

CORRIGENDA

Laszlo Kollar, Toru Wada and Mark Lautens, Asymmetric hydroformylation of deltacyclane, *Tetrahedron: Asymmetry*, **1992**, 3, 1011-1014.

Page 3, paragraph 3, first sentence:

For the determination of the absolute configuration of the *exo*-formyl products, **5**, was transesterified with (+)-(1*S*,2*R*,5*S*)menthol.

B. Wirz and W. Walther, Enzymatic preparation of chiral 3-(hydroxymethyl)-piperidine derivatives, *Tetrahedron: Asymmetry*, **1992**, 3, 1049-1054.

In **Scheme 1** compounds **4** and **7** were incorrectly drawn. As indicated in the text, **4** is *racemic* and drawn with wavy (not wedged) bond. *S*-configured **7** is drawn wedged (not wedged hashed), as shown here.
