This article may be used for research, teaching and private study purposes. Any substantial or systematic reproduction, re-distribution, re-selling, loan or sub-licensing, systematic supply or distribution in any form to anyone is expressly forbidden.

The publisher does not give any warranty express or implied or make any representation that the contents will be complete or accurate or up to date. The accuracy of any instructions, formulae and drug doses should be independently verified with primary sources. The publisher shall not be liable for any loss, actions, claims, proceedings, demand or costs or damages whatsoever or howsoever caused arising directly or indirectly in connection with or arising out of the use of this material.

## EDITOR'S NOTE

Dr. J. Calvin Giddings, Distinguished Professor of Chemistry at the University of Utah, died October 24, 1996, at the age of 66 after a prolonged battle with cancer. Professor Giddings was an extraordinary individual whose knowledge and interests covered the entire spectrum of Separations. He founded the journal *Separation Science and Technology* and served as its Executive Editor for the past 30 years. I have asked his son Professor Steven Giddings to provide the readers of *Separation Science and Technology* with a memorial of his father. On behalf of the Associate Editors and the Editorial Board, we extend our deepest sympathies to Professor Giddings' family.

Steven M. Cramer  
Executive Editor
