

ERRATUM

A. S. SHAWALI and H. M. HASSANEEN, The Reaction of Carbanions of β -Diketones and β -Keto Esters with Hydrazidic Bromides. *Tetrahedron* **29**, 121 (1973).

The statement beginning "In spite of this wide application . . ." is not meant to claim the priority of pyrazole synthesis. R. Fusco and coworkers were first to report such a synthesis from other strictly related compounds, (*Gazz. Chim. Ital.* **67**, 3 (1937); **68**, 59 (1938); **69**, 344, 353, 364 (1939); **72**, 411 (1942)). The author thanks Dr. T. Stephen for calling this to his attention.
