-a-glance diagrams.

PART I of the new Dictionary is compiled from 37 IRE Standards on electronics terms, organized and published by The Institute of Radio Engineers over an 18 year period. Each definition cites the Standard from which it was taken; where a term is used in more than one field, and has more than one meaning, each is listed under a separate entry.

PART II of this 225 page volume is a Dictionary of Symbols, made up of five IRE Standards: Letter Symbols for Electron Tubes; Letter Symbols for Semiconductor Devices; Graphical and Letter Symbols for Feedback Control Systems; Graphical Systems for Semiconductor Devices; and Graphical Symbols for Electrical Diagrams. A four-page index to graphical symbols is included.

THE INSTITUTE OF RADIO ENGINEERS
1 East 79th Street, New York 21, N. Y.

Please send me ..... copies of your complete new Dictionary of Electronics Terms and Symbols.

☐ I am an IRE member. Am enclosing $5.20 per copy.
☐ I'm not yet a member. Am enclosing $10.40 per copy.

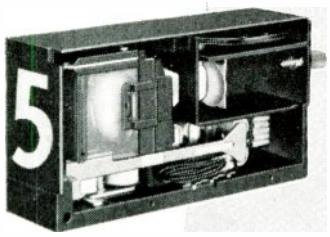
BINARY OPERATED READOUT

New!

Operates Direct—No Buffers or Translators Required



BINA-VIEW Self-Decoding Alpha-Numeric Readout

Applications: Connected directly into computers, teletype, etc.

Features: Electro-magnetic operation, low power (10 milliwatts), accepts BCD code to 6 bits, does own translating.

Specifications: 1⅜" high character, module size 1¾" x 3¼" x 6¾"

Price Complete from $50.00

WRITE TODAY FOR COMPLETE DETAILED INFORMATION

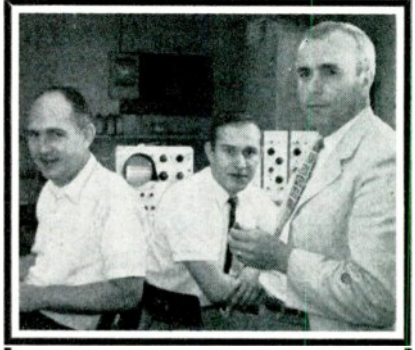
INTECTRON

INCORPORATED

Newton Lower Falls, Massachusetts



Technical Staff Capabilities:

APPLIED RESEARCH & DEVELOPMENT

Advanced techniques for computation, control and communications.

Real time digital control, analog digital conversion.

Microphotographic information storage.

Instrumentation systems.

Complete Facilities Include: electronic and optical laboratories & model shop for custom prototype production.

For details, circle #113 on Reader Service Card

Other water-cooled loads up to 50KW can be supplied.

*VSWR is 1.1 or less to 1000 mc on all models — with "N" connectors.

**Water Cooled ***Forced Air

★QC TYPE: Bird Quick-Change Connector, designed for rapid change. Available in following types: Female or Male N, C, HN, BNC, LC, LT, UHF, and ⅞" EIA flanged.

TERMALINE

RF ABSORPTION WATTMETERS

Portable — Non Radiating

Portable . . . direct reading . . . non-radiating "load" type wattmeter . . . used in field or laboratory to measure and absorb power . . . accuracy ±5% of full scale . . VSWR 1.1 to 1 maximum over operating range.

COAXWITCH

COAXIAL SELECTOR SWITCHES

Dependable manually operated switches for selecting antennas, receivers, transmitters or other apparatus with coaxial connections. Ideal as a system component in electronic equipment where reliable, repeated channel switching is required; pull knob, rotate, and push in to make contact.

TERMALINE

RF LOAD RESISTOR

Quick-Change Connectors

Reflection-free terminations for 50-ohm coaxial lines . . . low VSWR . . . non-radiating . . . water cooled rating 2500 W to 50 KW . . . air cooled rating to 2.5 KW . . . forced air to 5 KW. Quick-Change Connectors (★QC Type) available on many models.

COAXIAL RF FILTERS

Our extensive engineering and manufacturing facilities are at your command for the custom design and manufacture of filters to your specifications. Intelligent design, skillfull manufacture assure you of highest performance and reliability. New miniature filters, as light as five ozs., are available and can be produced in quantity.

Complete Specifications on request.

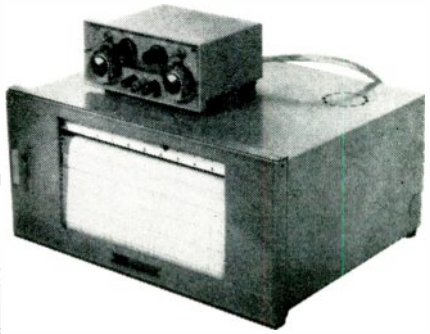
NEW CONCEPT IN RECORDING!



Westronics, Inc. proudly announces the introduction of the totally new UNIVERSAL RECORDER to its present recorder line. This new Universal Recorder can operate as a standard fixed-span recorder, or it can function with one or more EXTERNAL PLUG-IN Modules.

This "Family" of External Plug-In Modules, 24 in all, contain the circuitry necessary to allow this recorder to function as a Strain Gage, Adjustable Span & Zero, Resistance Bulb, Flow, Temperature, Pressure or Potentiometer Following recorder. These Modules, which feature convenient, calibrated controls, may be panel mounted or used as a table-top laboratory instrument. No re-wiring of the recorder is necessary to change from one module to another. Modules are available for almost any recording application you may have.

The Universal Recorder is available in both 5" and 11" strip chart sizes in single pen, dual pen and multipoint models. Consult the Westronics representative nearest you for more information.

WESTREX PRECISION PRODUCTS

FOR FACSIMILE, RECORDING AND COMMUNICATIONS SYSTEMS

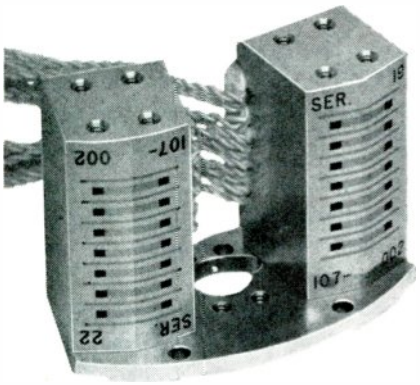
FOR INFORMATION on these and other Westrex facsimile, communications, and recording products and accessories, write to:

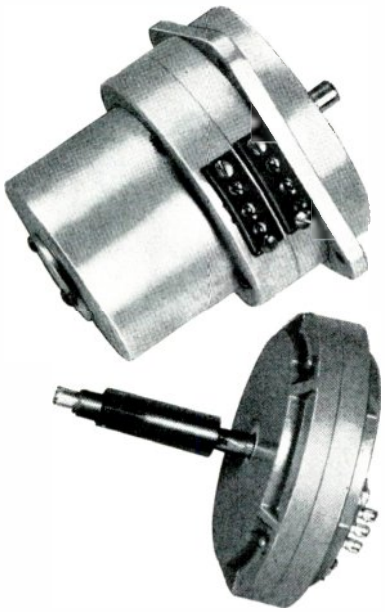
Westrex Company

A DIVISION OF LITTON SYSTEMS, INC.
540 West 58th St., New York 19, New York
335 N. Maple Dr., Beverly Hills, California

FORK FREQUENCY STANDARDS Hermetically sealed, vacuum-mounted tuning fork oscillators for chronometers, recorders, audio frequency equipment, radios, and test and measurement instruments. Designed to overcome effects of varying temperature, pressure, humidity and operating position. Fundamental frequency 1000 to 5000 cps; others available on order. Accuracy to one part in 10^6; with oven, two parts in 10^7. As small as 4⅛″ x 2⅜″ x 1¼″. As light as 9 ounces.

RECORDING HEADS Up to 14-track in-line or interleaved recording heads. Accommodates 14 tracks on 1-inch magnetic tape. For FM recording, carrier-erase recording with saturated pre-recorded tapes, and direct recording on neutral tapes by mixing bias and signal currents. Standard IRIG spacing. Gap line spacing between tracks 1.500 ±0.0005 inch. Crosstalk better than —50 db at 1000 cps. Gapless, multi-layer Mumetal shielding.





SYNCHRONOUS MOTORS Phonic-wheel type. Constant angular rotation for precise synchronization. 60-pole rotor reduces shaft speed without gearing. Accuracy within 0.1 degree of angle under normal load conditions. Motor current approximately 75 milliamperes per phase. Operable as single or two-phase. **Model GS:** Contains integral induction-start motor. Operates from vacuum tube amplifier on 60 to 3600 cps. Output to 1/100 hp. **Model MS:** Operates on signal frequencies from 150 to 4000 cps. Torque at 1800 rpm high as 6 inch-ounces per phase.

CHRONOMETERS For use as timer or clock in observatory, laboratory, or field. Precision standard for astronomical, geophysical, and navigational uses. Accurate to 1 part per million. Direct display of hours, minutes, seconds, and tenths. Any group of four frequency or pulse outputs in 10 to 1000 cps range on order. With amplifier, drives recorders, motors, time repeater indicators, and programming devices at precise, constant speed.

TOP-HAT® RETAINERS For electron tubes, relays, capacitors, other plug-in components. Trimmed or untrimmed styles for round-conical, round-contoured, round-flat, rectangular and other configurations. Positive retention in any position and under most severe shock or vibration. Made of corrosion-resistant stainless steel. Special spring action gives good resilience. Fastens and releases with finger pressure — no tools or loose parts. Light, reliable, and built to military and industrial specs.

1962 IRE DIRECTORY

Directory I
Complete Equipment

Communications—
Computation—
Control—
Instrumentation—
Test

42 major groups
341 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment
II. Components
III. Materials & Services

Within these three basic directories, 112 major product and service groups are numbered consecutively throughout. Under each of these 112 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing all products in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25H
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

Directory I. Complete Equipment

2. Aircraft-Missile Navigation & Test Equipment.

Grumman Aircraft Engineering Corp., N.Y., 15c, 55c, 60c

Guardian Electric Mfg. Co., 1572 W. Carroll Ave., Chicago 7, Ill., 60c, Tel: 312-CHesapeake 3-1100
See ad in class 73

Gyrex Corp., Calif., 15sc, 35c

Hallamore Electronics Div., Siegler Corp., Calif., 10c, 15sc, 20c, 25c, 65c

Hampshire Engineering Co., Mass., 15c

Harmon Co., Inc. (George), Calif., 65sc

Hass Instrument Corp., D.C., 15sc

Hastings-Raydist, Inc., Va., 5s, 15s

Haydon Co. (A. W.), Conn., 15c

Hazeltine Corp., N.Y., 15c, 25c, 70c

Hewlett-Packard Co., Dymec Div., Calif., 15c

Hickok Electrical Instrument Co., Ohio, 5c, 15c, 60c

Hoffman Electronics Corp., Calif., 25c, 35c, 55c

Hollywood Mfg. & Supply Corp., Calif., 15c

Hoover Co., Electronics Div., Md., 15c

Houston Fearless Corp., Westwood Div., Calif., 25c, 65c

Howard Instrument Co., N.J., 15c, 25c

Howell Instruments, Inc., Texas, 5sc, 15s

Humphrey, Inc., Calif., 35c, 40c

Hunter Mfg. Co., Ohio, 15c

Huyck Systems Co., N.Y., 15c, 25c, 60c

Hycon Mfg. Co., Calif., 15c

Hydro-Aire Co., Div. of Crane Co., Calif., 15c

I.D.E.A., Inc., Ind., 15c

I-T-E Circuit Breaker Co., Special Products Div., Pa., 30c

Iconix, Inc., Calif., 15c

Ideal-Aerosmith, Div. of Royal Industries, Inc., Wyo., 40sc

Image Instruments, Inc., 2300 Washington St., Newton Lower Falls 62, Mass., 25c, Tel: 617-WOodward 9-8440
See ads in classes 9, 10, 21, 86

Industrial Electronic Engineers, Inc., 5528 Vineland Ave., North Hollywood, Calif., 25s, Tel: 213-TRiangle 7-1144
See ads on pages 162 and in class 63

Industrial Instruments, Inc., N.J., 15c

Instrument Systems Corp., N.Y., 15c, 25c

Instruments For Industry, Inc., 101 New South Rd., Hicksville, L.I., N.Y., 15c, 30c, Tel: 516-OVerbrook 1-7100
See ads in classes 43, 74

Intercontinental Dynamics Corp., N.J., 15 Portable-Testers c

Intercontinental Electronics Corp., N.Y., 5s, 25s

International Business Machines Corp., N.Y., 15c, 25c, 50c, 60c

International Business Machines Corp., Federal Systems Div., Md., 15c, 25c

International Fermont Machinery Co., Inc., N.Y., 15sc

International Telephone & Telegraph Corp., ITT Federal Laboratories, Ind., 15c

International Telephone & Telegraph Corp., ITT Federal Laboratories, N.J., 15c, 20c, 25c, 30c, 45c, 50c, 55c, 60c, 65c

International Telephone & Telegraph Corp., ITT Industrial Products Div., Calif., 10c

International Telephone & Telegraph Corp., ITT Labs., Components & Instrumentation Laboratory, Ind., 25sc

Interstate Electronics Corp., Calif., 25c, 65c

Iron Fireman Mfg. Co., Electronics Div., Ore., 35sc

Jackson Electronic & Mfg. Div., International Basic Economy Corp., Ohio, 15c

Jacobs Instrument Co., Md., 50c, 60c

Johnson Electronics, Inc., Fla., 15c

Julie Research Laboratories, Inc., N.Y., 15sc

Kahn & Co., Inc., Conn., 15c

Kaiser Aircraft & Electronics, Div. of Kaiser Industries Corp., Calif., 25c, 60c

Kaman Aircraft Corp., Conn., 5c, 10c, 15c, 50c, 55c, 60c

Kaman-Nuclear, Div. of Kaman Aircraft Corp., Colo., 5c, 20c

Kato Engineering Co., 1420 First Ave., Mankato, Minn., 15c, Tel: 8-2941
See ad in class 67

Kay Electric Co., Dept. ID-10, Maple Ave., Pine Brook, N.J., 15s, Tel: 201-CApital 6-4000
See ad on pages 72-73

Kelsey-Hayes Co., Mich., 15c

Kern Instruments, Inc., N.Y., 15sc

King Radio Corp., Kans., 45s

Kinn Electronics Corp., Md., 45c, 70c

Kollsman Instrument Corp., Subsid. of Standard Kollsman Industries, Inc., N.Y., 5sc, 10sc, 15sc, 20sc, 25sc, 30sc, 35sc, 40sc, 45sc, 50sc, 55sc, 60c, 65c, 70sc

Korry Mfg. Co., Wash., 15sc, 25sc

Laboratory For Electronics, Inc., Mass., 15c, 30c

Land-Air, Inc., Ill., 45c

LaPointe Industries, Inc., Conn., 5c

Lear, Inc., Calif., 10sc, 15sc, 25sc, 35sc, 40sc, 50c, 55sc, 65c

Lear, Inc., Instrument Div., Mich., 10sc, 15sc, 20sc, 25sc, 35sc, 40sc, 50sc, 55sc

Leesona Corp., Leesona Moos Laboratories Div., N.Y., 5c

Lignes Telegraphiques et Telephoniques, France, 5c

Ling Temco Vought, Inc., Texas, 25s, 30c

Ling Temco Vought, Inc., F F & M Electronics, Inc. (Subsid.), Calif., 25sc, 30c, 60c

Ling Temco Vought, Inc., Temco Electronics Div., Texas, 30c

Lionel Corp., N.J., 15c, 20c, 25c, 30c, 40c, 45c, 65c, 70c

Lionel Corp., Telerad Div., N.Y., 65c

Litton Industries, Inc., Components Group, Airtron Div., N.J., 65c

Litton Industries, Inc., Litton Systems, Inc. (Subsid.), Calif., 15c, 20c, 25c, 30c, 35c, 40sc, 45sc, 50sc, 55sc, 60c, 70c

Litton Industries, Inc., Litton Systems, Inc. (Subsid.), Maryland Div., Md., 15c, 20c, 30c, 45c, 65c, 70s

Lockheed Electronics Co., N.J., 15c, 25c, 65c, 70c

Lockheed Electronics Co., Avionics & Industrial Products Div., Calif., 15c

Loral Electronics Corp., N.Y., 15c, 25c

Lumatron Electronics, Inc., 116 County Courthouse Rd., New Hyde Park, L.I., N.Y., 15c, Tel: 516-PIoneer 7-3200
See ad in class 23

MacLeod Instrument Corp., 4250 N.W. Tenth Ave., Fort Lauderdale, Fla., 5c, 15c, 25c, Tel: 305-LOgan 4-8518
See ad in class 4

Madigan Electronic Corp., N.Y., 15c, 25c, 60c, 65c

Magnavox Co., Magnavox Research Laboratories, Calif., 15c

Magnetic Amplifiers Div., Siegler Corp., 632 Tinton Ave., New York 55, N.Y., 10c, 15c, Tel: 212-CYpress 2-6610
See ad in class 69

Magnetic Controls Co., Minn., 15c

Mallory & Co., Inc. (P. R.), Ind., 15c

Mandrel Industries, Inc., Calif., 35sc, 60sc

Mandrel Industries, Inc., Greenleaf Mfg. Div., Mo., 35c

Marconi's Wireless Telegraph Co., Ltd., N.Y., 20s, 25c, 30c, 45s, 70s

Marquardt Corp., Pomona Div., Calif., 15c, 25c, 60c

Martin Co. (Martin-Marietta Corp.), Md., 10c, 15c, 25c

To improve performance of AUTOMATIC CONTROL EQUIPMENT

specify

Inductrol* Induction Voltage Regulators

Voltage fluctuations can cause electronic tube failure, make equipment operate erratically, increase replacement parts costs. Inductrol regulators operate on the induction principle. This means precise voltage control and high reliability because **no brushes or tubes** are used. G-E Inductrol regulators are virtually maintenance free.

More information appears opposite General Electric "Voltage Regulator" listing in Directory II, Class 72.

*Registered trade-mark of General Electric Co.

VOLTAGE REGULATOR PRODUCTS SECTION
GENERAL ELECTRIC
PITTSFIELD, MASS.

For details, circle #123 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

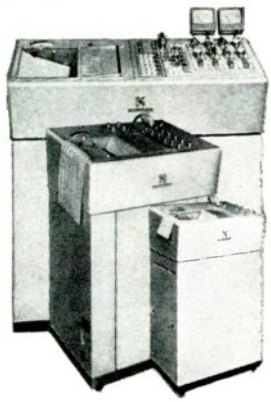
SCHWARZER
Recorders for Medicine



Tailored for high frequency & physiological measurements

- Physiopolyographs, 2 to 16 channels
- EEG, 4 to 16 channels, more channels on request
- Unique Direct-Writer specially designed for phono cardiography, low & high frequencies
- Combined Recorders in various sizes

The SCHWARZER Recorder: High frequency, rectilinear-dry, and economical!

SCHWARZER Company
46 Salmi Road, Framingham, Mass.

World Radio History

INSTRUMENTS FOR LABORATORY and PRODUCTION

WIDE RANGE PRECISION INDUCTANCE BRIDGES

63A
- 1Kc to 100Kc internal osc-det.
- .002 μh to 1.1 h
- .002 to 110K ohm series res.

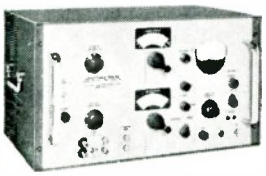
63B
- 0.4Kc to 20Kc internal osc-det.
- 0.02 μh to 11 h
- 0.002 to 110K ohm series res.

63C
- 5Kc to 500Kc internal osc-det.
- 0.0002 μh to 110 mh
- 0.0002 to 11K ohm series res.

PRICE $1500 ALL MODELS

- Accuracy to 0.25%
- Resolution to 0.01%
- No false or sliding null

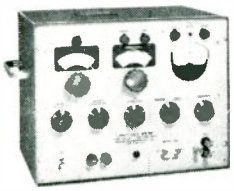
THREE TERMINAL CAPACITANCE BRIDGE FOR 1 MC USE



MODEL 75A
PRICE $990

- .0002 to 1000 μμf capacitance
- Accuracy to 0.25%
- Resolution to 0.01%
- .01 to 1000 μmhos conductance
- 1000 ohms to 100 megohms resistance
- Self contained 1 MC osc-det.
- Built-in DC bias for semiconductor testing available

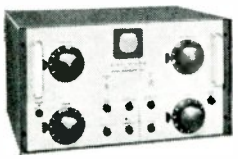
THREE TERMINAL CAPACITANCE BRIDGE FOR 100 KC USE



MODEL 74C
PRICE $935

- .0002 to 11,000 μμf capacitance
- Accuracy to 0.25%
- Resolution to 0.01%
- .001 to 1000 μmhos conductance
- 1000 ohms to 100 megohms resistance
- Self-contained 100KC osc-det
- Built-in DC bias for semiconductor testing available

TUNED AC NULL DETECTOR



MODEL 51A
PRICE $1900

- Useful as a detector for low frequency impedance bridges Balance can be observed on either built in CRT or external meter
- 20 cycles to 200 KC tuning range
- 10 μv sensitivity
- 1 megohm shunted by 100 μμf input
- Discrimination to 40 db against 2nd harmonic
- Phase sensitive

RF DISTORTION METER & VOLTMETER

MODEL 85B & C
PRICE $740

- 1-100 MC:85B
- 0.1-6 MC:85C
- Sensitivity: 60 db below 1 v
- Accuracy: ±2 db
- RF Voltmeter: Same as 91C

UHF GRID DIP METER

- Highest sensitivity to L & C coupling
- 300 to 1000 MC
- Accuracy: 2%

MODEL 101B
PRICE $275

NEW SENSITIVE R F VOLTMETER

MODEL 91D

- 1.2KC — 1200MC Frequency Range
- 300μv — 3v Range
- Linear DC Output
- High Impedance Probe Supplied

STILL IN PRODUCTION
MODEL 91C PRICE $395

- 10KC — 600MC Frequency Range
- 1 Mv — 3v Range

MODEL 91CA Price $495
- 300μv — 3v Range

SENSITIVE DC NULL DETECTOR

FOR MAXIMUM READOUT ON WHEATSTONE BRIDGES

- 1 μv to 100 v sensitivity
- Input: 10 megohms constant
- Floating input
- Amplifier Gain: 100 db

MODEL 56A
PRICE $395

SENSITIVE DC METER

ULTRA SENSITIVITY IN VOLTAGE & CURRENT MEASUREMENTS

- 1 μv to 1000 v in 17 ranges
- 0.1 μμa to 1 a in 25 ranges
- Input: 10 megohms constant
- Floating input
- Amplifier Gain: 100 db

MODEL 95A
PRICE $495

DC VOLTMETER

- 10 μv to 1000 v in 14 ranges
- Input: varies 10-100 megohms
- Amplifier Gain: 70 db
- Amplifier Output: ±0.5 ma into 1500 ohms
- Zero center meter eliminates polarity switch

MODEL 97A
PRICE $325

DIFFERENTIAL DC VOLTMETER

- 10 μv to 1000 v in 14 ranges
- Input: varies 10-50 megohms
- DC common mode rejection = 80 db
- Critically balanced attenuators provide true differential measurements

MODEL 98A
PRICE $395

SYSTRON—DONNER CORPORATION
Digital/Analog Systems & Instruments

Model 3500 Tiniest Complete Computer — weighs 28 lbs! with 10 stabilized or unstabilized amplifiers, 5 potentiometers, one or two problem boards.

Donner General Purpose Analog Computers are widely known for excellent performance and moderate cost. Donner offers a remarkably full line of amplifiers, computer accessories, and related instrumentation test equipment, of the most modern design.

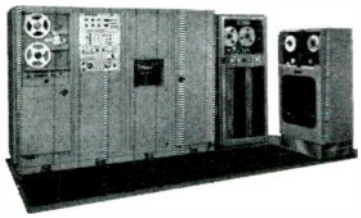
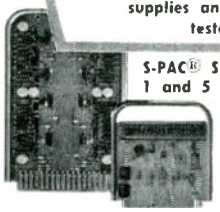
DIGITAL COMPUTERS AND SYSTEMS



- SPECIAL-PURPOSE DIGITAL COMPUTERS
- SATELLITE AND SPACECRAFT DIGITAL SYSTEMS
- INFORMATION STORAGE AND RETRIEVAL SYSTEMS
- COORDINATE CONVERSION COMPUTERS
- COMPUTER FORMAT TRANSLATORS
- TIME COMPRESSION AND DIGITAL CORRELATION SYSTEMS
- AUTOMATIC CHECKOUT AND MEASURING EQUIPMENT
- DATA PROCESSING AND CONTROL SYSTEMS
- SIMULATORS

DIGITAL MODULES AND ACCESSORIES

- Wide variety of solid-state plug-in packages, such as flip-flops, inverters, drivers, gates. . . .
- Rack mountings, power supplies and package testers.



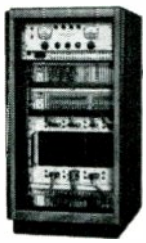
S-PAC® SERIES
1 and 5 mc static logic

T-PAC® SERIES
1 mc synchronous logic

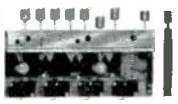
H-PAC® SERIES
10 and 16 mc static-synchronous logic

3C-BLOCS®

RANDOM-ACCESS MAGNETIC CORE MEMORIES



CODE BAR SWITCHES AND KEYBOARDS



Input: Octal or decimal pushbuttons
Output: Binary coded contact closures

SONILINES®

Magnetostrictive Delay Lines 2μsec to 0.01 sec

High Performance & Reliable
PAPER TAPE EQUIPMENT

READERS

Multi-speed photoelectric tape readers for strip, loop or reel tape applications. Reading rates up to 1000 characters/second. Chopped reflected light principle affords greater reliability and versatility. **Punched, printed, colored, or transparent** tapes read interchangeably **without** electrical adjustment.

RECORDERS

Coded tape recorders electrostatically print identical code format of punched tape at speeds up to 1000 characters/sec. Rectangular black spots are formed for reading by reflected photoelectric techniques, and, by edge recording of alpha-numeric characters, visual interpretation is possible. Non-impact, non-contact process offers high reliability and performance levels with quiet operation.

REELERS

High speed modular tape handlers provide optimum operational features. Bidirectional tape speeds up to 100 ips. Complete controls under all operational modes. Dependable tape supply and transport up to 10½" diameter standard NAB reels.

DIGITAL SYSTEMS

Inquiries invited on multistylus printer-plotter, alpha-numeric strip printer, wide page printer and related data handling equipment.

OMNITRONICS, INC.
BW BORG-WARNER

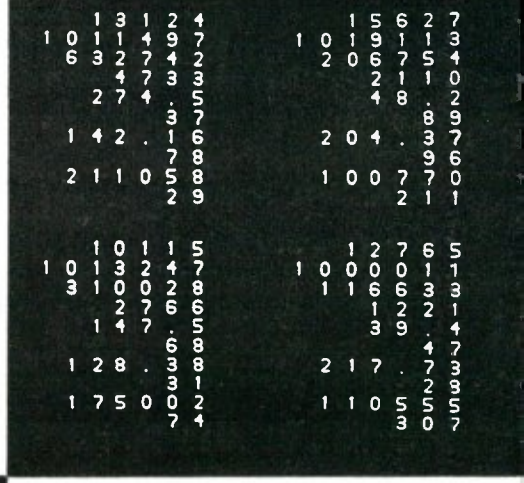
World Radio History

Digital Radar Indicator



THIS IS A PHOTOGRAPH OF A COMPUTER GENERATED DISPLAY BEING PRESENTED ON A MODEL DD51 DATA DISPLAY DELIVERED JANUARY 5 1960. CHARACTERS ARE DISPLAYED AT THE RATE OF 150000 PER SECOND IN FOUR SIZES-

LARGE MEDIUM SMALL AND MINIATURE

These are reproductions of unretouched photos. Each character is displayed in 5 μs.

COMPUTER READOUT AT COMPUTER SPEED Data Display's proprietary technique of character generation and radar sweep generation result in computer output presentations of exceptional readability, stability and versatility. Symbols of any size or shape can be displayed at greater speeds and in larger numbers than with any other system on the market today. Designed from a computer viewpoint, advanced digital circuit techniques are employed, making the displays inherently compatible, both philosophically and logistically, with all modern digital data systems.

DATA RECORDERS EXPENSIVE ?

not any more

now . . . 0.2% precision in complete, easy-to-use, portable ANALOG TAPE RECORD/REPRODUCE SYSTEMS *at prices you can afford*

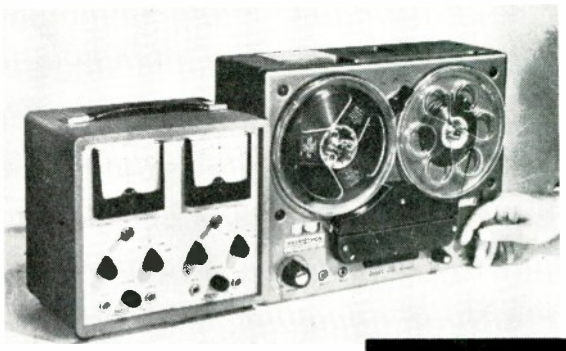
MNEMOTRON model 204* **$2,950**

4-CHANNEL SYSTEM complete with tape transport

Any 2 of these speeds: 1⅞, 3¾, 7½, 15 ips

Frequency Response: • 0-800 cps @ 15 ips • 0-200 cps @ 3¾ ips • 0-400 cps @ 7½ ips • 0-100 cps @ 1⅞ ips

Extended frequency response available on request



MNEMOTRON model 102A* **$1,390**

2-CHANNEL SYSTEM complete with tape transport

3 Standard speeds: 1⅞, 3¾, 7½ ips

Frequency Response: • 0-400 cps @ 7½ ips • 0-100 cps @ 1⅞ ips • 0-200 cps @ 3¾ ips

Extended frequency response available on request

COMMON SPECIFICATIONS FOR MNEMOTRON SYSTEMS

Input Sensitivity: full scale ±3 volts or ±10 volts

Input Impedance: 100 K Ω, high sensitivity, 330 K Ω, low sensitivity.

Speeds: 15, 7½, 3¾, and 1⅞ ips. For 2-channel systems, 15 ips and 15/16 ips available on request. 30, 15/16 and 15/32 ips available for 4 through 7 channel systems on request

Noise: Less than 50 db below full scale

Linearity: 0.2% of full scale

Temperature Stability: 0.1% per degree centigrade

Crosstalk between data channels: below 70 db

Output Impedance: 120 K ohms. 1 K ohms (for direct driving of low frequency paper recorders). Specify.

Output Level: full scale 1 volt

Output Unbalance: —1 volt for 0-volt in; may be readily balanced out on available pen recorders; balancing network available on request

Converter Power Consumption: 2-channel systems: 10 ma. at 6.7 volts per channel. 4 thru 7 channel systems: 14 ma. at 6.7 volts per channel. Choice of (a) Mallory Mercury battery with a lifetime of approx. 3 years in average usage, or (b) 0.05% regulated power supply, for 4 thru 14 channel systems

Weight of Converter: 6 lbs. per channel

Weight of Tape Transport: All systems through 7 channels—25 lbs.

SYSTEMS AVAILABLE WITH THE FOLLOWING FEATURES • **ULTRA-HIGH PRECISION WITH OVERALL NOISE LESS THAN 60 DB BELOW FULL SCALE, WITH UNIQUE ELECTRONIC NOISE COMPENSATOR** • 0.1% LINEARITY AVAILABLE WITH ULTRA-LOW NOISE SYSTEMS • TRANSPORTATION DELAY, CONTINUOUSLY ADJUSTABLE FOR ANALOG COMPUTERS • AVERAGE RESPONSE ON LINE COMPUTER CAT MARK II.

a price-plus-precision breakthrough,

pioneered by Mnemotron's unique pulsed FM principle and fully transistorized, self-contained, interchangeable modules.

• RECORDS ALL ANALOG DATA DOWN TO—AND INCLUDING—DC IN ALL THESE INDUSTRIAL AND RESEARCH APPLICATIONS:

• Data acquisition, storage, analysis & reduction • Time scale contraction and expansion • Dynamic Simulation • Programming • Computer Read In and Read Out

EXPANDS USEFULNESS OF PAPER RECORDERS

• Extends frequency response and channel capacity • Saves you from being "snowed" with data • Lets you look at same data at different time scales • A permanent record even if paper is damaged

Write for complete application, price and delivery information on Mnemotron Analog Data Tape Systems and Computers for your specific needs.

***Also available: 6-channel system—$3,980 . . . and 7-channel systems (using ¼" tape); Up to 14 channels (using ½" tape)**

NOW AVAILABLE: The CAT MARK II BIOLOGICAL DIGITAL "ON LINE" COMPUTER FOR AVERAGE EVOKED RESPONSES OF BRAIN POTENTIALS AND OTHER BIOLOGIC VARIABLES.

MNEMOTRON CORPORATION

49 South Main Street, Pearl River, New York

IMAGE INSTRUMENTS, INC.

LABORATORY ELECTROSTORE

for VIDEO STORING
SCAN CONVERSION
ANALOG PROCESSING

- Provides: Instant storing, immediate viewing, high resolution, fast erasure, without film or tape.
- Converts: Pictures from one scan system to another.
- Records in milliseconds, reads out for seconds or minutes.
- Performs: Analog processing or data analysis.
- Contracts or expands the time scale.
- Stores several pictures in a single storage tube.

Ask for specifications or other data related to your particular image-storage problem.

BUILDING THE FUTURE IS A BIG JOB!

The radio-electronic engineers who form the membership of the Institute of Radio Engineers must remain years ahead of actual production, in order to pave the way for the products of tomorrow, through research and development today.

The special issues of "Proceedings of the IRE" help these men transform the theory of today into the production lines of tomorrow. Pictured above are the October 1951 Color Television Issue; November 1952 Transistor Issue; and January 1953 UHF Issue (all now out of print).

Special issues on special subjects are more than usually helpful, but every issue of "Proceedings of the IRE" is filled with facts and figures.

IMAGE INSTRUMENTS, INC.

LABORATORY ELECTROSTORE

for VIDEO STORING
SCAN CONVERSION
ANALOG PROCESSING

- Provides: Instant storing, immediate viewing, high resolution, fast erasure, without film or tape.
- Converts: pictures from one scan system to another.
- Records in milliseconds, reads out for seconds or minutes.
- Performs: Analog processing or data analysis.
- Contracts or expands the time scale.
- Stores several pictures in a single storage tube.

Ask for specifications or other data related to your particular image-storage problem.

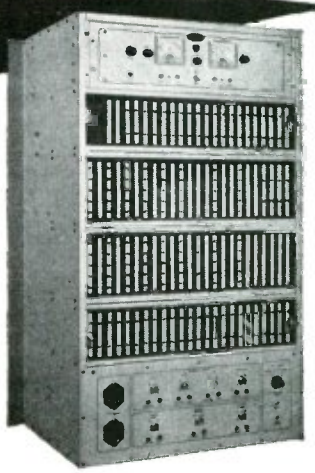
TRANSISTORIZED DIGITAL SYSTEMS BLOCKS

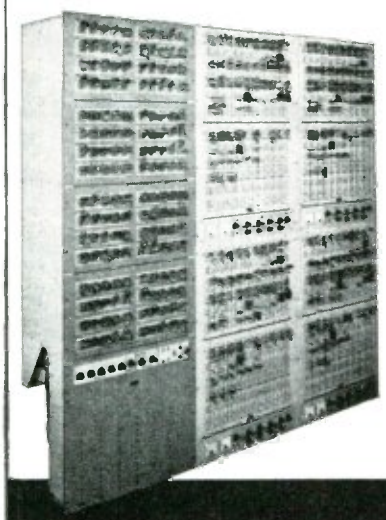


FREE

Send for complete data and specifications on either the 100 Series or 300 Series systems blocks.

Creative engineering by NAVCOR has successfully developed the 100 Series transistorized modules - for digital test equipment and prototype development, and the newer 300 Series card modules - for constructing complete data handling systems. Delivered complete and attractively packaged, these economical systems modules are ready to operate with a minimum of inter-unit wiring.

NAVCOR can engineer and manufacture complete systems to your requirements. Years of experience, devoted exclusively to semiconductor digital systems design, have produced hundreds of thousands of operating logic stages.



GENERAL CHARACTERISTICS

100 SERIES

Time proven 100 Series modules have been used extensively for bench top test equipment and for rapidly building system prototypes. Complete 10 stage BINARY COUNTERS, SHIFT REGISTERS, etc., are attractively packaged in 2¼" x 10½" slide-in units, which assemble into portable cabinets or relay rack housing.

The completely compatible 100 Series transistor circuitry is operable from D. C. to 200KC.

300 SERIES

The completely compatible 300 Series transistor circuitry is operable from D. C. to 300KC and is packaged on 5"x6" glass epoxy cards, with neon indicators and pull handles. There are five stage BINARY COUNTERS, SHIFT REGISTERS, etc. per card.

As many as 100 bits of logic circuitry may be contained in a single 19" relay rack housing. Gold taper pin connectors facilitate inter-unit wiring.

UNITS AVAILABLE

- PULSE GENERATORS
- PULSE DELAYS
- FLIP-FLOP STORAGE REGISTERS
- SHIFT REGISTERS
- REVERSIBLE SHIFT REGISTERS
- BINARY COUNTERS
- COMPLEMENTING FLIP-FLOPS
- REVERSIBLE BINARY COUNTERS
- BINARY DECIMAL COUNTERS
- PULSE STANDARDIZERS
- AMPLIFIED NOR LOGIC
- COMPARATORS
- ELECTRONIC SWITCHES
- PULSE SORTERS
- LOW LEVEL AMPLIFIERS
- DIGITAL TO ANALOG CONVERTERS
- DIGITAL DECODERS & ENCODERS
- DIODE GATES
- DELAY MULTIVIBRATORS
- INVERTERS, EMITTER FOLLOWERS

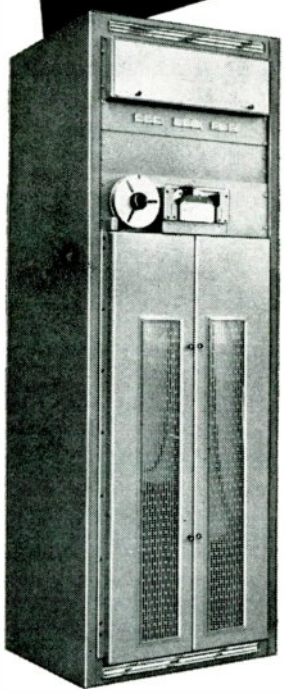
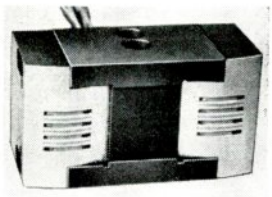
MAGNETIC MEMORY-COMPUTER EQUIPMENT



Rely on a designer/manufacturer to fulfill all your component and equipment requirements, both immediate and long-range . . . standard or custom-designed . . . for military and commercial applications.

MAGNETIC HEADS

Our multi-track precision heads are designed to accommodate your most critical computer and instrumentation needs. Numerous standard types are available, as are design and manufacturing facilities to satisfy any special requirements.



MEMORY DRUMS

In addition to standard models available for both commercial and military purposes, a variety of applications can be satisfied by combinations of standard drum designs.

MAGNETIC TAPE SYSTEMS

Typifying speed and reliability, this bin type tape transport is one of many models available for digital and instrumentation applications.

TAPE RECORDERS

Wide product line includes airborne recorders for analog and digital recording and reproducing. The digital series is now available to process on magnetic tape any computer format.

Baldwin®

MODEL 410 DIGITAL

COUNTERS

High resolution incremental Encoder and Tachometer with 5,000 count per rev. and directional sensing suitable for up and down counter. Diam: 4", Length: 4 15/64", Wt· 6¼ lbs.

