We wish to communicate an unfortunate omission in the referencing and acknowledgement to prior art in our recent report [*Tetrahedron: Asymmetry* **2006**, 17, 3070–3074]. After the publication of our paper, we became aware of a previous paper by S. J. Garden, C. Tomasini et al. [*Tetrahedron* **2006**, 62, 12017–12034] reporting an enantioselective approach to (+)-convolutamydine A exploiting a different approach. The authors apologize for this oversight.
