Dialkyl Peroxides Decomposition in the Presence
of Quaternary Ammonium Halides

N. V. Maksyuta, V. Ya. Suprun, I. A. Opeida, and N. A. Turovskii **p. 814** [abstract](#)

Decomposition of dicumyl peroxide and cumyl *tert*-butyl peroxide was studied in the presence of tetraethylammonium halides in acetonitrile, dimethylformamide, 2-propanol, and acetic acid. The tetraethylammonium halides accelerate the decomposition of dialkyl peroxides in 2-propanol and acetic acid, but do not affect the reaction velocity in dimethylformamide and acetonitrile. The decomposition products character depends on the solvent nature.

Anisole Alkylation with *N*-Arenesulfonylimines
of Dichloro(phenyl)acetaldehyde and Derivatives Thereof