Write for our FACT SHEET

AR&T ELECTRONICS, INC.
BOX 627 LITTLE ROCK, ARKANSAS
A wholly-owned subsidiary of the Baldwin Piano Company

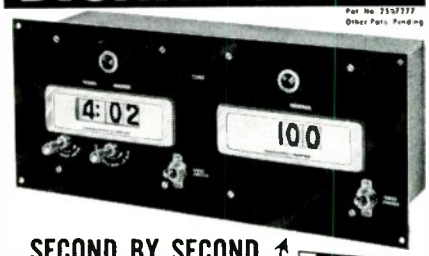
NEW . . TYMETER GRADINETIC®
SECOND BY SECOND
5 DIGIT 12 OR 24 HOUR READOUT
DIGITAL CLOCK



SECOND BY SECOND GRADIENT READOUT

#110 FEATURES:

• Split Second Timing • Second by Second 00-59 Kinetic Gradient Readout • Time is registered on 5 Polygonal Drums . . One Hour Drum, One 10 Minute Drum, One Minute Drum, Two Seconds Drums • Large 5/8" easy to read digits, 12 hour clock • 5/16" easy to read digits, 24 hour clock • Full vision in line readout digital display • Independent front panel time reset controls reset digits individually • Illumination controlled by independent control switch • Jewel light panel indicator • Movement shock resistant to withstand shock of 2000 lbs. • Completely enclosed in anodized metal dustproof case • Height 4½", Width 12", Depth 3½", Weight 6 lbs. • Front panel mount . . desk or bench use • TYMETERS are powered by a rugged, completely enclosed synchronous motor with a rotor speed of 450 RPM • UL approved motor and cord • Guaranteed one year

World Radio History

why Servo uses NIKON OPTICAL COMPARATORS

For details, circle #144 on Reader Service Card

SERVOTHERM® infrared detectors are thermister bolometers manufactured by Servo Corporation of America for military and industrial use.

The sensitive nerve cell of a thermister bolometer consists of two semi-conductor elements with high negative temperature coefficients. These elements are appropriately called 'flakes', for each is hardly more than 1/250th of a square inch in area, and only .0004 inch thick.

These 'flakes' must be flawless, and must pass rigid inspection for critical dimensions, positioning in the cell, solder junctions, and for possible defects. They are so fragile that no ordinary mechanical inspection means can be used.

Servo Corporation has solved this inspection problem by using a Nikon Model 3 Optical Comparator. A sharp, bright, highly magnified image of the 'flake' appears on the comparator screen where it is conveniently, quickly and accurately inspected, and precise measurements made to within .0001 inch. No tool touches the 'flake'.

Use of the Nikon Comparator has enabled Servo to achieve quality standards which would have been quite impossible, by any other means. SERVOTHERM® bolometers are rated among the most accurate and reliable in the field today.

Why not investigate what a Nikon comparator can do for you? For complete details, write Dept. IR-62.

THE BETTER DATA TRAP

For the past 10 years, PHOTOMECHANISMS' engineers and physicists have designed, developed, and built electro-optical and photographic instruments, including recording cameras using film and paper in all sizes, simulators for government and industry, and special x-ray movie cameras.

RAPIDATA* may be added to most of our instruments to make records instantly accessible for viewing, projecting, or scanning.

In our modern plant, we have facilities for the development, engineering, manufacture, and testing of simple components or entire systems.

Let us send you our brochure which further indicates our competence in this field. A letter outlining a specific requirement will receive a prompt and thoughtful reply.

** Trademark for our rapid access photoprocessing technique.*

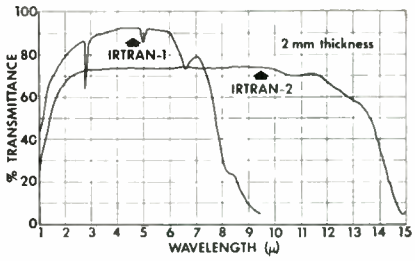
KODAK COMPONENTS FOR INFRARED SYSTEMS

KODAK IRTRAN OPTICAL ELEMENTS

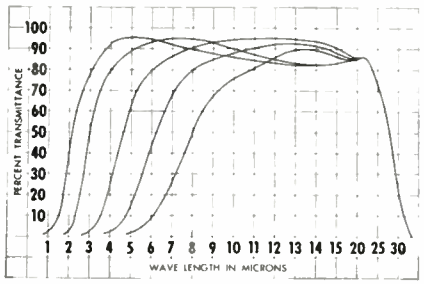
Kodak has developed a new class of "optical" materials for use in infrared and microwave systems and instruments. They retain high transmittance when hot (600°C and beyond). They are not injured by thermal shock, humidity, abrasion, weathering, organic solvents, 0.5N HNO_3, 1N H_2SO_4, 0.5N KOH, or 0.5N NH_4OH.

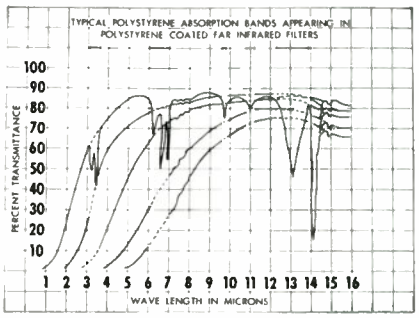
Irtran-1 material, low in refractive index, provides the best answer to the "dual-mode" problem. Infrared and microwave radiation can look through the same window. Irtran-2 material has the relatively high infrared refractive index of 2.2. Both materials we form and polish into lenses, domes, prisms, and flats.



KODAK FAR INFRARED FILTERS

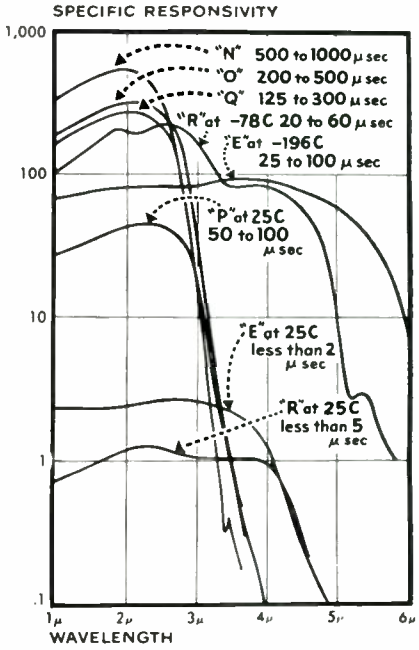
Kodak makes blocking filters of silver chloride with a silver sulfide layer that removes radiation up to a selectable wavelength between 1μ and 5μ. Series 200S filters have polystyrene protective coatings.





KODAK EKTRON DETECTORS

These photoconductive resistors are made by depositing lead sulfide or lead selenide. They provide a wide-open choice in spectral response and time constant, and a wide-open choice of physical forms—large, small, complex shapes, multiple arrays, "immersed," Dewar-housed.



SEND FOR THIS FACT-FOLDER

Kodak makes quite a few kinds of components for systems that detect, analyze, and otherwise respond to infrared radiation. In exchange for your name, address and company affiliation, we will gladly send you a folder full of our latest data sheets. (Things are moving too rapidly at present to permit the finality of a printed catalog.)

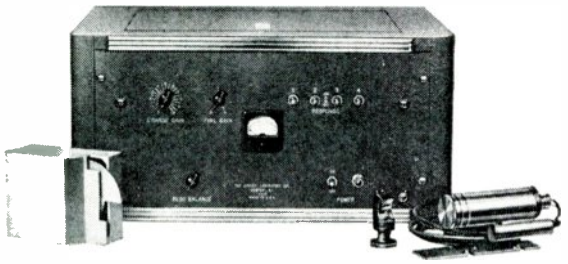
A Superior Detector for Infra-Red Spectroscopy



GOLAY PNEUMATIC DETECTOR*

Among the characteristics that render the Golay Detector superior to other types of detectors for use in infra-red spectroscopy are:

1. An effective sensitive area 3/32" in diameter.
2. Sensitivity of 6 x 10-11 watts RMSENI when used with "chopped beam" method and with recording time constant of 1.6 second.
3. Uniform sensitivity from the ultra-violet through the visible and the entire infra-red, and up to the micro-wave region.
4. Improved, drift-free, A. C. operated amplifier with step gain controls and four response periods.

*Fundamental and experimental aspects of this detector are discussed in the following publications: Rev. Sci. Inst. 18, 347 and 357 ('47); ibid. 20, 816 ('49); Proc. IRE 40, 1161 ('52).

IMAGE INSTRUMENTS, INC.

ELECTROSTORE

for

INSTANT "VIDEO" STORAGE AND RECALL

- Provides instant storage & recall, with high resolution, fast erasure, without film or tape.
- Splices into Video line between camera and monitor without disturbing Video level.
- Two Models. 207 for locations where both external drive and composite blanking signals are available. 206 for installations where only incoming Video signal is available.

Ask for information on your particular image-storage problem.

MODEL 15-2
ULTRA-SENSITIVE SCINTILLATION SURVEY METER

10,000 c.p.m. background (.01 mr/hr) up to 10,000,000 c.p.m. 7" diameter plastic scintillator, all transistorized

FRANKLIN SYSTEMS, INC.
POST OFFICE BOX 3250
WEST PALM BEACH, FLA.

For details, circle #152 on Reader Service Card

Safety in the Palm of Your Hand

SPARROW MINIATURE RADIATION ALARM
Low cost, feather weight, shirt pocket size. Operates 2 weeks on penlight batteries. Gives split-second startling audible warning when approaching danger areas.

RADIATION SURVEY METER
Portable alpha-beta-gamma accuracy of 15%. Flashlight battery operated transistor circuits. Built in loudspeaker and earphones.

WIDE RANGE SURVEY METER
For routine or disaster surveys. Illuminated dials. Extra wide range 5 mR to 500 R per hour. Automatic temperature compensation. Flashlight battery operated transistor circuits.

NUCLEAR AIR SAMPLER
Constant rate sampling. Records amount of air and running time. Operator's control board simplifies use. Built-in vacuum gauge, on-off switch, fuses, lights, and filterholder.

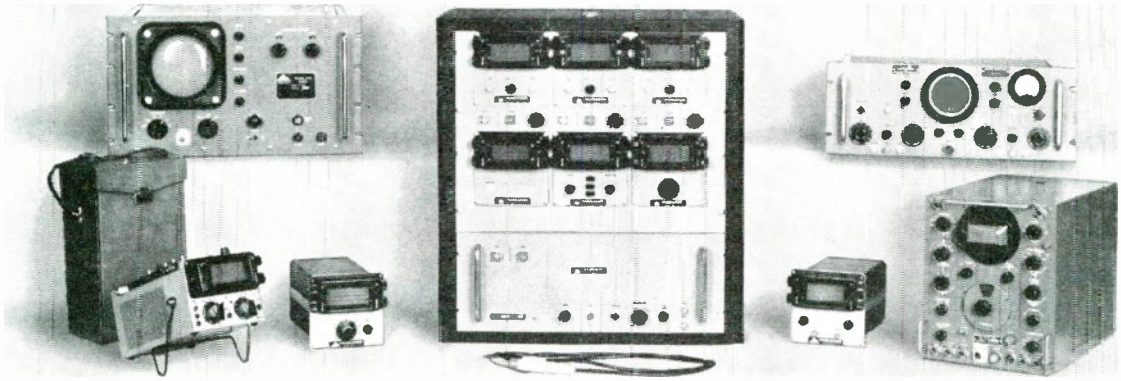
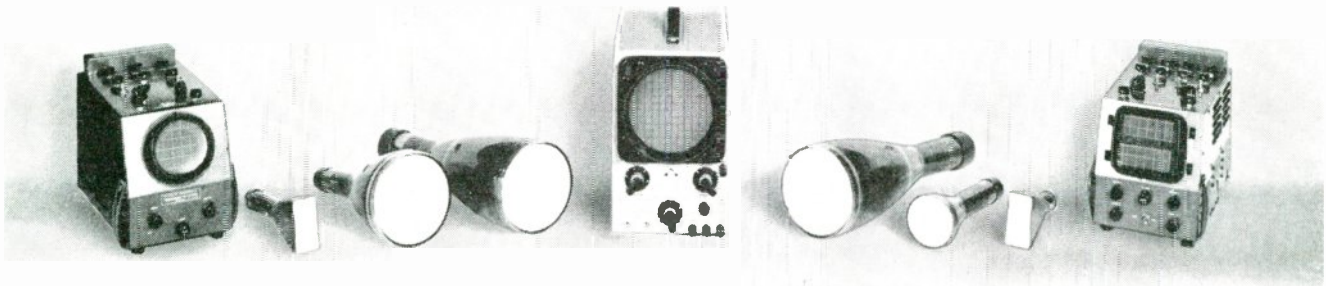
SEE Waterman FIRST





FOR YOUR OSCILLOSCOPE AND CATHODE RAY TUBE NEEDS

SYSTEMATS®—The up-to-date custom approach to multi-function monitoring. Any number of modules may be mixed or matched. Built to industrial or military standards and uses PANEL-SCOPES as building blocks.

PANELSCOPES®—Standard and custom designed panel mounted oscilloscopes in modular form of 5 1/16" x 5 1/4". Amplifiers from 2 1/2 mv/inch, up to 10 mc; triggered, repetitive or expanded sweeps; and automatic portrayal available. Rugged and military construction.

PANELPACKS®—Power supplies for PANEL-SCOPES and SYSTEMATS.

RAKSCOPES®—Standard and custom built rack mounted industrial and military type oscilloscopes.

PULSESCOPES®—A series of versatile pulse synchroscopes for Laboratory, Field and Airborne use.

CRAFTSCOPES®—A series of direct reading portable industrial oscilloscopes featuring 5-inch displays, small size (1/2 to 3/4 cu. ft.) and weights as low as 18 lbs.

POCKETSCOPES®—A series of extremely portable time-tested industrial oscilloscopes less than 1/4 cu. ft. and weight as low as 8 lbs. with wide performance specifications.

RAYONIC® CATHODE RAY TUBES—A complete line of 3-inch and 5-inch tubes made to EIA or MIL specs. with rectangular and round cross sections. Tube lengths: from 7 inches. P1, P2, P7, P11 and special phosphors available.

ACCESSORIES — Probes, Carrying Cases, Tube Mounting and Shielding Kits.

PRIMER-SCOPES®—A lightweight economical oscilloscope, ideal for experimenters, school training and industrial monitoring.

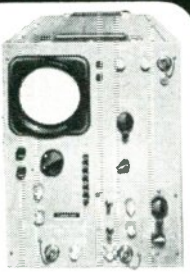
The accepted way to measure Nanosecond SWITCHING TIMES of transistors, diodes, circuits

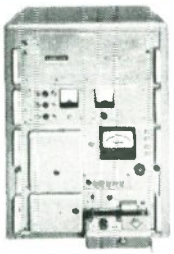
WORLD'S FASTEST SAMPLING OSCILLOSCOPE



Lumatron Model 112

Bandpass to 2 KMC. Sweep rates to 0.05 ns/cm. Dual channels. Complete test systems available for pulse, transistor switching, and diode recovery measurements.

ACCURATE, DIRECT READING AUTOMATIC TEST SET



Lumatron Model 400

Automatically measures risetime, falltime, storage and delay characteristics from 0.5 ns to 2 usec. Accuracy 5%, or better. Up to 3600 tests per hour.

Write for complete specifications

Cathode Ray Equipment

Model K-120 DC to 20 Megacycle high performance Oscilloscope

Designed around one of ETC's well-known premium-quality single-gun CRT's, the K-120 offers exceptional versatility through plug-in accessory options — sweep delays, time generators, preamplifiers, etc. DC- 15mc ±3 db. 23 nanosecond rise time. 0.2 μ sec. — 5 sec. / cm sweep.

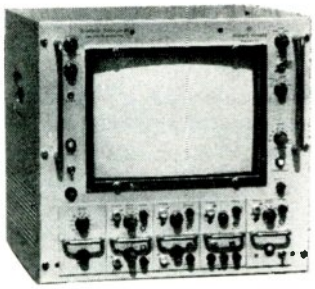
SCHWARZER

Oscilloscope for Industry & Medicine



- For research & monitoring
- Up to 10 phenomena simultaneously
- 15,000 cps frequency response
- Various plug-in preamplifiers
- High accuracy & stability

The SCHWARZER Oscilloscope is a highly qualified measuring tool—simple and economical in use.

SCHWARZER Company
46 Salmi Road, Framingham, Mass.

World Radio History

TRANSISTOR RECEIVING EQUIPMENT

LOW AND VERY LOW FREQUENCIES

- RECEIVERS
  Fixed and variable tuned, T.R.F. and superheterodyne, for both terrestrial and space environments.
- FOR PRECISION TIMING WITH VLF RELIABILITY

1. CALIVERTER

VLF to HF converter for reception of VLF timing signals on communications receiver. Output 5.000 mcs plus VLF frequency.

2. VLF-18

T.r.f. receiver with speaker and b.f.o. for phase coherent reception of NBA standard time and frequency transmission.

- FOR PRECISION FREQUENCY COMPARISON
  1. VLF servo loop system
  2. LF 100 kc Loran-C system
- Loop Antennas

Shielded, balanced, weatherproof for superior VLF and LF reception.

HIGH FREQUENCIES

- Riometers for studying ionospheric absorption
- WWV pre-amplifiers for remote antenna locations

These units are available from stock and can be easily modified to meet special requirements.

World Radio History

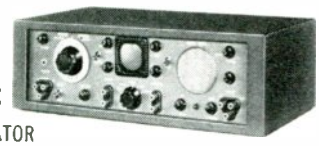
VLF PHASE COMPARATOR

provides 1000% better measurement accuracies than previously possible —

Complete system for making frequency comparisons between local standard oscillators and VLF standard broadcasts. Accuracies better than one part in 10^9 with short measurements. Longer periods give higher accuracies. Measurements may be displayed on strip-chart recorder. Available for frequencies from 15 to 60 KC. 3½"x 19"x 18", 28 lbs. Model **VLA $1490.**

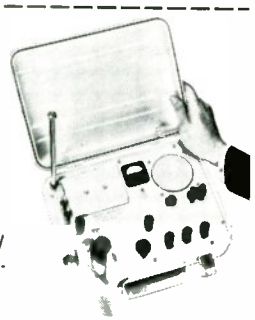


MODEL **WWVC** COMPARATOR

Highly sensitive (1 uv) crystal controlled receiver for utilizing WWV and WWVH transmissions in precision audio and radio frequency work and time interval measurements. 2" oscilloscope, 3" speaker. 5¼"x 19"x 9½" rack mount **$690**; cabinet model **$741.**

MODEL **SR7** WWV RECEIVER

Dual conversion type. S meter, phone jack and speaker. Noise limiter, antenna trimmer, and provision for oscilloscope or headphones. 3½"x 19"x 8½" rack mount or 3½"x 12"x 8½" bench model, **$285.**



MODEL **WWVT** WWV RECEIVER
transistorized

Completely portable crystal controlled receiver for utilizing WWV and WWVH broadcasts in remote location work.
S meter, phone jack, and speaker. 9"x 12"x 5", 9½ lbs. **$690.**

MODEL **WVTR** WWV RECEIVER

Rack mount version of model WWVT. 3½"x 19"x 5½". Battery powered $660; with AC power supply **$725.**

XY [GRAPH] RECORDER

20 important features to consider

- ½% accuracy
- Standard 8½"x 11" graph paper
- Flat bed
- 7½ in/sec. pen speed
- Clip on pens for multicolor trace
- Unconditional one year warranty
- Drift free
- Continuously variable attenuators
- Each axis mechanically & electrically independent
- Critically damped response
- Rugged construction
- 120% zero offset
- Full chart visibility
- Floating inputs to 100 volts dc
- Interchangeable chopper stabilized amplifiers
- Inline simplified control panel
- 10 or 1 mv/in sensivity
- 10 k or potentiometric input
- Unobstructed paper loading
- Completely portable (35#—14" x 15" x 8")

CHECK LIST FOR ONLY $595

**MEC MODEL 1587
VERTICAL/HORIZONTAL
X-Y RECORDER**

The MEC Model 1587 Vertical/Horizontal Plotting Board accurately and instantaneously presents four independent variables of analog or converted digital data as two simultaneous and permanent recordings. Both plots utilize the entire back lighted surface and may be shown as continuous curves, a series of points or symbols, or a combination of these.

This plotting capability is entirely unaffected by the attitude of the plotting surface, which may be vertical, horizontal or at any intermediate angular position.

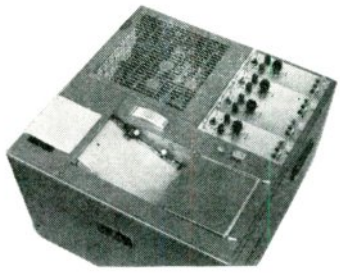
SCHWARZER

High-Frequency Graphic Recorders



- Five basic sizes available
- 1 to 16 channels, more channels on request
- Plug-in, high-gain DC-AC preamplifiers
- Frequency response: up to 300 cps within 3 db
- Rectilinear, dry & permanent tracings with unique SCHWARZER carbon paper method
- Economical recording principle: cost is less than $2 per thousand feet per channel!

SCHWARZER Company
46 Salmi Road, Framingham, Mass.

NEW!
Heat-sensitive
RECORDING CHARTS
Quality-Proven in Test after Test!

After lengthy research and extensive testing, GC brings you the best all purpose heat-sensitive oscillograph paper for a wide range of recorders andevery industrial application.

GC heat-sensitive charts provide finer trace lines for accuracy in recording, outstanding dimensional stability, and greater resistance to abrasion in handling.

Through volume production, and with over 50 years of experience, the world's largest producer of recording charts can bring substantial savings to you for all your chart requirements.

Our new folder gives you the facts on GC heat-sensitive charts. Clip and mail the coupon for your copy.

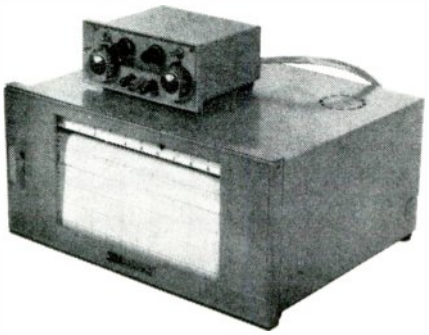
NEW CONCEPT IN RECORDING!



Westronics, Inc. proudly announces the introduction of the totally new UNIVERSAL RECORDER to its present recorder line. This new Universal Recorder can operate as a standard fixed-span recorder, or it can function with one or more EXTERNAL PLUG-IN Modules.

This "Family" of External Plug-In Modules, 24 in all, contain the circuitry necessary to allow this recorder to function as a Strain Gage, Adjustable Span & Zero, Resistance Bulb, Flow, Temperature, Pressure or Potentiometer Following recorder. These Modules, which feature convenient, calibrated controls, may be panel mounted or used as a table-top laboratory instrument. No re-wiring of the recorder is necessary to change from one module to another. Modules are available for almost any recording application you may have.

The Universal Recorder is available in both 5" and 11" strip chart sizes in single pen, dual pen and multipoint models. Consult the Westronics representative nearest you for more information.

Westmore, Inc., N.J., 15c

Westrex Co., Div. of Litton Systems, Inc., 540 W. 58th St., New York 19, N.Y., 5sc, 10sc, 15sc, Tel: 212-JUdson 2-3030
See ad on page 224

Wintronics, Calif., 5c, 15c

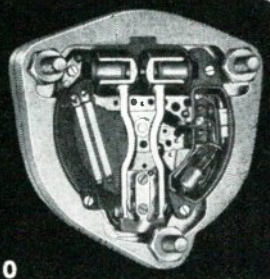
Worner Electronic Devices, Ill., 5 Photoelectric s

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

World Radio History

FREQ STDS.

AND PRECISION FORK UNITS 1 TO 40,000 CYCLES



TYPE 10
1⅜"x1⅜"x⅜"

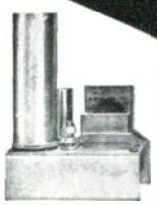
This frequency standard (360 or 400 cycles) is accurate to ± 50 parts per million at 10° to 35°C. Aging has been greatly minimized.

External power of 1.4 volts at 6 microamperes powers the unit.

TYPE 2007-6

TYPE 25

TYPE 2001-2



TYPE 2007-6 FREQUENCY STANDARD

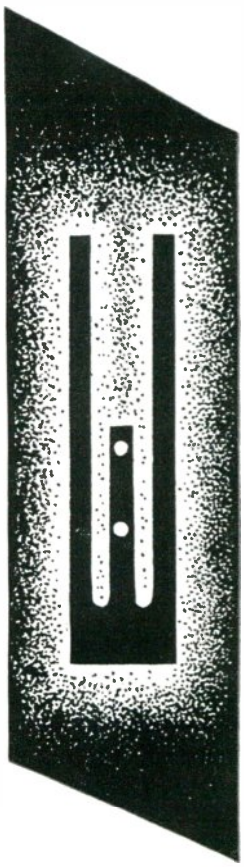
Transistorized, Silicon type
Size, 1½" dia., x 3½" H., Wt., 7 oz.
Frequencies: 360 to 1000 cy.
Accuracies:
2007-6 ± 0.2% (—50° to +85°C)
R2007-6 ± .002% (+15° to +35°C)
W2007-6 ± .005% (—65° to +85°C)
Input: 10 to 30V DC at 6 ma.
Output: Multitap, 75 to 100,000 ohms

TYPE 2001-2 FREQUENCY STANDARD

Size, 3¾" x 4½" x 6" H., Wt., 26 oz.
Frequencies: 200 to 3000 cycles
Accuracy: ±.001% at +20° to +30°C
Output: 5V at 250,000 ohms
Input: Heater voltage, 6.3 - 12 - 28
B voltage, 100 to 300 V, at 5 to 10 ma.
Accessory Modular units are available to divide, multiply, amplify and power this unit.

TYPE K-5A FREQUENCY STANDARD

Size, 3½" x 3" x 1¾"
Weight, 1½ lbs.
Frequency: 400 cycles
Accuracy: .03%, —55° to +71°C
Input: 28V DC ±10%
Output: 400 cy. approx. sq. wave at 115V into 4000 ohm load (approx. 4W)



TYPE 25 PRECISION FORK

Size, ⅝" dia. x 2⁹⁄₁₆"
Weight: 2 ounces
Frequencies: 200 to 1000 cy.
Accuracies:
R-25T and R-25V ± .002% (15° to 35°C)
25T and 25V ± .02% (—65° to 85°C)
For use with tubes or transistors.

INQUIRIES INVITED

For over 20 years we have made frequency standards and precision fork units for applications where consistent accuracy and rugged dependability are vital. Shown are just a few typical examples.

Some users integrate our products with instruments of their own manufacture. In other cases we develop complete assemblies to meet special needs.

You are invited to submit any problems within the area of our activity for study by our engineering staff.

PICKARD & BURNS, Inc.

Subsidiary of Gorham Corp.

Time:

- Complete time systems vlf
- VLF Time Signal Receivers
- VLF Clock Setting Units
- Loran-C Time Signal Receivers
- Loran-C Clock Setting Units

Frequency:

- RALOC Radio Locked Frequency Standards
- RALOC Precision Frequency Comparators
- VLF Phase Comparator Systems

New militarized, transistorized, modular units for a wide variety of frequency control applications.

PICKARD & BURNS, Inc.

FREQUENCY STANDARDS — 50 DIFFERENT MODELS

ANY FREQUENCY • ANY POWER OUTPUT • ANY SIZE

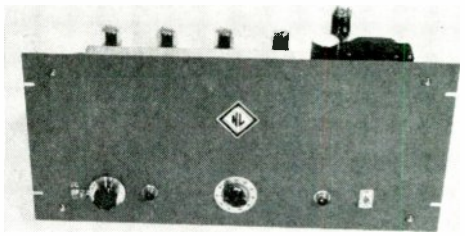
Frequency Stability up to 5 parts in 10^{10}. Most models are kept in stock.

The picture shows the front panel of Model 67.

Specifications: Stability 1 part in 10^7. Input voltage 95 to 135 volts. 60 cps (Sola Power Transf.). Output voltage 50 volts across 10,000 ohms.

Model 71 is similar but has a 10-watt, 115 volts power output.

Specifications: Stability 1 part in 10^7. Input voltages 95 to 135 volts, 60 cps (Sola Power Transf.). Output 115 volts, 10 watts.



Model 304 Transistorized Frequency-Time Standard is provided with a time-of-day clock with hour hand, minute hand, and seconds hand. The required input is 24 volts d-c, 2 amps Output 115 volts, 25 watts

50 other models of FREQUENCY STANDARDS

1. SUBASSEMBLIES
   Models 52, 54, 56, 124, 126 and many others not listed here.
2. GENERAL PURPOSE UNITS:
   Models 61, 63, 65, 67, 128
3. MOTOR AMPLIFIERS:
   Models 71, 101-6L6, 103, 104, 119, 140, 141, 200-IN, 201-IN.
4. FREQUENCY MEASUREMENT UNITS:
   Models 105, 110, 111, 129, 138
5. TIME KEEPING UNITS:
   Models 25L6B, 35L6B, 103, 104, 110, 111
6. FREQUENCY DIVIDERS:
   107, 115, 117, 130
7. TRANSISTOR STANDARDS:
   Models 73, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310
8. CRYSTAL CLOCKS FOR SIDERAL TIME

World Radio History

***A new slant** on making high accuracy DC measurements conveniently and economically!*

The model PC
PocketPot*

(PHOTO ACTUAL SIZE)

SENSITIVE RESEARCH'S NEW MINIATURE DC POTENTIOMETER!

The Model PC "PocketPot," is a stable, completely self contained, high accuracy DC potentiometer, with internal galvanometer, reference standard source, and direct "in line" readout. It is ideally suited for use as an infinite impedance calibrator or measuring instrument. Additional voltage and current ranges can be obtained by using it in combination with the Model PC-S, a switch controlled, .05% accurate "plug in" unit of the same size. Both models, when used together, may be easily held and operated in the palm of the hand!*

PocketPot*

SPECIFICATIONS

ACCURACY: ± .05% of reading or ± .5 mv., whichever is greater.

RANGES: 0—5.100 v. When used with PC-S 0—500 v. and 0—1 amp.

SENSITIVITY: Infinite resistance at null. When used with PC-S, 2,000 Ω/v.

RESOLUTION: Continuous, 1 mv. divisions on slide wire.

BATTERY OPERATED: Does not require an external power source.

READOUT: Direct "in line."

SIZE: 9" x 4¼" x 1¾". **WT:** 3 lbs.

PRICE: Model PC, $325.00; Model PC-S $125.00. F.O.B., New Rochelle, N. Y.

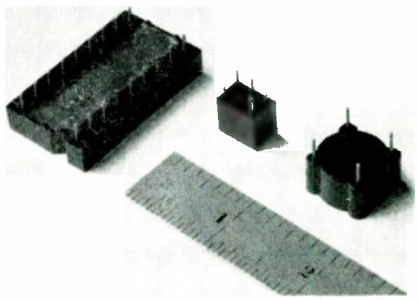
SHIFT REGISTERS



Forbes and Wagner specialize in the design and packaging of single and multiple bit magnetic memory type shift registers, gates and related devices. Several standard cases are available.

As a large scale producer of these units for computer manufacturers, Forbes and Wagner has developed skilled personnel in this field and is well equipped with specialized test facilities.

We will be glad to assist you with your problems in this area.

TELEMETRY
system

Applied Electronics Corporation of N. J. are producers of the most reliable solid state telemetry systems available today.

Supplied for use on Titan, Minute Man, Sub Roc and other major missile programs with an outstanding record of operational performance. In addition to the company's standard line of PAM, PDM and PCM systems, a new family of satelite telemeters is being produced and supplied for

QUALIFIED.....

use on several satelite projects. These equipments are characterized by low power dissipation, small size and high accuracy. Technical Specialization has enabled us to produce the most advanced and reliable completely solid state telemetry systems. Several of these are briefly described opposite.

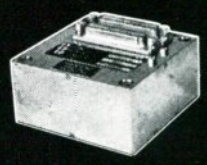
45 x 20 PDM MULTICODER
MODEL MDH — 4 SERIES



PDM Multicoders solid state designed with utmost compactness, highest accuracy with low power dissipation. This equipment contains power supply, commutator and pulse duration modulator. The equipment is also available for low level applications.

HIGH SPEED SOLID STATE
PCM MULTICODER MCH SERIES

PCM System or digital Telemeter includes a high resolution electronic commutator which accurately samples up to 120 channels, coder and power supply in a package size of 6" x 6" x 9"—the smallest working digital telemeter available today.

PDM, PCM, PAM

30 CHANNEL LOW LEVEL PAM
MULTICODER MAL-3 SERIES

PAM are available in all standard IRIG sampling and channel configurations, Solid State, high reliability, long life and low power dissipation —also available for low level applications.

30 CHANNEL TWO POLE
SOLID STATE PAM MULTICODER
MODEL MAH-3-2 SERIES

Engineering Specifications are available on all available AEC Designed Equipment, our Engineering and Research, and Design Departments are always available to discuss your specific telemetry problems.

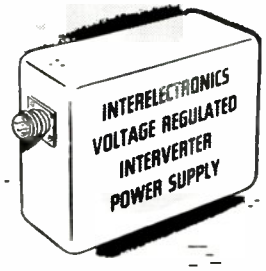
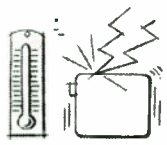
PROVEN RELIABILITY—
SOLID-STATE POWER INVERTERS
over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—



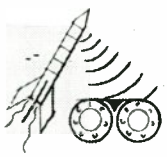
Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. Wide input range (18 to 32 volts DC), high conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).



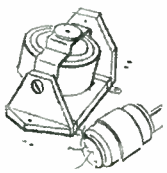
Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2% with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards).

Complies with MIL specs. for shock (100G 11 mlsc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).



AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit or actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.



Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call LUdlow 4-6200 in New York.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

World Radio History

Superior quality **Sub-Carrier Oscillators** with both High (0-5 volts) and Low Level (0-20 millivolts) units available. Supplied to numerous Companies and Agencies concerned with Space and Defense operations. These Oscillators have excellent temperature characteristics being stable when plunged through a 100°C temperature range.

Complete **Sub-Carrier Oscillator Systems** can be supplied utilizing our universal Mount which has the property of omniplugability; that is, Oscillators (High and Low Level) and Mixer Amplifier can be mixed randomly at the user's discretion. The Mount Harness is a Printed Circuit, thus affording high reliability and ease of fabrication.

IS TELEMETERED DATA RECORDING & DISPLAY YOUR PROBLEM?

- Utilizing telemetered data, we have recently completed a device which exposes and processes 180 weather maps per hour on 12 in. wide photosensitive paper. We are currently building a recorder-processor and display system for satellite-telemetered pictorial data.
- PHOTOMECHANISMS can put the sensitivity and versatility of photography to work to solve your data capturing and displaying problems.
- The addition of RAPIDATA*, our fast and reliable photoprocessing technique, can reduce the delay between recording and utilization of data to mere seconds.
- If your interest is general, a postcard request will bring you our brochure. However, if you have a specific problem, your call or letter will receive our most thoughtful reply.

** Trademark for our rapid access photoprocessing technique.*

PHOTOMECHANISMS, Inc., 15 Stepar Place, Huntington Station, L. I., N. Y.

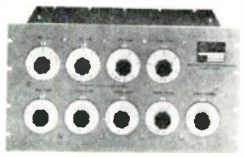
ALLISON LABORATORIES

Audio Frequency Test Instrumentation



Model 349 Noise Generator and Octave Band Equalizer.

A controlled, calibrated audio noise source, as well as an octave band analyzer. 20-19,200 cycles. Unique continuously-variable passive filters of every type. Noise Generators, Octave-Band Equalizers, Band-Elimination Filter sets. Extremely high rejection, smooth flat-topped characteristics.

Wide Range
PULSE and SQUARE WAVE GENERATOR
PSG-1
Broad Range of Frequencies and Pulse Widths

- Frequency—1 cycle to 1 mc
- Pulse Width—.1 μsec. to .3 seconds
- Rise and Fall Time—.02 μsec. for 10 v, 100 ohm output
- Rise and Fall Time—.1 μsec. for 50 v, 500 ohm output

Price $690.00

DOUBLE PULSE ADAPTER • PSG-1/DG Price $135.00

Pulse and Square Wave Generator — Rack Mounted PSG-1/RM Price $740.00

Double Pulse Adapter — Rack Mounted PSG-1/DG/RM Price $145.00

Variable Width
PULSE GENERATOR
PG-10

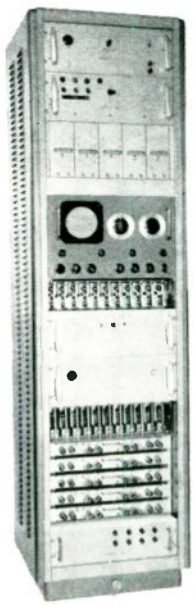
The Pulse Generator, PG-10, generates variable width pulses in the frequency range 1 megacycle per second to 20 megacycles per second. It is especially useful where high repetition rates and narrow pulses are required. Price $1250.00

- Frequency range: 1-20 mcps (3 overlapping ranges)
- Rise and fall time less than .006 μsec.
- Minimum pulse width approximately .02 μsec.
- Can be externally synchronized.

Very Low Frequency
SPECTRUM ANALYZER
SA-11

This analyzer system is designed for use wherever real time, accurate, high-resolution analysis of the very low frequencies is required. Some typical fields of application are:

- **Seismology**
- **Underwater acoustics**
- **Heartbeat analysis**
- **Speech analysis**
- **Shock and vibration analysis**



Frequency range—
0 to 5000 cps

Analysis time—
1 second for maximum selectivity

Resolution:
500 lines on all scales

Transistorized models SA-12 and SA-14 will provide frequency ranges up to 250,000 cps and, with GASL auxiliary equipment, offer power density and normal density capability

PHASE ANGLE & RATIO INSTRUMENTS

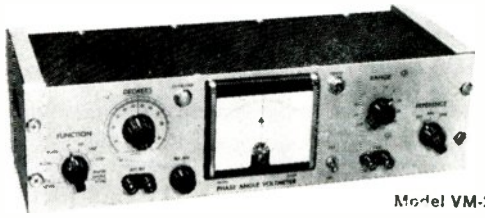
PHASE ANGLE VOLTMETERS

Provide direct reading of total, fundamental, in-phase and quadrature voltages; phase sensitive nulling of in-phase or quadrature components; direct reading of phase angle without ambiguity. Single-, three-frequency and broadband types, in bench, rack-mount and miniaturized models.

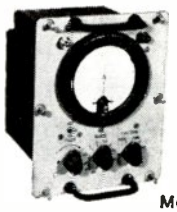
Model VM-202 Single Frequency Voltmeter. 1 mv to 300 v in 12 ranges; accuracy ±2% of f.s. Phase accuracy: dial 1°, meter ±3% of f.s. degrees. Signal: 1 freq., 30 cps to 10 kc. Input impedance: 10 meg. Reference: 100k ohms, 0.25 v min. Nulling sensitivity: 2 uv, phase sensitive. Harmonic rejection (with filters): 55 db. Scale: 3-0-3, 10-0-10, linear. Phase dial: 4 scales, 90° (elec.) apart. Dimensions: 5¼" h. x 19" w. x 7⅛" d.

Model VM-204 Three Frequency Voltmeter. Similar to VM-202 but accommodates signals at any three specified frequencies. Choice of frequencies from 60 to 4500 cps in standard models, to 10 kc on special order. Dimensions as VM-202, but 2" deeper case.

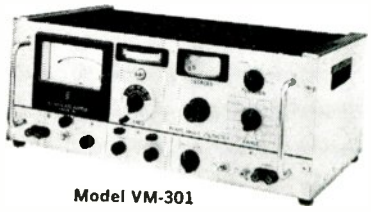
Model VM-230 Transistorized Voltmeter. Miniaturized, ruggedized version of VM-202 for modular inclusion in ground support and other systems requiring small size, dependable performance in severe environments. Range down to 300 microvolts f.s. on order. Input impedance 1 meg. Voltmeter response 20 cps. to 20 kc.



Model VM-202



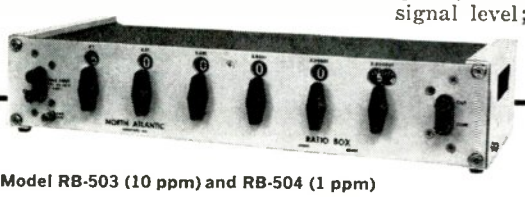
Model VM-230



Model VM-301

Model VM-301 Broadband Voltmeter. For applications where signals from 10 cps to 100 kc must be instrumented with highest accuracy. Phase shift accuracy 0.2° absolute, uniform over full 360°. Phase shift can be read while sweeping frequency in half-decade steps. Nulls unaffected by changes in signal level; harmonic effects eliminated by plug-in filters.

