### **INTRODUCTORY REMARKS**

The Second Symposium on Separation Science and Technology for Energy Applications was held in Gatlinburg, Tennessee, May 5-8, 1981. It is one of a series of such symposia, held biannually, to bring together practitioners of this diverse discipline in order to exchange knowledge both within and among their specialties on topics related to energy production, utilization, and conservation.

Papers delivered at the symposium are presented in this and the following issue of the Journal. Some of the papers do not appear in these issues, however, due to the unavailability of the manuscripts or because of editorial considerations.

The symposium was organized and conducted under the sponsorship of the U.S. Department of Energy and Oak Ridge National Laboratory by the following:

#### **Organizing Committee**

A. P. Malinauskas, General Chairman, Oak Ridge National Laboratory

W. J. Haubach, Technical Co-Chairman, U.S. Department of Energy

S. D. Clinton, Technical Co-Chairman, Oak Ridge National Laboratory

E. P. Horwitz, Argonne National Laboratory

W. R. Wilkes, Mound Laboratory

#### **Session Chairmen and Co-Chairmen**

*Computer Modeling of Separation Processes*

W. Tedder, Georgia Institute of Technology

M. F. Doherty, University of Massachusetts

*Recovery of Valuable Materials from Dilute Sources*

C. F. Coleman, Oak Ridge National Laboratory

W. A. McKinney, U.S. Department of the Interior, Bureau  
of Mines

*Liquid-Liquid Extraction*

W. W. Schulz, Rockwell International

J. D. Navratil, International Atomic Energy Agency

*Uses of Surfactants in Separation Processes*

E. P. Horwitz, Argonne National Laboratory

A. S. Kertes, Hebrew University

*Separation Methods in Fossil Fuel Utilization*

L. J. Petrovic, Resource Engineering, Incorporated

B. R. Rodgers, Oak Ridge National Laboratory

We are particularly pleased to acknowledge the editorial assistance provided by Vivian Jacobs, symposium arrangements which were capably handled by H. B. Graham, Norma Callaham, and Barbara Malinauskas, and the secretarial support of Beverly Varnadore, both in the conduct of the symposium and in the preparation of these issues of the Journal.

The dates and location of the third symposium in this series, to be held in 1983, are presently undetermined.

A. P. MALINAUSKAS
