

Cell Death

- | | | |
|--|---|-----|
| Diazoxide preconditioning alleviates caspase-dependent and caspase-independent apoptosis induced by anoxia-reoxygenation of PC12 cells | H. Zhang, D. Zhao, Z. Wang and D. Zheng | 413 |
|--|---|-----|

BIOTECHNOLOGY

Gene and Protein Engineering

- | | | |
|---|---|-----|
| Remarkable improvement in the heat stability of CutA1 from <i>Escherichia coli</i> by rational protein design | Y. Matsuura, M. Ota, T. Tanaka, M. Takehira, K. Ogasahara, B. Bagautdinov, N. Kunishima and K. Yutani | 449 |
|---|---|-----|

Immunological Engineering

- | | | |
|--|---|-----|
| Characterization of human single-chain antibodies against highly pathogenic avian influenza H5N1 viruses: mimotope and neutralizing activity | J. Yang, R. Yoshida, Y. Kariya, X. Zhang, S. Hashiguchi, T. Nakashima, Y. Suda, A. Takada, Y. Ito and K. Sugimura | 507 |
|--|---|-----|

CONTENTS Rearranged According to Subject Categories, Vol. 148, No. 4

JB REFLECTIONS AND PERSPECTIVES

- Kenji Soda—researching enzymes with the spirit of an alpinist T. Yoshimura, H. Mihara, T. Ohshima and K. Tanizawa 371

JB REVIEWS

- Featured article of the month.** Mechanisms of control of microRNA biogenesis B.N. Davis-Dusenbery and A. Hata 381
- Featured article of the month.** Diverse physiological functions of MKK4 and MKK7 during early embryogenesis Y. Asaoka and H. Nishina 393

BIOCHEMISTRY

Protein Structure

- Proteolytic fragmentation and sugar chains of plasma ADAMTS13 purified by a conformation-dependent monoclonal antibody H. Hiura, T. Matsui, M. Matsumoto, Y. Hori, A. Isonishi, S. Kato, T. Iwamoto, T. Mori and Y. Fujimura 403
- Crystal structures of glycylamide ribonucleotide synthetase, PurD, from thermophilic eubacteria G.-i. Sampei, S. Baba, M. Kanagawa, H. Yanai, T. Ishii, H. Kawai, Y. Fukai, A. Ebihara, N. Nakagawa and G. Kawai 429
- Channeling and conformational changes in the heterotetrameric sarcosine oxidase from *Corynebacterium* sp. U-96 T. Moriguchi, K. Ida, T. Hikima, G. Ueno, M. Yamamoto and H. Suzuki 491
- Solution structure of the HRDC domain of human Bloom syndrome protein BLM A. Sato, M. Mishima, A. Nagai, S.-Y. Kim, Y. Ito, T. Hakoshima, J.-G. Jee and K. Kitano 517

Enzymology

- A novel lacase with urate oxidation activity from *Lysobacter* sp. T-15 H. Tamaki, T. Matsuoka, Y. Yasuda, S. Hanada, Y. Kamagata, K. Nakamura and S.-i. Sakasegawa 481

Enzyme Inhibitors

- Mechanisms and specificity of factor XIa and trypsin inhibition by protease nexin 2 and basic pancreatic trypsin inhibitor D. Navaneetham, D. Sinha and P.N. Walsh 467

Biochemistry of Proteolysis

- Mechanism of egg envelope digestion by hatching enzymes, HCE and LCE in medaka, *Oryzias latipes* S. Yasumasu, M. Kawaguchi, S. Ouchi, K. Sano, K. Murata, H. Sugiyama, T. Akema and I. Iuchi 439

MOLECULAR BIOLOGY

Genetic Diseases

- Earlier onset of motor deficits in mice with double mutations in *Dyt1* and *Sgce* F. Yokoi, G. Yang, J. Li, M.P. DeAndrade, T. Zhou and Y. Li 459

CELL

Receptors and Signal Transduction

- Identification of a phosphorylation site in c-Ski as serine 515 M. Nagata, S. Nagata, K. Yuki, K. Isogaya, M. Saitoh, K. Miyazono and K. Miyazawa 423