Complete data on any of these models will be forwarded on request

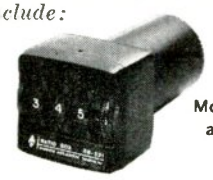


Model RB-503 (10 ppm) and RB-504 (1 ppm)

RATIO BOXES

Precision inductive AC voltage dividers to meet all range, accuracy and cost requirements. Rack, panel and portable bench models, deviation, binary ratio standards and automatic stepping types. Maintain accuracy over specified frequency range; feature in-line readout, high input and low series impedance. Range of characteristics available in this series include:

Ratio Range	—.111110 to +1.111110
Frequency	30 cps to 10 kc
Accuracy	.10 ppm to 1.0 ppm
Input Voltage	0.35f to 2.5f
Input Impedance	60 k to 1 megohm
Effective Series Impedance	7.5 ohms to 0.5 ohms



Model RB-520 and RB-521 (10 ppm)

PHASE SENSITIVE AC-to-DC CONVERTERS

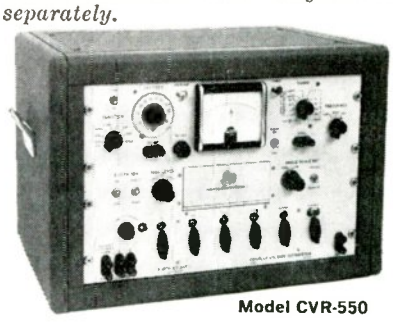
Compact, modular units meet requirements of ground checkout, production and other test systems for phase sensitive conversion of AC signals to proportional DC voltages. High linearity, sensitivity and fast response. Manual selection or remote relay programming of total, fundamental, in-phase and quadrature voltage functions. Half-panel rack mount models also available.

Model PSC-410

	PSC-410	PSC-420
Signal	single freq.	multiple freq.
Range	10 mv to 300 v	10 mv to 300 v
Frequency: Total	60 cps to 5 kc	30 cps to 10 kc
Phase Sens.	400 and 800 cps (60 cps to 2 kc special)	60 cps to 10 kc (3 per unit, max.)
Accuracy: Total	0.1% to 1/10 f.s.	0.1% to 1/10 f.s.
Phase Sens.	0.1% f.s.	0.1% f.s. to 5 kc 0.25% f.s. to 10 kc
Response	0.1 sec at 400 cps	0.1 sec at 400 cps
Output (10 k load)	0-10 v dc	0-10 v dc
Programming	range, function	range, function, freq.

COMPLEX VOLTAGE RATIOMETER

Single unit, integrated system includes all instrumentation, circuitry and accessories for measurement of phase angle, transformation ratio and related quantities. Direct reading of phase angles up to 0.5 radians, and transformation ratios to 0.001% unaffected by quadrature. Standard model accommodates any three specified frequencies from 60 cps to 3 kc, and includes both signal and reference channel filters. Phase angle voltmeter may be used separately.



Model CVR-550

Ratio Range	±1.111110
Ratio Accuracy (max)	$\pm (0.001 + \frac{0.0001}{\text{ratio}})$ %
Outputs	Ratio on six-digit ratio box. Angle in both degrees and milliradians

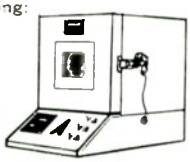
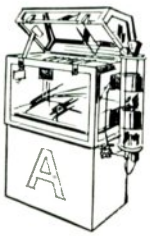
SERVICE: Thirty thousand square foot main plant, plus New England and Florida laboratories, operating around the clock for your convenience.

test chambers

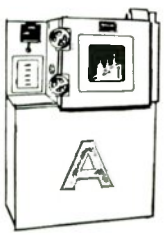
All types, including:

Econ-O-Line Low-High Temperature Chambers, Liquified CO_2





Salt Spray Chambers, All Lucite Construction



Low-High Temperature Liquified CO_2 Chambers, Or Cascade Refrigeration

BETHLEHEM

TESTING CHAMBERS

to further RELIABILITY of military and industrial products

We offer Testing Equipment created by an unmatched combination of comprehensive engineering capability and prime manufacturing facilities. Standard sizes or custom engineered to your testing requirements. Meet all military specifications.

ValuLine • ThermaLine

SPACE SIMULATION CHAMBERS
HIGH AND LOW TEMPERATURE CHAMBERS
HUMIDITY CHAMBERS
ALTITUDE AND HIGH VACUUM CHAMBERS
EXPLOSION CHAMBERS
SAND AND DUST CHAMBERS
SALT FOG
RAIN AND SUNSHINE
HIGH PRESSURE TEST EQUIPMENT
HIGH TEMPERATURE THERMAL SYSTEMS
LOW TEMPERATURE THERMAL SYSTEMS
HIGH IMPACT SHOCK TESTING MACHINES for light and medium weight equipment

WE FABRICATE PORTABLE SELF-CONTAINED CHAMBERS AND COMPLETE WALK-IN AND DRIVE-IN FACILITIES

Years of study and experience in pioneering advanced test facilities are at your disposal. Kindly address your inquiry to Mr. Bernard Friedman, Manager . . .

Environmental TEST CHAMBERS

Standard test chambers are expertly designed for accurate, reliable testing. Superior design and quality construction assure years of dependable service with a minimum of maintenance. Whatever the simulated condition desired, there is a Standard Cabinet designed specifically to do the job, guaranteed to give excellent performance.

Standard Cabinet Company, a recognized pioneer in the field, has an uninterrupted history of over 18 years under the same ownership and management. It has acquired a wealth of experience and skill in the design and construction of chambers of every description.

VIBRATION TEST EQUIPMENT

Complete systems from 175 to 5000 pounds force, featuring economical expandability, automatic control, minimum distortion or lateral motion, low gauss level at table, environmental models and limited random testing with minimum accessories.

DIAL-A-GAIN INSTRUMENTS

1. Low noise cathode follower of unique design
2. Up to 100 feet of shielded input signal cable
3. Precision calibrated adjustment of gain
4. Direct dialing of accelerometer sensitivity
5. Standardized data through normalized output
6. Usable with recording instruments
7. Direct indicating meter models
8. Simultaneous displacement, velocity and acceleration outputs

UNHOLTZ-DICKIE CORPORATION, 2994 Whitney Ave., Hamden 18, Conn.

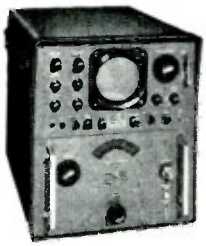
World Radio History

MICROWAVE SPECTRUM ANALYZERS

10 to 100,000 mc

FEATURING:

- 1 to 30 cps adjustable sweep rate
- Direct-reading UNIDIAL® tuning control, with no klystron modes to set
- High accuracy, resolution and sensitivity
- Frequency dial accuracy ±1%
- Non-contacting klystron cavity chokes for noiseless tuning
- Five-inch flat-face CRT
- Provision for use with Multi-pulse Spectrum Decoder (Model SD-1)



Model TSA

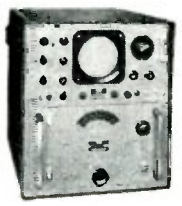
DIRECT READING SPECTRUM ANALYZER

10 to 44,000 mc in 5 Plug-In Tuning Units

To test missiles, radar, microwave components, telemetering and multi-pulse transmission

Features:

- **Dispersion:** 400 kc to 25 mc
- **Resolution:** 2 to 80 kc variable
- **Attenuation:** Continually variable
- **Sensitivity:** —50 to —95 dbm, depending on frequency
- Internal Marker: ± 14 mc



Model TSA-S

COMBINATION SYNCHROSCOPE-SPECTRUM ANALYZER

10 to 44,000 mc in 5 Plug-In Tuning Units

PROVIDES TIME AND FREQUENCY DISPLAYS

Time Display: Shows signal waveform

Frequency Display: Shows power vs. frequency

Bandwidth: 5 kc, 50 kc, 500 kc, 5 mc. Synchroscope sweep rate: 2, 10, 100, 1,000, 10,000 and 100,000 μ sec per screen diameter. Dispersion, Sensitivity and Internal Marker same as TSA.

Model TSA-W

WIDE DISPERSION SPECTRUM ANALYZER

FOR NARROW AND WIDE PULSE ANALYSIS

10 to 44,000 mc in 5 Plug-In Tuning Units

- **Dispersion:** 200 kc to 80 mc (2 ranges)
- **Resolution:** 2 to 80 kc variable
- **Internal Marker:** ±40 mc
- **Screen Display:** Linear or log

80 mc dispersion displays pulses narrow as 0.1 μ sec. For wide pulses, dispersion may be adjusted down to 200 kc.

TRANSISTORIZED MULTI-BAND, SINGLE UNIT SPECTRUM ANALYZER

Complete Frequency Coverage, From 10 to 40,880 mc

Model SA-84T

Completely transistorized lightweight unit.

Dispersion: 500 kc to 25 mc, adjustable

Resolution: 20 kc at all frequencies

Internal Marker: ± 13 mc

Power Input: 115/230 VAC, 50/60 cps or 12 VDC

Power consumption: when battery operated, 110 watts

Sensitivity: —50 to —105 dbm, depending on frequency.

Weight: 70 lbs. One half the weight of conventional vacuum-tube equivalent

Meets MIL-I-26600 for r-f interference

UNIVERSAL SPECTRUM ANALYZERS

Complete frequency coverage 10-40,880 mc in single self-contained units—no additional tuning units required. Expanded, direct-reading, slide rule dial

Model SA-84

- **Dispersion:** 10 to 55 mc: 500 kc to 5 mc, adjustable 55 to 40,880 mc: 500 kc to 25 mc, adjustable
- **Resolution:** 20 kc :
- **Internal Marker** variable

Model SA-84W

Wide Dispersion

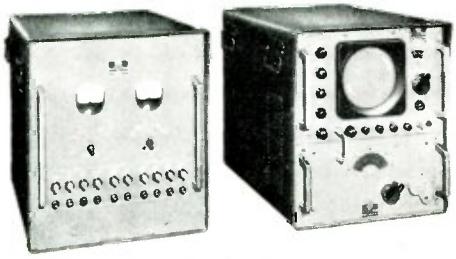
- **Dispersion:** 10 mc to 240 mc: 10 mc 240 mc to 40,800 mc: 80 mc
- **Resolution:** 2 kc to 80 kc variable
- **Crystal controlled markers from 10 to 40,880 mc**
- **Log-linear display**
- **Accurately calibrated IF attenuator**

WIDE BAND SPECTRUM ANALYZER

Self-Contained Unit Covers 10 to 40,000 mc in 20 Bands

- **Dispersion:** 1 mc to 25 mc in narrow band 50 mc to 4000 mc in wide band
- **Resolution:** 20 kc in narrow band 1.5 mc in wide band
- Rapid band selection by means of illuminated push-button switches.
- Frequency marker up to 4000 mc.
- End-markers indicate frequency limits of each band.
- Center-marker permits switching from wide to narrow bands without hunting for r-f signal.
- **Sensitivity:** —50 to —80 dbm, depending on frequency.

Model WSA



Model DA-70

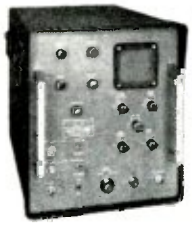
100 GC SPECTRUM ANALYZER

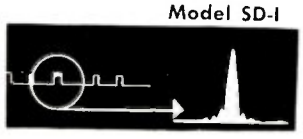
Covers 50,000 mc to 100,000 mc in Three Bands

- **Dispersion:** Continuously adjustable from 50 mc to 1000 mc. Permits narrow pulse inspection.
- **Resolution:** 1 mc
- High intermediate frequency assures image rejection and prevents video detection.
- **Frequency marker:** for measuring frequency differences.
- **Dial frequency Accuracy:** ±1.0%
- **Nominal Sensitivity:** —50 dbm for entire frequency range.

MULTI-PULSE SPECTRUM SELECTOR

Model SD-I





Permits spectrum analysis of individual microwave pulses in a pulse group when used with any Polarad Spectrum Analyzer. Any pulse in a complex coded signal may be isolated for examination.

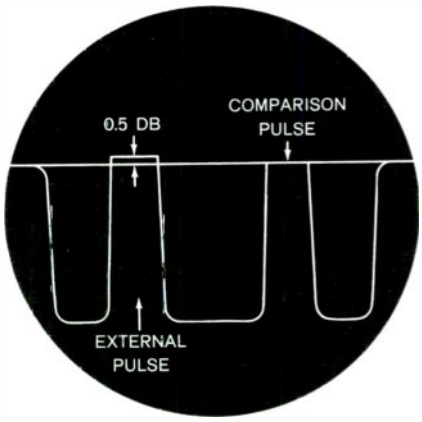
DETERMINE

PEAK
PULSE POWER
WITHIN 0.5 DB



WITH
MULTI-BAND
FLEXIBILITY

The Series 5000 Pulse Power Calibrator is the only instrument that will give a final, direct reading of peak rf pulse power to this degree of accuracy . . . quickly, regardless of waveshape, and without introducing unknown errors. In addition, it provides multiple-band coverage, through the use of interchangeable rf heads.

RF Unit Model 5205, now available, covers the range from 8500 to 9600 mc. Other rf heads, in development, will cover further important bands. The display, essentially a notch wattmeter, permits comparative power discrimination within less than 0.1 db. Direct input power level range is approximately −5 to +63 dbm.

WRITE TODAY for more information on this and other new GCC developments in microwave components, wavemeters, attenuators, oscillators and test equipment.

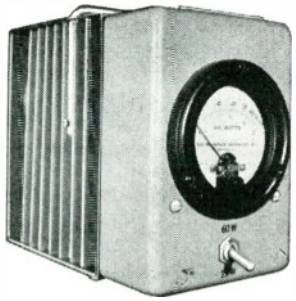
World Radio History

Average Reading R. F. POWER METERS

1. Calibrate these Power Meters in your plant or laboratory against low frequency power standards at power line frequencies. No need to ship to manufacturer for repair and recalibration.
2. No correction curves necessary.
3. Simple operation.

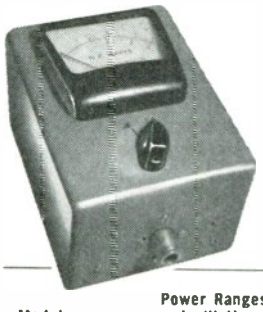


200 KC TO 500 MC GREATLY IMPROVED

- **Portable, Continuous Duty.**
- **Can be recalibrated anywhere with DC or Alternating Current Power against a low frequency standard.**

These broad band R.F. Power Meters are of the absorption-type consisting of an oil filled, air cooled, coaxial load resistor and a voltmeter calibrated to read watts. The power meter is suitable for use as a field or laboratory test instrument, is completely shielded and non-radiating, permitting transmitter testing and adjustment without interference. The meter box is easily detached, permitting location of the load resistor at a remote point. In cases where power measurements are not required the load resistor may be used as a dummy load. No correction curve is necessary to cover the frequency range. The spurious response usually associated with directional couplers and capacitative voltage dividers is absent in this purely resistive voltage divider. Since this is a resistive voltage divider which has the same voltage division at DC, 60 cycle AC, and at high radio frequencies, this instrument can be calibrated and its calibration can be checked frequently on 60 cycle supply voltages.

Model	Power Ranges In Watts	Dielectric	Max. Power Dissipation	Price
PM-3	60, 150	Oil	150 watts	$220.00
PM-4	.15, .6	Air	1 watt	95.00
PM-5	.6, 1.5	Air	1.5 watts	95.00
PM-6	1.5, 6	Air	10 watts	95.00
PM-7	150, 600	Oil	600 watts	285.00
PM-8	1.5, 6, 15, 60	Oil	100 watts	225.00
PM-9	2.5, 10	Air	10 watts	105.00
PM-10	15, 60	Oil	90 watts	145.00
PM-14	25, 100, 500	Oil	500 watts	325.00
PM-16	150, 600, 1500	Oil	1500 watts	375.00
PM-18	1.5, 6, 15, 60, 150, 600	Oil	600 watts	485.00
PM-19	1.5, 6, 15, 60, 120	Oil	100 watts	250.00



100 KC TO 200 MC

- **Intermittent Duty.**
- **Portable.**
- **Can be recalibrated anywhere with DC or Alternating Current Power against a low frequency standard.**

Model	Power Ranges In Watts	Dielectric	Max. Power Dissipation (Intermittent Duty)	Price
AM-3	60, 150	Oil	150 watts	$95.00
AM-6	1.5, 6	Air	10 watts	60.00
AM-7	150, 6	Oil	600 watts	150.00
AM-8	1.5, 6, 16, 60	Oil	100 watts	95.00
AM-9	2.5, 10	Air	10 watts	60.00
AM-10	15, 60	Oil	90 watts	75.00
AM-14	25, 100, 500	Oil	500 watts	175.00
AM-16	150, 600, 1500	Oil	1500 watts	200.00

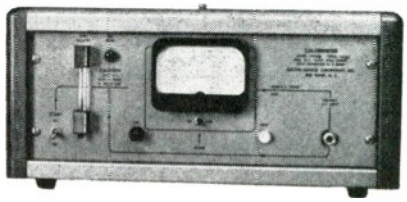
AM-19	1.5, 6, 15, 60, 120	Oil	100 watts	125.00

DIRECT READING

Calorimetric Power Meter

3% ACCURACY



ACCURACY: 3% (less load error)

These power meters are greatly simplified Calorimeters, which use an accurate metering pump of the gear type driven by an overpowered synchronous motor to keep the fluid flow constant. The instrument is fully self-contained, portable, self-cooled and requires only connection to the power line. It does not use any flow meters, thermometers or any other controls. There is only the "ON" & "OFF" switch for the operator to use on the front panel, when a measurement is to be made. A sensitive thermopile and microammeter measures the power dissipated in the R.F. load. The microammeter is calibrated in watts and is direct reading. These Calorimeters are available with either a coaxial or a waveguide load.

COAXIAL CALORIMETERS

Type	Full Scale Power	Freq. Range KMC	Price
CPM-10	10	DC-10	$950.00
CPM-50	50	DC-10	950.00
CPM-100	100	DC-10	950.00
CPM-500	500	DC-10	950.00
CPM-5000	5000	DC-1	1400.00
CPM-10000	10000	DC-1	2000.00
CPM-20000	20000	DC-1	3250.00

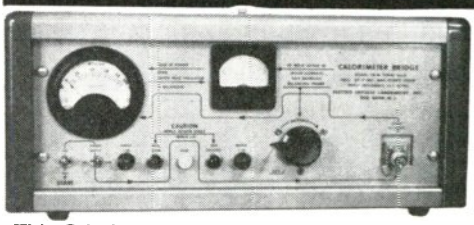
WAVEGUIDE CALORIMETERS

Type	Full Scale Power	Price
CPW-10	10	$850.00
CPW-50	50	800.00
CPW-100	100	800.00
CPW-500	500	800.00
CPW-5000	5000	1200.00
CPW-10000	10000	1750.00
CPW-20000	20000	2950.00

DIRECT READING

Calorimeter Bridge

2% ACCURACY



with Self-Contained Calorimeter Loads, Cooling System & Circulating System.

ACCURACY: 2% (less load error)

This Calorimeter is completely self-contained with its own circulating system, cooling system and the radio frequency dummy load and requires only connection to the regular power line. The R.F. power is read directly on a 4½" meter in watts. A single coaxial dummy load is available to cover the frequency range from DC to 10,000 Mc and for the power range from 1 to 1000 watts. The overall accuracy of this Calorimeter is 3%. However, this accuracy can be improved greatly by calibrating the Calorimeter by means of an external laboratory-type wattmeter.

Model	Range	Frequency	Price
CB-11	1 watt	DC-4 KMC	$900.00
CB-12	5 watts	"	900.00
CB-13	25 watts	"	1250.00
CB-14	150 watts	"	1250.00

Short Form Catalog of
MICROWAVE TEST EQUIPMENT
DELIVERY FROM STOCK

FXR offers the finest and most complete line of MICROWAVE TEST EQUIPMENT in the world! Craftsmanship and engineering know-how, housed in over 250,000 sq. ft. of modern facilities, are the keys to this quality FXR line.

Contact your nearest FXR representative for full information in these additional fields:

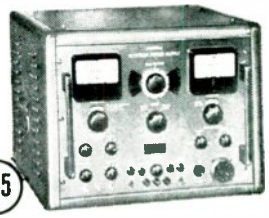
831

TEMPERATURE COMPENSATED POWER METER

- Power Range, full scale —20DBM or 0.010 MW. to + 5DBM or 3.00 MW.
- Type 218 Heads required

Model B831A • $335
Model B832T (Transistorized) • $450

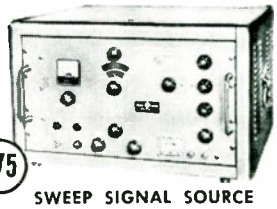


815

UNIVERSAL KLYSTRON POWER SUPPLY

- Beam: 200-3600V
  Grid: 0 to +150V; 0 to —300V
  Reflector: 0-1000V

Model Z815B • $1350

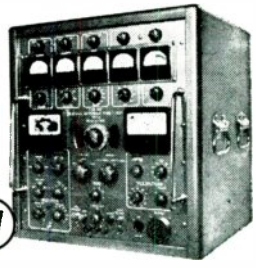


775

SWEEP SIGNAL SOURCE

- Freq. Range: 8200-12400 MC.
- Provisions for AGC

Model X775A • $2900



817

UNIVERSAL MICROWAVE POWER SUPPLY

- Helix: 0-3500V • Filament: 0-15V D.C.
- Separate Grid Voltages #1, #2, #3, #4 plus Collector and Anode Voltages

Model Z817A • $2650

812

STANDING WAVE AMPLIFIER

- Full scale sensitivity, 0.1μV signal-to-noise ratio 3:1
- Tunable 1000 cps filter

Model B812A • $225

819

KLYSTRON POWER SUPPLY

- Beam: 300-1000V at 85 MA.
- Grid: 0 to +150V; 0 to —300V
- Reflector: 0-900V

Model Z819A • $625

POLARAD

MICROWAVE RECEIVERS
400 to 84,200 mc

TRANSISTORIZED CALIBRATED FIELD INTENSITY RECEIVER

Model CFI

1,000 to 10,000 mc

Four Interchangeable Plug-In Tuning Units Cover All Frequencies.

Transistorized, low power drain, ruggedized field intensity receiver provides accurate measurements of frequency and absolute power level of conducted or radiated microwave energy. Combines a Field Intensity Calibrator, a Monitor and Power Unit and a Calibrated Antenna System. The Model CFI covers 950 to 11,260 mc when used as a microwave receiver.

FEATURES:

- Built-in power inverter for use with 12 volt DC source.
- Direct-reading frequency dial.
- Output level: read directly in db.
- Audio, video and recorder outputs.
- AM, FM, CW and PULSE reception.
- One third lighter than equivalent vacuum-tube Field Intensity Receiver.
- Calibrated antenna system includes an omni-directional band antenna and separate directional antennas to match each tuning unit.

Sensitivity:
—90 dbm.

Frequency Dial Accuracy:
±1%

Maximum RF input:
3 volts

Impulse Bandwidth:
1 mc, 5 mc and 8 mc

Image and Spurious Response Rejection:
Better than 60 db

CALIBRATED MICROWAVE FIELD INTENSITY RECEIVER

Model FIM

1,000 to 10,000 mc

Two compatible tuning units under development will extend frequency to 20,000 mc.

Indicates Absolute Power Level By Comparing Input Signal Against Internally Generated Signal In A Single Unit.

Four Interchangeable Plug-In Tuning Units Cover All Frequencies.

Frequency Dial Accuracy:
±1%

Maximum RF Input:
3 volts

Sensitivity:
—80 dbm

Impulse Bandwidth:
5 mc

Image and Spurious Response Rejection:
Better than 60 db

Attenuation:
0 to 80 db in steps of 1 db

- Only Microwave Field Intensity Receiver with self-contained signal generator which calibrates entire system under test at any level.
- First single microwave test system to determine radiated r-f interference and susceptibility.
- Front-panel meter indicates average, peak, slide-back peak or quasi-peak value of r-f signals. Outputs for video, audio and recorder.
- Direct-indicating peak VTVM for ease of frequency location of impulse noise.
- Single UNIDIAL® tuning control tunes both the receiver and signal generator.
- Calibrated antenna system includes an omni-directional broad band antenna and separate directional antennas to match each tuning unit.

TRANSISTORIZED MICROWAVE RECEIVER

Fully Transistorized Circuitry Ehsures Low Power Drain and Rugged Construction. One-third lighter than equivalent vacuum-tube receiver.

950 mc to 11,260 mc

Four Plug-In r-f Tuning Units Cover All Frequencies.

Four Instruments In One.

- AM, FM, CW, MCW, Pulse receiver
- Field intensity receiver
- Pulse, pulse-time or pulse-position demodulator
- Sensitive power meter

- Power consumption when battery operated, 180 watts. Built in power inverter for use with 12 volt DC battery source.
- AFC and AGC circuits.
- Audio, video and recorder outputs.
- Output level: read directly in db.

Model TR

Frequency Dial Accuracy: ±1%
Impulse Bandwidth:
1 mc, 5 mc, or 8 mc
Image Rejection: Better than 60 db
Video Bandwidth: 3.5 mc
Sensitivity: —90 dbm

MICROWAVE RECEIVER

400 to 84,200 mc

Nine Interchangeable Plug-In Tuning Units Cover the Frequency Range.

Four Instruments In One.

- AM, FM, CW, MCW Pulse receiver
- Field intensity receiver
- Pulse, pulse-time or pulse-position demodulator
- Sensitive power meter

For quantitative analysis of microwave signals, and monitoring of all types of radio and radar communication.

Model R

Features: UNIDIAL® control with direct-reading frequency dial. AFC and AGC. Audio, video, recorder and trigger outputs. Output level read directly in db.

Frequency Dial Accuracy: ±1%
I-F Bandwidth: 3 mc
Video Bandwidth: 2 mc
Image Rejection: Greater than 60 db to 11,260 mc
Range of Linearity: With AGC, 60 db
Sensitivity: —55 to —90 dbm, depending on frequency

ANTENNA PATTERN TUNING UNIT 2,000 to 75,000 mc

Designed For Use With Model R Receiver

- **External Mixer With Flexible Cable.** May be located at or near antenna, any distance up to 75 feet from receiver.
- **Internal electronic 1000 cps sweep** allows direct operation into any standard make AC antenna pattern recorder.

Model RW-T

TRANSISTORIZED MICROWAVE IMPULSE GENERATOR

1,000 cps to 10,000 mc

Model IC-120

For use with microwave receivers when making field intensity measurements, as a signal source for spectrum analyzers, in noise measurements, and other applications. Generates 0.020 nanosecond pulses.

CALIBRATED ANTENNAS
1,000 to 10,000 mc
and
TEST ANTENNAS
1,000 to 40,000 mc

READ

RF FREQUENCIES TO ±0.03%

WITHOUT TABLES

NOW you can get direct-reading convenience **plus** extreme precision of tuning **plus** broad frequency coverage . . . **without using tables or calibration charts.**

Only DATA-DIAL (patented) direct-reading wavemeters bring you these advantages. The tuning knob drives a long tape carrying a sloped frequency scale, which moves behind an index curve accurately drawn on a transparent window. As the cavity is tuned, the moving intersection point of these curves compensates for inherent variations, giving the frequency for each setting without further correction.

Model 3102 covers frequencies from 900 to 2100 mc, with a direct-reading accuracy of ±0.03% below 1700 mc and ±0.05% above that point. The cavity has an integral crystal detector output. Model 3103, in final development, covers frequencies from 2350 to 3750 mc. Other models will extend the range of this new line to further bands.

WRITE TODAY for more information on this and other new GCC developments in microwave components, pulse power calibrators, attenuators, oscillators and test sets.

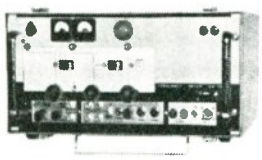
Lavoie INSTRUMENTS

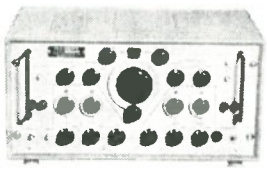
for precision measurement and analysis



LA-70A
FREQUENCY METER

The LA-70A offers exceptional accuracy, fine tuning stability, and portability. It is uniquely suited to meet FCC requirements for .0005% tolerance of fixed station transmitters in the 50-1000 Mc range. The companion LA-71 Deviation Meter provides rapid and accurate measurement of peak frequency deviation over a center frequency range of 5 Mc to 1000 Mc.

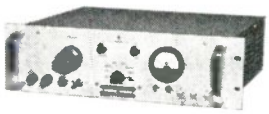
Price LA-70A $1,595.
LA-71 $ 490.



LA-593
PULSE GENERATOR

A versatile double-pulse generator with wide range control and excellent pulse shape. The amplitude of each pulse is separately adjustable. The LA-593 performs excellently in the testing of network transient response, checking delay lines, and in measuring AVC circuit recovery time.

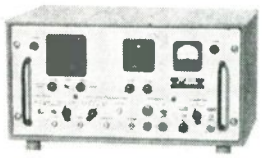
Price..... $1,175.



LA-90
FREQUENCY STANDARD

A completely self-contained package, including power supply, this 5 Mc frequency standard provides exceptional stability of 1 part in 10^9 per day. A new approach to crystal oven regulation results in shifts of less than 0.01°C over several months of operation. Six standard output frequencies.

Price..... $1,950.



LA-800D
WWV FREQUENCY COMPARATOR

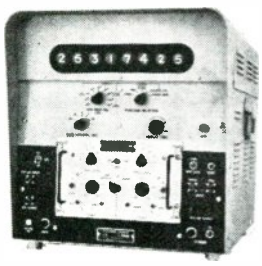
The LA-800D is the first to provide an accurate means for continuous monitoring of local frequency standards without frequency dividers or synchronous clock. Instantaneous accuracy is better than 1 part in 10^7. Receives either the 5.0 or 15.0 Mc WWV transmission.

Price ..... $985.

LA-270
OSCILLOSCOPE

Incorporating new design concepts in sync systems and circuitry, the LA-270 features high sensitivity (.05 V/CM), DC to 70 Mc (down less than 3 db at 70 Mc), and full 6 CM vertical deflection. A rugged, militarized unit with all circuitry built into removable modular constructed assemblies.

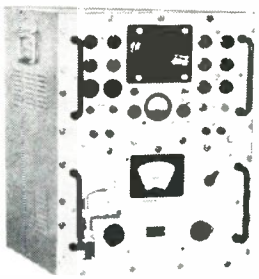
Basic Unit $1,985.
S-70 high Gain Pre-Amplifier Plug-in $ 175.
D-70 Dual Trace Pre-Amplifier Plug-in $ 285.



LA-80
ELECTRONIC COUNTER

The only 10 megacycle counter with directly coupled in-line readout. Binary conversion is eliminated by a true decade system. Time base stability is ±one part in 10^8 per day. Ten cycles to ten megacycles frequency range, with extended ranges available. The LA-80 offers outstanding reliability with minimum maintenance.

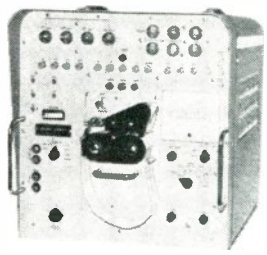
Price..... $2,250.



LA-18M
SPECTRUM ANALYZER

The bench-size LA-18M is one of a line of Lavoie spectrum analyzers featuring high stability and wide range in compact units. Unique detachable waveguide mixers provide versatility and adaptability at low cost. Range of the LA-18M is 10 Mc to 44,000 Mc.

Price..... $4,950.



LA-303
ROBOTESTER

High speed sampling and comparison reduce production line checkout and operational test time 80%. Pre-programmed acceptance standards guarantee exact measurements of resistance, insulation resistance, voltages AC and DC, and impedance. Accessories permit handling of complex problems and provide complete test systems built on Robotester capabilities.

Price ..... $5,600.

RAMCOR

DENSIOMETER MODEL 1200

Specifically engineered to detect unsafe levels of VHF, UHF, L, S, C and X-band energy from tubes and antennas. Battery-powered, direct reading, easily used by non-technical personnel.

WAVEGUIDE SWITCHES

Covering all frequency ranges. Isolation better than 60 db over entire band. Fully interlocked for magnetron protection. Switching time .05 seconds. Mechanical units and specials available.

WATTMETER MODEL 1300

Panel mounted or portable. Designed for accuracy and ease of operation over a range 10 mc to 10,250 mc. Displayed in 3 ranges: 0-1, 0-5, 0-10 milliwatts.

POLARAD

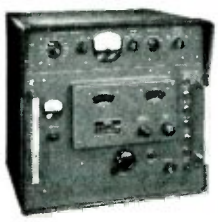
MICROWAVE SIGNAL GENERATION EQUIPMENT

500 to 50,000 mc

500 to 21,000 mc. Polarad signal generators in this range feature: Continuously variable attenuators calibrated directly in —dbm. Internal pulse, FM and square wave modulation, external pulse and multi-pulse modulation. Delayed and undelayed sync outputs. UNIDIAL® tuning. Direct-reading frequency dials accurate to ± 1%. High stability non-contacting klystron cavity chokes for noiseless tuning and accurate calibration.

UHF SIGNAL GENERATOR

500 to 1,000 mc



Model PMR

Single unit covers entire frequency range.

Internal pulse (40-4,000 pps), and square wave modulation (10-10,000 pps.) Internal FM with interchangeable modulator.

Calibrated output: 0 dbm (1 mw) to —127 dbm.

MICROWAVE SIGNAL GENERATOR

10,000 to 21,000 mc

Model PMK

Two interchangeable generator units.

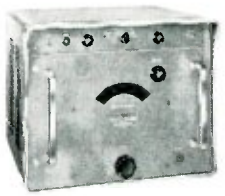
Internal pulse and square wave modulation (10-10,000 pps.) Output to 10 mw. DIGITAL frequency indicator.

Calibrated power output: +10 dbm (10 mw).

MICROWAVE SIGNAL SOURCE

1,050 to 11,000 mc

in 4 interchangeable tuning units.



Model KSS

A stable source of microwave energy at relatively high power output level. Internal square wave 10-10,000 pps. External pulse, square wave or FM modulation. Adjustable attenuator.

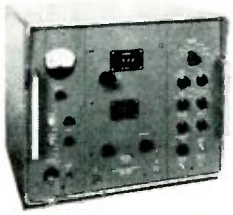
Power output: 14 to 400 mw, depending upon frequency.

ULTRA-BROADBAND MICROWAVE SIGNAL GENERATOR

4,200 to 11,000 mc

in one instrument

Model MSG-34



Internal pulse and square wave modulation (10-10,000 pps.) 0 to —127 dbm attenuator output.
DIGITAL frequency indicator.

MICROWAVE SIGNAL GENERATOR

4,450 to 11,000 mc

Two interchangeable r-f generator units. Model PMX

Internal pulse and square wave modulation (10-10,000 pps.) 0 to —127 dbm attenuator output.

MICROWAVE SWEEP GENERATOR FOR INSTANTANEOUS MICROWAVE ANALYSIS 1,000 to 16,000 mc

At single frequency or over a wide range

in 5 interchangeable tuning units. Provides high-power microwave signal adjustable from single frequency to 2:1 frequency range. .001 to 100 cps sweep rate. Int. mod.: 1,000 cps and 456 kc square wave. Ext. mod.: square wave, FM and pulse.

Model CSG

RAPID SCAN RATIO SCOPE

Model VS-2A

Displays ratio of two input signals, gives visual plot of VSWR as function of frequency, at a single frequency or over an entire sweep range. Calibrated 7" CRT. For use with Model CSG.

MICROWAVE SIGNAL GENERATORS

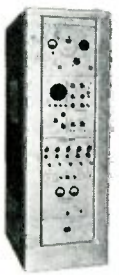
Model MSG

	Frequency	Calibrated Power Output	Internal Pulse Modulation: Internal Square Wave	Width in μ sec.	Pulse Repetition Rate in pps	Delay in μ sec.	FM deviation in mc minimum
MSG-1	950-2,400 mc	1 mw (0 dbm)	40- 4,000 pps	0.5-10	40- 4,000	2.5-300	±2.5
MSG-1P*	950-2,400 mc	10 mw (+10 dbm)	10-10,000 pps	0.2-10	10-10,000	2-2,000	±2.5
MSG-1R	950-2,400 mc	1 mw (0 dbm)	10-10,000 pps	0.3-10	10-10,000	2-2,000	±2.5
MSG-2A	2,000-4,600 mc	1 mw (0 dbm)	40- 4,000 pps	0.5-10	40- 4,000	2.5-300	±2.5
MSG-2R	2,000-4,600 mc	1 mw (0 dbm)	10-10,000 pps	0.3-10	10-10,000	2-2,000	±2.5
MSG-2P*	2,000-4,600 mc	10 mw (+10 dbm)	10-10,000 pps	0.2-10	10-10,000	2-2,000	±2.5

*Attenuator Accuracy: ±3 db between 0 and +10 dbm.
±2 db below 0 dbm.

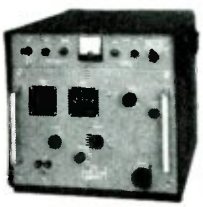
CODE MODULATED MULTI-PULSE MICROWAVE SIGNAL GENERATOR

950 to 10,750 mc Model B



in 4 interchangeable tuning units. Provides 5 independently adjustable pulse channels, each with variable pulse width and delay. Built-in precision oscilloscope.

EHF SIGNAL GENERATORS AND SOURCES



EHF Signal Generators and Sources

12,400 to 50,000 mc. Units in this range provide cw signals, 1,000 cps internal square wave, external modulation provisions, accurate frequency calibration.
EHF SIGNAL GENERATOR 18,000 to 39,700 mc, 7 plug-in units. Accurate power calibration. EHF SIGNAL SOURCE 18,000 to 50,000 mc, 9 plug-in units. High power output.

EHF SIGNAL GENERATOR Tuning Unit	Frequency Range	EHF SIGNAL SOURCE Tuning Unit
G1822-1	18,000 to 22,000 mc	S1822-1
G2225-1	22,000 to 25,000 mc	S2225-1
G2427-1	24,700 to 27,500 mc	S2427-1
G2730-1	27,270 to 30,000 mc	S2730-1
G3033-1	29,700 to 33,520 mc	S2933-1
G3336-1	33,520 to 36,250 mc	S3336-1
G3540-1	35,100 to 39,700 mc	S3540-1
	39,600 to 46,000 mc	S4046-1
	45,900 to 50,000 mc	S4650-1

Model SG-1218 Signal Generator and Model SS-1218 Signal Source. Available with a frequency range of 12,400 to 17,500 mc.

ROUNDING OUT ITS COMPLETE LINE OF MICROWAVE INSTRUMENTS, POLARAD ALSO OFFERS:

Model PJ-1 — Pulse Jitter Tester: displays jitter magnitude and jitter waveform.

Model SV-1 — Servo-Analyzer: frequency range:—.001 to 100 cps in 5 ranges.

Model MP-1A—Coded Multi-Pulse Generator: provides up to five independently adjustable pulse channels for generation of precise coded multi-pulse trains. Each pulse can be independently pulse-time modulated by means of an external signal.

Model N-1 — Precision Noise Generator: 1,000 cps to 500 mc — 1 to 20 db.

Model P-3—Transistorized Microwave Power Meter: 10 to 40,000 mc; measures absolute r-f power instantly.

All-Ceramic Reflex Klystron Tubes

Polarad Tube Type	Frequency Range
ZV 1012	500 to 3,000 mc
ZV 1010	700 to 3,000 mc
ZV 1010X	950 to 2,800 mc
ZV 1021X	1,000 to 4,000 mc
ZV 1009	1,500 to 6,000 mc
ZV 1009X	1,700 to 5,000 mc
ZV 1011	4,000 to 11,000 mc

Model K-200—Microwave Tube Tester: tests both internal cavity and external cavity klystron tubes, pencil triodes, rocket tubes and lighthouse tubes.

