

CORRIGENDUM

SAMUEL H. WILEN, LUCIANO DELGUZZO and RICHARD SAFERSTEIN, Experimental Evidence for AcO-7 Neighboring Group Participation. *Tetrahedron* **43**, 5089-5094 (1987).

It has come to our attention that experimental evidence for the intervention of a seven-membered acetoxonium ion in a reaction has been previously reported by P. Kočovský, F. Tureček and V. Černý, *Coll. Czech. Chem. Commun.* **47**, 117 (1982). We regret not citing this work. See also P. Kočovský and I. Stieborová, *J. Chem. Soc. Perkin Trans. I* 1969 (1987).
