ENVIRONMENTAL LETTERS

edited by

JAMES W. ROBINSON

*Department of Chemistry
Louisiana State University, Baton Rouge*

Published: quarterly

This is a new journal dedicated to the understanding of man's total environment and particularly to that section of society working toward this goal.

All papers concerned with experimental research and research philosophy pertinent to the unravelling of the machinery of the environment and the effects of natural or man-made perturbations on this machinery will be considered for publication. The journal will be concerned with all varieties of pollution such as air pollution, water pollution, solid waste, thermal pollution and noise pollution and their effects on the life forms found on earth. We hope to help reveal the medical and psychological impact of such perturbations on man.

INCLUDED AMONG THE EDITORIAL BOARD MEMBERS

Dr. Mario C. Battigelli, M.D.
*The University of North Carolina
Chapel Hill*

Dr. George Bugliarello
*University of Illinois at
Chicago Circle*

Dr. J. C. Burridge
*The Macaulay Institute for
Soil Research
Craigiebuckler, Aberdeen*

Dr. Harold E. Calbert, Chairman
*University of Wisconsin
Madison*

Dr. Morton Corn
University of Pittsburgh

Dr. Hans L. Falk
*National Institute of
Environmental Health Sciences
North Carolina*

Dr. Robert Frank, M.D.
University of Washington, Seattle

Dr. G. M. Hidy
*Science Center
Thousand Oaks, California*

Dr. Jay S. Jacobson
*Boyce Thompson Institute for
Plant Research, Inc.
Yonkers, New York*

Dr. Mitchell Litt
*University of Pennsylvania
Philadelphia*

Dr. Harry P. Kramer, Director
National Air Pollution Control Adm.

Dr. Vaughn A. Newill, M.D.
*Director: Division of Health
Effects Research
National Air Pollution Control Adm.*

Dr. J. N. Pitts, Jr.
*University of California
Riverside*

Dr. Philip W. West
*Louisiana State University
Baton Rouge*

Dr. Joseph T. Zung
*University of Missouri
Rolla*

Dr. Robert White-Stevens
Rutgers University

Analytical Letters
an international journal for rapid communication

Analytical Letters is an international medium for the rapid publication of short communications on important developments in the entire area of analytical chemistry and analytical biochemistry: electrochemistry, thermochemistry, separations, kinetics, nuclear analysis, organic and inorganic analysis, titrimetry, microchemistry, instrumentation, electronics, statistics, applied spectrometry, and all phases of analytical biochemistry and biomedical analysis.

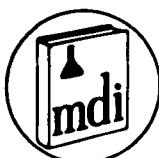

Communications are short and to the point and deal with original experimental and theoretical research. Letter debates between authors on interpretation of research data or on controversial subjects in analytical chemistry are encouraged, and these letters make a specific contribution to the clarification of a problem.

The Editorial Board of *Analytical Letters* consists of analytical chemists and biochemists from all parts of the world, who collectively cover a wide range of research specialties. Communications are published in English, French or German.

The Editorial Board

A. J. Bard, University of Texas. F. E. Beamish, University of Toronto. R. Belcher, University of Birmingham. E. W. Berg, Louisiana State University. A. I. Busev, Lomonosov University, Moscow. R. Chen, National Institutes of Health. John A. Dean, University of Tennessee. C. Duval, Lab. Rech. Micro-Anal., Paris. G. Duyckaerts, University de Liège, Belgium. H. Flaschka, Georgia Institute of Technology. O. Hayaishi, Kyoto University, Japan. E. C. Horning, Baylor University College of Medicine. S. Jacobs, Medical Research Council, London. J. Jordan, Pennsylvania State University. R. A. Keller, State University of New York, College at Fredonia. M. Lederer, University of Rome. T. S. Ma, City University of New York. E. Pungor, University of Chemical Industries, Hungary. G. Rechnitz, State University of New York, Buffalo. E. Sawicki, National Center for Air Pollution Control, Cincinnati. W. Simon, Eidg. Technische Hochschule, Zurich. E. Stahl, Universität des Saarlandes, Germany. N. Tanaka, Tohoku University, Japan. E. Wänninen, Abo Academi, Finland. J. C. White, Oak Ridge National Laboratories. Cecil Wilson, Queens University, Belfast. P. Zuman, Heyrovský Institute, Prague. J. Zýka, Charles University, Prague.
