

The Journal of Nutritional Biochemistry (JNB) is an international journal devoted to advancements in nutrition science. Its major focus is on investigations about nutrients that overlap with the areas of biochemistry molecular biology, neurochemistry, toxicology, and pharmacology. For details concerning the preparation of manuscripts see Information for Authors, which is published in each issue of the journal.

The Journal of Nutritional Biochemistry is published monthly by Elsevier Inc., 360 Park Avenue South, New York, NY 10010-1710.

Subscription Rates (2005): Institutional price: US\$916.00; Personal price: US\$244.00; Prices include postage and are subject to change without notice. Claims for missing issues can be honored only up to three months for domestic addresses, six months for foreign addresses. Duplicate copies will not be sent to replace one undelivered through failure to notify Elsevier of change of address. Single copy and back volume information available upon request. Periodicals postage paid at New York, NY and at additional offices.

POSTMASTER: Send address changes to The Journal of Nutritional Biochemistry, Journals Customer Service, 6277 Sea Harbor Drive, Orlando, FL 32887-4800 USA.

(For Post Office use only: Volume 16 issue 7 of 12.)

Customer service (orders, claims, online, change of address): Elsevier Periodicals Customer Service, 6277 Sea Harbor Drive, Orlando, FL 32887-4800. Tel: (800) 654-2452 (U.S. and Canada); (407) 345-4000 (outside U.S. and Canada). Fax: (800) 225-4030 (U.S. and Canada); (407) 363-9661 (outside U.S. and Canada). E-mail: elscps@elsevier.com.

Reprints: For copies of 100 or more of articles in this publication, please contact the Commercial Reprints Department, Elsevier Inc., 360 Park Avenue South, New York, NY 10010-1710. Tel: (212) 633-3813 Fax: (212) 633-3820 e-mail: reprints@elsevier.com.

This journal and the individual contributions contained in it are protected under copyright by Elsevier Inc. and the following terms and conditions apply to their use:

Photocopying: Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Health Science Rights Department, Elsevier Inc., 170 S. Independence Mall W 300 E, Philadelphia, PA 19106-3399, USA; Tel: (+1) 215-238-7869; Fax: (+1) 215-238-2239; e-mail: healthpermissions@elsevier.com. You may also contact Rights & Permissions directly through Elsevier's home page (<http://www.elsevier.nl>), selecting first 'Customer Support', then 'General Information', then 'Permissions Query Form'.

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; Tel: (978) 750 8400, Fax: (978) 750-4744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; Tel: (+44) 171 436 5931; Fax: (+44) 171 436 3986. Other countries may have a local reprographic rights agency for payments.

Derivative Works: Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage: Permission of the publisher is required to store or use electronically any material contained in this journal, including any article or part of an article. Contact the publisher at the address indicated.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Address permissions requests to: Elsevier Inc. Rights & Permissions Department, at the mail, fax and e-mail addresses noted above.

Notice: No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

The Journal of Nutritional Biochemistry

Volume 16, Number 7, July 2005

CONTENTS

REVIEWS: CURRENT TOPICS

- 385** β -Carotene breakdown products may impair mitochondrial functions—potential side effects of high-dose β -carotene supplementation
Werner Siems, Ingrid Wiswedel, Costantino Salerno, Carlo Crifò, Wolfgang Augustin, Lorenz Schild, Claus-Dieter Langhans, Olaf Sommerburg

RESEARCH ARTICLES

- 398** Improved absorption of caseinophosphopeptide-bound iron: role of alkaline phosphatase
Bertille Ani-Kibangou, Said Bouhallab, Daniel Mollé, Gwénaële Henry, François Bureau, Dominique Neuville, Pierre Arhan, Dominique Bouglé
- 402** Promotion of adenoma growth by dietary inulin is associated with increase in cyclin D1 and decrease in adhesion proteins in Min/+ mice mucosa
Marjo Misikangas, Anne-Maria Pajari, Essi Päiväranta, Marja Mutanen
- 410** Prologue to the international symposium "vitamins as regulators of gene expression: biotin as a model"
Antonio Velázquez-Arellano, Alfonso León-del-Río
- 411** The *Escherichia coli* biotin regulatory system: a transcriptional switch
Dorothy Beckett
- 416** Targeted and proximity-dependent promiscuous protein biotinylation by a mutant *Escherichia coli* biotin protein ligase
John E. Cronan
- 419** Biotin—a regulator of gene expression
Krishnamurti Dakshinamurti
- 424** Pharmacological effects of biotin
Cristina Fernandez-Mejia
- 428** Molecular genetics of biotin metabolism: old vitamin, new science
Roy A. Gravel, Monica A. Narang
- 432** Biotin-dependent regulation of gene expression in human cells
Alfonso León-Del-Río
- 435** Marginal biotin deficiency is teratogenic in mice and perhaps humans: a review of biotin deficiency during human pregnancy and effects of biotin deficiency on gene expression and enzyme activities in mouse dam and fetus
Donald M. Mock
- 438** Effects of biotin on growth and protein biotinylation in *Saccharomyces cerevisiae*
Victoriano Pérez-Vázquez, Salvador Uribe, Antonio Velázquez-Arellano
- 441** Biotinidase: its role in biotinidase deficiency and biotin metabolism
Barry Wolf
- 446** Biological functions of biotinylated histones
Nagarama Kothapalli, Gabriela Camporeale, Alice Kueh, Yap C. Chew, Anna M. Oommen, Jacob B. Griffin, Janos Zemleni
