

Corrigendum

Corrigendum to “Synthesis and structural characterization of enantiopure (2*R*,5*R*)-(+)-2,5-dimethylthiolane”
[Tetrahedron: *Asymmetry* 9 (1998) 189–191][†]Stephan Otten, Roland Fröhlich[‡] and Günter Haufe**Organisch-Chemisches Institut, Westfälische Wilhelms-Universität, Corrensstraße 40, D-48149 Münster, Germany*

On page 191, reference 13, a value for the specific rotation of compound **4** was given erroneously. This value should read $[\alpha]_{\text{D}}^{20} -13.6$ ($c=1.0$, diethyl ether). On page A23 the third line of the stereochemical abstract should read $[\alpha]_{\text{D}}^{20} -13.6$ ($c=1.0$, diethyl ether).

We would like to thank Professor C. J. Rizzo, Vanderbilt University, Nashville, TN, for drawing our attention to this matter.