Model 150
Generator for K-Band

- Models available from L-Band to millimeter waves.
- Frequencies variable over wide ranges.
- Some models with octave bandwidth.
- New Model 400 covers X-Band from 8.2 to 12.4 Kmc.
- All models have extreme stability achieved by patented AFC discriminator and high-gain dc amplifier feedback.

BRC Precision Test Equipment is engineered and manufactured to the highest standards of the industry—standards that have made the BRC trademark a recognized symbol of precision and dependability throughout the world. Highly qualified representatives—specialists in electronic test equipment—stand ready to solve customer problems in every major foreign and domestic area. Write today for the illustrated BRC catalog.

Precision Electronic Instruments since 1934

Boonton Radio Corporation

World Radio History

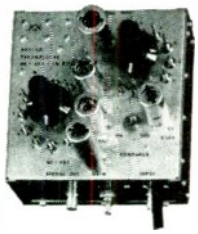
Improved High Power Pulsed Oscillator, PG-650-C

PG-650-C model has been further improved to include a ½ μsec pulse with 3 cycles rise and fall, and change of mode of operation for C.W. and as a gated amplifier. This high powered pulsed oscillator has become standard equipment in leading laboratories in the United States and Europe for research in ultrasonics, nuclear magnetic resonance and transient analysis.

R.F. Output voltage (min) into 93 ohms .....0-300 p. to p. 0-600 Special order
Pulse length—continuous .....1½—13 μsec
Rise and Fall times (max.) .....0.3 μsec
Pulse droop 5%
Noise output .....Therma. noise from termination
Harmonic output (mostly third) 10%
R. F. Leakage .....Negligible

SPECIAL FEATURES
Pulse lengths available from ½ to 50 μsec.
Internal delay ranges from calibrated Helipot: 120, 1100, 11000 μsec.
Gate Output available for intensifying and blanking purposes.
External modulation of r.f. oscillator using varying pulse length and p.r.f.'s for Carr-Purcell method.
Double Pulse output
Fine controls on P.R.F. pulse length and Delay Time.
Special coils will extend coverage from 12KC to 200 MC.

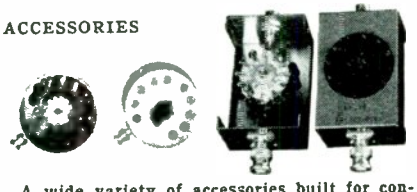
PREAMPLIFIER, PA-620



This Preamplifier is a general purpose device for matching ultrasonic transducers with capacities as high as 100 pfd between 5 and 65 MC, and to provide a limited amount of gain with a good signal to noise ratio. Two of the three stages have variable bandwidth as well as center frequencies. An additional feature is a comparer stage with separate gain control low impedance input for attenuation measurements.

SPECIFICATIONS
Input impedances .....93 to 3200 ohms
Bandwidths .....0.5—17 MC
Low noise cascode input with 6922 tube
Three other tubes—6AK5
Gain .....35—50 db

ACCESSORIES



A wide variety of accessories built for convenience and accuracy are available—resistors, capacitors and resistances.
Single units or decade boxes are conveniently designed in series and parallel combinations.

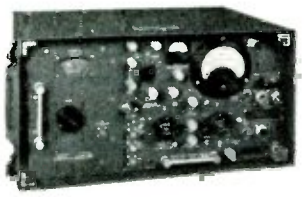
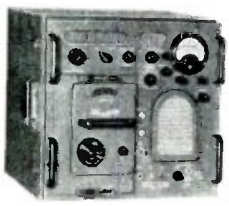
World Radio History

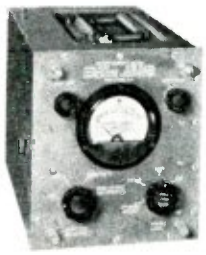
When Reliability is a must...
specify EMPIRE



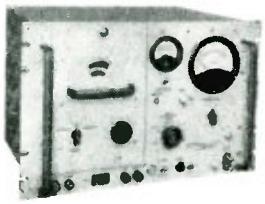
NOISE AND FIELD INTENSITY METER
Model NF-105 • 14 KC to 1000 MC
Use of five quick-change tuning heads avoids costly repetition of components common to all frequency ranges. Built-in impulse generator serves as calibrator. Carrier and peak reading VTVM. Fully regulated power supply.



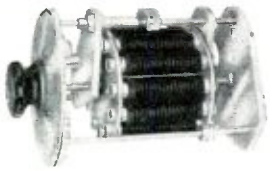
NOISE AND FIELD INTENSITY METER
Model NF-112 • 1 KMC to 10 KMC
Companion unit to NF-105. Four interchangeable tuning heads. Excellent shielding effectiveness. Calibration by means of built-in impulse generator. Compact. Simple to operate.



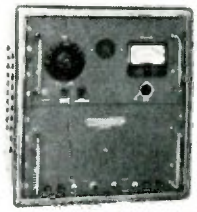
BROADBAND POWER DENSITY METER
Model NF-157
200 MC to 10 KMC
Personnel safety indicator. Average power from 0.1 mw/cm² to 2 w/cm². Complete with 3 pick-up probes. Portable. Self-contained.



AM MODULATION METER
Model MM-120 • 15 KC to 1000 MC
Indicates modulation percentage of signal generators and transmitters. RF sensitivity 0.01 volts. Two plug-in tuning units.

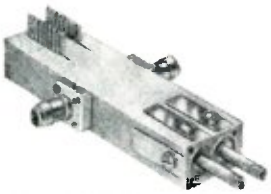


BROADBAND COAXIAL ATTENUATORS
DC to 4 KMC
Pads, 6 and 12 position step attenuators (manually and motor operated), attenuator panels. Many models, of 1 through 50 watts power dissipation. Large range of values. Low VSWR. Long term stability. Conservative power ratings.

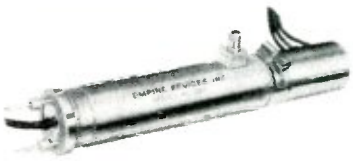


VARIABLE FREQUENCY POWER SUPPLIES
Models VP-410, VP-1000
400 VA, 1000 VA
Low distortion. Excellent regulation. Quick recovery. Wide frequency range.

BROADBAND CRYSTAL MIXER
Model CM-107 • 225 MC to 5600 MC
Eight fixed tuned models. Low noise figure. Laboratory or production applications. Versatile.

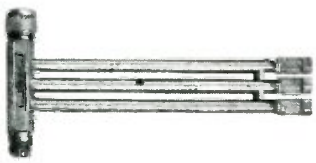


MICROWAVE PRESELECTORS
Model CF-190
Tunable selection of desired signals from 850 to 11,000 MC by means of 4 models. Rejection of undesired signals from signal generators and other sources makes for accurate measurements and prevents receiver overload.



WIDE RANGE KLYSTRON OSCILLATORS
Model KL-280
Three models produce RF power from 1000 to 6000 MC with a minimum of unwanted radiation and spurious responses. Low noise and long service life are insured by non-contacting plungers. Available for CW and pulsed operation.

BROADBAND HYBRID JUNCTIONS
Model HJ-321
The entire range from 1000 to 8000 MC is covered by only 3 units. All four terminals are brought out for maximum flexibility. Excellent isolation between diagonally opposite terminals.



BROADBAND COAXIAL STUB TUNERS
200 MC to 10 KMC
Single, double and triple stub tuners of rugged construction. Locking nuts insure stable operation.

COAXIAL TERMINATION
Model TE-80 • DC to 10 KMC
Low VSWR throughout. Type "N" connector. Many special versions available.

JERROLD®
SWEEP GENERATORS
NEW!

Model 900B

Very narrow to very wide sweep widths in one sweep SIGNAL generator

$1880.00

Unusual stability in sweep widths from 10 kc to 400 mc. Frequency range 500 kc to 1200 mc. Built-in crystal-controlled harmonic markers, direct coupled scope pre-amplifier, and attenuators. The ultimate instrument for your IF-VHF-UHF requirements.

Model 900A

Wide-band sweep generator

$1260.00

Center frequency: VHF, 0.5 to 400 mc; UHF, 275 to 1000 mc. Sweep widths from 100 kc up to 400 mc. Flatness: ±0.5 db over widest sweep.

Model 707

Ultra-flat sweep generator

$795.00

Featuring ±5/100 db flatness; plug-in oscillator heads*; variable sweep rates from 1/min. to 60/sec.; all electronic sweep fundamental frequencies; sweep width min. of 1% to 120% of C.F.

*Heads available within the spectrum 2 to 265 mc. Narrow-band heads on request.

approved by U.S.N. U.S.A.F. U.S.A.(SIG. C.)

Stoddart RFI instrumentation is an approved standard of the services. It is designed to comply with the DOD's RFI Compatibility Program and Spectrum Signature Plan MIL-STD-449. This equipment is approved for interference measurements required by the following Military Specification series:

MIL-I-6181
MIL-I-11748 (Sig. C.)
MIL-I-16910 (Ships)
MIL-I-26600 (U.S.A.F.)

Stoddart instrumentation is also approved for measurements in accordance with other Military Specifications, S.A.E. and F.C.C. requirements and can be supplied with C.I.S.P.R. recommended time constants.

Equipments are portable, dripproof, dustproof and ruggedized for all-weather field use . . . precise and dependable for sensitive and selective laboratory measurements.

Precision measurements are assured by calibration methods using equipment with accuracies traceable to the National Bureau of Standards.

World Radio History

There are

3 SPECIFIC WAYS

in which "Proceedings of the IRE" serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the IRE" publishes basic research and engineering application articles, it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the IRE" carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of-product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it!

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the IRE," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the IRE" is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

UNIQUE PORTABLE, PLUG-IN SWEEP GENERATOR

the NEW MICRO-SWEEPER

Here's a small, lightweight sweep generator that attaches directly to your oscilloscope panel. No cables or batteries. Just plug in and operate. MICRO-SWEEPER sweeps speeds up to 2 microseconds/centimeter on your scope. Use it for IF alignment; wideband amplifier testing; filter studies; tv test work; field testing where portability is a must; classroom demonstrations.

And check these performance advantages!

- **Choose from 3 models:**
  Model 200 — .15 to 2mc
  Model 201 — 2.0 to 15mc
  Model 202 — 15.0 to 115mc
- **Output voltage:** 0.25 Volts rms into 600 ohms for Model 200.
  0.1 Volts rms into 50 ohms for Models 201 and 202.
- **Flatness:** ±0.5 db or better on all bands (±0.25 db on Model 200)
- **Over-all flatness, band-to-band:** ±1 db or less (±0.5 db on Model 200)
- **Easy maintenance, fully transistorized**

. . . **Now** — check the prices!

Model 200 $160.00 201 $160.00 202 $160.

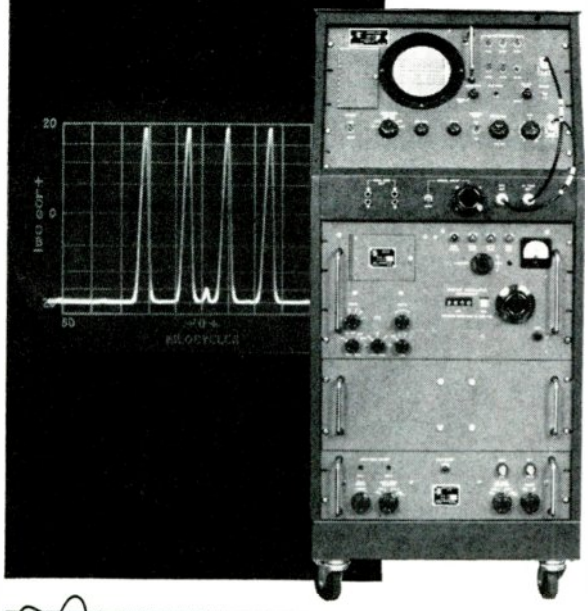
PTE-3
AN/GRM-33A

SINGLE SIDEBAND ANALYZER



The TMC Model PTE-3 (AN/GRM-33A) is a multi-purpose test instrument used at communication facilities, in laboratories, and in electronic production facilities for visual analysis of RF signals within the frequency range of 1.5 to 64.5 megacycles. The PTE-3 may be used for tuning and aligning transmitters, sideband exciters, RF filters, and for band occupancy studies. Detailed analysis of any portion of the selected spectrum for intermodulation distortion, harmonic distortion, sideband suppression, carrier suppression, spurious signals, hum, noise, and adjacent channel interference is made possible by a manual sweep control.

The PTE-3 contains a variable frequency oscillator with long term stability, a two tone RF generator for unit test and calibration, and a two tone audio generator for distortion analysis.

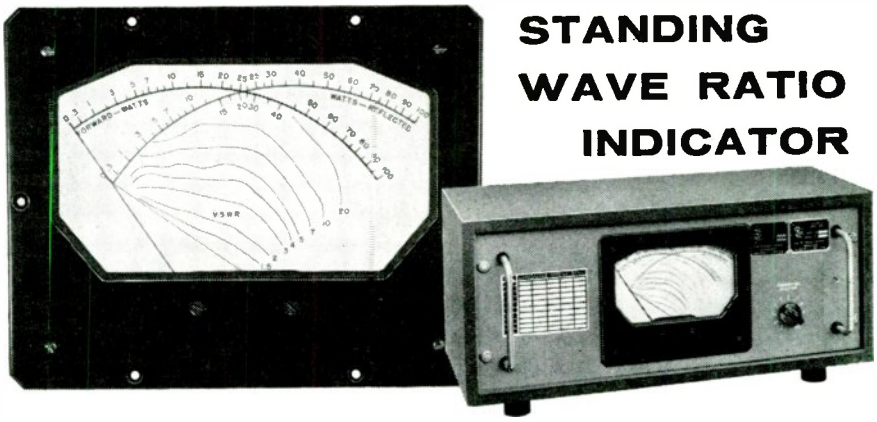
SWR-3000



STANDING WAVE RATIO INDICATOR

The TMC Model SWR-3000 is a multi-purpose instrument which will instantaneously provide visual indications of Forward Power, Reflected Power, and Voltage Standing Wave Ratio.

The SWR-3000 may be used in any 50 or 70 ohm unbalanced transmission system covering 2-30 MCS, with average powers up to 3000 watts.

The SWR-3000 is used as an operational and maintenance tool at transmitter stations, in electronic plants for production testing of transmitters, and laboratories for RF transmission system measurements.

For additional information about the SWR-3000 and other test equipment, please contact TMC Test Equipment Division, Mamaroneck, New York.

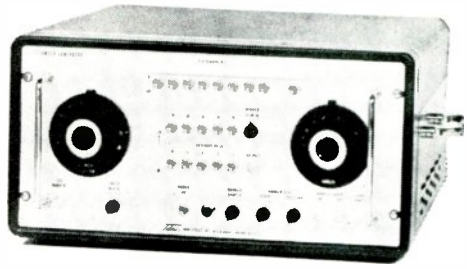
Telonic INDUSTRIES INC.

SWEEP GENERATORS

- *Fast, accurate frequency response testing*
- *Ranges from 20 cps to 2500 mc*
- *Built in attenuation and frequency markers*



A Telonic Sweep Generator provides your laboratory or production line the quickest, most accurate means available for measuring frequency response of RF circuits.

Scanning the entire frequency range in one 60th of a second, a Telonic Sweep Generator completely eliminates time-consuming point-to-point response tests. Available in many models covering various portions of the RF range, they may be used to check response of filters, mixers, amplifiers and many other RF circuits.

Quantitative measurements are provided by integral, precision attenuators. Marker systems, both fixed and variable, are also available on many models.

Write for catalog 8-C.

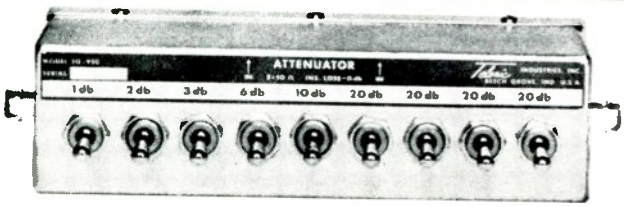
SERIES	RANGES	PRICES
HD	10 kc — 910 mc	$695.00 — 995.00
LD	3.5 — 140 mc	695.00
LR	3.4 — 140 mc	995.00
PLR	Plug-in oscillators for LR models	
SD	200 — 1260 mc	745.00
ED	975 — 2450 mc	1,495.00
PD	4.2 — 1010 mc	2,750.00
SV	VHF Channels	725.00 — 775.00

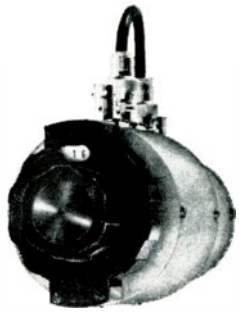
GENERAL SPECIFICATIONS

Flatness..... 5%
Zero Base Line..... Oscillator off during return sweep
Sweep Rate..... Line frequency (50-60 cps)
Horizontal Sweep..... 20 volts
Vernier Attenuation..... 0-10 db.
Physical Description. Panel—⅛" x 8¾" x 19"
Chassis—2" x 14½" x 17"
Power..... 115 v. 50/60 cycle, approx. 120 watts
Display Linearity..... Better than 1.2:1
Radiation..... Less than 10 microvolts
Source VSWR..... Below 1.3:1
Markers..... Birdy-By-Pass Marker System
Variable Markers..... Available on LD, LR, SD & ED Models

Telonic INDUSTRIES INC.

R F ATTENUATORS





Turret and Toggle Switch Types

Telonic RF Attenuators are precision-built units designed to operate with long-term accuracy and low insertion loss.

Toggle switch models are available with 6 or 9 steps of attenuation in 1 db increments from 0 to 42 or 0 to 102 db. Switches are silver-plated wiping contact types for continuous operation. Special versions can also be furnished to meet most operating requirements.

Telonic Turret Attenuators use self-cleaning knife type contacts to maintain reliable service. These attenuators are available as single units with steps of 1, 2, 5, or 10 db, tandem units to operate 2 circuits simultaneously, or the TAB (shown) providing 0 to 59 db attenuation in 1 db steps through a dual, concentric knob and dial.

TYPES	ATTENUATION (max.)	PRICE RANGE
Turrets	to 59 db	$65.00 — 225.00
Tandem Turrets	to 50 db	160.00 — 200.00
Multiple Turrets	to 110 db	325.00
Toggles	to 20 db	65.00 — 85.00

Telonic ENGINEERING CORPORATION

R F FILTERS

Telonic TBP Filter

Miniature Band Pass and Low Pass

Telonic TLP-4 Low-Pass Filters are exceptionally rugged devices available with any cut-off frequency from 200 to 2000 mc in 5 mc increments. Inherent simplicity makes them ideal where low-cost dependable performance is required.

TBP Band-Pass Filters cover the frequency range from 200 mc to 2000 mc and may be set at any value between 2.5 and 25%. They are available in 2 or 4 sections depending on band pass and rejection requirements. Miniature construction makes them especially well suited for missile and aircraft applications.

TTF Tunable Band Pass Filters consist of 5 resonant line sections capacity loaded to tune over a 2:1 range. Insertion loss is less than 1.5 db. Standard units are available covering frequencies from 250 to 2500 mc.

TCF Cavity Band Pass Filters consist of machined aluminum cavities, capacity loaded, and are adjustable over a ± 25% range. Center frequencies are available from 200 to 2500 mc and are set to factory standards or to customer requirements.

320 True RMS	5 cps-500 kc	100 μV-320 V	10 MΩ shunted by 8 to 18 pF	3% 15 cps-150 kc; 5% elsewhere	$445
350 True RMS	50 cps-20 kc	0.1 V-1199.9 V	2 MΩ shunted by 15 to 45 pF	¼% 0.1 V-300 V, 100 cps-10 kc; ½% outside these limits	$720

ELECTRONIC TEST EQUIPMENT

DECADE AMPLIFIER
Model 220C
Battery-operated amplifier, 10x or 100x; 10 cps-150 kc; 5 MΩ input; 2% accuracy. $115

CALIBRATOR, Precision dc and ac
Model 420
Provides precise output, rms, peak-to-peak, or dc, from 0-10 V; accuracy ¼% with cal. chart. $365

CAPACITANCE METER, Direct-reading
Model 520
Direct-reading of capacitance 0.01 pF to 12 μF; accuracy 2% above 0.1 pF. $335

INVERTER, Sensitive dc to ac
Model 700
Inverts dc as low as 10 μV and up to 100 V, to ac to be measured on any of VTVM's listed. $365

CONVERTER, Linear ac to dc
Model 710
Converts ac to dc linearly over each decade, 1 mV-1000 V; 30 cps-250 kc; accuracy ¼% 50 cps-10 kc, ½% 30 cps-50 kc, 1% above 50 kc. $450

LABORATORY STANDARDS

A-T VOLTMETER
Model 390
10 Mc to 1000 Mc; as laboratory standard for high voltage. NBS calibration not included in price. $2,250

H-F TRANSFER VOLTMETER
Model 393
25 cps to 30 Mc; a transfer device for accurate measurement of voltages or calibration of voltmeters; each probe covers 2 to 1 voltage range, 1 V to 50 V. $550 inc. one probe ($100 for each add. probe)

MICROPOTENTIOMETER
Model 440
0 to 900 Mc; as laboratory standard for 40 μV to 0.33 V. NBS calibration not included in price. Price includes one resistor-thermocouple combination. $250

World Radio History

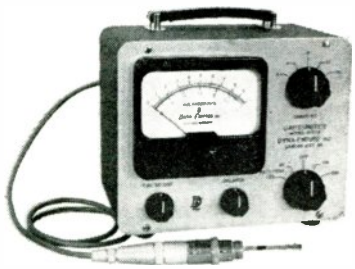
Select the transistorized **DYNA-EMPIRE** GAUSSMETER best suited to your needs

Completely transistorized Dyna-Empire gaussmeters accurately measure flux density and determine "flow" direction. Ideal for measuring and locating stray fields, plotting variations in strength and performing rapid comparisons of production lots against a standard. Easy-to-operate,—no jerk, pull, ballistic readings or circuit breaking required.



NEW TRANSISTORIZED GAUSSMETER MODEL D-874

Special Features:

FIVE RANGES: 300 gauss full scale, 1,000 gauss full scale, 3,000 gauss full scale, 10,000 gauss full scale, 30,000 gauss full scale.
LINEAR OVER ENTIRE OPERATING RANGE
PORTABLE, OPERATES FROM OWN SELF-CONTAINED BATTERIES
BATTERY LIFE—1,000 HOURS
REQUIRES NO EXTERNAL POWER SOURCE
INTERNAL CALIBRATION STANDARD
WEIGHT—4 LBS.
UNIVERSAL PROBE SUPPLIED IS 0.025" THICK BY 0.200" WIDE. ACTIVE AREA IS ONLY 0.0079 SQUARE INCHES LOCATED NEAR THE TIP OF THE PROBE.

Complete with Universal probe $195.

TRANSISTORIZED GAUSSMETER MODEL D-855

This quality precision built Gaussmeter reads flux densities to 30,000 Gauss full scale ±2.5%. It is a highly sensitive instrument and provides tremendous flexibility. Complete with two linear probes—one high sensitivity probe for measurement of low density fields and one probe for measurement of high density fields. Special probe available for reading 3 gauss full scale.

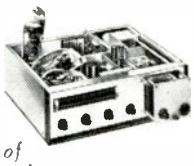
CIMRON
Digital Instrumentation



Model 6000 Digital Voltmeter. Basic unit, offering great accuracy and ease of operation in applications where printout is not required. Manual ranging and polarity.

A complete line of digital voltmeters and volt-ratio meters all of which may be extended in range or function by means of plug-in accessories — an exclusive Cimron development. AC-DC Converters, DC Preamplifiers, Input/Output accessories.

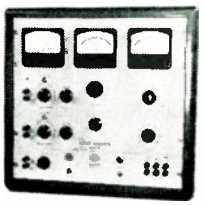
METROLOG DIVISION
DATALOG CORPORATION
Advanced Design Servo-Analyzers

Direct-Reading Model 204A Servo Analyzer with Recording Capability



Simultaneous readout of frequency, amplitude ratio, and phase angle. Automatic plotting of Bode-Nyquist and Nichols diagrams. For use in laboratory design and testing, production, quality control and inspection, and field service trouble shooting.

FOR PROMPT, INFORMED SERVICE ..... CALL

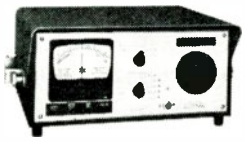
A Modern Approach to Electronic Instrumentation



Model 951 Transistorized precision differential (potentiometric) microvoltmeter. Accuracy, 0.01%

An example of advanced engineering applied to general-purpose instrumentation: combining 100% solid state circuitry and the ultimate in component selection, Model 951 measures DC potentials from 1 μV to 1000 V with extreme accuracy and reliability. Ask about other S-F advanced designs in Precision Measuring Equipment, Cable Fault Finders, Precision HV Sources and VTVM's.

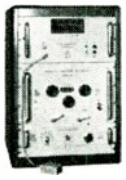
HI LAB Holt INSTRUMENT LABORATORIES
Laboratory-Standard AC Instrumentation

Model TT-1 Thermal Transfer Voltmeter NBS Certifiable 0.5 - 1200 v: .02% - 50 kc .004%/mm null sensitivity



New AC-DC transfer standard makes transfer measurements to a calibrated DC supply of the same voltage as the unknown AC being measured; eliminates ratio errors in high frequency multiplier resistors.

Regulators, Amplifiers, Oscillators, Reference Standards, Calibration and measuring devices for the entire audio spectrum.

PRECISION LABORATORY INSTRUMENTS!

MODELS MV27D-L, MV-127A-L, MV111A-L and MV-07B are equipped with insulated high and low input.

ULTRA-SENSITIVE RF VOLTMETER

1mV-3V F.Sc., 50KC-200MC, 5% accy.; 30 KC-700MC, 10%. DC output 1.5V @ 1mA.

MODEL MV-28A . . . $495
MODEL MV-38A . . . $395
(Same as 28A except 3mV-3V)

ULTRA-SENSITIVE DC VOLT-AMMETER

10uV-1KV mid. sc., 10uuA-1mA mid. sc.; inp. imp. 1-60 meg. DC output 1.25V @ 1mA. Basic accy. V-2%, A-3%.

MODEL MV-07B . . . $495

ULTRA-SENSITIVE AC VOLTMETER

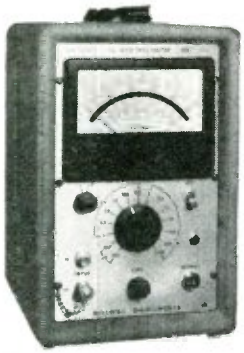
10uV-1KV F.Sc. Inp. Imp. 10K to 3.3 meg., Freq. Resp. 10cps-150KC. Basic accy 2%. AC output 40db.

MODEL MV-45A . . . $350

GENERAL PURPOSE DC VOLTMETER

250uV mid. sc. 1000V F.Sc., 6 to 60 meg., Inp. Imp., DC output 2.5V @ 1mA. 2% Basic accy.

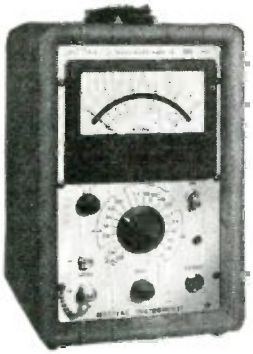
MODEL MV-27D-L . . $335



LABORATORY TYPE DC VOLTMETER

100uV-1000V F.Sc., 1 to 60 meg. Inp. Imp., DC output 2.5V @ 1mA. 1% Basic accy.

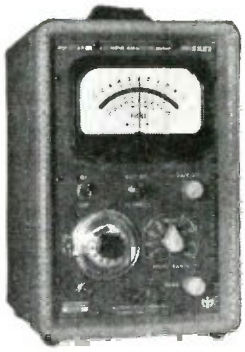
MODEL MV-127A-L . $395



LABORATORY TYPE DC AMMETER

100uuA-250mA F.Sc., 1 meg to .004 ohm Input Shunt. DC output 2.5V @ 1mA. 1% Basic accy.

MODEL MV-111A-L . $420



ELECTRONIC WHEATSTONE BRIDGE

Measures 1 ohm to 1000 megs in 9 ranges. Max applied power to Rx 50 mw. Basic accy. .05%.

MODEL MV-276A . . $795

(For rackmount change MV to RM, or in case of VS model add R after type number, and add $25)

"Hushed Transistor" AMPLIFIER

2 uV Noise Shorted input, 10 KC Band Pass
10-80db gain, 10K or 100K Inp. Imp., 2 cps-180KC, HI & LO Pass filter.

MODEL VS-64A $395
MODEL VS-68A $495
(Same as 64A except 10 meg. tube input)

DC MODULATORS

High qual. low noise chopper. Less than 2 uV drift. Dwell time —55%. Other dwell times avail. Guar. life 1 yr. 50-60 cps. Plug-in.

MODEL DCM-99K-1 . . $45

LINEAR SCALE OHMMETER

Direct reading, measures 1 ohm to 2.5 megs. F.Sc., 10mV drop across RX. Basic accy. 1%.

MODEL MV-279B . . $465

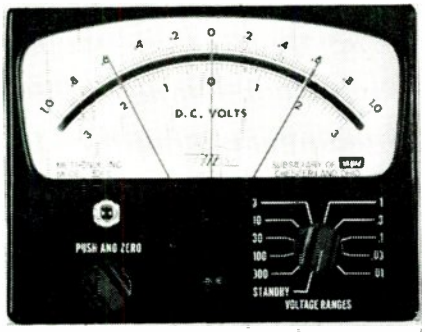
10 Megohms



PLUS Control

An electronic voltmeter with a meter-relay

This happy combination makes an extremely versatile and acute instrument.

It has critical measuring ability that goes with high input impedance, in space-saving panel-mounting style.

It also has the reliable, simple control of a locking contact meter-relay, with adjustable set points.

Many difficult functions can be easily controlled: conductivity cells, life testing of components or systems, production testing and sorting, automatic Go-No Go of missile circuits.

Ready When Needed

Metronix DC instruments such as Model 301-C-CMR (illustrated) have input resistances up to 10 megohms. AC input impedances go as high as 5 megohms. Like all Metronix panel-mounting electronic voltmeters (PMEV's), they are always connected—immediately available for continuous monitoring of critical parameters.

Send for data sheets describing Metronix PMEV's in single or multiple ranges, DC or AC, with either meter-relays or conventional indicating meters.

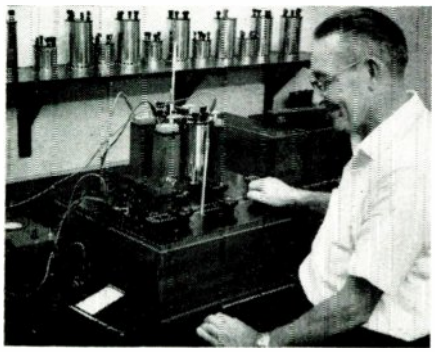
COMMERCIAL

ELECTRICAL



STANDARDS

LABORATORY

Physics Research Laboratories, Inc. offers, on a commercial basis, the facilities of a primary standards laboratory for the calibration of basic electric standards. For the first time, the testing and certification of precision electrical instruments, and such standards as resistors, cells and condensers are available from a commercial laboratory. All standards and instruments used at PRL in tests are directly traceable to the National Bureau of Standards. Complete detailed information relative to PRL's testing laboratory services is available on request to Dept. SA-1. Also request catalogs describing PRL's complete line of fine electrical instruments.

Digital Magnetic Test Equipment

Precision Voltage-Current Calibrator, Model 1082
Range: 0.01 - 10 V
Accuracy ±0.1%

Accurate reference for oscilloscope analysis of high speed waveforms.
Wide input signal bandwidth.
High speed digital and pulse equipment — core testers, memory plane testers, pulse generators and drivers, magnetic memories and sequential buffers, logic circuit plug-ins (LOGIX BLOCKS).
One of the largest and most sophisticated lines in the field.

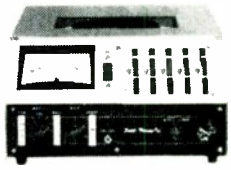
A Modern Approach to Electronic Instrumentation



Model 851 Solid State Potentiometric Voltmeter. .05% Accuracy

Another example of the S-F "max-min" concept in instrumentation. Widest range (1mv - 1kv), rugged design, greater stability, recorder output, reference voltage source, polarity reversal for negative voltages, in-line read-out plus many other features, for less money.

Ask about other S-F advanced designs in, Precision Low Level Measuring Instruments, General Purpose Test Equipment, VTVM's, Cable Fault Finders, High Voltage Power Supplies, and Nuclear Equipment.

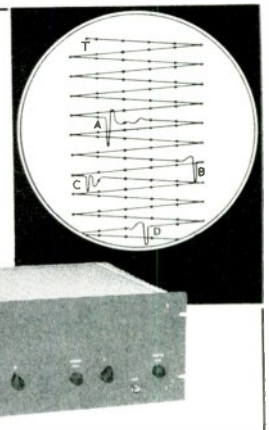
TIMING GENERATOR...

For Precision Timing One-Shot Events

Radionics Model TWM-2A Timing Generator provides waveforms for a zig-zag sweep with triangular waves and Z-axis marker dots—for high accuracy timing of one-shot, multiple-signal events. Extensively used in R & D on shock tubes, explosives, hypersonics, gas dynamics, and other fast events.



OTHER RADIONICS PRODUCTS:

- Focussed-ultrasound generators for biomedical research
- Ultrasonic analyzers
- Wide-range regulated power supplies, 0-2000 volts
- Instrument velocity servo amplifiers

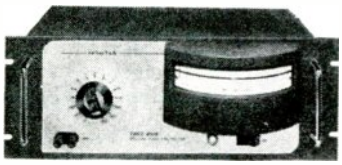
trio/lab

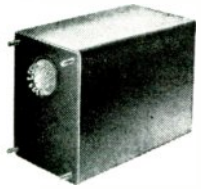
UNIQUE, VERSATILE INSTRUMENTS

0.25% ACCURACY RACK MOUNTING TRUE RMS VTVM MODEL 120-7



Exclusive from trio/lab: laboratory precision measurement of complex waves with VTVM versatility. Overcomes problems of distortion caused by harmonics and spikes (inherent in peak responding and average reading meters) through the use of special dynamometer movement which achieves direct-reading, true RMS values of both sine and complex waves with deflection directly proportional to the square of the current. **Range:** 15 ranges: from .01 to 500 RMS Volts full scale. **Sensitivity:** Needle deflection directly proportional to true RMS value of input signal. **Input Impedance:** 1 Megohm. **Frequency Response:** 50-2000 cps (usable to 4kc). **Accuracy** (above 50% electrical deflection): 0.25% of full scale at 400 cps; 0.50% all other frequencies. **Power:** 115 Volts, 50-400 cps. **Tube Complement:** 3-5751; 1-5687; 1-6V6; 1-5R4; 1-6AS7. **Dimensions:** 19" wide x 7" high. **Weight:** 26 lbs. **Price:** $985. Portable version—Model 120-1.

ALL TRANSISTOR DC VOLTAGE COMPARATOR MODELS 204-1 and 204-2



A ruggedized, sealed monitoring control device which compares an unknown voltage to a known input reference level, and operates a double pole, double throw relay when the reference level exceeds the known voltage by 1 millivolt or more. Response is less than 25 milliseconds in the 204-1, 100 milliseconds in the 204-2. Operation is unaffected by temperatures between −55°C and +55°C. It can be used for either high or low limit comparison by reversing the input leads. The most reliable technique for automatic, programmed accurate measurement with computer-speed. Applications include: military ground support devices, airborne instrumentation, production test equipment, alarm/control systems, and many data gathering and processing systems. Using printed circuitry and miniature components throughout, this compact (2-3/8" x 3-3/16" x 4-3/8") instrument meets applicable portions of MIL specs. **Power Requirements:** 204-1—115V, 400 cps ± 20 cps; 204-2—115V, 60 cps ± 2 cps. Both—1.5 watts with relay pull-in; 1.25 watts with relay dropout. **Input Impedance:** Both—1 megohm min. **Speed of Response:** 204-1—25 milliseconds (max); 204-2—100 milliseconds (max). **Temperature Range:** Both—operating: −55° to +55°C (with 20-minute operation at 71°C); **Storage:** −62° to +85°C. **Finish:** Both—semi-gloss black. **Weight:** 1 lb., 10 oz. **Terminal Connections:** Both—15-pin solder. Latch and inhibit facilities built-into both instruments. **Price:** $285 each.

PORTABLE AC VTVM MODEL 109-2

A superb laboratory instrument with signal circuits isolated from case and power circuits to provide floating measurements previously impractical, and accurate voltage measurements to 5 cps. **Ranges:** 12 ranges calibrated to RMS value of a sine wave: 0.001 to 300 VAC full scale. **Sensitivity:** (Lowest Range): 1 MV. **Input Impedance:** 10 Megohms shunted by 37 mmf from 0.001 to 0.3 volts; 23 mmf from 1 to 300 volts. **Accuracy:** 2% of full scale. Can measure accurately to 20 microvolts. **Power:** 105-125 VAC, 50-420 cps. **Tube Complement:** 4-7025, 1-6X5, 1-0A2. **Dimensions.** 6¼" high x 10¾" wide x 12" deep. **Weight:** 13 lbs. **Price:** $220.

1% ACCURACY PANEL MOUNTING PRECISION AC VTVM MODEL 130-1

Designed to provide all advantages of electronic measurement of AC voltages without exceeding the area required for its indicating meter. Circuit utilizes generous amounts of feedback to assure constant meter indication over a wide range of tube characteristics and operating voltages, while the possibility of oscillation is eliminated by carefully designed amplitude-phase characteristics. **Standard Ranges:** 10, 30, 100, 300 millivolts; 1, 3, 10, 100, 300 Volts. **Accuracy:** ± 1% of full scale. **Input Impedance:** 1 Megohm (0.5 megohms for ranges 51-99 millivolts). **Frequency Range:** 50-30,000 cps @ ± 1%. **Power Requirements:** 6.3V (AC or DC) at 0.5 amp, 200-250 VDC at 4.0 ma (max). **Weight:** 1 Pound. **Connections:** 5 Solder terminals: Input, Gnd, B+, 6.3V, 6.3V. **Tube Complement:** 1-6AB4; 1-5751. **Color:** Black bakelite meter, black wrinkle dust cover.

RUGGEDIZED PANEL-MOUNTING SINGLE RANGE AC & DC TRANSISTOR VOLTMETERS

The AC instruments have standard ranges of 10, 30, 100, 300 MV; 1, 3, 10, 30, 100, 300 V. Power requirements are 115 V at 50-2000 cps. All are ruggedized per Mil-M-10304, and have accuracy of 2% of full range; input impedance 1 megohm (min). **MODEL 301-1,** AC, zero left, TRVM has a frequency response of 20 cps to 500 kc (contact factory for other ranges); weight is 1 lb., 2 oz. Size is 3½" round and connections are 5 double turret solder terminals. **Price: $250. MODEL 302-1,** AC, phase-sensitive, zero center, TRVM has a response of 380-2000 cps (signal & reference frequency must be the same). Weight is 1 lb., 12 oz. **Size** is 3½" round and connections are 7 double turret solder terminals. **PRICE: $275. MODEL 303-1,** AC, zero left, TRVM has a frequency response of 20 cps to 500 kc (for 10 MV range. Contact factory for other ranges); weight is 1 lb. Size is 2½" round and connections are 5 double turret solder terminals. **Price: $275. MODEL 304-1,** AC phase-sensitive, zero center, TRVM has a frequency response of 380-2000 cps (signal & reference frequency must be the same). Weight is 1 lb., 10 oz. Size is 2½" round and connections are 7 double turret solder terminals. **Price: $300. MODEL 305-1** (Zero Center) and **MODEL 305-2** (Zero Left) DC TRVM's have standard ranges of 1, 3, 10, 30, 100, 300 volts DC. The range of Model 305-1 also includes a 0.5 volts DC reading. Power requirements are 115 V, 400 cps, 2 watts (max). Weight is 1 lb., 5 oz. Size is 3½" round and connections are 5 double turret solder terminals. **Price: $225.**

NEW WIRELESS MEASURING SYSTEMS

FOR . . . PHYSICAL PARAMETERS, HORSEPOWER . . .

