SCOPE

The *Russian Chemistry Journal* – the Journal of the Mendeleev Russian Chemical Society publishes critical review articles in contemporary chemistry and chemical engineering. Each issue is devoted to any specific topical scientific or engineering problem, a field of science, or a class of chemical substances and materials. It makes possible to view the problem from many angles. Frequently articles on the same issue are written by scientists who have radically different opinions. Thus, each issue is like a monograph devoted to a certain problem and consisting of collected works.

The journal was founded in 1869.
