Editorial

With this issue of *Separation Science and Technology* we launch a special section on solvent extraction. This section will serve as a focal point for research results in this central area of separations. In order to coordinate and catalyze the development of this section, an auxiliary editorial team has been brought together. This team consists of two prominent researchers who have agreed to serve as *solvent extraction editors*: Dr. James D. Navratil, International Atomic Energy Agency, Wagramerstrasse 5, P. O. Box 100, A-1400 Vienna, Austria and Dr. E. Philip Horwitz, Chemistry Division, Argonne National Laboratory, Argonne, Illinois 60439.

We solicit high quality manuscripts in the solvent extraction area. Authors should submit manuscripts to the nearest solvent Extraction Editor for processing. We look forward to the participation of the solvent extraction community in making this section reflect the broad scope and exciting work going on worldwide in solvent extraction.