MIDAS

MIDAS provides reliable multi-channel data on stress, strain, pressure, physiological response, etc., without the use of slip rings.

Applications include continuous monitoring of helicopter blades, propellers, shafts, turbine physical parameters.

Three channel, FM/FM solid-state transmitter measures only 1¼" x 1¼" x 6". Complete system includes multi-channel receiver and recorder.

THOR

Thor provides a continuous indication and record of shaft horsepower, torque and RPM without the use of slip rings. Prevents shaft overload. Miniature, solid-state transmitter assures maintenance free operation and ease of installation. Less than six inches of space required for transmitter and sensors in typical marine application. System includes receiver-recorder.

NANOSECOND PHOTOGRAPHIC INSTRUMENTATION

Kerr Cell Shutter, Light Pulse Generator, Synchronizer, Catadioptric Light Screen, Shadowgraph and Schlieren Systems, Ballistic Range Instrumentation Systems.

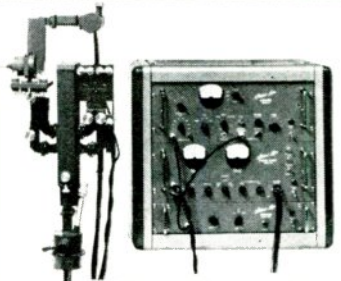
ELECTRON MAGNETIC RESONANCE SPECTROMETERS
by Strand Labs



For applications in
- fundamental physical research
- measurements of magnetic susceptibility
- studies of free radicals
- process control

Microwave Spectrometers for operation at X, Ku, K and Ka Bands, with 200 and 1600 mc soon available.

Voltage Breakdown Tests

Bench HYPOT® Test Sets, a-c and d-c models, have outputs to 30 kv. Separate 4½" meters for test voltage and leakage current. Wide selection of models.
Model 424 Bench HYPOT® provides 0-5000 v d-c. For testing cables, condensers, coils, transformers, motors, and assemblies. Measures leakage current from 0.1 microampere to 100 microamperes over four scale ranges. Rapid testing of capacitors with output of 5 milliamperes under short circuit. Operates from 110-120 v 50/60 c outlet with long-life selenium high voltage supply.
Net complete $497.50

- **Insulation Materials Tester**
  Dielectric strength determined to laboratory precision. Interchangeable test fixtures for varnishes, porcelain, tape, acetate sheet, films, tubing and cloth. Write for Bulletin, Model 4501 HYPOT® Materials Tester.
- **Insulating Oils Tester**
  New portable design, only 42 lbs., for testing insulating oils at point of application as well as in the laboratory. Test potential variable from 0 to 35 kv, with 2 kva rating. Write for bulletin Model 4505 HYPOT® Oil Tester.
- **Measure Resistance to FIVE MILLION MEGOHMS**
  VIBROTEST® megohmmeters provide direct reading measurements to FIVE million megohms and higher with electronic power supply that eliminates tedious cranking. Write for bulletin "VIBROTEST".
- **Test Electrical Grounds**
  VIBROGROUND® measures resistance to ground of electronic, telephone, and power equipment. Direct reading. Operates from self-contained battery. Write for Bulletin "VIBROGROUND"®
- **Special Instruments**
  A. R. I. engineers have developed instrumentation to meet many specialized research, development, and production applications. Your inquiry for special equipment will receive prompt attention.

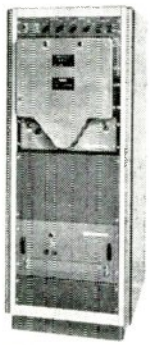
BARNES

TEST INSTRUMENTS for COMPONENTS

AUTOMATIC CAPACITOR TEST SETS



These instruments, with fully automatic null balancing and range switching, offer a speed advantage of 4 to 1 over manual balancing. Even non-technical help can make quick, accurate measurements. Visual, digital readout eliminates balancing and readout of vernier dials by operator and insures correct reading. Standard lab type capacitance bridges are used and the accuracy of the automatic set is the same as the basic bridge. Units are available for use with digital readout systems and adjustable tolerance limits can be provided for classification of components.

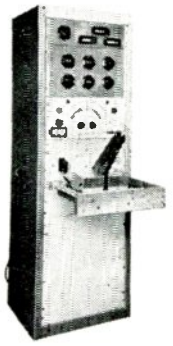
TYPE 15. BASIC BRIDGE: General Radio Type 716C. CAPACITANCE RANGE: 100 μμf to 1.1 μf. DISSIPATION FACTOR RANGE: 0 to 21%. TEST FREQUENCY: 1000 cps. DIRECT OR SUBSTITUTION MEASUREMENT.
TYPE 61. BASIC BRIDGE: General Radio Type 1611B. CAPACITANCE RANGE: 0.1 μf to 11,000 μf. DISSIPATION FACTOR RANGE: 0 to 60%. TEST FREQUENCY: 120 cps.
TYPE 63. BASIC BRIDGE: Boonton Electronics 75A. TEST FREQUENCY: 1 megacycle. CAPACITANCE RANGE: .01 μμf to 1000 μμf.
CONDUCTANCE RANGE: .1 to 1000 μmhos.

DIGITAL DEVIATION BRIDGE

A servo driven "Null Balance" Bridge for comparing resistance of a sample resistor to a standard resistor of the same nominal value. Indicates deviation of sample from standard in percent of nominal value and is used for sorting, inspection, and matching of resistors, potentiometer linearity checking and resistor adjusting. Deviation indication is given by pointer on front of instrument and by an analog digital commutator for printout, recording or digital comparison. Can be used with a relay output system for automatic sorting and binning and will achieve production rates of 3000 pieces per hour or more.

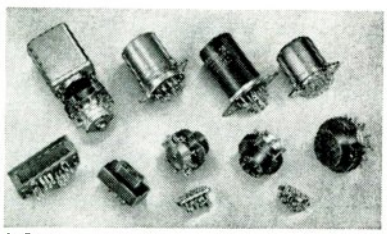
SPECIFICATIONS. RANGE: Standard ± 2% and ± 20%. MEASUREMENT RANGE: 10 ohms to 30 megohms. ACCURACY: ± 0.5% of scale. POWER SUPPLY: Self-contained for D.C. bridge voltage 1—100 V. D.C.

SORTING MECHANISMS



BARNES Sorting and Test Systems are designed to handle, test and sort all types of electronic components, including axial lead, radial lead and disc types. Equipment is available for Resistors, Capacitors and Diodes. Sorting into 2 to 8 categories can be provided. Units can be furnished for semi-automatic and fully automatic operation and also for testing taped components. Speeds to 5000 pieces per hour are achieved depending on the handling method and number of categories. We can supply fully automatic models for sorting resistor blanks into 10 equiproportional categories at rates to 4000 pieces per hour.

TEST SOCKETS



Available in over 200 standard types and configurations for plug-in testing of solder-terminal components and hermetic seal headers. They are made for a wide variety of relays, switches, transformers, circuit modules, crystal-can components, etc. Sockets are available for all types of solder-terminals including solder hook, flattened and pierced, straight pins, turrets, etc.

SPECIAL FEATURES. 1. Long life—200,000 or more insertions. 2. Socket bodies in flexible materials for bench testing, high temperature materials or Teflon FEP for environmental tests. 3. Reliable, low-resistance connections—beryllium copper contacts, nickel and hard gold plated for long wear. Contact resistance less than .005 ohms per contact. 4. will not damage components—floating contacts allow for minor irregularities, headers cannot be inserted improperly. 5. Dual, mutually insulated contacts give separate voltage and current terminals for contact resistance measurements and dry circuit testing. 6. Single contact sockets available for economy. 7. All sockets are easily repairable.

Write, wire or phone for further information, prices and delivery.

DYNAMIC TORQUE TESTER AND DYNAMOMETER

Determines the dynamic characteristics of systems under operating conditions

FEATURES TWO OPERATING CONDITIONS IN ONE UNIT

Torque Meter— measures torque while supplying power at variable speeds.

Dynamometer— measures torque while absorbing power at variable speeds.

A stable, rugged, mechanical instrument, where torque range may be varied by exchange of load cells.

Also: Torque Monitor, a Control instrument.

Falcon DIVISION
General Thermodynamics Corp.
211 Concord Turnpike, Cambridge 40, Mass.

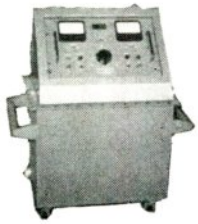
PESCHEL

HIGH VOLTAGE TEST EQUIPMENT



DC OVERPOTENTIAL TESTERS

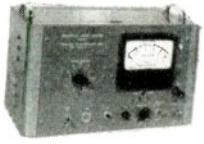
Models cover voltage ranges 0-50, 0-120, 0-150, 0-250, 0-300 KV DC. Curret rating 5 ma.

- Non-destructive quantitative testing
- Small size, light weight
- Rugged design for industrial use
- Selenium rectifiers for long life
- HV terminates in shielded cable
- Control cabinet stacks on top of HV section (may be separated for control)
- Fully instrumented control section

K 15-2

SERIES-K HIGH VOLTAGE AC TEST SETS

- High current capacity to ASTM standards
- Low waveform distortion, below 5%
- Dual-scale voltmeter directly across output
- Continuously adjustable output voltage
- Convenience and safety controls
- Zero-start interlock
- External interlock provision
- Surge protection on meters, relays and transformer primary
- High speed air circuit breaker to protect unit.



SENSITIVE HIPOT TESTERS, SERIES H

Models include H2-B, H5-B, H10, H20, H30. (0-2 to 0-30 KV DC)

- 5 microamp over-current meter relay, continuously adjustable to 5000 microamp deenergizes high-voltage (on DC)
- Non-destructive quantitative testing (on DC)
- Auxiliary AC output voltage available
- HV selenium rectifiers—no tubes
- Completely instrumented, with safety & convenience features

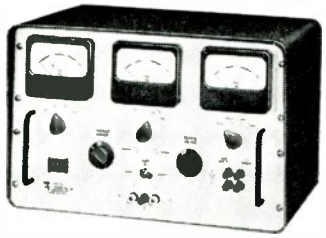
SEMICONDUCTOR TEST EQUIPMENT

To Accurately Evaluate Semiconductor Parameters

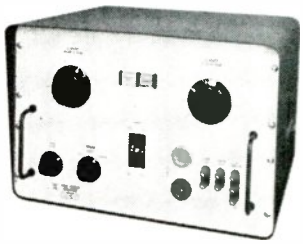
• Incoming Inspection • Production Test • Reliability Systems



20 AMPERE DYNAMIC RECTIFIER ANALYZER

- Forward current 0.5 1 2 5 10 20 amp. D.C. full scale
- Reverse voltage 250/1000V. peak
- Forward voltage drop 0-1, 0-5V.
- Reverse current from 1μa to 50ma. in four ranges
- Self-contained, no external load resistors
- Mirror scale 1% instruments
- Tests under actual operating conditions in accordance with Mil. Specs.

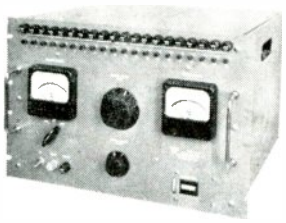
Model 170A **Price $895.00** **Delivery: Stock-2 Weeks**



600 AMPERE SURGE TEST SET

- Provides surge current test for silicon rectifiers in accordance with Mil. S-19500-B
- Continually adjustable to 600 amp. peak
- Self-contained, portable
- Single half wave sinusoidal pulse
- 75, 2500 and 6000 amp. units available
- 1% monitoring accuracy
- Automatic programming available

Model 220 **Price $1200.00** **Delivery: Stock-2 Weeks**

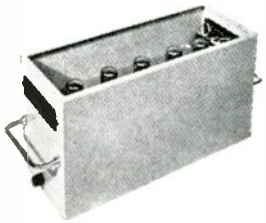


MODULAR DYNAMIC TEST POWER SUPPLY

- Forward current & reverse voltage adjusted independently
- Reduces operating costs by a factor of 50
- Capacity is 20 rectifiers 0.1 to 1 amp. or any combination up to 2 rectifiers, 10 amp. each
- Mirror scale 1% instruments

Model 154D **Price $895.00** **Delivery: 2 Weeks**

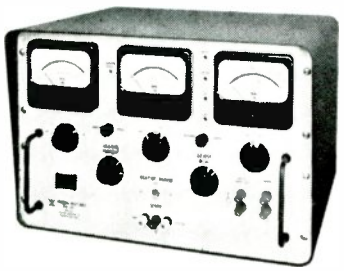
Model 154E — Same as 154D, with provisions for reverse current measurement $995.00



LIFE TEST MODULE

- Self-contained switching module
- Simulator circuit
- Units may be set up in parallel for testing above 10 amp.
- Reduces operating costs by a factor of 50
- Plug-in rack adapters available for 3, 4, and 5 modules
- Forward drop equalizing resistors

Model 180A **Price $250.00** **Delivery: Stock-2 Weeks**



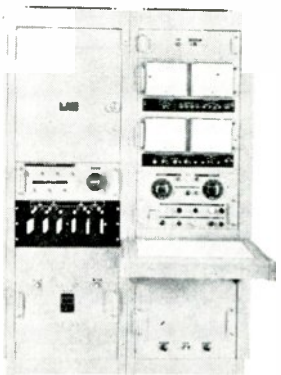
THERMAL RESISTANCE TEST INSTRUMENT

- Measures junction temperature rise
- Accuracy within 5% (under standard conditions)
- Heating current 0-.5/1/5/10 amps
- Centigrade ranges 0-50/150
- 1% instruments
- Measuring pulse 100-500μ sec
- ½ Wave or D.C. heating current

Model 222 **Price $1800.00** **Delivery: Stock-2 Weeks**
Higher power units available

200 AMPERE DYNAMIC TEST SET

- Forward current 20/200 amp. D.C. full scale
- Reverse voltage 0/1500V. peak
- Forward voltage drop 0-5/10V. peak
- Reverse current from 2 μa to 250ma. in four ranges
- Self-contained, no external load resistors
- Mirror scale 1% instruments
- Tests under actual operating conditions in accordance with Mil. Specs.



Model 164 (Basic Unit) **Price $11,525.00** **Delivery 8-10 Weeks**

Complete Reliability Evaluation Systems Available

World Radio History

1962 IRE DIRECTORY

Directory II Components

47 major groups
532 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment

II. Components

III. Materials & Services

Within these three basic directories, 112 major product and service groups are numbered consecutively throughout. Under each of these 112 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the subproducts in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25H
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

World Radio History

RF

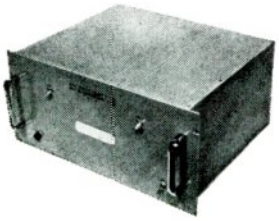
components demonstrating exceptional performance characteristics

broadband amplifiers • low noise amplifiers
tunable amplifiers • bandpass filters
multicouplers • multiplexers • converters
coaxial attenuators • terminations
impedance matching transformers

Broadband RF Amplifiers

40-1500 mcps

Model HFW Amplifiers cover an octave of frequency. Their truly exceptional performance features low noise, high gain with low power drain.



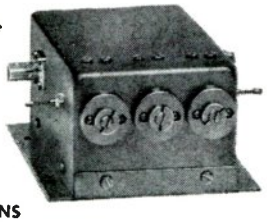
SPECIFICATIONS (condensed)

Freq range	40-1500 mcps
Z in/out	50 or 75 ohms
Noise figure	5-11 db
Gain	10-30 db or greater if desired

Bandpass Filters

30-2000 mcps

Model HFF and HFF-T Bandpass Filters are rugged, reversible in operation, remarkable in performance (which approximates theoretical expectations). Advanced filter designs are also available for antenna couplers and diplexers.



SPECIFICATIONS (condensed)

	HFF	HFF-T
F_o, mcps	30-1000	200-2000
Bandwidth	5-25% F_o	1-15% F_o
Insertion loss	≦1 db	≦1 db
VSWR	≦1.2 in passband	

Attenuators and Terminations

DC-2000 mcps

Impedances of 52.5 and 75 ohms
VSWR 1.2 maximum
Nominal attenuation from 1 to 20 db
BNC, TNC, or N connectors

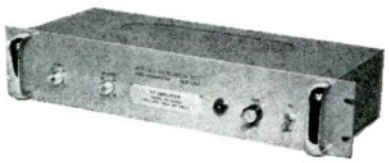
Impedance Transformers

DC to 1000 mcps
VSWR 1.2 maximum
Minimum loss
Matching any pair of 50, 75, 93 ohms
BNC connectors

Low Noise RF Amplifiers

30-300 mcps

Model UH-2(A)SP Amplifiers offer broadband response, high gain, and low noise figure, with additional advantages of simplicity, high reliability, ruggedness, small size and low weight.



SPECIFICATIONS (condensed)

Freq. range	F_o preset between 30 and 300 mcps
Gain	Greater than 20 db
Bandwidth	Up to 10% of F_o
Noise Figure	<1 db at 30 mcps to <3 db at 300 mcps

AMPLIFIERS and PRECISION POWER SUPPLIES

ANALOG COMPUTER BUILDING BLOCKS

Full line of plug-in DC amplifiers. Band width and low drift are outstanding characteristics. Price range: $23 to $95.

Request Data Sheets.

Instrument power supplies (.001% specs). Price range: $295 to $850.

Request Data Sheets.

EMBREE
ELECTRONICS CORP.

World Radio History

WE'VE BEEN HIDING UNDER A BUSHEL BASKET

We've emerged from seven years' designing, engineering and producing some of the nation's most sophisticated electronic countermeasures systems.

Experience and knowledge gained has been applied in developing a line of IFI amplifiers that meet some pretty tough specifications at lower cost than you'll find elsewhere.

Available for immediate delivery.

P-205 SERIES PRE-AMPLIFIERS

M-200 SERIES I-F AMPLIFIERS

300 SERIES VIDEO AMPLIFIERS

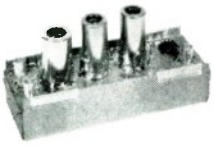
M-500 SERIES WIDE BAND AMPLIFIERS

600 SERIES AMPLIFIERS

M-400 SERIES HIGH POWER DISTRIBUTED AMPLIFIERS

LOG-LIN AMPLIFIERS

T-330 TRANSISTORIZED AMPLIFIERS



Write for data sheets, and judge for yourself.

Magamps

also: CURRENT TRANSFORMERS
PULSE TRANSFORMERS
CONTROL REACTORS
FILTERS
TOROIDS *to your specifications, or we will design them.*

DESIGN CAPABILITY: Specialized experience in high performance magnetics qualifies us to design your problem components. (Details of past achievements on request.)

PRODUCTION FACILITIES: Controlled environment areas for stick, bobbin and toroid winding, hermetic sealing, and encapsulation.

RELIABILITY: Proven production capability to meet Mil-T-27A airborne and missile requirements with tight quality control.

World Radio History

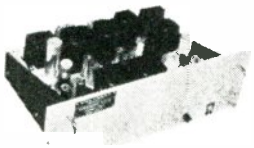
Interesting instruments

Model 759-6

$225.00

Practically-Priced DC Amplifier

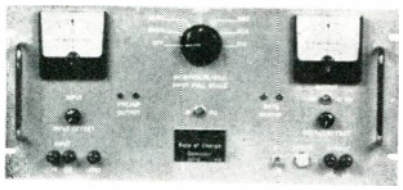
Now — a low-level DC amplifier costing less than $200.00, that has the features usually found in instruments costing twice as much. Model 759-6 accepts dc signals from 5 μv to 1 volt... has 5 meg input impedance... ¼% linearity... panel meter... is fully isolated from ground... with 0 to ± 1% recorder output.



Model 557-2B $1250.00

Computer for Ratios

This instrument computes, to ±1%, ratios of two independent low-level (to 1 mv full scale) variables. The Ratio Computer has a wide variety of uses in measurement or control of the process industries, thermal studies, medical instrumentation, and other modern circuits.



Model 557-1A $ 950.00

Rate of Change Computer

An accurate device for measuring slow changes in low-level DC potential as low as 10 μv/sec. Magnetic Instruments' Rate of Change Computer is used for measurement and/or study of temperatures, pressures, radiation, chemical concentration, and other physical phenomena.

World Radio History

microwave instrumentation

Low noise TWT Amplifiers

- *Noise figures as low as 4.5 DB*
- *Frequency coverage 0.5 to 18.0 KMC*
- *Remote operation*

Ideal as antenna and low noise receiver preamplifiers. MPE Low Noise Amplifiers are designed for ease in system integration. TWT, solenoid and solenoid supply can be located up to 100 feet from the electrode supply. Remote control permits complete operation from electrode supply. High regulation, low ripple achieves maximum capabilities of low noise traveling wave tubes. Write for complete specifications.

Power Leveling Systems

- *Constant output power*
- *Sweep frequencies of 0.01 to 100 CPS*
- *Six models cover 0.5 to 18.0 KMC*

The Microwave Power Leveling Systems find wide applications in the testing and development of microwave components and systems where a constant power, sweeping signal source is required. The system may also be used as a CW signal source. Provisions for amplitude, pulse and frequency modulation are included. Sweep speeds permit display on oscilloscope or recorder. Write for further details.

Special applications for TWT's

Although MPE offers the most complete line of TWT Amplifiers available, we have delivered many TWT Amplifiers and Electronically Swept Oscillators for special applications. Quotations for specific requirements will be prepared by our technical staff. MPE also supplies solenoids for all TWT's and BWO's. Write for complete catalog or send us your requirements.

Electronically Swept Oscillators

0.5 to 18.0 KMC

- *Speed frequency response measurements on wideband microwave systems*
- *Reflectometer measurements*
- *Broadband antenna development*
- *ECM equipment design*
- *Modulated or CW signal source*

Direct reading of frequency and sweep width provide simplicity of operation in these wideband swept oscillators. Each model is a complete, self-contained unit capable of amplitude, pulse and frequency modulation. Six models provide complete coverage, 0.5 to 18.0 kmc. Sweep speeds continuously adjustable from 0.01 to 100 cps for display on oscilloscope or recorder. Single frequency (CW) operation also provided. Request Data Sheet for more details.

TWT Amplifiers

- *Broadband* (approximately octave bandwidths)
- *Full coverage* 0.25 to 18.0 kmc
- *Standard amplifiers provide up to 10 watts output*

MPE Broadband TWT Amplifiers provide wide bandwidth, high gain amplifier for laboratory use or system applications. Output power levels of 10mw, 1 watt and 10 watts are standard over most of the 0.25 to 18.0 kmc frequency range. Intermediate or higher powers are available in many frequency ranges. PM focused amplifiers are available where size, weight and power consumption are critical. Standard line includes amplifiers especially designed for pulse operation. Most amplifiers provide for grid modulation. 10 mw amplifiers provide for helix serrodyne modulation. Write for details.

World Radio History

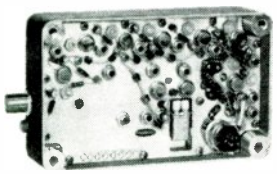
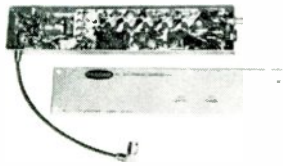
RSE ELECTRONICS CORPORATION

Receiving & Transmitting Equipment: Command Receivers & Decoders, Radar Receivers, Beacons, Frequency Multipliers & Transmitters
Amplifiers: Intermediate Frequency Amplifiers, Distributed Amplifiers
Ground Equipment: Missile Check-Out Equipment, Ground Support Equipment
Instruments: FM Signal Generators (400 to 550 Mc), IF Noise Figure Measurement Equipment
Specifications of representative products follow:

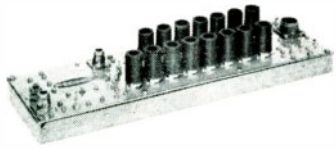


RSE COMMAND RECEIVER, TRANSISTORIZED, UHF: Model 2621 crystal controlled receiver. **Frequency:** Fixed tuned within ± .01% of desired frequency between 406 Mc and 549 Mc. **Frequency modulation:** ± 150 Kc. **Sensitivity:** 5μv for 6 db $\frac{S+N}{N}$. **Interference:** To Mil-I-26600. **Limiting level:** 90% of max. output on 14 μv input. **Selectivity:** —60 db at ± 2 Mc from carrier. **Image rejection:** 60 db. **I-F bandwidth:** 400 Kc. **Disc. P-P separation:** 400 Kc. **Power input:** 1.2 watts at 29 ± 2 VDC. **Size:** 3" x 5" x 1¼". **Weight:** 16 oz. Used with Models 1801, 1802, 1803 Decoders.

RSE TRANSPONDER, UHF/L-BAND: Model 2611A/2703A includes subminiature tube receiver, transmitter, and power supply. **RECEIVER**—Fixed tuned to any frequency between 406 Mc and 549 Mc. **Sensitivity:** 10 μv for 6 db $\frac{S+N}{N}$. **Modulation:** FM ± 350 Kc. **Output:** 5 VRMS. **Image rejection:** 30 db. **Selectivity:** —55 db at ± 2 Mc from carrier. **Output bandwidth:** 2.2 to 50 Kc. **TRANSMITTER—Frequency:** 1650 Mc to 1680 Mc. **Modulation:** FM ± 500 Kc. **Output:** 27 dbm. **Frequency stability:** ± 4 Mc. **FM ripple:** ± 20 Kc. **GENERAL—Input power:** 29 ± 2 VDC at 1.8 Amps. **Weight:** 4 lbs. **Size:** 3 1/16" x 6 13/16" x 7 7/8". **Temperature range:** —55° C to + 70° C. Used with Models 1801, 1802, 1803 Decoders.

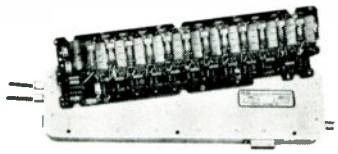


RSE TRANSISTORIZED I-F AMPLIFIERS: Model 84201A is typical of others in RSE's line of transistorized amplifiers. **Center frequency:** 42 Mc. **Bandwidth:** 1.4 Mc. **Gain:** 120 db. **Source Impedance:** 300 ohms with 25 μμf. **Output impedance:** 35 ohms. **Noise figure:** 2.6 db. **Video output voltage:** + 15 volts. **Nominal pulse width:** 1 μsec. **Gain control provisions:** manual, automatic and sensitivity time control. **Temperature range:** —20° C to + 55° C. **Size:** 12" x 2½" x 1¼". **Weight:** 25 oz. **Power required:** 120 VDC at 30 ma, 6.3 VAC at .6 amps, 28 VDC at 70 ma.



RSE SERIES 2200 DISTRIBUTED AMPLIFIERS

Model	3db Bandpass	Input Impedance	Output Impedance	Voltage Gain	Dimensions (inches)	Application
2210	0.1 - 175 mc	200Ω	50Ω	18 db	15⅝" x 3 1/32" x 3¼"	Low noise preamplifier (noise figure 8 db)
2220	0.1 - 300 mc	50Ω	50Ω	20 db	15⅝" x 3 1/32" x 3¼"	General purpose voltage amplifier
2230	0.1 - 300 mc	50Ω	50Ω	18 db	15⅝" x 3 1/32" x 3¼"	Power amplifier (1 watt output)



RSE STANDARD SUBMINIATURE IF AMPLIFIERS

Model	Center Frequency	Band Width	Noise Figure	Source Impedance	Output	Gain	Gain Control Type & Range AGC	Gain Control Type & Range MGC	Overall Dimensions (including tubes)
810-030	30.0 mc	10.0 mc	2.4 db	400Ω at 10 μμf	IF	93 db	80 db	none	8⅝" x 3⅛" x ⅞"

ANTENNAS
by
Ainslie
CORPORATION

NOW — available from Ainslie Corporation, a new remote control positioning pedestal capable of handling our antennas up to 18 feet in diameter in frequencies from 100 to 10,000 mc. Modifications available for a variety of tracking applications. Whatever your antenna or reflector requirements may be, contact us at our new facilities.

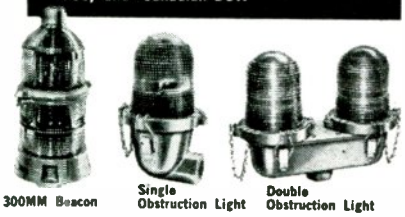
HUGHEY and PHILLIPS, INC.

Specialists in Obstruction Lighting Equipment and Controls

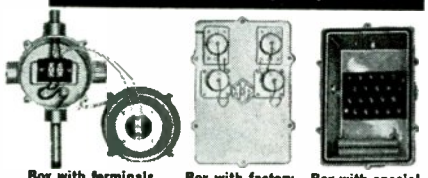
BEACON and OBSTRUCTION LIGHTS, designed to meet specifications of CAA, FCC, and Canadian DOT.



300MM Beacon — Single Obstruction Light — Double Obstruction Light

You'll find Hughey & Phillips have obstruction lights for every job. The engineering of each light offers maximum efficiency and simplified installation and maintenance. Whether you need bottom or side entrance conduit fitting types, there is a model to meet your requirements.

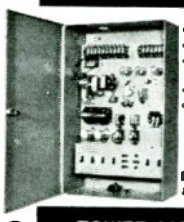
SPECIAL CAST ALUMINUM WATERTIGHT JUNCTION BOXES, offering a wide choice in types of terminals, cable support, and factory installed screw cap receptacles.



Box with terminals, cable support, and receptacle in cover. — Box with factory installed screw cap receptacles. — Box with special terminals and cable support.

Hughey & Phillips have pioneered in the use of adequate junction boxes with proper terminals, and built-in cable support to meet NEC requirements.

SPECIAL CONTROL UNITS, designed for both indoor and outdoor installation.



- Photo-Electric Control Units
- Beacon Flashers
- Combination Photo Control & Beacon Flashers
- Lamp Failure Indicator System
- Controls with Autotransformer system . . . pioneered by Hughey and Phillips for tall towers increases lamp life.

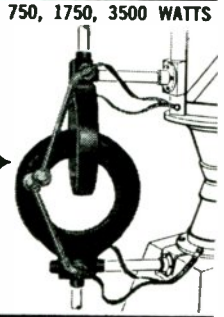
Photo control, flasher and Lamp Failure Alarm

TOWER LIGHTING ISOLATION TRANSFORMER

THREE SIZES . . . 750, 1750, 3500 WATTS

FEATURING:

- HIGHER EFFICIENCY
- IMPROVED REGULATION
- ADDITIONAL TAPS
- FIBER GLASS INSULATION
- EPOXY ENCASED
- VERSATILE MOUNTING



HUGHEY & PHILLIPS, INC.

MANUFACTURERS OF

300MM Beacons, Obstruction Lights, Photo-Electric Controls, Beacon Flashers, Special Junction Boxes, Microwave Tower Light Control and alarm Systems, Tower Isolation Transformers, and Complete Kits for: Tower Lighting, Sleetmelter Power and Control.

3200 N. San Fernando Blvd. Burbank, Calif.

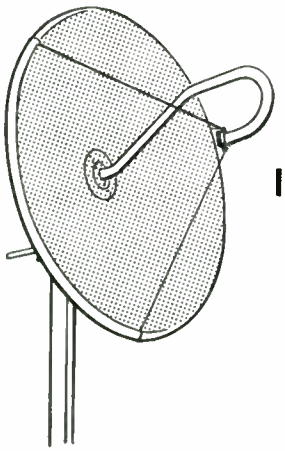
TACO

For Antennas and Antenna Equipment

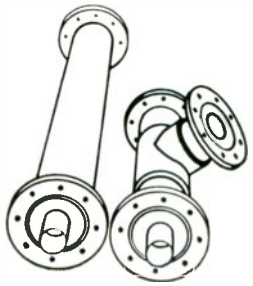


IN MICROWAVE

Taco now offers a complete line of microwave antennas, complete with feeds for all operational frequency ranges in sizes ranging from 4′ to 12′ in diameter. Mounts available for all requirements. Deicing equipment for all sizes.

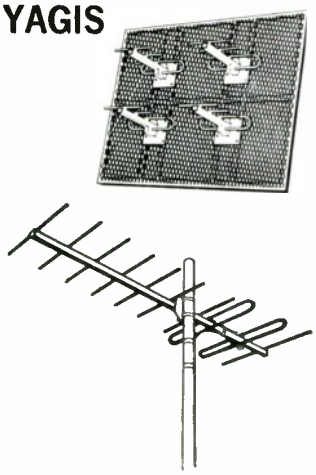
IN RIGID TRANSMISSION LINE

Rigid transmission line in both copper and aluminum. Complete systems including all accessory components for both EIA and Quick-Clamp connections. Sweeps, elbows, adaptors, switches, pressurization fittings, and all other fittings for 7/8″, 1 5/8″, 3 1/8″ and 6 1/8″. 50-ohm and 75-ohm lines in appropriate sizes.



IN RUGGEDIZED YAGIS

All-aluminum, all-welded ruggedized yagis for use in 30 to 500 mc frequency ranges. Coaxial feed. Available in 4, 5, or 10 element designs with single or multiple drives. Also available with screen reflectors and multiple arrays. May be polarized vertically or horizontally. Complete mounting hardware.



IN COMPLETE ANTENNA-TOWER SYSTEMS

Complete antenna-tower systems ready to install. Available in sizes up to 24′ in diameter. With or without remote control mechanized mount. Feeds available upon special order. Systems come complete, requiring minimum installation time in the field.

IN ANTENNA DESIGN AND SPECIAL MANUFACTURING

Taco maintains the finest test range in the industry, together with an outstanding antenna laboratory staffed with experienced, competent personnel. These facilities are ready to meet with any antenna, or antenna system need of industry or the military.

In addition to the antennas listed, Taco manufactures a complete line of parabolic antennas up to 32′ in diameter, aircraft and submarine antennas, telemetering helical antennas, tracking antennas, and many other types. WRITE FOR COMPLETE TECHNICAL CATALOG...

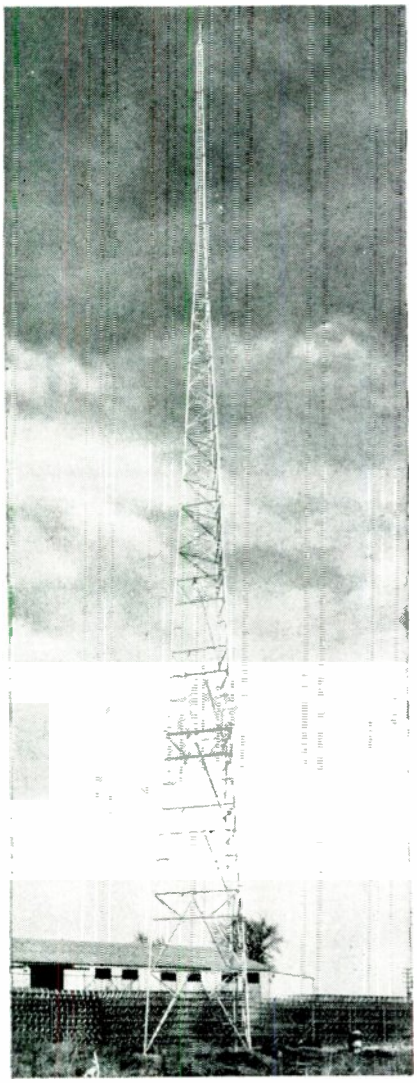
ROHN
SELF SUPPORTING
COMMUNICATION TOWER
NOW available up to 170 ft.!



★ Fully self-supporting in heights up to 170 ft.
★ Rated a true HEAVY-DUTY steel tower, suitable for communication purposes, such as radio, telephone, broadcasting, etc.
★ Complete hot-dipped galvanizing after fabrication.
★ Low in cost—does your job with BIG savings—yet has excellent construction and unexcelled design! Easily shipped and quickly installed.

FREE *details gladly sent on request. Representatives coast-to-coast.*

TRG INC.

Total Capability in Antennas 26 to 220 kmc.

TRG has pioneered in the development of millimeter radar systems. Whatever your requirements, a sophisticated unit to strict mil specs or a standard off the shelf unit, contact TRG.

- Horn fed paraboloids
- Waveguide slot arrays
- Monopulse antennas
- Circular polarized feeds
- Linear-circular polarized feeds
- Shaped beam search
- Lobe switching
- Omnidirectional
- Solid dielectric lenses
- Electroformed gain standards

ARRA TT LINE

CONTINUOUSLY VARIABLE ATTENUATORS

New

ULTRA BROADBAND

PRICE **$150**

Exclusive Features:

- Bandwidth: 1.0 to 9.0 KMC with a single unit
- Continuously variable for all values of attenuation
- VSWR: 1.5 max. at all frequencies for all values of attenuation
- Attenuation: 10 db min. at 1 KMC
- Insertion Loss: 0.5 db max.
- Power: 10 w. average, 5 KW peak
- Size: 5" diameter by 1" high
- Drive: micrometer or shaft
- Model 3-6414-10

In addition, other standard models* available are

Model No.	Freq. KMC	Max. Atten.	Max. VSWR	Unit Price
1414-10	25-.50	10	1.5	$270.
2414-20	.50-1.0	20	1.5	$260.
2-3414-30	.8-2.5	30	1.5	$260.
3414-30	1.0-2.0	30	1.4	$240.
4414-30	2.0-4.0	30	1.3	$220.
4-5414-30	2.0-6.0	30	1.3	$230.
5414-30	4.0-7.0	30	1.3	$220.
6414-30	7.0-11.0	30	1.3	$220.

*Insertion Loss 0.2db Max.

World Radio History

PRECISION MICROWAVE CALIBRATION EQUIPMENT

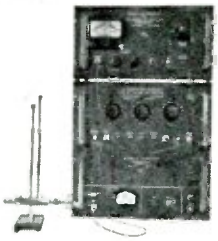
- *All attenuators and terminations made with Weinschel Film Resistors for maximum stability.*
- *All attenuators and terminations individually calibrated.*
- *Certificate of calibration supplied with each attenuator.*
- *All instruments 100% tested for all performance specifications.*

Modulated RF Sources—Models MS-8 to MS-13.

Exceptional amplitude and frequency stability for precision microwave measurements. Six RF Sources plug into common Power Supply-Modulator, cover frequency range of 50 to 10,500 MCS with true single-knob control. Modulator frequency is tuning fork stabilized.

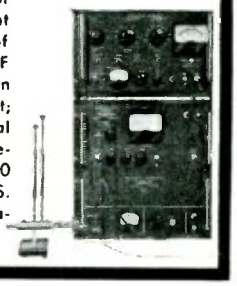
Single Channel Insertion Loss Test Set (Simple, Accurate)

Measure Attenuation directly up to 30 DB. Typical systems error: .1 DB. Resolution: about .02 DB. Frequency Range: 20 MCS to 90,000 MCS. Write for Application Note #1.



Dual Channel Insertion Loss Test Set (High Resolution)

.02 DB precision for 20 DB measurement despite changes of .1 DB in level of RF source. Attenuation range: 20 DB, direct; 40 DB with partial RF substitution. Frequency range: 20 MCS to 90,000 MCS. Write for Application Note #4.



Available as a complete system 100 to 12,400 mc

Standard Attenuator Comparator, Model VM-1
(Sensitive to —120 DBM)

For standards laboratories. Calibrates signal generator output attenuators or calibrates attenuators. 105 DB range. Direct reading accuracy between —21 and —81 DBM exceeds .02 DB/10 DB.

Step Attenuators

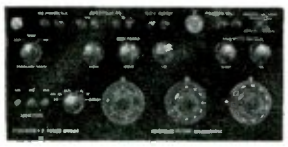
DC to 2 KMC. RF calibration accuracy: 1 to 10 DB: .02 DB; 20 to 50 DB: .02 DB/10 DB. Model 60: 2 drums, 0-60 DB in 1 DB steps. Model 64: 3 drums, 0-64 DB in .1 DB steps. Model 640: 3 drums, 0-110 DB in 1 DB steps. Switch repeatability: .01 DB.

Double Stub Tuners

Adjustable spacing between stubs for quick matching. Chart on base for optimum stub spacing versus frequency. Collets lock stubs. Adjustable height of connectors. Frequency Ranges: Model DS 109: .75 to 10 KMC; Model DS 109L: .4 to 4 KMC; Model DS 109LL: .2 to 2 KMC.

Coaxial Thermistor Mount, Model 675-A

100-4000 mc. Long thermal time constant of mount eliminates effects of ambient temperature variations. Calibration factor supplied at 400, 1000 and 1500 mc accurate to 2%.

