

Instructions for Authors

General

Papers submitted for publication should be new publications. The submission of a paper is held to imply that it has not previously been published in any language, that it is not under consideration for publication elsewhere, and that if accepted for publication it will not be published elsewhere without the written approval of the Editors-in-Chief and consent of the Publisher.

Submission of Manuscripts by post

Authors are requested to include a note of their fax number and E-mail address when submitting their manuscript. Manuscripts should be submitted in triplicate and should be presented in double-spaced typescript.

Contributions from North and South America, India, China, Japan, Australia and countries in that half of the world should be sent to
Professor Gary D. Christian, Department of Chemistry, University of Washington, Box 351700, Seattle, WA 98195-1700, USA,
Fax number: (+1) 206 685 3478; e-mail: christia@chem.washington.edu

Contributions from Europe, the Middle East and Africa should be sent to

Professor Jean-Michel Kauffmann, Université Libre de Bruxelles, Institut de Pharmacie, Campus de la Plaine, C.P. 205/6,
Boulevard du Triomphe, B-1050 Bruxelles, BELGIUM, Fax number: +32 2 650 5225; e-mail: jmkauf@resulb.ulb.ac.be

Articles on Disk

Authors are encouraged to submit *final and accepted* manuscripts on disk (3.5" diskette, CD or Zipdisk). Two copies of the printout should always be included. Disks must be clearly marked with at least the following: Operating system, disk format (DS/DD), software package used, Authors' names, short title of the paper. The text and graphics should be saved on separate disks. It is essential that the electronic and hardcopy versions are identical. The hardcopy will be used as the definitive version of the article.

Refereeing of Papers

All papers submitted are refereed by experts who advise the Editors-in-Chief on the matter of acceptance in accordance with the high standards required and on the understanding that the subject matter has not been previously published and that the authors accept full responsibility for the factual accuracy of the data presented and have obtained any necessary authority to publish.

Referees will be encouraged to present critical and unbiased reports which are designed to assist the author in presenting material in the clearest and most unequivocal way possible. At the discretion of the Editors-in-Chief, the names of referees may be disclosed if thereby agreement between author and referee is likely to result. Authors should appreciate that the comments of referees are presented in a constructive spirit, and that agreement between the views of author and referee must result in a higher standard of publication.

Preliminary communications will be refereed urgently and will be accorded priority in publication. *Letters to the editors* will not be refereed, but will be published at the discretion of the Editors-in-Chief. If accepted, they will also be given priority. All papers accepted are subject to editorial amendments if necessary.

Presentation of Manuscripts

Papers must be written in English. Because of the particular importance for analytical methods to be correctly reproducible great care should be taken to ensure that the style and quality of language is clear and unambiguous. Authors for whom English is a foreign language are recommended to have the paper thoroughly checked and corrected before submission. After the title of the paper and the authors' names the following should be given: (i) the establishment where the work was done, (ii) a summary of the essential contents of the paper, (iii) an indication of the principal author for correspondence. Where possible, papers should follow the pattern: Introduction, Experimental, Results and Discussion, References, or such of these sections as apply.

The presentation of tables, graphs and formulae should be kept to an absolute minimum and where possible the results from a series of investigations should be in table form or as a graph. The same data should not be presented in both tables and figures or given in the Discussion as well as the Experimental section.

Tables and Figures

Tables should be so constructed as to be intelligible without reference to the text, every table and column being provided with a heading. Units of measure must always be clearly indicated. Unless it is essential to the argument, tables should not list the results of individual experiments, but should summarize results by an accepted method of expression (e.g. standard deviation). The same information should not be produced in both tables and figures. Footnotes to tables should be indicated by superscript letters. Figures should be provided as carefully prepared line drawings about twice the final size on plain white drawing paper, suitable for direct photographic reproduction. The original line drawings should be supplied with one of the copies of the manuscript. Each figure should be clearly

marked on the back with the names of the authors and the figure number. Figure captions should be typed on a separate sheet. Straight-line calibration graphs are not generally permitted; the necessary information can be included in the text (e.g. in the form of an equation). The preferred positions for all figures and tables should be indicated in the manuscript by the authors.

Nomenclature

All nomenclature should conform as closely as possible to the rules established by IUPAC.

References

In the text refer to the subject or to the author's name (without initial), followed by the reference number in square brackets; the full references should be given in a list at the end of the paper in the following form:

- [1] J.B. Austin and R.H.H. Pierce, *J. Chem. Soc.*, 57 (1955) 661.
- [2] S.T. Yoffe and A.N. Nesmeyanov, *Handbook of Magnesium-Organic Compounds*, 2nd edn., Vol. 3, Pergamon Press, Oxford, 1956, p. 214.
- [3] A.J. Howard, *Electron spin resonance spectroscopy*, in T.P. Salthouse (Ed.), *Structure Elucidation through Applied Spectroscopic Methods*, Reidel, Dordrecht, 1986, pp. 229–253.
- [4] A.B. Smith, *The Effect of Radiation on Strength of Metals*, A.E.R.E., M/R6327, 1962.
- [5] N. Feldstein, U.S. Patent 3,574,644, 1971.

Journal-name abbreviations should be those adopted by the Chemical Abstracts Service (Bibliographic Guide for Editors and Authors, The Americal Chemical Society, Washington, DC, 1974). If the correct abbreviation is not known, the title should be given in full.

Proofs & Reprints

Proofs, together with transfer of copyright and reprint order forms are despatched direct from the printers to the principal author (as indicated on the paper when submitted) for his or her approval and correction. After careful checking and correction these proofs should be returned without delay to Elsevier Ireland Ltd., Elsevier House, Brookvale Plaza, East Park, Shannon, Co. Clare, Ireland, for inclusion in the next possible issue.

Authors are kindly requested when proof reading to correct only those errors introduced by the printer. Modification to the text at proof stage will necessarily cause a delay in publication and incurs additional costs which may have to be charged to the authors or their institutions. Elsevier will do everything possible to get your article corrected and published as quickly and accurately as possible. Therefore, it is important to ensure that all of your corrections are sent back to us in one communication.

The publisher reserves the right to publish the paper without waiting for corrected proofs to be returned by the author, if waiting would cause undue delay.

Copyright: Authors are requested to read the note on copyright published inside the covers of each issue. Publication of a paper may have to be delayed until a signed transfer of copyright agreement has been received. Authors are recommended to send the agreement at the same time as the proofs are returned.

“Reprints: the corresponding author of each paper will be provided with a PDF of the article in its published form. Authors wishing to order additional paid reprints should indicate the number of reprints required when returning proofs.”
