EDITORIAL

We are pleased to begin publication in this issue of the proceedings of the American Chemical Society Symposium on Gel Permeation Chromatography. This Symposium constituted part of the 159th ACS National Meeting in Houston, February 22-27, 1970, and was sponsored jointly by the Divisions of Analytical Chemistry, Petroleum Chemistry, and Cellulose, Wood and Fiber Chemistry. The organizers, who introduce the Symposium on page 257, assembled an outstanding collection of authors with unusually wide interests. Their summed contributions mark an important advance in the field of GPC and, more broadly, in the entire field of macromolecular separations.