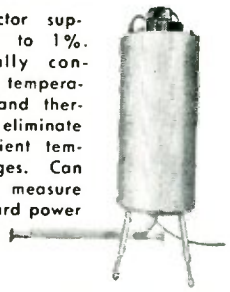


Precision RF Power Bridge, Model PB-1

For standards laboratories requiring the highest possible accuracy in high frequency power measurements . . . capable of accuracies of .1% in the measurement of substituted DC power.

X-Band Power Standard Models 811, 813 and 815

Calibration factor supplied accurate to 1%. Thermostatically controlled constant temperature chamber and thermal isolator eliminate effects of ambient temperature changes. Can be used to measure power or standard power source.



10 Watt Power Pads, Model 10

Frequency: DC to 1.5 KMC. 50 ohms. Attenuation: 1 to 20 DB. Maximum VSWR: 1.30, bilateral. Stainless steel type N connectors. Stable under power.

Coaxial Attenuators, Models 50, 50-C, 50-SC

Frequency: DC to 3 KMC. 50 ohms. Attenuation: 1 to 80 DB. Maximum VSWR: 1.20 bilateral. Finish: Stainless steel (Type N connectors); nickel plated (Type C or SC connectors).

Coaxial Attenuators, 1 to 12.4 KMC—Models 210, 520, 540, 633, 663

Frequency: 1 to 12.4 KMC. 50 ohms. Attenuation: 1 to 20 DB. Finish stainless steel (Type N Connectors); nickel plated (Type C, BNC, TNC, SC connectors). Available also in ruggedized version to meet MIL-A-3933 and MIL-T-945A (Model 530).

Write for complete specifications.

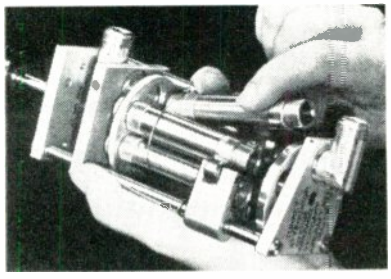
STODDART

WIDE RANGE COAXIAL ATTENUATORS
50 & 70-OHM TERMINATIONS

Manufactured using exclusive Stoddart film resistors for highly accurate and stable operation from dc thru 3000 mc; with special values from dc thru 10 kmc.



2, 6 and 10 position turret attenuators offer quick removal, replacement or rearrangement of single attenuator pads. **Small and rugged**, the Stoddart turrets operate with a **"Pull-Turn-Push"** sequence.

Stoddart attenuator pads are available in any value from 0 thru 60 db, including fractional values. Any conceivable combination of male and female, Type N and Type C connectors may be ordered. **Pads with flanges for panel mounting can also be supplied.**

10, 20, 40 and 60 db attenuators are available for operation from dc thru 10 kmc.

1 watt, 50-Ohm terminations can be selected for use from dc thru 7000 mc, in addition to those in the dc-3000 mc range. All 1 watt terminations can be supplied with either Type N or Type C connectors. ½ watt, 50 or 70-Ohm terminations with BNC or TNC connectors manufactured for use from dc thru 1000 mc.

Common db values available from stock.

Detailed literature upon request.

SILVER CHLORIDE

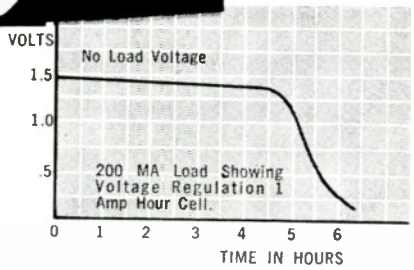
CHLORIDE + + − − VOLT

BATTERIES

The newest development in batteries, these miniature units are capable of delivering large peak currents (10 amps/sq. in.). . . . May be recharged at 1 amp per sq. in. . . . Rapid depolarization. . . . Will withstand short circuits for sustained periods, recovering full potential in fraction of a second. Available in 5 sizes from 1/4"D x 1/4" to 2"D x 1/2" and from 300 to 6,000 MA hours.

Silver-Chloride, zinc, sea-water activated batteries also available . . . no gassing, no magnesium used.

We invite inquiries on special applications for unusual power source requirements.



DISCHARGE CURVE

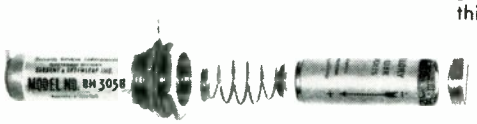
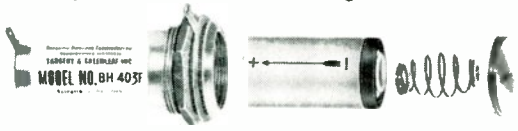
BF SERIES

BF Series Transistor Battery Holder accommodates batteries and cells with diameters up to 1 3/8" and lengths from 1 19/64" to 7 3/16" making it possible to use different battery combinations to obtain a wide selection of DC voltages. Batteries can be exchanged simply by unscrewing the holder cap. Designed for mounting up to a 1 5/8" diameter hole and 3/8" thick panel.

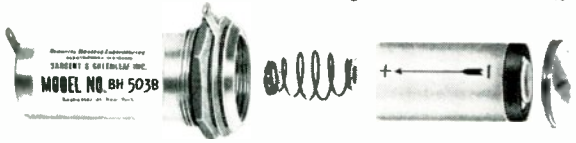
Inquiries for special battery holder length and diameters are invited.



300 SERIES: (B SERIES SHOWN) • Accommodates batteries ranging up to 11/16" diameter and lengths from 1.300 to 5.850.



400 SERIES: (F SERIES SHOWN) • Accommodates batteries ranging from 1" to 1 1/8" diameter and lengths from 1 11/16" to 6 3/16".



500 SERIES: (B SERIES SHOWN) • Accommodates batteries ranging from 1 3/16" to 1 3/8" diameter and lengths from 2 3/16" to 7 3/16".

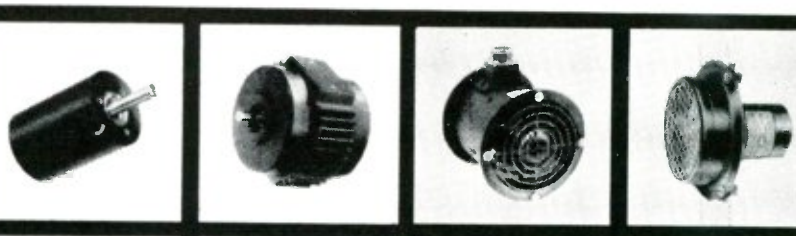
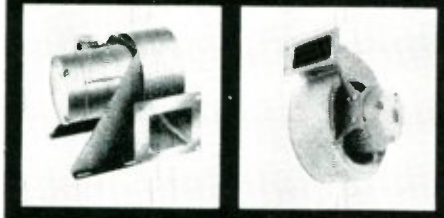
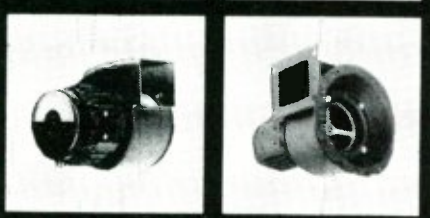
OUR FIELD ENGINEERS WILL GLADLY ASSIST YOU IN YOUR COOLING PROBLEMS





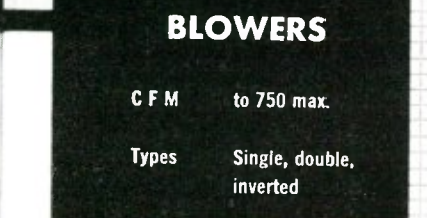
BLOWER AND FAN TYPES OFFERED

Centrifugal and Vane Axial Blowers, Blower Housings, Axial Flow Fans.



TYPES OF SUB-FRACTIONAL MOTORS MANUFACTURED:

Induction, Hysteresis Synchronous, Reluctance Synchronous, Servo, Gear and High Slip Induction.



BLOWERS

C F M	to 750 max.
Types	Single, double, inverted
Housings	2¼" to 11½", vertical, overall
Mountings	Flange, foot, cone

MOTORS

Horsepower	1/500th to ½ h.p.
Speeds	3600 rpm max. at 60 cps 24,000 rpm max. at 400 cps Dual and Variable Speed Units
Frequency	Fixed . . . 50, 60 or 400 cps Variable . . . 50 to 450 cps, and 320 to 1,000 cps Special . . . as required
Voltage	Standard 115V and 230V Special . . . as required
Phase	1, 2 or 3 phase
Size	1" O.D. to 4⅜" O.D.

FANS

C F M	to 1000 max
Types	Axial, vane axial, ALTIMATIC ®
Blades	2" to 12" dia.
Mountings	Venturi, foot.

Air Marine motors and cooling units have been designed and tested to meet the specifications of both the military and industry.

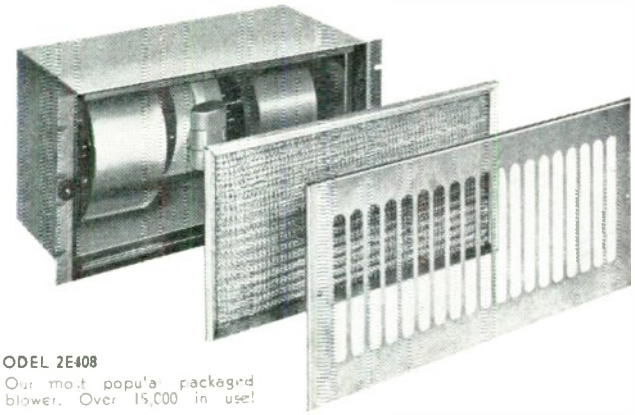
McLEAN

for the World's Finest and Largest Line of Electronic Fans and Blowers



MODEL 2E408
Our most popular packaged blower. Over 15,000 in use!

McLean fans and blowers are compact, packaged units that pressurize the cabinet with cool, filtered air, preventing dust from entering through cracks or joints. The units are complete, and ready for use. No cutting or fitting is necessary . . . standard EIA notching is used. All units contain easily replaceable filters. Smart, stainless steel grilles eliminate the necessity of matching special finishes. All components provide long service-free life, reliability, long-term economy, maximum safety and quiet operation.

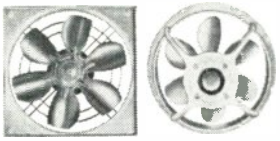
SPECIFICATIONS FOR 19" RACK MODELS

Panel Height	Model	CFM	Remarks	Type
3½"	2E300E	150	Case Height 5½" Recessed	Blower
5¼"	2E300A	150	Basic Model	Blower
5¼"	3E40B	180	For Low Rear Head Room	Propeller
5¼"	2E408E	300	Case Height 7" Recessed	Blower
7"	2E408A	300	Basic Model (Silent Operation)	Blower
7"	2E55B	250	Basic Model	Propeller
7"	M2E55B	300	400 Cycle Mil-Spec	Propeller
7"	2EB508E	500	Case Height 8¾" Recessed	Blower
8¾"	2EB508A	500	Basic Model	Blower
8¾"	2E80B	475	Basic Model	Propeller
8¾"	2EB610E	800	Case Height 10½" Recessed	Blower
10½"	2EB610A	800	Basic Model	Blower
10½"	2E80BS1	500	Basic Model	Propeller
10½"	1EB800	1000	Case Height 12¼" Recessed	Blower

Modifications of Above Models Can be Made to Other Width Racks

RECESSED MODELS
For maximum air delivery where panel space is limited.

FILTER GRILLE ASSEMBLIES
For cabinets lacking sufficient louvre area to permit an adequate air change.



RING AND PANEL FANS
Mount easily and quickly against bottom, top or sides of cabinet with shaft in any position.

SINGLE AND DUAL CENTRIFUGAL BLOWERS
For spot cooling, pressurizing or general purpose use where filtered air is not essential.

HALF PANEL WIDTH FANS AND BLOWERS
For narrow width panels or full width where space is a problem. Same high quality as full width units.

REVERSIBLE FANS
Easy to install, great mounting flexibility. Can be installed as blow or suck.

ARCO

Leader in precision

FILM CAPACITORS

ARCO FIRSTS IN PLASTIC FILM CAPACITORS

- 0.05% TOLERANCE
- 0.05% STABILITY
- RELIABLE 100°C POLYSTYRENE
- CONTROLLED LINEAR TEMPERATURE COEFFICIENT
- ZERO TEMPERATURE COEFFICIENT
- 10^{12} OHM INSULATION RESISTANCE POLYSTYRENE
- MINIATURE CAPACITOR STANDARDS
- TEMPERATURE-STABLE R-C NETWORKS

These achievements are fully documented and the listed characteristics uniformly reproducible. All Arco specifications are conservative limits which can be expected of each capacitor made. The expressions "typical" and "average" will never apply.

We solicit inquiries on special capacitor design problems and also engage in formulation and construction of stable, precise R-C networks and capacitor assemblies.

HIGH POWER MATCHED PULSE COMPONENTS

Pulse Forming Networks

Pulse Transformers

Charging Reactors

Oscillator Filament Transformers

FEATURES

- Stable performance at High Temperatures
- Widest Range and combination of Electrical parameters
- Oil filled units hermetically sealed in welded seam cases
- Designed to meet exact system requirements
- Meets and exceeds all Mil requirements

Axel Pulse components are designed for use in Industrial, Military and Research application where electronic equipments demand a specific energy impulse of accurate shape and duration. All Axel Pulse Components have a high reliability and are designed to meet minimum space and weight requirements.

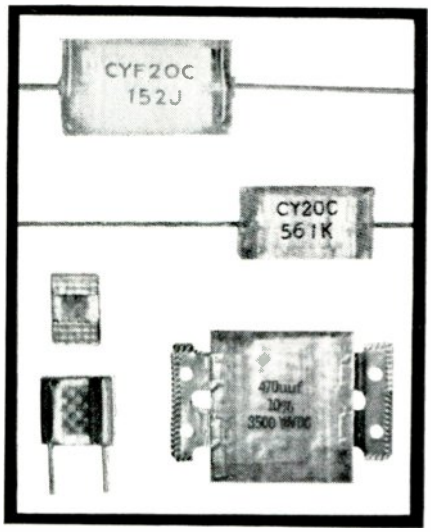
CORNING GLASS CAPACITORS

Most rugged, most compact capacitors you can specify. They're practically indestructible. Made by alternating layers of glass ribbon and aluminum foil and then fusing the mass under heat and pressure. They defy heat, moisture, and other environments.



CY • uuf for uuf, the smallest, most stable axial lead capacitor you can buy. After 2000 hours at 125°C with 150% of full rated voltage, capacitance change is less than 0.5%. MIL-C-11272B.

These range from 1 to 10,000 uuf.

There is also a medium-power style ranging up to 150,000 uuf.

CYF • Fusion-sealed CY capacitors with zero moisture absorption. You can boil these capacitors in salt water for days without affecting their performance. Guaranteed four times better than MIL specs for moisture resistance. From 1 to 5100 uuf.

W, WL • Wafers with or without leads. Smallest high stability capacitors made. Up to 10,000 uuf in 0.061 sq. in. of PCB area. Electrodes sealed to dielectric sheets in such a way that seal cannot be broken without destroying capacitor. Performance of MIL-C-11272A.

Write for data sheets.

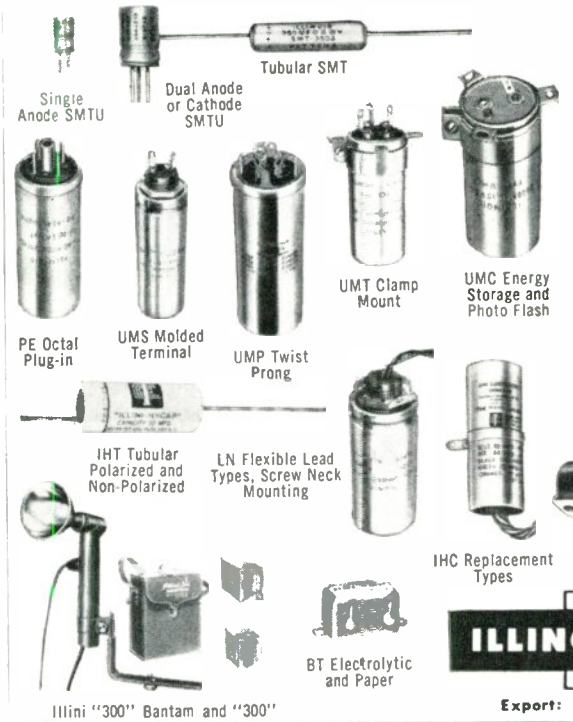
TYPE SMT Miniature

There is a "Time Tested Quality"

ILLINOIS Electrolytic Capacitor

for YOUR APPLICATION!



Need electrolytic capacitors in volume, or a few highly specialized units? It's Illinois . . . your first choice source with more than 25 years of experience in research and development and millions of capacitors of "Time Tested Quality" serving industry throughout the world. Illinois Capacitors do the job better because they feature:

- **Wide range of capacities and voltages —from miniatures to heavy duty power pack and energy discharge types.**
- **Excellent low temperature characteristics**
- **Stable, low leakage, high temperature characteristics**
- **Rugged, excellent under severest operating conditions.**

We invite your inquiry.

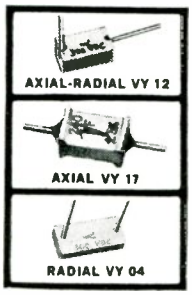
Vitramon® CAPACITORS
stable • rugged • low loss • miniature
low noise • humidity immunity
wide temperature range

VY T.M. solid state
PORCELAIN CAPACITORS
Conforms with MIL-C-11272B

STANDARD TYPES AND VALUES

All series A, AR and R are available in the following values from factory or distributor stocks in 10%, 5%, 2% and 1% tolerances.



VY 12C or VY 13C
0.5 to 200 mmf at 500 vdc
220 to 300 mmf at 300 vdc

VY 21C or VY 22C
510 to 1000 mmf at 500 vdc
1100 to 2400 mmf at 300 vdc*

VY 16C or VY 17C
220 to 470 mmf at 500 vdc
510 to 1000 mmf at 300 vdc

VY 31C or VY 32C
1100 to 3300 mmf at 500 vdc
3600 to 6800 mmf at 300 vdc**

VY 05C
300 to 620 mmf at 100 vdc
680 to 1200 mmf at 50 vdc

VY 04C
0.5 to 22 mmf at 500 vdc 110 to 220 mmf at 100 vdc
24 to 100 mmf at 300 vdc 240 to 510 mmf at 50 vdc

*2200 and 2400 not available in - Axial Series
**6200 and 6800 not available in - Axial-Radial Series

The superior electrical and mechanical characteristics exhibited by Vitramon® capacitors are attributes of their solid state composition — fine silver electrodes molecularly fused within a solid block of high grade porcelain, forming a monolithic unit that requires no case or hermetic seal.

VK® micro-miniature
CERAMIC CAPACITORS
Conforms with MIL-C-11015/18 and /19

10-10,000 mmf

NEW CATALOG SUMMARY

presenting... Jennings Vacuum Components, inherently qualified by their unique use of a vacuum dielectric, to help you solve many difficult design problems of high voltage in limited spaces.

A few minutes inspection of the wide range of vacuum components in this new product bulletin will reveal many design possibilities that ordinary electronic components cannot achieve. The bulletin contains valuable data and specifications on the latest types of Jennings Fixed and Variable Capacitors, Power Switches, Coaxial Relays, Triggered Spark Gaps, Transfer Relays and High Voltage Measuring Equipment.

The following examples illustrate some of the unusual capabilities of Jennings vacuum components:

R6G VACUUM SWITCH WITH MODEL E SWITCH MOUNT

Recommended max. load voltages for max. operating recovery voltage at 50 amps-rms .. 27 kv
Thermal current (for 30° C rise) ..... 250 amps-rms
Max. interrupting current (10 times) ..... 1500 amps-rms at 9 kv
Withstand voltage (60 cycle 1 min. dry) ..... 36 kv-rms

RB1R VACUUM TRANSFER RELAY

Overall length ..... 2¾ in.
Peak test voltage ..... 18 kv
Continuous current .... 15 amps-rms
High speed ..... Over 100 cps
Long life .... 10,000,000 ops min.

UCSL VACUUM VARIABLE CAPACITOR

Capacity range ..... 7-1000 mmfd
Overall length ..... 7-9/16 in.
Peak voltage ..... 5 kv
Continuous current .... 40 amps-rms

Send for your copy of this informative catalog today. No charge of course.

RELIABILITY MEANS VACUUM / VACUUM MEANS Jennings®

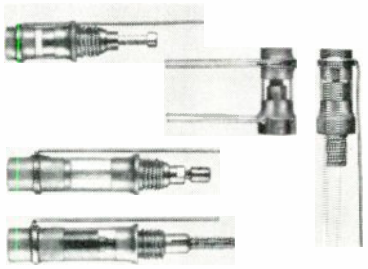
CORNING TRIMMER CAPACITORS AND INDUCTORS



CAPACITORS: Rotary • in three models for high-frequency tuned circuits. Standard: to 12.0 mmfd; split bushing: to 12.0 mmfd; precision: to 4.0 mmfd. Full rating from −55 to +125°C. TC: +50 ±50 ppm/°C. Nonporous silver plating for corrosion resistance available on request.

Direct Traverse • for linear tuning. Full rating from −55°C. to +125°C. TC: +50 ±50 ppm/°C.; 0.5 to 3.0 mmfd; 1.0 to 7.5 mmfd; 1.0 to 8.0 mmfd; 1.0 to 12.0 mmfd.

Mini-Trimmers • for ultrafine tuning. .40 uufΔ/turn. Fixed cavity tuning. Silver-plated hardware for highest Q and corrosion resistance. Zero derating at 125°C. No backlash. Complete circumference thread contact with direct traverse motion. Panel mount or printed board. 1 to 4 mmfd; 1 to 8 mmfd; 1 to 12 mmfd; 1 to 18 mmfd.

Precision Direct Traverse • When back-of-panel space is critical—other specs are same as for MINI-TRIMMERS, except there is a 1-30 mmfd model.

INDUCTORS: Delivered off the Shelf • 27 values ranging from 0.05 uh to 2.0 uh. High Q, 120 to 250. Frequency range from 10 MC to over 250 MC. High reliability under shock and vibration, since conductor is fired into glass; cannot shift. Low TC: 0 to +20 ppm/°C. Operation range from −55°C. to +125°C. No drift even under drastic dT. For panel or printed board mounting. Standard tolerance is ±10%. ±5% also available above 0.25 uh.

Kit for prototype work contains 10 different inductors with four tuning cores.

For data sheets write to 750 High Street, Bradford, Pa.

World Radio History

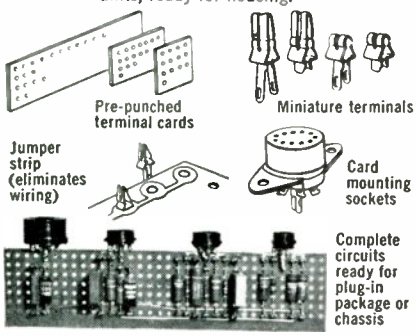
ALDEN BUILDING BLOCKS for ELECTRONICS

ALDEN plug-in components for electronic systems

All the convenience and ease of modular packaging . . . plus built-in maintainability and reliability

From layout to finished equipment in just 3 steps!

1 Unitize circuitry in compact, vertical planes with unique Alden Terminal Card Mounting System. Your circuitry is assembled in complete units, ready for housing.



Pre-punched terminal cards

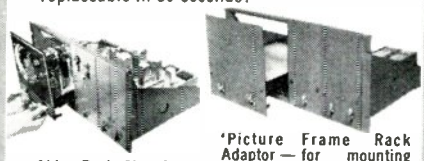
Miniature terminals

Jumper strip (eliminates wiring)

Card mounting sockets

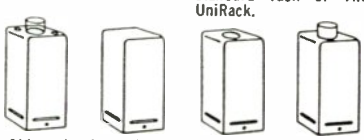
Complete circuits ready for plug-in package or chassis

2 Mount cards in Alden Basic Chassis for tremendous flexibility and quick servicing. With spares, units are replaceable in 30 seconds!



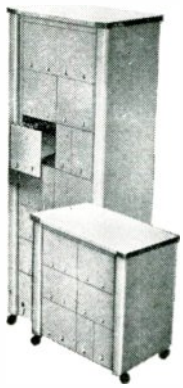
Alden Basic Chassis

*Picture Frame Rack Adaptor — for mounting Alden Basic Chassis in any combination. Mounts in standard rack or Alden UniRack.



Alden plug-in packages: 4 sizes — 7, 9, 11, and 20 pin

3 Alden Uni-Racks for housing sub-assemblies give you a more compact, serviceable unit. Available in 2 basic heights — mobile or stationary. Easily accessible, front or rear.



ALDEN testing and sensing elements to spot trouble instantly

Miniature test jacks

Miniature indicator lights

Miniature Pan-i-lite switches for momentary contact

Stacking and patch cords

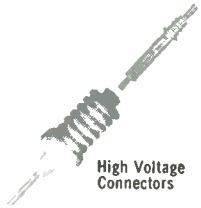
ALDEN plugs and connectors

Save time, weight, space in volume production. Leads tailored to your specs, ready for quick assembly

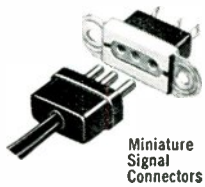
Non Interchangeable Connectors — 2-11 contacts

Tube Cap Connectors

"IMI" and Missile Connectors



High Voltage Connectors

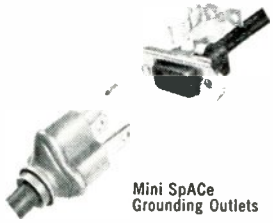


Miniature Signal Connectors

ALDEN electrical components

For volume production: combine quick, easy assembly with absolute minimum size and weight

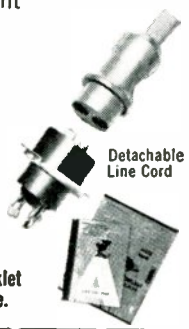
Mini SpACe Convenience Outlets — smallest, most rugged UL-approved convenience outlets available



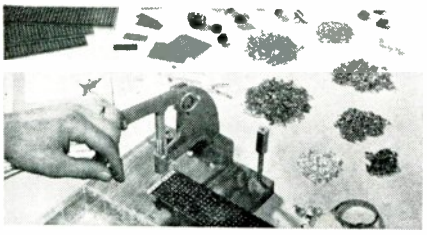
Mini SpACe Grounding Outlets

440 FH Series Safety Fuseholders

Miniature Indicator Fuseholders



Detachable Line Cord



ALDEN "Get-Started" Kits — For every engineer who wants to save time and money in layout, assembly and packaging. These basic assortments of Alden plug-in components are priced 40% below individual component cost to make it as easy as possible for you to evaluate Alden building block techniques. Individual kits priced from $11.50 to $249.50

Write today for new Alden Booklet and updated Quick-Order Guide.

DESIGN . PRODUCTION . ASSEMBLY

Completely Integrated Service

Printed Circuits for Military and Industrial Electronic Equipment

"Packaging" of circuits, from schematic diagram into Printed Circuit or Modular form.

Production in small or medium quantities — prototypes to a few thousand boards.

Secondary operations: Plating — Fabrication — Assembly — Dip Soldering — Encapsulation.

Rigid Inspection and Quality Control insure the production of High Reliability Printed Circuits to Exacting Specifications.

Ansley | *PLUS* | Module

Adds a third dimension to printed circuitry. It may answer your design problem. Ask us for details.

EPEC

Printed circuitry by E P E C meets the rigid specifications of use in missiles, guidance systems, computers and quality instruments from *THREE Separate and Complete* facilities: plants in Needham Heights, Natick, Massachusetts and Encinitas, California.

These plants are producing today—

- **PRINTED WIRING & ASSEMBLY**
- **DIELOX—circuits on aluminum base**
- **CU-CON PLATED HOLES**
- **PROTOMAKA, the laboratory unit for 'do-it-yourself' processing of printed wiring boards.**

continuity in printed circuitry

products proven by use:

CU-SIL 250° C printed wiring
CON-WELD weldable printed wiring
CON-THRU plated through holes

Proficiency in design-engineering-layout, master drawings and complete processing through final assembly & test is characteristic of a well-integrated staff with proven ability.

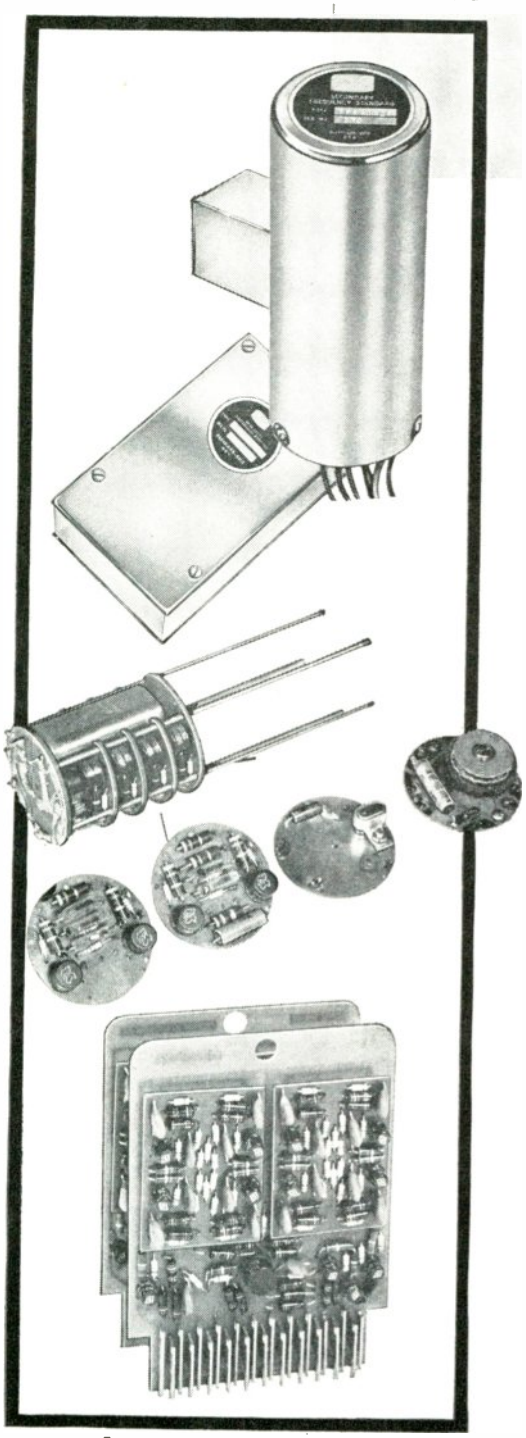
Frontier

proven on major missile and military systems*

- **extreme accuracy**
- **absolute reliability**
- **subminiature packaging**

on these frequency • time • digital products



Frontier service on "standards" or "specials":

Staff application engineers analyze your specifications . . . recommend a Frontier standard product . . . or a custom-packaged "special." Standards or specials, all have performance and absolute reliability guaranteed.

■ frequency

oscillators • secondary and portable standards • converters (frequency and subminiature DC-DC voltage) • R. F. oscillators • frequency control systems • precision engineered accuracies to meet any requirements . . . from parts per 10,000 commercial spec. . . . to parts per billion full mil-spec. • special developments

Absolute reliability, "advanced-art" fully solid state packaging

■ time

programmers • intervalometers • timers • digital clocks • on-missile (launch vehicle and payload) command program timers (fixed and variable instruction) • electromechanical and solid state • single and multi-channel • time reference and memory command systems • special developments

Absolute reliability, "advanced-art" packaging

■ telemetry

oscillators • transmitters • C.W.—F.M.—P.C.M. • "specials" • transponders • special developments

Absolute reliability, sub-miniature high density packaging

■ digital modules

• complimentary logic modules that are quickly and specifically "Frontier-Tailored" for your particular system • master clocks • flip-flops • scalers • comparators (parallel and serial) • pre-set counters • amplifiers • drivers • shift registers • redundant output selectors (with or w/o comparison monitors) • binary-decimal decoders • indicator drivers • special developments

Absolute reliability . . . and standard, solid state packaged modules that package... directly from your experimental system, into the final mil-spec. shipment.

*Three years to date with no "in-flight failures."

World Radio History

"FIRST IN PRINTED CIRCUITS"

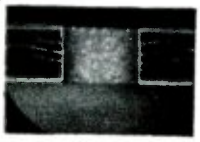
"World's Largest and Most Experienced Independent Manufacturer"

Photocircuits
CORPORATION

GLEN COVE, NEW YORK ORiole 6-8000
PHOTOCIRCUITS CORP. OF CALIF.
ANAHEIM, CALIFORNIA KEllogg 2-3338

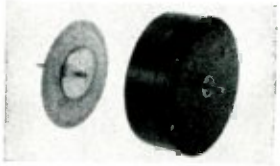
PRODUCTION CAPACITY
complete job shop facilities

You can have the world's largest and most flexible printed-circuit manufacturer at your service. Whether it's 100 or 1,000,000 boards, IBM punched card scheduling, experienced production people and stringent quality control methods assure you dependable quality and reliability . . . on time.



TUF-PLATE HOLES
reliable thru-hole construction

PC's famous plated-thru holes are substantially more reliable than eyelets under experimental cycling. Will pass MIL-E-5272A without a failure. Plating is dense, ductile and fine grained. Tuf-Plate holes assure reliable dip soldering as a homogenous portion of your circuitry.



PRINTED DC SERVO MOTORS
provide direct drive

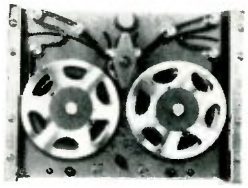
PMI permanent magnet dc motors feature a disc-type armature with no rotating iron. They are ideal for instrument applications requiring unusually low inertia, smooth torque, high pulse torque capability, and minimum inductance. Applications include positioning servos, tape reel drives, numerical positioning devices, and intermittent motion systems.

MINIFY
tested and proven miniaturization

Landless, plated thru-hole construction saves up to 80% of board space. Components are the size limiting factors, not the circuitry. Each board has the same Tuf-Plate reliability—production proven in thousands of military uses.

PHOTOELECTRIC TAPE READERS
whisper-quiet operation

Direct tape drive from the printed motor makes Photocircuits tape readers unusually quiet, reliable and maintenance-free. The absence of brakes, clutches and pinch rollers eliminates the usual difficulties encountered with conventional tape transports. Line-by-line reading at speeds up to 300 characters per second. All models completely transistorized.



Timely tech bulletins written for engineers and designers who wish to keep pace with the newest developments in printed circuitry. Bulletins give specifics on materials, layout, design, assembly, etc. To receive them contact your nearest PC field office.

Streamlined prototype system puts finished boards in your hands quickly. From quote to shipment, your requirements are handled rapidly . . . in a matter of hours. Complete and separate from general production, the Proto-Circuits Division is staffed by experts to help you with money-saving pre-production boards.

ENCAPSULAYER: a multiple layer printed sandwich allows high packaging densities through TUF-PLATE plated hole interconnections. Ideal for miniaturized back panel wiring.
CERAMICIRCUITS: provide ceramic-based printed circuits for applications requiring special mechanical and electrical stability.

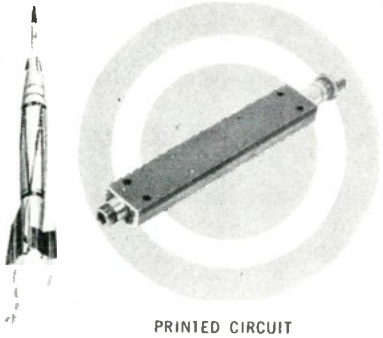
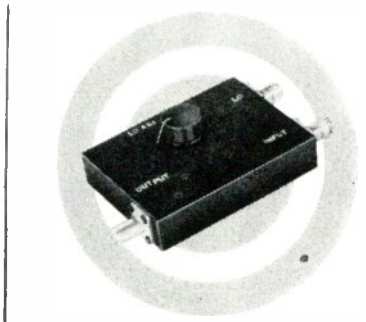
Premier's unique skills and facilities
HIT THE BULLSEYE
for both engineer and buyer



PRINTED CIRCUIT STRIPLINE FILTER



PRINTED CIRCUIT MIXER

ENGINEERS can depend upon Premier to meet the most exacting microwave component specifications and deliver complete uniformity and operating performance.

BUYERS find at Premier facilities geared to produce competively as well as design engineering which can often effect further economies through more accurate interpretation of performance requirements and improved working efficiency.

Whether a standard waveguide unit or an intricate new design, bring your problem to Premier . . . Premier will bring the answer to you.

Designed and Produced by Forbes and Wagner

The F & W specially designed coils shown above have solved specific problems. We will be glad to put our coil experience to work for you.

Typical F & W Coils

Relay • R. F. Transformers and Chokes • Saturable Reactors • Variable Inductors • Toroidal

Available in open construction, encapsulated and hermetically sealed. F & W encapsulated units meet the requirements of MIL-C-15305.

The coil shown here was developed to supply a 2500 V pulse for triggering a flash lamp from a 30 V source. This unit is subject to 10 KV test.

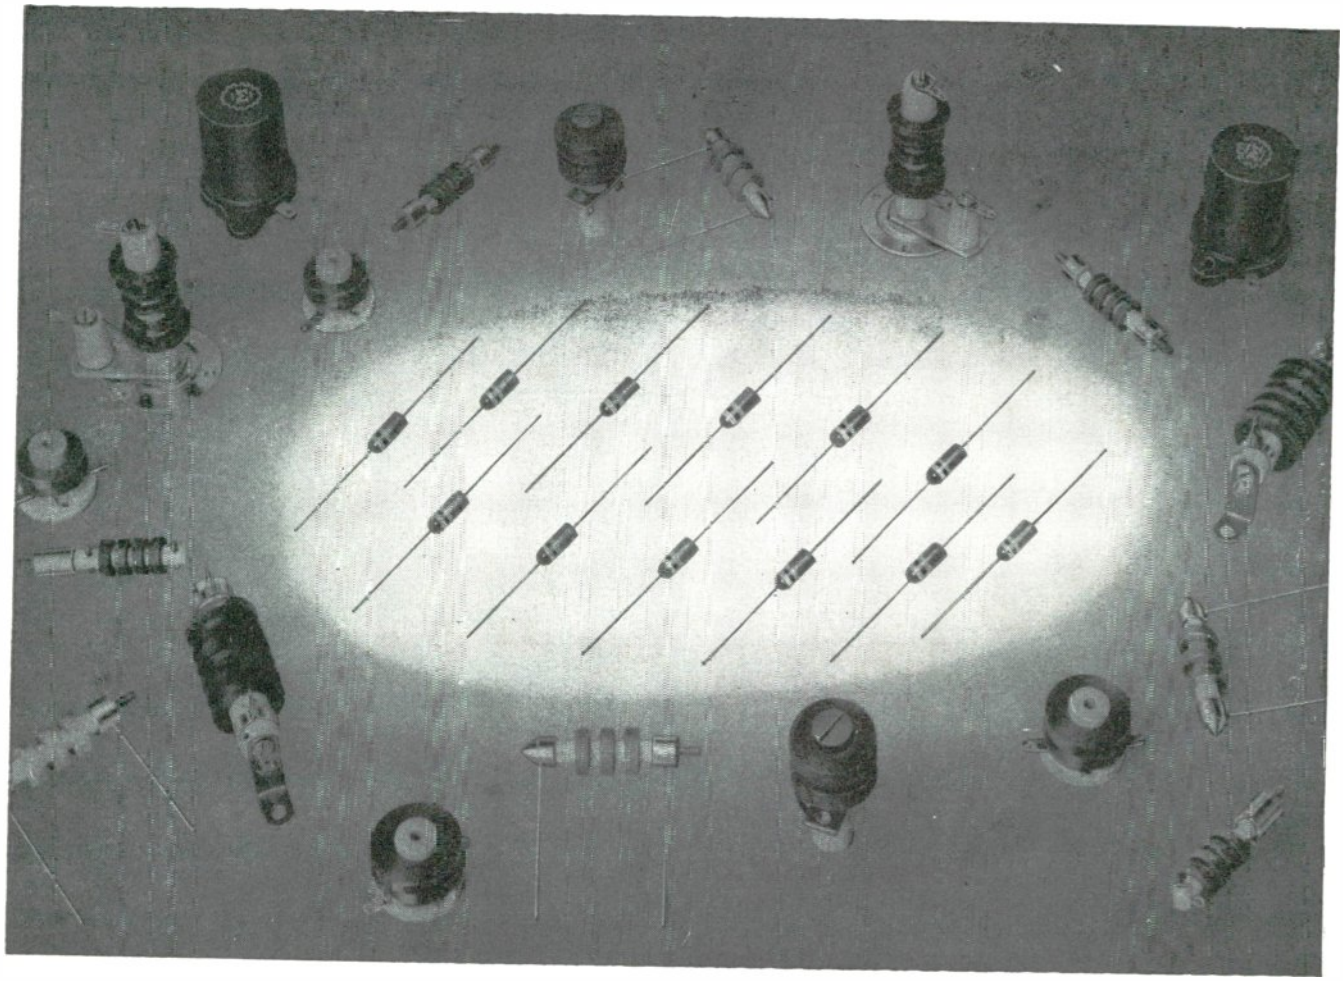
World Radio History



Encapsulated Inductances

Millen DESIGNED for APPLICATION encapsulated coils provide another advance in the r-f inductor field. Modern application requires miniature, heat and cold resistant, hermetically sealed, and abrasion resistant r-f inductor assemblies. The James Millen Manufacturing Company has pioneered many advances in the r-f inductor field, including the now standard 4 pi r-f choke, the axial lead r-f choke, and the miniature r-f choke. Developments have now made possible another advance, the No. 34301 and No. J301 encapsulated inductors—hermetically sealed—miniature size. Ambient temperature minus 55 degrees to plus 100 degrees C.

NO. J301 MINIATURE ENCAPSULATED INDUCTANCES

DESIGNED for APPLICATION miniature inductances are: extremely small (see table at right)—hermetically sealed—wound on axial lead Carbonyl cores—color coded. Coils are available in EIA standard values plus 25, 50, 150, 250, 350, 500, and 2500 microhenries. Current rating 100 to 1450 milliamperes depending on coil size.

NO. 34301 STANDARD ENCAPSULATED INDUCTANCES

Encapsulated DESIGNED for APPLICATION axial lead phenolic form r-f inductances. Hermetically sealed—heat resistant—abrasion proof—color coded. 0.15 to 2500 microhenries available in EIA standard values plus 25, 50, 150, 250, and 350 microhenries. Inductance ± 5%. Values available in same progression as J301 coils listed in the table at the right. Current rating 250 to 2800 milliamperes, depending on coil size. Ambient temperature range—minus 55 degrees to plus 100 degrees Centigrade. Size 3/16 inches diameter × 9/16 inches long to 3/8" × 7/8".

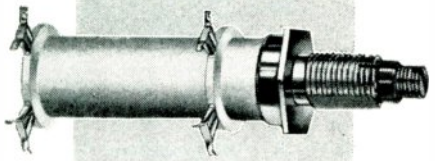
NEW



TERMINAL DESIGN

ON ALL THE

DELEVAN

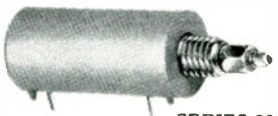
DELEFORMS

- Each terminal has two rigid tabs for circuit connections.
- Completely safe as terminal is insulated from coil form by a fiberglass collar.
- Coil winding connections are made to base of terminal leaving tabs clean and free for attachments.
- Solder connections are easily made on the "Y" type terminal tabs.

ALSO Introducing

Two New Series to the Industry's Widest Range of Standard Molded Coils.

SERIES 200
TAPER-LOCK has a small taper nut, positively locking the insert core.



SERIES 220
TORK-TITE has a split coupling, which guarantees optimum torque, yet cannot bind or freeze.

These new Variable Coils are molded for maximum protection and reliability. The core design of each Series permits use for chassis mounting or for printed circuit applications. Standard values from .15uh to 36MH.

WHY

MAJOR C. R. TUBE MFGRS. RECOMMEND SYNTRONIC YOKES

Exceptional manufacturing uniformity. Achieved by unique pepperpot tube testing—the most comprehensive method known for precise measurement for spot uniformity . . . to attain extremely accurate focusing. For technical details, request ELECTRONIC INDUSTRIES reprint #6-57 from Syntronic Instruments, Inc.

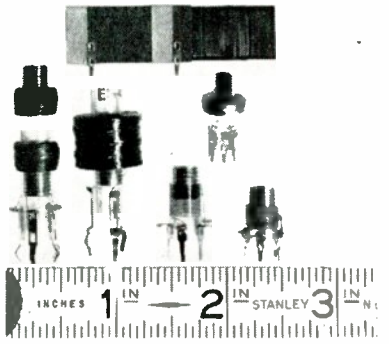
Mfg. of R.F. Coils for Radio—T.V.—Citizen band—Stereo—Missiles and Radar



Above designs from Production

New—In design and production.
—Subminiature designs with NO Loss of "Q."
—Small ferrite-plug in-Loop Antennas.
—Injection Molded forms used on Coils for Core Torque Control. Results in—Fine Tuning and Stability at no extra cost.

Get your needed designs and production from the *originators* of practically all present day Printed Circuit R.F. Coils. Our greatest compliment is that the entire trade copy us.

TOROTRON

designers and manufacturers of a complete line of

• TOROIDAL INDUCTORS • TOROIDAL TRANSFORMERS • WAVE-FILTERS • MAGNETIC AMPLIFIERS • STATIC INVERTERS • DECADE INDUCTORS

Our complete catalog of Toroidal Components includes:

TOROIDAL INDUCTORS. A complete standard line of Toroidal Inductors covering the frequency range up to 10 Megacycles. High Q characteristics for size and weight requirements of portable and airborne equipment. Inductance to 50 henry. Size from ⅛" ID to 8" OD. Inductance Tolerance ± 1%. Availability of units, **Open, Hermetic cased and epoxy Molded.** All units except open type are made to MIL-T-27 specification.

TOROIDAL TRANSFORMERS. Covering frequency range up to 10 megacycles.

FILTERS. Telemetering band-pass filters available for every channel ranging from 400 cps to 70,000 cps. and various bandwidths between 15% and 40%.

MAGNETIC AMPLIFIERS. Torotron manufactures an extensive line of magnetic amplifiers ranging from saturable reactors to fast response servo amplifiers.

STATIC INVERTERS. Torotron makes available a line of static inverters DC to DC—DC to AC. **Construction:** 1. Hermetically sealed. 2. Form (open) modular.

DECADE INDUCTORS. Hi precision decade inductors. Inductance Tolerance ± .25%. Inductance range from 1 Mh steps to 10 Hy steps. Hi Q up to 300.

Torotron also offers qualified engineering assistance, in designing to customer specification. Dept D

VARI-L®

ELECTRICALLY-VARIABLE INDUCTORS

The accepted means for non-mechanical control of inductance, reactance, and resonant frequency.

We have over seven years experience in this exclusive field. Let us assist you in the selection of a Vari-L unit suitable to your purpose.

STANDARD VARI-L CONFIGURATIONS

illustrated here include approximately 30 tried-and-proven designs of broad utility. All are encapsulated and hermetically sealed, often meet customer requirements as is, and are carried in stock. Their characteristics are tabulated below. In addition we have tailored some 200 "specials" to exact and varied specifications, including subminiature and printed-circuit types.

Send us your specifications for evaluation without obligation.

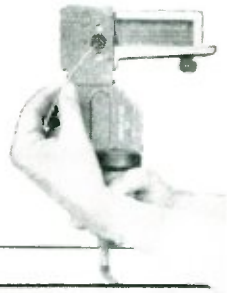
BURNDY READY REFERENCE
CONNECTION
SELECTOR CHART



Photographs of products are not to scale.	DEFINITIONS	TYPES	FEATURES
HYFEN®	Plug and receptacle connectors with crimp-type, snap-locked contacts.	Miniature rectangular, rack and panel, general purpose, modular, plug-in relay base, printed circuit -- pin and edge type, coaxial—miniature and standard, BANTAM, round.	Tool-installed crimped contacts are individually or gang connected and disconnected. Extremely versatile and reliable. Quality materials used for inserts and contacts which are normally gold plated. Modular concepts.
STAPIN®	Solid shank, solid barrel taper pins for wire terminations in variety of receptacles.	Sealed, terminal blocks, modular frames and inserts, coaxial, console mount, bussed, stacking strips.	Rugged solid construction provides protection against repeated and rough handling. Tool-installed STAPIN quality-controlled by tooling.
UNIRING® • HYRING® 	Compression sheath connector for terminating and grounding shielded or coaxial cable.	one-piece UNIRING, two-piece HYRING, both in complete size ranges.	Tool-installed, eliminates possible heat damage to conductors, dielectric, and insulation. Both available preinsulated or uninsulated. Conforms to MS25311 and MS25312 (AER).
MODULOK® • CRABLOK® 	Quick-disconnect or permanently-connected terminal blocks.	2- or 4-tier MODULOK. 5- or 15-bay CRABLOK.	Extremely versatile modular design. Reliable electrical contact in both quick-disconnect or permanent connection position. Tool-installed crimp-type contact tips.
INSULUG® • HYLUG®	Compression terminals, splices.	Round, fork, right angle, flag, high temperature insulated and uninsulated.	Hand, semi-automatic, and fully automatic tooling—with removable dies -- provide up to 1000 quality-controlled connections per hour.
WIRING SPECIALTIES	Cable hangers, pigtail splices, strip terminals.	NYLOCLIP® BURCAP® FINGRIP®	Compression connections, tool controlled. NYLOCLIP strong, light, environmentally resistant.

World Radio History

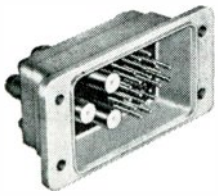
GENERAL CIRCUITRY AND QUICK DISCONNECT MS Series, MS Types, K Series. MS plugs meet MIL-C-5015; include environmental resistant types, and feature low cost, uniform quality, interchangeability, and wide variety of contact arrangements. A wide variety of shell sizes and types are available to meet all general-purpose applications. The K Series are lightweight, rugged, all-purpose plugs—have many of the features of the MS Series. The K line features a special Acme threaded coupling. Crimp snap-in contacts are available in some MS types.

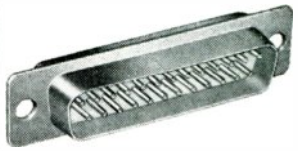
RACK/PANEL Dual panel rectangular plugs have a wide variety of contact arrangements and shell sizes. Rectangular shape increases insert area utilization, simplifies assembly, provides maximum flexibility for module or unit plug-in applications. Available in environmental resistant types; coaxial and high voltage contacts, solder or crimp snap-in.



AUDIO AND LOW LEVEL CIRCUITS P, XLR, XK, O, UA Series for all low level sound requirements. Full line of plugs for all requirements of microphone, radio, television, tape recorders, computers, control devices, and many other applications. In many shell sizes and contact layouts, coaxials. Latch-lock types, wall mounting, panel, locknut mounting, and adapter receptacles. Line includes the deluxe streamlined XLR Series.

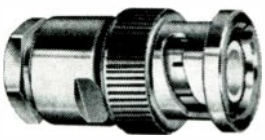
MINIATURE SERIES KQ/KR, KM, K-Miniature, DPA, DPX, Golden-D. *Circular Miniature Plugs* designed for aircraft, missile and other applications where space and weight are critical. Include environmental resisting, crimp snap-in contacts, quick-coupling devices, monobloc construction, hermetically sealed versions.

Miniature Rectangular Plugs meet weight and space limitations in rack/panel installations. Range from lightweight sub-miniatures to small plugs of great strength. Coaxial layouts, hermetically sealed versions, crimp snap-in contacts.



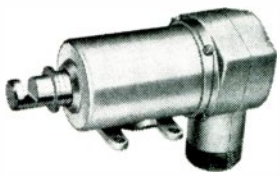
CANNON PLUGS FOR ANY APPLICATION OR ENVIRONMENT

HERMETICALLY SEALED Available in most popular plug lines. Includes the first Series approved to MIL-C-25955, which requires leakage rates of less than .001 micron cubic foot per hour (1.5×10^{-8} cc/sec.). Plugs for all hermetic applications—standard or custom designs, with some series designed to withstand extreme thermal shocks, temperatures from —100°F to 1000°F, pressures above 2000 psi.



COAXIAL RF SERIES Available in a wide variety of types from subminiatures to large cable applications. For use in thousands of military, industrial, and commercial applications. Meet extreme environmental conditions. Hermetically sealed versions, weight-saving aluminum versions available. Full line of RF plugs meets all requirements from ground based equipment through outer space.

UMBILICAL PLUGS AND PLUG/HARNESS SYSTEMS Designed for the specialized demands of missile launching; provides the utmost reliability in connections between complex electronic systems within a missile and a master control point or other ground systems. Compatible with any method of launching, any method of engagement or release. Plug/Harness systems are designed, manufactured, and tested as a unit under rigid, quality-controlled conditions in a separate, highly specialized facility. The ability to combine specified plugs and cables into one complete unit provides a single responsibility for performance of the complete plug/harness system—assures the highest reliability.



MAGNETIC DEVICES A wide range of magnetic actuating devices for military, industrial, and commercial applications. AC and DC solenoids; linear, rotary and reciprocating actuators for computers, business machines, environmental, and special design. Push, pull, Push-Pull; high temperature, potted, hermetically sealed. Broad power ranges, input voltages in 6, 12, 24, 36, 115, and 230 dc and ac.

For more than four decades Cannon has been solving critical plug problems for every conceivable military and industrial application. Our wide variety of plugs—more than 27,000 designs—are available to meet such problems of modern technology as *shock, vibration, acceleration, temperature, altitude, moisture,* and *miniaturization*...Cannon plugs are the standard of the industry for use in aircraft, missiles, ground support equipment, computers, data processing devices, business machines, radio, television, and many other standard and special applications. For additional information on the typical designs illustrated, or other types to meet your individual requirements, write to:

CANNON ELECTRIC COMPANY, 3208 Humboldt Street, Los Angeles 31, California

RELIABILITY DELIVERED

NEW
SUBMINIATURE
COAXIAL
R F CONNECTORS
SMALLEST, LIGHTEST, MATCHED IMPEDANCE SUBMINIATURE CONNECTOR AVAILABLE
MICON, new as a company, old in experience, makes available the industry's most extensive line of uniquely designed bulkhead, chassis, line and printed wiring board connectors of the 50 ohm screw-on type.

We, at MICON, have prepared an evaluation kit which is available on request.

World Radio History

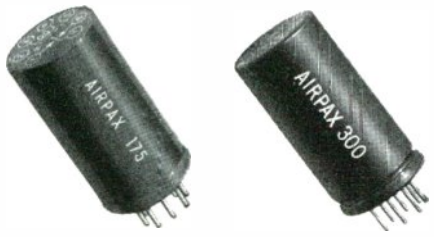
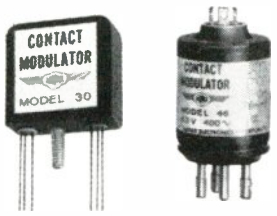
AIRPAX

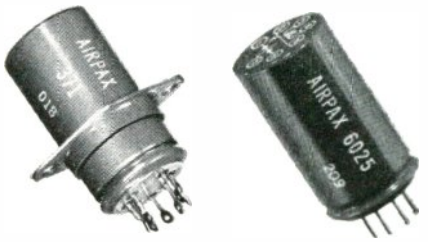
CHOPPERS
CIRCUIT BREAKERS
TELEMETRY SYSTEMS
MAGNETIC COMPONENTS



Miniature hermetically sealed electromechanical CHOPPERS for stabilized DC amplifiers used in computers, servos, bridges and control systems. TYPE 175 has 60 CPS drive; TYPE 300 uses 400 CPS drive.

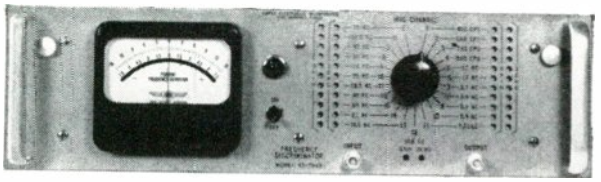


These tiny CHOPPERS have the same long-life reliability characteristics as their larger counterparts. MODEL 30 is for 60 CPS operation; MODEL 46 uses a 400 CPS drive.

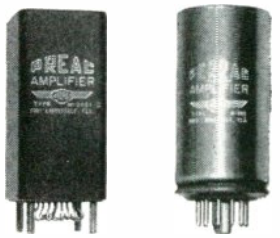


TYPE 371 uses center pivoted armature construction to permit operation under conditions of severe shock and vibration. TYPE 6025 is a transistor chopper with self contained drive transformer. Drive, 50 to 5000 CPS.

The MAGMETER® frequency detector delivers an output current directly proportional to input frequency with an accuracy of 0.1%.



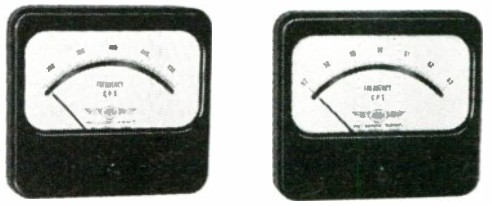
The CALIBRATOR series of frequency discriminators utilizes solid state components for long trouble-free life. Available in single and multi-channel units.



PREAC magnetic amplifiers are high sensitivity DC units with an extremely stable null. FERRAC instrument push-pull magnetic amplifiers have exceptional stability and linearity.

Miniature CIRCUIT BREAKERS of the magnetic type are available in ratings from 50 ma. to 15 amps.

Custom TRANSFORMERS are produced to exacting requirements. Rigid QC procedures assure highest reliability.



Expanded scale FREQUENCY METERS with an accuracy of 0.1% are completely self contained.

Illustrations are representative of the devices which Airpax produces. A complete line of choppers, both electromechanical and transistor types, cover every conceivable condition of use.

Telemetry equipment, employing solid state components, uses a single front panel switch in the multi-channel type to select each of the 23 IRIG information channels. The Airpax MAGMETER® frequency detector is the "heart" of these devices.

The circuit breaker line features both military and commercial types with or without isolated indicating circuits. Breakers are available in series, shunt and relay types and in ganged assemblies for 2 and 3 phase circuit protection.

ATR PRODUCTS FOR MODERN LIVING

ATR PLUG-IN TYPE PORTABLE INVERTERS*

A.C. HOUSEHOLD ELECTRICITY
Anywhere . . . in your own car!

Operates Standard A.C.
- Record Players
- Dictating Machines
- Small Radios
- Electric Shavers
- Heating Pads, etc.

In your own car or boat!

MODELS
6-RMF (6 volts) 60 to 80 watts. Shipping weight 12 lbs. DEALER NET PRICE $33.00
12T-RME (12 volts) 90 to 125 watts. Shipping weight 12 lbs. DEALER NET PRICE $33.00
*Additional Models Available

ATR "A" Battery ELIMINATOR

For Demonstrating and Testing Auto Radios—TRANSISTOR or VIBRATOR OPERATED!

Designed for testing D.C. Electrical Apparatus on Regular A.C. Lines—Equipped with Full-Wave Dry Disc-Type Rectifier, assuring noiseless, interference-free operation and extreme long life and reliability.

MAY ALSO BE USED AS A BATTERY CHARGER
MODEL 610C-ELIF . . . 6 volts at 10 amps. or 12 volts at 6 amps. Shipping weight 22 lbs.
DEALER NET PRICE $49.95
MODEL 620C-ELIT . . . 6 volts at 20 amps. or 12 volts at 10 amps. Shipping weight 33 lbs.
DEALER NET PRICE $66.95

AUTO-RADIO ATR VIBRATORS

By every test ATR Auto-Radio Vibrators are best! . . . and feature Ceramic Stack Spacers, Instant Starting, Large Oversized Tungsten Contacts, Perforated Reed, plus Highest Precision Construction and Workmanship and Quiet Operation!

There is an ATR VIBRATOR for every make of car!

Ask your distributor for ATR's Low Priced type 1400, 6 volt 4-prong Vibrator; and 1843, 12 volt 3-prong; or 1840, 12 volt 4-prong Vibrator. THE WORLD'S FINEST!

There is a trim plate kit for YOUR CAR!

ATR CUSTOMIZED KARADIO

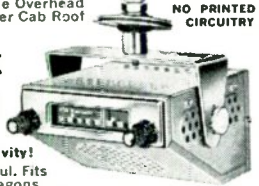
Vibrator-Operated with Tone Control

ATR KARADIO . . . is ideal for small import cars or compact American cars! Unit is completely self-contained—extremely compact! Powerful 8-tube performance provides remarkable freedom from engine, static, and road noises. The ATR Customized Karadio comes complete with speaker and ready to install. Can be mounted in-dash or under-dash—wherever space permits! No polarity problem. Neutral Gray-Tan, baked enamel finish. Overall size, 7" deep, 4" high, and 6½" wide. Shipping weight, radio set, 7 lbs.
Model K-1279—12 for 12V Dealer Net Price . $33.57
Model K-1279— 6 for 6V Dealer Net Price . . $33.57

Airplane Style Overhead Mounting under Cab Roof

NO PRINTED CIRCUITRY

ATR TRUCK KARADIO



Excellent Tone, Volume, and Sensitivity!

Compact, yet powerful. Fits all trucks, station wagons, most cars and boats. Just drill a ⅝ inch hole in roof and suspend the one-piece unit (aerial, chassis and speaker) in minutes. Watertight mounting assembly holds antenna upright. Yoke-type bracket lets you tilt radio to any angle.

Extra-sensitive radio has 6 tubes (2 double-purpose), over-size Alnico 5 PM speaker for full, rich tone. Big, easy-to-read illuminated dial. Fingertip tuning control. Volume and tone controls. 33-in. stainless steel antenna. Neutral gray-tan enameled metal cabinet, 7 x 6½ x 4 in. high over-all. Shipping weight 10½ lbs.
Model TR-1279—12A for 12V Dealer Net Price $41.96
Model TR-1279— 6A for 6V Dealer Net Price $41.96

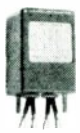
INSTRUMENT CHOPPERS

A component for every industrial and military application . . . mechanical, photo and solid state.

MICRO-SCAN RELAYS

Micro second switching of microvolt signals for data handling, transducer sampling and analogue computation.

INSTRUMENT TRANSFORMERS



A complete line of unique input and low power transformers designed for instrumentation circuits where accuracy, balance, precision with both electromagnetic and electrostatic shielding are required.

MINIATURE TRANSFORMER

Miniature and microminiature designs for all applications, industrial and military. Use the unique James transformer kits for design . . . the economical and convenient way to production models by James.

GIANT IN PERFORMANCE – MIDGET IN SIZE

PERFORMANCE PROVED UNDER PEAK OPERATING CONDITIONS

Designed to meet modern high performance standards of the most sophisticated electronic systems — the highly versatile Spacetronics components* have these important features —

- hermetically sealed
- perfectly balanced
- wiping action on contacts
- low thermal EMF's
- good shock and vibration characteristics
- low noise
- sub miniature size

*Manufactured and sold under license from Rawco Instruments, Inc

(1) Type D - SPDT, 60 and 400 CPS Spacetronics Chopper—Noise less than 5μv or less than 1μv selected. Contact arrangement is BBM.

(2) Type E - DPDT, 60 and 400 CPS Spacetronics Chopper—Same high standards of performance as Type D, as a DPDT unit in a grounded swinger operation.

(3) Spacetronics Polar Relay—This unique computer device has a reaction time of approximately 500 microseconds closing and opening. There are no electrical connections for current to flow when it is in its de-energized position. Current may be passed in either direction.

FOR COMPLETE SPECIFICATIONS CONTACT: SPACETRONICS INC. • P. O. BOX 12325 • FORT WORTH 16, TEXAS

World Radio History

VIBRATING CAPACITORS

A vibrating-reed type capacitance modulator used to measure currents as low as 10^{-16} amperes. Drift never exceeds ±0.2 millivolts per day, noncumulative. Thus it is ideal where stable performance without recalibration is required for periods of a month or more.

Please write for Catalog 523.

STEVENS INCORPORATED ARNOLD

QUALITY SINCE 1943

7 ELKINS ST., SO. BOSTON 27, MASS.

DC-AC CHOPPERS For 50/60/94/120 C.P.S.

These miniature Choppers are outstanding. Long life and flawless performance are assured by the exclusive Stevens-Arnold twin contact feature. Noise level is less than 1 microvolt into 100,000 ohms. There are twenty-two types, both single and double pole, all built to meet rigid commercial specifications.

Please write for Catalog 515.

DC DRIVEN CHOPPERS

For portable and transistorized instruments. A modification of our service proven AC driven type, these have a 94 cycle chopping rate to eliminate offsets in DC amplifiers and null-seeking equipment. Drive Unit operates from 12 volts DC.

Please write for Catalog 554.

MILLISEC RELAYS

Amazingly fast, from 200 microseconds to 1 millisecond. Available in both commercial and military models, single-pole and double-pole, with shielded or unshielded coils. They are factory sealed and may be mounted in any position.

Please write for Catalog 337

OSCILLATOR STABILIZERS

TUNING FORK Oscillator Stabilizers afford precise and economical frequency stabilization of vacuum tube or transistorized oscillators to provide accurate control tones for the operation of Resonant Relays. Available in the range of 50 to 1000 cps.

Please write for catalog 563.

RESONANT RELAYS

For low cost selective calling or remote control, use Stevens-Arnold TUNING FORK Resonant Relays. They operate only when energized at rated frequency and permit individual control of thousands of functions at the end of a cable pair or radio channel. Now miniaturized, they can be furnished in any frequency from 50 to 1000 cps.

Please write for catalog 563.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

World Radio History

GENERAL THERMOELECTRIC CORPORATION

GTC

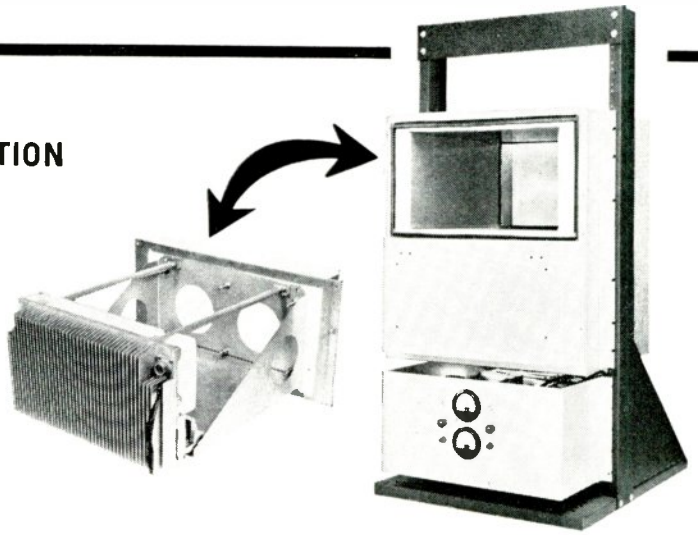
THE *BEST KNOWN* NAME IN

THERMOELECTRIC COOLING

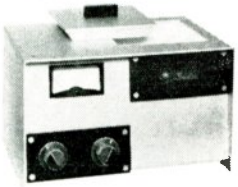
• For Military Electronics • Industrial Systems
• Scientific Instrumentation and Specialized Commercial Use

TEMPERATURE STABILIZATION CHAMBERS

An original GTC development that's filling the bill for special electronic applications where a stabilized temperature must be maintained over prolonged periods even though the outside temperature is considerably above or below the control point. Standard Frigistors are incorporated as required. Ideal for use with temperature-sensitive high-frequency devices. Critical components can be held to temperature variations of 1°C or less.



CONSTANT TEMPERATURE CONTAINERS



A wide range of temperature-stabilized enclosures employing Frigistors which afford temperature ranges from 125°C to −30°C within a 2° accuracy. Suitable for control of the temperature of liquids and air in medical, industrial and military electronics.

THERMO-ELECTRIC BAFFLES

Completely solid state baffles employing GTC Frigistors. Available for use with existing vacuum systems. Eliminate the need for conventional mechanical refrigeration equipment. Noiseless . . . no moving parts . . . no major maintenance. Power consumption small compared with freon types. Sizes range from 2 inches to 32 inches in diameter. Lower cost than most conventional cooling systems.

WATER-COOLED HEAT SINKS

GTC water-cooled heat sinks provide efficiencies greatly superior to heat sinks rejecting heat to air. They are ideal for microtome freezers, industrial instrumentation and general laboratory use.

For details, circle #334 on Reader Service Card

World Radio History

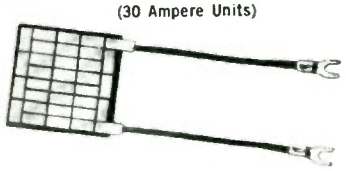
FRIGISTORS

Frigistors are special TE modules developed by GTC engineers for the cooling of heat-sensitive electronic components. They are mechanically rigid, compact, lightweight, fully integrated units and are designed for rugged environmental applications. For less rugged requirements, special foamed Frigistors are available which provide somewhat higher operating characteristics than shown in the adjoining table.

GTC FRIGISTORS (15 Ampere Units) Minimum Ratings Shown Throughout				
	F1	F4	F8	F32
COUPLES	1	4	8	32
△ T in air (no load)	56°C	55°C	55°C	50°C
Heat Pumping Capacity in Watts at 0 △T	0.75	2.5	5	20

HIGH POWER FRIGISTORS

(30 Ampere Units)

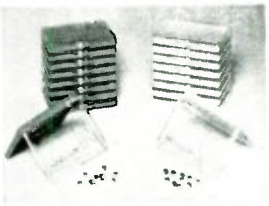


GTC also has available 30 ampere units with a △ T in the air (no load) of 64°C or better. Various combinations of couples are available and are nominally rated at 2 watts per couple at 0 △ T.

SPOT COOLERS FOR TRANSISTORS AND DIODES

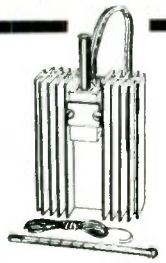
These special Frigistors are used for cooling stud-mounted diodes and power transistors. They add reliability and performance capability by extending temperature ranges by a wide margin.

GTC SPOT COOLERS Minimum Ratings Shown Throughout	F3 TC Transistor Cooler	F3 DC Diode Cooler
COUPLES	3	3
△ T in air (no load)	60°C	60°C
Heat Pumping Capacity in Watts at 0 △ T	4.25	4.25



NEELIUM/S

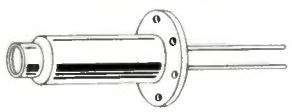
A unique GTC semiconductor material for TE cooling and heating. P and N types available from stock in 4 x 4 x 4 mm sizes and 6 x 6 x 7 mm sizes. Also available in a variety of sizes and shapes to specification and in cut or plate form. GTC P type material is sintered for rugged construction and easy handling. It can be machined and cut with ease. N type material is supplied in both zone-leveled and sintered forms. For maximum effective Z, a hybrid couple using sintered P and zone-leveled N material, is recommended. For rugged use where maximum Z is not critical, all sintered couples are available.



DEMONSTRATION UNITS

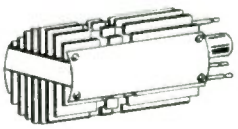
A basic scientific and educational tool for experimenters and students. Accelerates the understanding of semiconductor thermoelectric heating, cooling and power generation. A low-cost way to learn TE fundamentals. Completely self-contained! Power source — a 1½ volt battery! TE Demonstration Units for advanced experiments also available.

IR DETECTORS



Cool-down time approaches microseconds in these highly sensitive detectors. They're tiny, but rugged; withstand tremendous forces of acceleration; and require little power. Large quantity production available.

CRYSTAL COOLERS



These TE Crystal Coolers maintain a constant crystal temperature low enough to insure frequency stability, and increased life. Extreme flexibility of design permits meeting any specification, and easy interchange of components makes the units ideal for field maintenance. Coolers for multiple crystals also available.

LARGEST LINE

GTC's early start in the field has resulted in the largest and most diversified line of practical and efficient TE cooling units available anywhere. GTC devices are made to meet a variety of standard requirements and can be ordered in volume from stock.

MOST EXPERIENCE

GTC has pioneered thermoelectric cooling devices that are time-proven and currently in use by large military contractors and well-known manufacturers of industrial and commercial systems.

BEST ENGINEERING SKILL

GTC can custom-design thermoelectric cooling systems and devices that achieve the ultimate in performance. And you can ask for, and receive, sound engineering help . . . fast . . . free . . . accurate . . . with no strings attached.

LARGEST PRODUCTION FACILITIES

GTC occupies a large new plant in Princeton, equipped with R & D facilities . . . fast, modern manufacturing equipment and methods . . . highest quality control standards . . . and a large staff of TE engineers and technicians.

Magnetic Core LAMINATIONS

Motor laminations are produced to close specifications from both universal type and customer-owned dies of all types. Call for discussion of your requirements. Transformer laminations are available from stock in a wide variety of sizes and materials—including Supermu laminations with uniform magnetic characteristics and substantially higher permeability rejection levels.

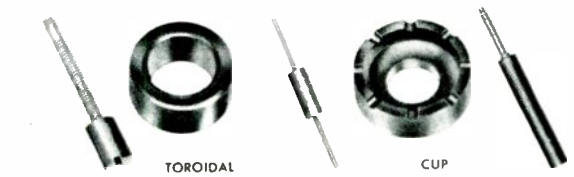
CUSTOM IRON CORES *to your specifications*



for Military, Micromodular and Special Applications

Never a problem in meeting Mil. Specs., when your "blue print" specifies Iron Cores from Permacor*.
Also, iron core environmental testing facilities available.

The Original **Engineered Economy Iron Cores** *for Commercial and Military Applications*

Ours alone . . . ENGINEERED ECONOMY® IRON CORES at low cost from stock. Over 14 types for most threaded and insert applications. As the world's largest producers of iron cores, we have the biggest, most expert engineering staff for designing, producing and recommending those custom iron cores that are best for your jobs.

Complete Engineering Service . . .

BULOVA

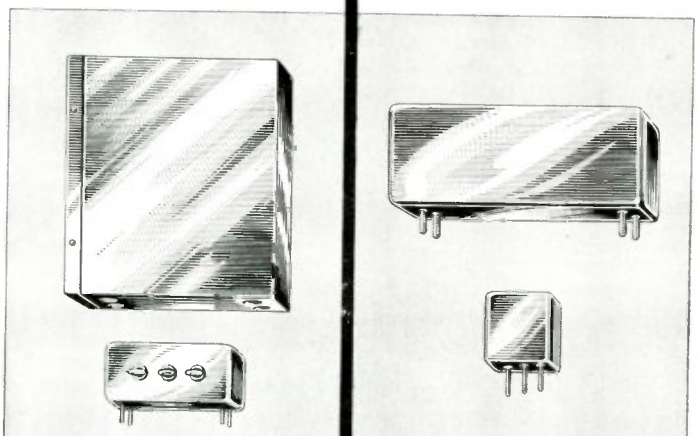
SYNONYM FOR QUALITY, RELIABILITY AND STABILITY!

Frequency control SYSTEMS AND OSCILLATORS .3 cps to 100 mc

Bulova frequency control systems and oscillators are custom-engineered for the most exacting military and industrial applications.

Bulova systems and oscillators span the frequency range from .3 cps to 100 mc and in stability ± 15 pp million without oven to ± 1 pp 10^9 with proportional oven control ...are available in either tube type or transistor construction.

They graduate in size from the MB-100 (1" x 1" x 2") to complete systems. The MB-100 compensated crystal oscillator assures single frequency output with a stability of ± 15 pp million from −50° C. to +90° C. without oven control. Complete systems may include power supply, oscillator, gated and resetting circuitry, binary stage, voltage regulator and pulse or power amplifiers



Crystal FILTERS 7 kc to 20 mc

Bulova crystal filters are designed to solve filtering problems at center frequencies with bandwidths of 0.01% to 8% and slope factors of 60/6 db as steep as 1.4 to 1.

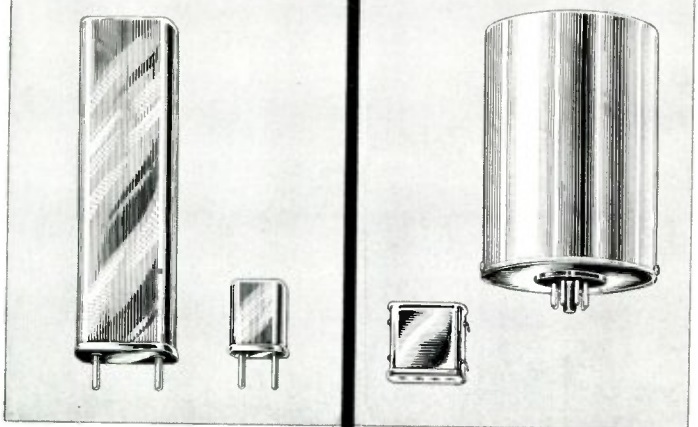
Bulova filters shave the frequency range from 7 kc to 20 mc, inclusive ...are available as bandpass, reject and single side band. They graduate in size from the 2E2 SM (1 7/16" x 1 15/16" x 1⅛") for frequencies of 175 kc through 20 mc to the OE6 (5½" x 3 1/16" x 3 5/64"), a single side band for frequencies of 7 kc through 500 kc.

CRYSTALS 2 kc to 100 mc

Bulova crystals are designed and produced for use wherever reliable, close-frequency control is essential.

Bulova crystals assure exacting control from 2 kc through 100 mc with 100 g shock resistance and 30 g to 2000 cps vibration resistance in most frequencies. They graduate in size from the HC-13/U (1 1/32" x 2 3/32" x 3") for 2 kc to the HC-18/U (.50" x .400" x .510") for 100 mc. The HC-18/U is now available to cover 450 kc through 1100 kc and 2 mc through 100 mc.

The majority of Bulova MIL Type crystals may be obtained in miniature holders.



OVENS

Bulova ovens are engineered to maintain ±.1° C. of operating temperatures so as to assure superior results in electrical stability of crystals, components and circuitry.

Bulova ovens graduate from the AM-100ED (external measurements: 3" diameter with a 7" maximum height; internal: 1.96" diameter with a 6" height) to the BHC-18-1 (external: 1 3/32" x 1 3/32" x 1¼"; internal 1 7/32" x ½" x 7/32"). The AM-100 maintains a temperature stability of ± .1° C.and is used for Bulova Type 74 glass crystal holders (Military Type HC-15/U), or complete systems. The BHC-18-1 holds temperature to ± 2° C.(−55° to +90° C.ambient) and has a capacity for a single HC-18/U plug-in type crystal holder or four crystal diodes, such as the IN658.

Complete information on all Bulova components and systems is available from your nearest Sales Representative, or by writing — *Department A-1376, Electronics Division, Bulova, 61-10 Woodside Ave., Woodside 77, New York.*

Bliley

THE STANDARD OF QUALITY FOR OVER 30 YEARS

Packaged Crystal Oscillators

Bliley CCO units are crystal controlled packages, complete with transistorized oscillator circuit and constant temperature oven. These compact plug-in units provide a high precision reference for use in counters, signal generators, lab standards and master oscillator systems. Standard models at 100 kc, 1000 kc, and 5000 kc as shown.

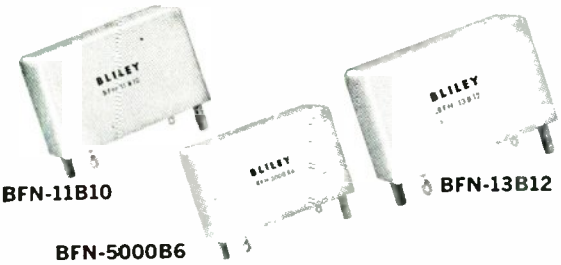
Bliley THE STANDARD OF QUALITY FOR OVER 30 YEARS

Crystal Filters 100 KC to 30 MC



Bliley crystal filters are custom engineered components that may be designed for a wide range of frequency and selectivity characteristics. Dependent upon shape factor and frequency range, bandwidths are obtainable from .01% to 8% of center frequency. Call upon Bliley for a qualified analysis and quotation on your crystal filter requirements. Some typical Bliley designs are shown in the following table.

TYPE	FREQ.	BANDWIDTH 6 db.	BANDWIDTH 60 db.	INSERTION Loss (Max)
BFN-0455B2	455 kc	4.4 kc	16 kc	5 db
BFN-2215B3	2215 kc	300 cycles	1100 cycles	3 db
BFN-2215B4	2215 kc	3 kc	12 kc	3 db

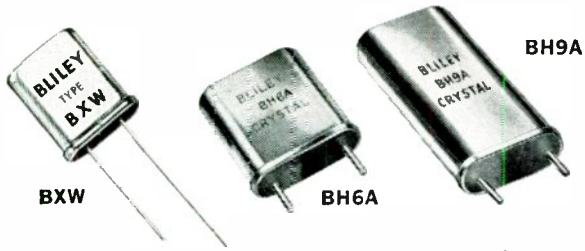
BFN-13B11	13 mc	15 kc	27 kc	6 db
BFN-13B12	13 mc	30 kc	55 kc	6 db

General Communications Crystal Units



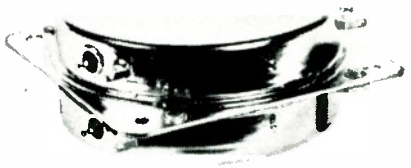
Bliley offers a complete selection of MIL type crystal units. Commercial equivalents and variations are available from 2kc to 150mc.

MIL HOLDER	BLILEY HOLDER	FREQUENCY RANGE
HC-6/U	BH6A	200kc-150mc
HC-13/U	BH9A	2kc-200kc
HC-18/U	BXW	3mc-150mc

Ultrasonic Delay Lines .75 to 4500 Microseconds

Bliley Ultrasonic Delay Lines for the range from .75 microseconds to 4500 microseconds are custom engineered for most applications. Exceptional performance characteristics such as low loss, low temperature coefficient, attenuation of spurious, and integral temperature control are factors resolved in the final design. Design parameters shown in the following tables are intended for general guidance:

DOUBLE ENDED RINGING LINE



TWO MATCHED DELAY LINE

SHORT DELAY LINES

Group	Freq. Range (mc)	Delay Time Range (Microseconds) Ringing Single Ended	Delay Time Range (Microseconds) Absorber Double Ended	Max. Temp. Coeff. (ppm/°C.)	Bandwidth as percent of carrier (with 93 ohm termination)	Loss level (db) with different termination 50 ohm	93 ohm	1000 ohm
A	5-60	.75-60	.75-30	—100	30		45	28
	60-100	.75-60	.75-30	—100	15		50	33
B	5-60	.75-40	.75-20	+85	35		43	27
	60-100	.75-40	.75-20	+85	15		48	31
C	5-60	.75-40	.75-20	+20	35		43	27
	60-100	.75-40	.75-20	+20	15		48	31
D	5-30	1.00-60	1.00-30	—100	40 (50 ohm term.)	12		
E	5-30	1.00-40	1.00-20	+20	40 (50 ohm term.)	12		

LONG DELAY LINES

Long Delay Lines may be specified with carrier frequencies in the range from 10 mc to 40 mc. Spurious signal attenuation shown in the following table applies only to frequency range 25-40 mc. *See footnote.*

GROUP	DELAY TIME RANGE (microseconds)	UNWANTED SIGNALS (db DOWN) Spurious	3rd Time	GROUP	DELAY TIME RANGE (microseconds)	UNWANTED SIGNALS (db DOWN)
A	30-400	50	40	D	500-1600	55
B	200-700	55	45	E	600-2000	55
C	300-1400	60	55	F	1000-2700	50
				G	600-3300	45
				H	1300-4500	45

Note: Best attenuation of spurious signals is achieved in medium delay time ranges and at higher carrier frequencies. Dependent upon loss level requirements, bandwidth may be estimated from 35% to 40% of carrier frequency. Loss and bandwidth characteristics are interdependent and are controlled by choice of terminations, carrier frequency and transducer capacity.

BLILEY ELECTRIC CO. UNION STATION BUILDING **ERIE, PA.**

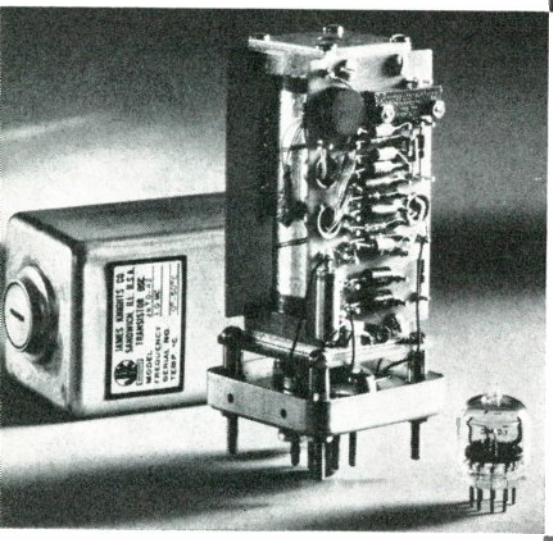
World Radio History

JK SULZER FREQUENCY STANDARDS

Fully-transistorized FS-1100T Frequency Standard: Normal output is 1.0 mc. and 100 kc. simultaneously with 1 volt available to 50 ohm loads. Provides minimum stability of 5 x 10^{-10} per day after initial aging. Features double proportional control oven.

Companion FS-1100TP Power Supply: Operates on 115 V. AC. Features internal nickel-cadmium battery for stand-by power up to 12 hours. Permits transport of operating unit.

Supplemental FS-1100TD Frequency Divider: All sub-harmonics, including the commonly used 1000 cycles, 400 cycles, 60 cycles, and down to as low as .01 pulse per second, have the same order of stability: 5 x 10^{-10}/Day or better.



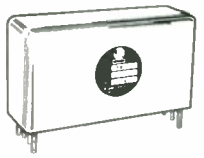
JK OSCILLATORS

Compact, precision plug-in signal sources. 60 cps through 75 mc. Sine and square wave outputs. Stabilities 1 x 10^{-6}/Day to 5 x 10^{-9}/Day. Silicon transistors. A wide range of models including the following:

JKTO-43: For frequency stability of 5 x 10^{-9}/Day, under normal conditions. Transistorized proportional control oven, hermetically-sealed, shock and vibration resistant. 100 kc. to 50 mc.

JKTO-23: Meets applicable aircraft equipment specifications with maximum frequency deviation of 2-5 x 10^{-8}. Long-life oven. Hermetically-sealed. 800 kc. to 75 mc.

JKTO-9: Popular, compact, general-use, wide-range oscillator. 1 x 10^{-6}/Day class. 20 kc. to 10 mc.



JK CRYSTAL FILTERS

Compact, rugged, hermetically-sealed and stable: Frequency Range 1 kc. to 40 mc., available to 150 mc. Band widths as narrow as .01%, and up to as high as 10%, for certain frequencies.

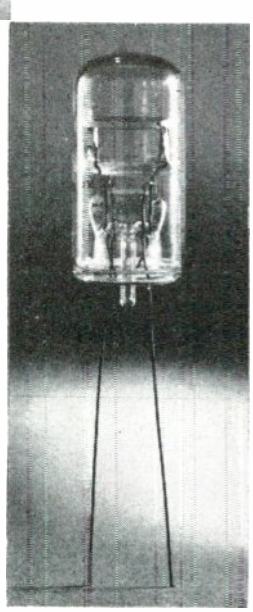
JK CRYSTALS

Precision Glasline Crystals: From 1 kc. to 150 mc. Designs for frequency standards available at 1 mc. to 5 mc. (with stabilities of 1 x 10^{-9}) and at 100 kc. (with stability of 1 x 10^{-8}).

Military Crystals: Meet all requirements outlined in specifications—MIL-C-3098B, MIL-C-16C, MIL-C-17167, etc.

Standard Crystals: Manufactured to a variety of specifications. Used as replacement crystals and as original equipment components.

Amateur and Citizens' Band Crystals: For transmitters, receivers, calibrators, etc.



JK THERMYSTALS

Precision-matched crystal-and-oven combinations featuring maximum stability, accurate calibration and high "Q". Types JK023T and JK026T available from 35 KC through 75 MC. Typical frequency tolerance in 25°C ambient:

At 100 KC = 0.25PPM
at 1000 KC = 0.10PPM

Write for Technical Literature

For details, circle #349 on Reader Service Card

JK CRYSTAL AND COMPONENT OVENS

Versatile, precise, compact: Available with snap-action or glass-sealed thermostats, or proportional control, depending on application. Wide range of sizes and shapes, for virtually any requirement.

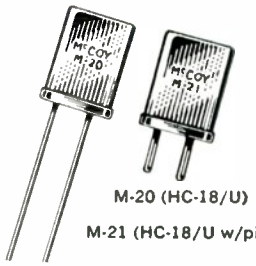
McCoy
CRYSTALS & CRYSTAL FILTERS

Regardless of its size, type, or frequency any crystal bearing the name McCoy can be relied upon to deliver the ultimate in frequency control despite wide temperature variations and extreme conditions of shock and vibration.

M-1 (HC-6/U)

METAL ENCASED STANDARD SIZE AND MINIATURE CRYSTAL UNITS

shown actual size



M-20 (HC-18/U)

M-21 (HC-18/U w/pins)

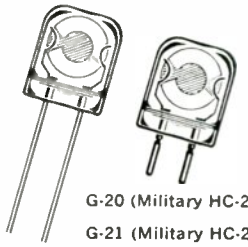
The crystals that made the name of McCoy a synonym for quality. Metal encased, HC-6/U size is available in frequencies from 500.0 kc to 200.00 mc.

Fills the need for miniature crystals in frequencies from 2.5 mc to 200.0 mc. Meets specs MIL-C-3098B and ARINC No. 401.

G-1 (Military HC-27/U)

ALL GLASS STANDARD SIZE AND MINIATURE CRYSTAL UNITS

shown actual size

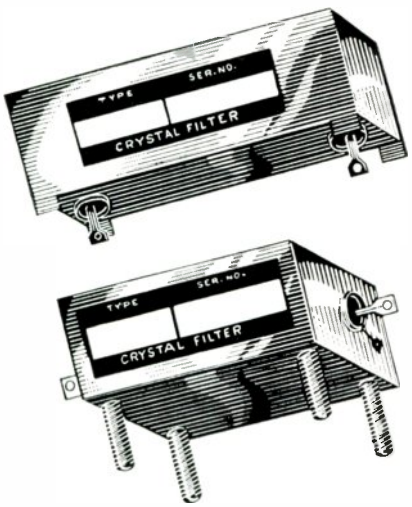


G-20 (Military HC-26/U)

G-21 (Military HC-29/U)

This vacuum sealed, hard glass crystal unit possesses all of the quality features for which the McCoy M-1 is so famous. It has long term frequency stability five times better than the conventional metal types. Available in frequencies from 500 kc to 200 mc.

This vacuum sealed, hard glass crystal unit meets the new CR-73/U and CR-74/U specifications. It has long term frequency stability five times better than the conventional metal type. Available in frequencies from 5000 kc to 200 mc.



CRYSTAL FILTERS

Our many years experience in designing and producing top quality oscillator crystals have enabled us to develop and produce filters of equal desirability. Current production includes filters in the 1.0 mc to 30 mc range, with bandwidths of .01% to 4.0% of center frequency. A number are available without costly design and prototype charges.

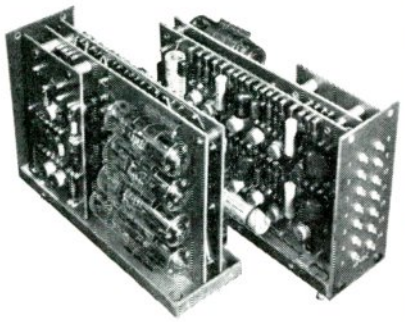
REEVES-HOFFMAN

FREQUENCY SOURCES, CRYSTALS, OVENS, FILTERS



PACKAGED OSCILLATORS

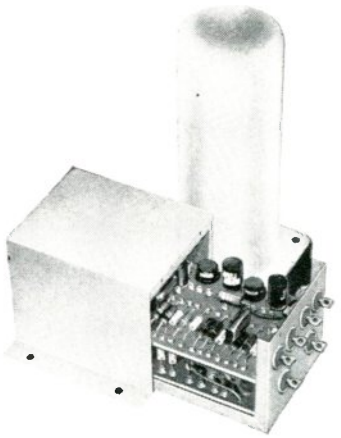
TRANSISTORIZED AND HARD TUBE TYPES of Reeves-Hoffman packaged oscillators are available in a frequency range from 100 cps to 100 mc. Stability is up to 1 part in 10^9. Packaged to your specifications.

PRECISION FREQUENCY STANDARDS have a basic frequency of 5 mc and are available with auxiliary circuitry for division to 100 kc, 1 mc and 10 mc. Stability is up to 1 part in 10^9 per day. Packaged to your specifications.

CRYSTALS

STANDARD TYPES of Reeves-Hoffman crystals, for all commercial and military applications, are available in a frequency range from 1 kc to 100 mc. Hermetically sealed in metal holders.

PRECISION TYPES of Reeves-Hoffman crystals, for use in high precision oscillators and secondary frequency standards, are available in a frequency range from 1 kc to 5 mc. Hermetically sealed in glass holders with standard radio tube bases.



OVENS

OVENS for precise temperature control are available in three types:

PROPORTIONAL CONTROLLED, for precise frequency standards, hold within 1/100th of 1° C at any fixed ambient.

THERMOSTATICALLY CONTROLLED, for high reliability requirements, hold within 1/10 of 1° C at any fixed ambient.

SNAP-ACTION CONTROLLED, for rugged military requirements, hold within 1° C at any fixed ambient.

FILTERS CRYSTAL FILTERS are available in a frequency range from audio to 30 mc.

Compact, rugged and highly reliable Reeves-Hoffman components are available in standard types or will be designed and manufactured to your specifications.

Most units can be designed to withstand up to 10 g at 5 to 2000 cps. Write for complete details.

PCA

MAGNETIC COMPONENTS

-designed for reliability
-built for reliability
-tested for reliability

Designed to meet the industry's most critical requirements for reliability, PCA's wide varieties of Delay Lines, Pulse Transformers and Filters are available from stock or may be obtained on special order, with a minimum of lead time, to meet the most stringent military or commercial applications.

Our staff of engineers, embracing some of the country's foremost experts in the field of pulse techniques, is at your disposal for the custom manufacturing of: distributed constant delay lines, lumped constant delay lines, pulse transformers, transistor transformers, toroids and filters.

Write us direct or see your nearest PCA representative.

DELAY LINES

Designed and Built
***by* Forbes and Wagner**

Stock Distributed Constant Lines with a delay to rise time ratio of up to 10 to 1.

Stock Lumped Constant Lines with a delay to rise time ratio of up to 50 to 1.

Custom designed units with a delay to rise time ratio of up to 150 to 1.

Stock Delay Lines range from 10 nanoseconds to 5 milliseconds delay.

Fixed and Variable Delay Networks to customers specifications.

Catalog of stock units available approximately September 15.

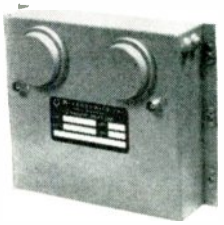
ULTRASONIC DELAY LINES



MICROSONICS Inc.

GENERAL—Delay .4 to 10,000 μsec at frequencies from 10 to 400 mc. Wide bandwidth and low spurious response for excellent pulse reproduction and dynamic range.

SPECIAL DESIGN—Designs available for minimum size and weight using folded construction. Dual channel lines operating at different frequencies with separate input and output transducers. Tapped delay lines to provide trigger channels which precede the signal channel.

TEMPERATURE CONTROL—Various designs are available for temperature control to provide multiple delay lines matched to nanoseconds in accuracy.

MAGNETO-STRICTIVE—Featuring compact and reliable designs with delays from 5 to 10,000 μsec, for information storage up to 1 mc.

SYSTEMS USING MICROSONICS DELAY LINES:
ASR-2, 3, 4, 5; UPS-1; FPS-30; SPS-38; SPS-6; ARSR; CPN-18; HAWK; APQ-72; MPS-23 etc.

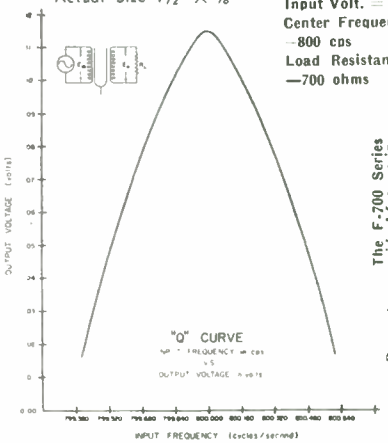
High Precision Tuning Fork Resonators for FILTERS

Actual Size 1½" × ⅝"

F-700 Series
Temperature Range —55°C to 100°C
Frequency Accuracy in %
F-700 —.2
F-701 —.1
F-702 —.05
F-703 —.025
Test Conditions: Input Volt. = 4v. Center Frequency —800 cps Load Resistance —700 ohms



The F-700 Series Resonators are ideal for use in audio oscillators and filters.

ADVANCED POWER SOURCES

THERMO ELECTRON, first in thermionic direct energy conversion has achieved noteworthy breakthroughs in this field. Typical of the thermionic generators in the development stage are:

- A 200-watt solar unit
- An isotopic fueled unit
- A 200-watt gas-heated unit
- A 45-watt gasoline heated unit

For further information regarding THERMO ELECTRON'S capability in research, development and manufacture of direct energy conversion systems contact Mr. Lawrence T. Sullivan, Business Manager.

World Radio History

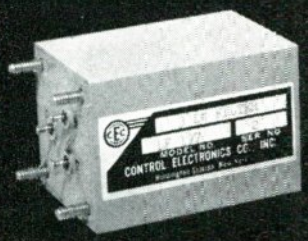
CONTROL ELECTRONICS' BUYERS' GUIDE

C.E.C. has for years been engaged in the design and production of quality components and systems for both military and industry. A member of our engineering group will be happy to meet with you on any problems you now face.

FILTERS & TOROIDS

BF-139

45 mc band pass filter—3 db bandwidth ≅ 2.5% center freq—40 db rejection at $2F_o$ and $0.5F_o$—input and output impedance 1500Ω—Hermetically sealed in accordance with applicable MIL specifications—Dimensions: 4½" x 2" x 2½"



LF-197

3000 cps low pass filter—3 db @ 3000 cps—40 db @ 4000 cps—Attenuation at other frequencies specified—Input and output impedance 10,000Ω—Dimensions: 1⅜" x 1⅜" x 2⅜"

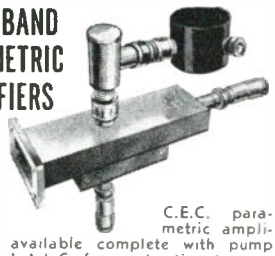
BF-128

45 kc resonant circuit—Max 3 db bandwidth: 4500 cps—Entire package requires only 0.4 cubic inches—Units available from 20 kc to 100 kc—Source impedance 3000Ω—Dimensions: 5/16" x 1⅛" x 1"

Hundreds of versions of the units shown as well as many other types of filters are offered by C.E.C. Our engineering group will be happy to meet with you and discuss your particular needs.

MICROWAVE COMPONENTS AND INSTRUMENTS

BROADBAND PARAMETRIC AMPLIFIERS



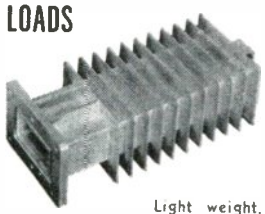
C.E.C. parametric amplifiers are available complete with pump A.F.C. and A.L.C. for application to your system at frequencies from U.H.F. to K_u Band.

Your particular requirements can be satisfied merely by minor modifications of our existing designs.

WAVEGUIDE AND COAXIAL LINE BANDPASS FILTERS

C.E.C. offers a large selection of standard waveguide and coaxial bandpass, low pass, and high pass filters. Frequencies range from 100 mc to 60,000 mc. Higher frequencies on special order. Custom designs can be made to your specifications.

DUMMY LOADS



Light weight, high-power waveguide and coaxial dummy loads. Complete line available covering all waveguide and coaxial line sizes.

C.E.C. also has available—

Rotary Vane Fixed Attenuators, Tunnel Diode Amplifiers, Mixers, Thermistor Mounts, Power Meters and Microwave Duplexers and Multiplexers.

A representative of our Microwave Division will be glad to discuss your specific requirements.

DELAY LINES

ILLUSTRATED: CODING TYPE 20.3μsec

LUMPED CONSTANT
FIXED & VARIABLE

5 millimicro sec to .1 secs
Impedance to 20,000 Ω
Bandwidth to 250 mc

DISTRIBUTED CONSTANT
FIXED & VARIABLE

Delays to 30 μ sec
Impedance to 10,000 Ω
Bandwidth to 20 mc

MAGNETOSTRICTIVE
FIXED & VARIABLE

2-10,000μsec

Also available are driver & output circuits for the reshaping of pulses.

Numerous versions of the above models as well as a capability to meet all specifications enables C.E.C. to consistently supply the needs of industry. Our engineering staff is always at your service. Write today for complete literature on our product line.

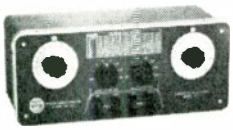
ALLISON LABORATORIES
Audio Frequency Test Instrumentation



Series 2 Filters Usable as low-cutoff, high-cutoff or band-pass units. Continuously adjustable bandwidth, 1 cycle to 672 KC.

Unique, continuously-variable passive filters of every type. Noise generators, Octave Band analyzers and equalizers, Band-Elimination Filter Sets. Extremely high rejection, smooth, flat-topped characteristics.

SPECIALISTS
Designers and Manufacturers of Proven VHF, UHF, MICROWAVE:
• Low & High Pass Filters
• Band Pass & Band Reject Filters, Fixed & Tunable
• Multiplexers, Fixed & Tunable
• Power Dividers
We can help you with your RFI problems.
Please write or call for additional information or literature.
ADAMS-RUSSELL CO., INC.
200 Sixth Street Cambridge, Mass. UNiversity 8-8040

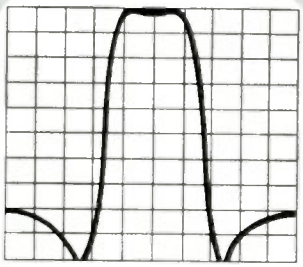
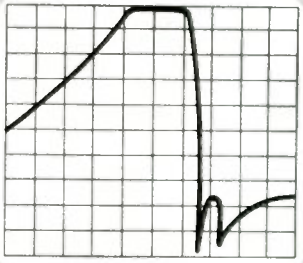
FROM CRYSTALS TO "BLACK BOXES" HEEMCO OFFERS 3-SIGMA RELIABILITY



A. CRYSTAL BANDPASS FILTERS



B. SINGLE SIDE BAND CRYSTAL FILTERS

The 3-sigma reliability for which Heemco products have long been recognized is available not only in crystals, but in filters and frequency sources as well as all types of associated circuitry and "black boxes".

CRYSTALS

Heemco crystal units, both standard and high vibration types, are available from 400 cps up, to fill a wide variety of commercial and military requirements.

FREQUENCY SOURCES

From standard designs, Hill Electronics custom designs and manufactures frequency sources to your particular requirements. Frequencies range from less than 1 cps to above 100 mc. Sizes range from $\frac{3}{4}$"x$\frac{3}{4}$"x1$\frac{1}{2}$".

Specifications for a typical standard unit are:

FREQUENCY: from 150 cps up

OPERATING TEMPERATURE: −65 to +125°C

FREQUENCY ACCURACY: ±.001%

VIBRATION: 5 to 2000 cps at 20g

SHOCK: 100g

SIZE: 2"x2"x4"

ONE OF HILL ELECTRONIC'S RECENT DEVELOPMENTS IS A 3-PHASE FREQUENCY SOURCE, SPECIFICATIONS FOR WHICH ARE AVAILABLE UPON REQUEST.

FILTERS

A. CRYSTAL BANDPASS FILTERS

Center frequency: 400 cps to 10 mc
Band Width: .01% to 13% of center frequency
Selectivity: Ratio of 60db to 6db band widths as steep as 1.4:1
Insertion loss: Usually less than 6db for wide band filters and less than 3db for narrow band filters
Wide Impedance Range
Attenuation: As much as 80db
Passband Variation: ±½db

B. SINGLE SIDE BAND CRYSTAL FILTERS

Center frequency: 400 cps to 10 mc
Band Width: .6% to 10% of center frequency
Steep Side Slope: As steep as 1.0026:1
Wide Impedance Range
Attenuation on steep side: As much as 60db
Passband Variation: ±1db

C. CRYSTAL NOTCH FILTERS

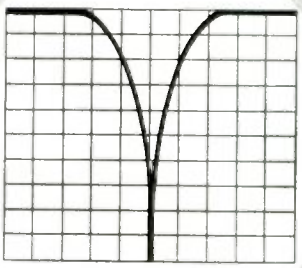
Center frequency: 400 cps to 10 mc
Band Width at 6db: .01% to .8% of center frequency
Insertion loss: Usually less than 3db
Attenuation in the notch: As high as 60db
Passband Variation: Less ±1db

D. CRYSTAL DISCRIMINATORS

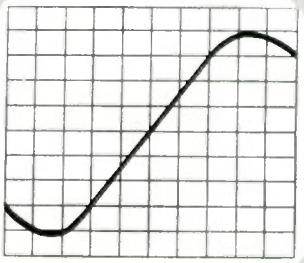
Center frequency: 400 cps to 10 mc
Band Width (peak to peak): .01% to .4% of center frequency
Wide Impedance Range
Output Voltage: Up to 20 volts peak to peak

E. "COMB" SETS

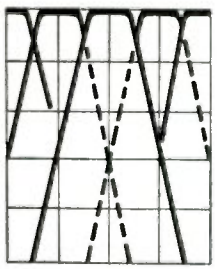
Because of rigid quality controls and long experience in the design and manufacture of our own crystals, we have been particularly successful in production of "comb" sets.



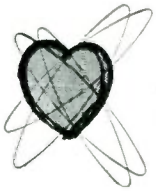
C. CRYSTAL NOTCH FILTERS



D. CRYSTAL DISCRIMINATORS



E. "COMB" SETS



Hill Electronics specializes in the design and manufacture of "black boxes" which utilize frequency sources and/or filters.

SELECT FROM THE LARGEST AND MOST COMPLETE LINE OF CRYSTAL FILTERS IN THE INDUSTRY

ITEK CRYSTAL FILTERS AND DISCRIMINATORS

SYMMETRICAL BANDPASS

MODEL NO.	CENTER FREQUENCY	BANDWIDTH 6 DB	BANDWIDTH 60 DB
100KPA	100Kc	50cps	200cps
2215KA	2215Kc	2.8Kc	12Kc
2215KB	2215Kc	250cps	1000cps
9MA	9Mc	3Kc	12Kc
10MA	10.7Mc	30Kc	60Kc
10MB	10.7Mc	15Kc	30Kc
10ME	10.7Mc	6Kc	15Kc
10MF	10.7Mc	3.5Kc	10Kc
13MA	13Mc	30Kc	54Kc
13MB	13Mc	15Kc	27Kc
30MJ	30Mc	40Kc	125Kc
30MK	30Mc	25Kc	62Kc
30MP	30Mc	5Kc	15Kc

Itek Bandpass Crystal Filters are widely used in commercial and military mobile FM receivers, spectrum analyzers, doppler radar, FSK systems, TRF receivers and other equipment requiring high selectivity and stability.

SINGLE SIDEBAND

MODEL NO.	CENTER FREQ.	SIDEBAND	PASSBAND	MINIMUM ATTENUATION
100KUC	100Kc	upper	300 to 6000cps (2db)	60db
100KLC	100Kc	lower	300 to 6000cps (2db)	60db
3MUA	3.2Mc	upper	300 to 3000cps (3db)	40db
2MUA	2Mc	upper	300 to 6000cps (2db)	60db
2MLA	2Mc	lower	300 to 6000cps (2db)	60db

Itek Single Sideband Filters are recognized for their rapid carrier and adjacent sideband cut-off characteristics. These Crystal Filters simplify SSB generation by reducing the number of frequency conversions.

CRYSTAL DISCRIMINATORS

MODEL NO.	BANDWIDTH	CENTER FREQ.	IMPEDANCE OHMS
13M-DM	50Kc peak to peak	13Mc	Input 10K Output 500K
10M-DC	50Kc peak to peak	10.7Mc	Input 10K Output 500K

Itek Crystal Discriminators are used in the construction of high-frequency, low distortion FM detectors at the first IF. The extreme stability of crystal discriminators makes them ideal for use in high-frequency AFC circuits.

ITEK CUSTOM FILTERS

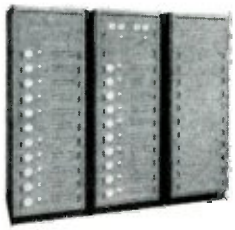
More Itek Crystal Filters of different models have been designed and produced than any other make. The experience acquired in producing tens of thousands of crystal filters can be used to your advantage. If your requirements differ from those met by Itek Stock Filters, send us your specifications for center frequency, bandwidth, selectivity, and impedance level. Our proposal will be submitted promptly.

ITEK NEWLY DEVELOPED CRYSTAL DEVICES

VOLTAGE CONTROLLED CRYSTAL OSCILLATORS

Itek "VCXO" Voltage Controlled Crystal Oscillator (Model 10MWA shown with cover off) provides greater stability, percentage deviation and linearity than similar devices offered in the past. These characteristics make VCXO especially suitable for FM generation and frequency control circuits.

SPECTRUM ANALYZERS



Itek Spectrum Analyzers with as many as 300 channels or more have been designed and produced. Operating in real time, these Analyzers can be used for precise audio analysis, missile tracking, and frequency monitoring. Built-in programmers control the rate and deviation of scan. Solid-state circuitry and parallel output channels insure maximum reliability.

OTHER ITEK ELECTRO-PRODUCTS

V.T. and Solid State **ULTRA STABLE OSCILLATORS** with guaranteed stability of 5 parts in 10^{10} per day, and V.T. and Solid State **FREQUENCY MULTIPLIERS** and **DIVIDERS.**

Custom Designed **FREQUENCY SYNTHESIZERS** for Transmitters and Receivers from 10KC to 50MC.

Ground, Airborne and IRIG **TIME CODE GENERATORS** for binary coded decimal timing signals.

Universal **MAGNETIC TAPE SEARCH UNIT** for automatic tape search on basis of time indices previously recorded.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

World Radio History

ORTHO COMPONENTS FOR DEFENSE AND INDUSTRY!

of Ortho Filter Corporation

TOROIDS — In addition to standard toroid features, O. F. C. units have: • Winding to minimize distributed capacity. Coil may be used at higher frequencies with higher "Q" factors. • Winding to inductance value on self-calibrating winding equipment yielding 1% units as standard tolerance at no cost premium for core calibrating, etc. • Availability of waxed, encapsulated, encased or taped units • Complete line of stock core sizes. Fast delivery on special orders • Facilities for winding from #6 to #50 AWG wire.

VARIABLE RF ATTENUATORS — These rotary adjustable variable attenuators are extremely accurate over wide frequency range. Available as individual unmounted units or in various combinations on rack-mounted panels, featuring: • Gold contacts • Resistive networks that function from DC to 250 MC • Each resistor mounted in cavity. This eliminates reactive components over the unit's useful frequency range • Conservatively rated. Guaranteed for full year under normal conditions.
SWR at 100 MC 1.01 max. Available .01, .1, 1.0 and 10.0 db/step.

MAGNETIC AMPLIFIERS—Built to customer specifications, Ortho Filter's high voltage and high temperature units feature: • Use from microwatt to kilowatt ratings • Special test procedures to insure excellent balance and minimum null voltages • Tape wound toroids and cut cores stacked to facilitate low cost prototypes promptly • Controlled winding techniques that guarantee uniformity with respect to distributed capacity and leakage inductances.

ANTENNA FILTERS • Cutoff frequency range up to 450 MC • Attenuation of 40 to 90 db over stop band • Insertion loss less than 1.0 db over entire pass band • VSWR less than 1.5 over entire pass band • Designed to your size, weight, termination, power and impedance specifications • Slope of cutoff 60 db at 1.2 of cutoff frequency.

FILTERS AND NETWORKS — Complete line of passive and active filters for use from DC to 1000 MC. LC and crystal types manufactured to customer requirements. Advanced design methods permit rapid delivery of prototypes using minimum circuit elements. Construction in accordance with MIL-F-18327A.

om Ortho Magnetics Inc.

Transformers

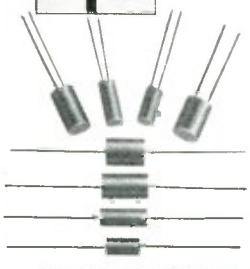
Complete facilities for all types of power and communication transformers. Ortho Magnetics specializes in balanced, hybrid, modulation and bridge transformers. Open frame, encapsulated and metal encased construction to all grades of MIL-T-27A. Provisions for in-plant testing.

orei Ortho Reliability Environmental Laboratories Inc. Test Facilities

Environmental test facilities for high and low temperature, shock, vibration and humidity. Life testing racks for resistors, capacitors and iron core components. Tests conducted in accordance with applicable military specifications.

opr Ortho Precision Resistors Inc.

Wire Wound Resistors



Specializing in the production of stable, reliable, precision wire wound resistors. Resistance change of only a few parts per million per year. High reliability with accuracies from 0.001% to 1.00% are available. Stock resistors are available with either axial or radial leads. Special terminals upon request.

RESISTANCE RANGE ____ 0.1 ohm to 5 megohms
WATTAGE RANGE ____ 0.1 watt to 2 watts
STANDARD T. C. ____ ±5 PPM above 100 ohms
SPECIAL T. C. ____ upon request

Matched sets, dividers, networks and AC resistors available

oc Ortho Crystal Inc.

Complete range of crystal filters from 1 KC to above 30 MC. Single sideband, band pass and band elimination crystal filters.

Write for complete technical data.

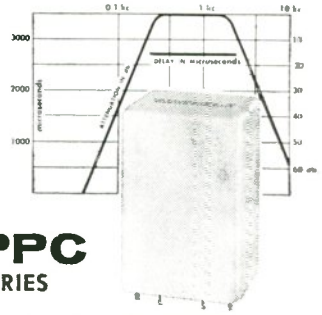
DELAY DISTORTIONLESS

WIDEBAND FILTERS



PPC SERIES

In the all-new SEG PPC Series, we have developed new techniques for eliminating phase and delay distortion in low, high or band-pass filters.

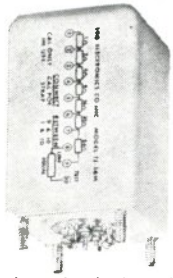
Here are typical specifications

Band width (3 db pts.)	270 to 2000 cps.
Ripple	±0.2 db
Insertion Loss	2 db Max.
Input impedance	600 ohms
Output impedance	600 ohms
Delay variation in passband	±2%
Size	3" x 3½" x 5"
Weight	5 lbs.

Hermetically sealed
Application: Data transmission

LINE EQUALIZERS

TEM SERIES



Data transmission through telephone lines has been increasing in importance constantly. The inherent reliability and freedom from interference of this transmission medium makes its use almost mandatory despite the amplitude and delay distortion inherent in telephone lines.

The SEG TEM Series of line equalizers uses new techniques for equalizing for both amplitude and delay in a single unit.

Extremely compact (a few cubic inches) the TEM Series is adjustable for any desired length of transmission line up to 25 miles.

Specify the transmission line characteristics and the nature and frequency spectrum of the transmitted signals or write for the TEM work sheet.

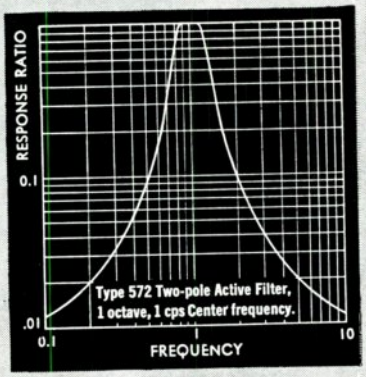
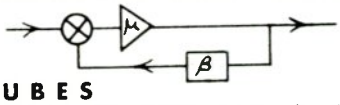
ULTRA-LOW-FREQUENCY BAND PASS

ACTIVE FILTERS



All filters and networks hermetically sealed with special encapsulations available.
Plug in or stud mounted
Individual problems promptly considered by our complete engineering facilities
Prompt delivery — Moderate prices

White
PLANT AT 5500 BALCONES TRAIL
WHITE
INSTRUMENT LABORATORIES
INCORPORATED
BOX 9006 AUSTIN 17, TEXAS



TUBES
Plug in amplifier feedback network pairs for use as filters or band-pass amplifiers. Widely used where LC filter sections are impractical. Available with tuned circuit or band-pass response with center frequency .02 to 500 cps.

TRANSISTORS
Integral transistor-network units with tuned circuit response from 1 cps to 5 kc with Q values to 20, requiring no external components.

Write for comprehensive literature on filter, amplifier, and network performance and application

- **Active Filters** (above), bulletins 212, 252, 272.
- **Twin-T Networks** for harmonic rejection, low-pass filtering, feedback circuits. Null frequencies .02 cps to 50 kc, wide range of impedance levels. Bulletin 500.
- **Toroidal Wave Filters**, LC filters with stable toroidal inductors. Low, high, band-pass models available over wide impedance and frequency ranges. Ask for LC Bulletins.
- **Network Notes** contain articles on use, performance, and problems of networks and filters.

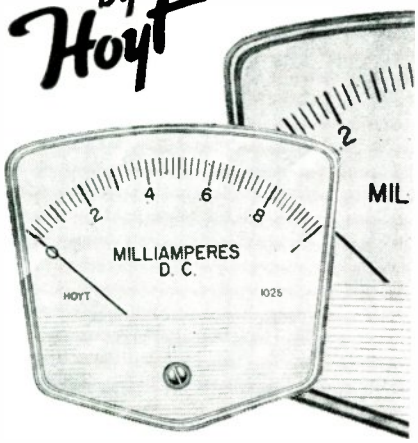
METERS

You can SEE and READ

by Hoyt



New Series 1025-1026 Interchangeable with Round Bakelite Case Types

Brilliantly new in their high visibility polystyrene cases are these modern type Meters by HOYT which give a true reading at a glance! Here longer scale length and the elimination of shadows plus clean design add up to a topnotch combination to incorporate in any panel.

The famous HOYT high torque movement with precise and rugged craftsmanship gives you what you've been looking for in Meters. These models are directly interchangeable with all round Bakelite meters, and are available in all AC and DC ranges as Ammeters, Milliammeters, Microammeters, Voltmeters and Millivoltmeters. Similar styles #1037 3½" and #1060 6" meters are also available for any modern panel meter application.

The HOYT square plastic case series (#649 and #653 shown) is available in 2½", 3½" and 4½" types. Just right for use where equipment needs to be revised to meet modern design requirements. These instruments are interchangeable with square Bakelite meters and can be supplied with a frosted or colored band on the case front in any AC and DC range. Extra long scales in shadow free cases give you the most value and quality for your money.

Write us for the NEW HOYT PANEL METER Brochure showing a complete line of plastic and Bakelite models.

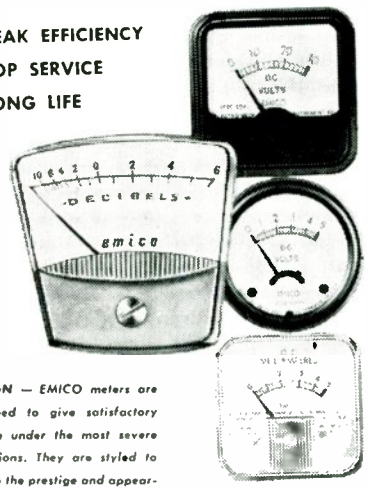
Eagle Signal Co., Div. of Gamewell Co., Ill., 65sc, 70sc
Ealing Corp., Mass., 10s, 20s, 25s, 35s, 40s, 80s

emico
PRECISION-PLUS METERS
• PEAK EFFICIENCY
• TOP SERVICE
• LONG LIFE



DESIGN — EMICO meters are designed to give satisfactory service under the most severe conditions. They are styled to add to the prestige and appearance of electrical equipment.
Write or call for full details and prices.
ELECTRO-MECHANICAL INSTRUMENT COMPANY
PERKASIE, PENNA.
For details, circle #380 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.
